ATTEN: J.W. Harbison

Gentlemen:

Received your memorandum on the Eunice King, #13-A, 28-21-37,
November 20, 1990.

You have permission to go ahead and move in on this well
and begin your workover to correct the leak.

At the time you have finished your workover, please let us
know, so that we may witness the test.

If you have any questions, please call the Oil Conservation
Division, Hobb NM (505) 393-6161.

Yours very truly,

OIL CONSERVATION DIVISION

Subject: PHT Christmas C 7-H 18-22-37

Our File:

Eunice King 13-A 28-21-37

Your File:

One of our Res. Engineers advised me that due to downhole configuration on Christmas C 7-H, we could not test for packer leakage. Evidently this well has been tested yearly erroneously. I picked it up 7 years ago from the well tester at that time and continued testing. I've enclosed a schematic to illustrate.

Eunice King 13-A is awaiting workover, as we suspect communication. With your permission we can test it following workover.

Thank you

JW Harbison

ENC.
