

OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

Miscellaneous Reports on Wells

RECEIVED OCT 13 1950 OIL CONSERVATION COMMISSION HOBBS-OFFICE

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports of beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

Table with 2 columns of report types: REPORT ON BEGINNING DRILLING OPERATIONS, REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL, REPORT ON RESULT OF TEST OF CASING SHUT-OFF, REPORT ON RESULT OF PLUGGING OF WELL, REPORT ON REPAIRING WELL, REPORT ON PULLING OR OTHERWISE ALTERING CASING, REPORT ON DEEPENING WELL, Report on Results of Perforating and Acidizing (checked).

Title

REPRODUCTION OF THE BROWN PELICAN

BY J. H. HERRING

U. S. DEPARTMENT OF AGRICULTURE, BUREAU OF BIRD PROTECTION

The Brown Pelican is one of the most interesting and beautiful of our seabirds. It is found in the southern part of the United States, and its range extends to the West Indies and northern South America. It is a large, powerful bird, and is well adapted to its life in the water. It is a very social bird, and is often seen in large flocks. It is a very intelligent bird, and is able to learn to open the caps of its own eggshells. It is a very hardy bird, and is able to survive in the most inhospitable of environments.

The Brown Pelican is a very interesting bird to study. It is a very social bird, and is often seen in large flocks. It is a very intelligent bird, and is able to learn to open the caps of its own eggshells. It is a very hardy bird, and is able to survive in the most inhospitable of environments. It is a very beautiful bird, and is one of the most interesting of our seabirds.
