DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately \$150° with rotary tools. All easing points will be commented in accordance with approved methods of the U.S. Geological Survey and any other requirements will be complied with.

It is planned to use the following casing pattern: 10 3/4" casing to be set at approximately 250' and comented with 250 sacks, coment to be circulated; 7 5/8" easing to be set at approximately 3050' and comented with 1100 sacks, or sufficient coment to protect the salt section as determined by survey; 5 1/2" casing to be set at total depth and comented with approximately 770 sacks coment as determined by survey, and to be perforated opposite the pay some.

Permission to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
