Re: Dual Completion
J. H. Moore, Pech-State #2
NW SW Sec. 32-215-36E
Lea County, New Mexico
Jalmat Pool

Attention: Mr. A. L. Porter, Jr.
Secretary-Director

Gentlemen:

The writer respectfully requests that I be granted a permit to dual complete the Pech-State #2 as a gas well from the Yates zone and as an oil well from the Seven Rivers sand zone in the Jalmat pool. In support of this application the following information is submitted:

1. The Pech-State #2 well is located 1,980' from the west line and 1,880' from the south line of Section 32, Twp. 21S, Rge. 36E, Lea County, New Mexico.
2. Said well is to be drilled to a depth of approximately 3,910', at which depth both the Yates gas sand and Seven Rivers oil sand will be penetrated. Five and one-half inch casing is to be cemented at total depth.
3. The Seven Rivers sand zone will be perforated from approximately 3,780' to 3,880'. This interval will be produced as an oil well through the tubing.
4. A production packer will be set at approximately 3,600' so as to separate the producing zones.
