

ATTACHMENT V

CHRONOLOGY OF DUAL COMPLETION INSTRUMENTS
SOUTHLAND ROYALTY COMPANY "A" NO. 2

- I. Application To Effect Dual Completion: Letter From Mr. Ralph L. Hendrickson, Field Superintendent, to the New Mexico Oil Conservation Commission dated January 6, 1954, File: KJB-4-401.
- II. Permission To Effect Dual Completion: Order No. DC-59, dated January 22, 1954.
- III. Notice Of Intention To Effect Dual Completion: Form C-102 submitted January 9, 1954, and approved February 15, 1954.
- IV. Report On Dual Completion Operation: Form C-103 submitted March 4, 1954, and approved March 15, 1954.
- V. Request For Gas Allowable: Form C-104 submitted March 4, 1954, and approved March 15, 1954.
- VI. Certificate Of Compliance And Authorization To Transport Natural Gas: Form C-110 submitted March 3, 1954, and approved March 15, 1954.
- VII. Certificate Of Compliance And Authorization To Transport Condensate: Form C-110 submitted March 16, 1954, and approved March 18, 1954.
- VIII. Assignment Of Allowable: Commission letter dated March 15, 1954, assigning the subject well a normal 160-acre gas proration unit.
- IX. Report Of Information Required By Order No. DC-59: Diagrammatic sketch of mechanical installation and special report of segregation tests submitted by letter dated May 25, 1954, File: KJB-213-401, from Mr. Ralph L. Hendrickson, Field Superintendent, to the New Mexico Oil Conservation Commission.
- X. Deliverability Test Report: Form C-122-C submitted results of test completed 7-12-54
- XI. Gas-Distillate Ratio Report: Form C-116 for month of August, 1954, submitted results of test completed July 14, 1954.

1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the system.

The system is designed to provide a comprehensive overview of the system's performance, including the system's architecture, the system's components, and the system's performance metrics.

The system is designed to provide a comprehensive overview of the system's performance, including the system's architecture, the system's components, and the system's performance metrics.

The system is designed to provide a comprehensive overview of the system's performance, including the system's architecture, the system's components, and the system's performance metrics.
