# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

THE first question which presents itself to the mind, is, what was the cause of the origin of the earth? and the answer is, that it was the result of the action of the laws of nature, which have been in operation from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time. It is not a sudden creation, but a gradual development, which has been the result of the action of the laws of nature, which have been in operation from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.

The earth, as we now see it, is the result of a long and gradual process, which has been going on from the beginning of time.
