Re: Application to dually complete Samedan Oil Corporation's Parks "A" No. 6, Drinkard Pool, Lea County, New Mexico.

Gentlemen:

By this letter of application, Samedan Oil Corporation wishes to state the following:

- (a) That Samedan Oil Corporation's Parks "A" No. 6, located in the NW/4 SW/4 of Section 14-22S-37E, Lea County, was completed August 10, 1949, at a total depth of 6455 feet. The attached Exhibit "A" shows the location of this well on Samedan Oil Corporation's Parks lease, and the location of all offset wells.
- (b) That subject well has 7" casing set at 6436 feet and was cemented with 500 sacks of cement. Top of cement by temperature survey was found at 2880 feet.
- (c) That subject well was plugged back August 23, 1950 to a depth of 6420 feet and presently produces gas only from the perforated interval 6340 to 6400 feet in the Vivian Zone of the Drinkard Pool.
- (d) That the applicant proposes to dually complete the well in the following manner, which is shown schematically in the attached Exhibit "B".
 - 1. Set a cast-iron bridge plug at 6200 feet and dump 2 sacks of cement on top, thus abandoning the Drinkard horizon.
 - 2. Perforate the 7" casing within the intervals 5978 to 6050 feet and 6078 to 6146 feet in the Tubbs Gas Pool, and from 5386 to 5540 feet in the Blinbry Gas Pool.
