

NEW MEXICO OIL CONSERVATION COMMISSION  
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in TRIPLICATE to the District Office, Oil Conservation Commission, within 10 days after the work specified is completed. It should be signed and filed as a report on Beginning Drilling Operations, Results of test of casing shut-off, result of plugging of well, result of well repair, and other important operations, even though the work was witnessed by an agent of the Commission. See additional instructions in the Rules and Regulations of the Commission.

Following is a report on the work done and the results obtained under the heading noted above at the

R. Olsen Oil Company  
(Company or Operator)

Boyd  
(Lease)

Company Tools  
(Contractor)

Well No. 5 in the NW 1/4 NE 1/4 of Sec. 23

T. 22S, R. 37E, NMPM, Tubb Pool, Lea County

The Dates of this work were as follows: 11-5-54 to 11-8-54

Notice of intention to do the work (was) ~~(was not)~~ submitted on Form C-102 on October 26, 1954  
(Cross out incorrect words)

and approval of the proposed plan (was) ~~(was not)~~ obtained.

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Two Baker bridge plugs were set in the 5 1/2" casing to seal off the open hole Drinkard zone from 6377' to 6448'. One plug was set at 6295' and the other at ~~6295'~~ 6292'. Approximately 10' of hydramite was placed on top of the plug at 6292' to insure positive seal off of the Drinkard zone. The Drinkard oil zone was abandoned due to its low production. The Tubb gas zone was then perforated from 5990' to 6070' and 6085' to 6130' for a single completion in the Tubb gas zone. This well was approved for dual by O. C. C. Order No. DC-159 but due to failure in getting the Drinkard zone to hold mud heavy enough to bring in the Tubb zone, two bridge plugs were set in the casing to seal off the economically marginal Drinkard pay.

*This well is now completed as a Tubb gas well as a single completion.*
