Charm Oil Co.
Box 1006
Eunice, New Mexico

Gentlemen:

Since your Wilson State Wells Nos. 3 and 4 located in Section 11, T-21-S, R-35-E, are producing with a ratio in excess of 100,000 to 1, they are being reclassified as gas wells in the Eumont Gas Pool effective May 1, 1972.

These wells are to be shut in on May 1, and will remain shut in until you have complied with the provisions of Commission Order No. R-1670 pertaining to the Eumont Gas Pool.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey
Supervisor, District 1

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves carrying out the actions that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves assessing the effectiveness of the actions that have been taken and determining whether the problem has been resolved.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The next step is the formulation of the hypothesis. This is done by the investigator who is responsible for the study. The third step is the design of the study. This is done by the investigator who is responsible for the study. The fourth step is the collection of data. This is done by the investigator who is responsible for the study. The fifth step is the analysis of the data. This is done by the investigator who is responsible for the study. The sixth step is the interpretation of the results. This is done by the investigator who is responsible for the study. The seventh step is the conclusion. This is done by the investigator who is responsible for the study. The eighth step is the reporting of the results. This is done by the investigator who is responsible for the study. The ninth step is the evaluation of the study. This is done by the investigator who is responsible for the study. The tenth step is the dissemination of the results. This is done by the investigator who is responsible for the study.
