The elevation of the derrick floor above sea level is 3407 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total Depth, 7368' - Line. 7" casing cemented at 6881' with 600 sacks.

On our "Subsequent Reports of Acidizing" this well, filed with your office under dates of 7-24-45 and 8-6-45 it was indicated that formation below casing had been treated with a total of 26,000 gallons of acid in three stages

7" casing has now been perforated from 6745-6785' and we desire permission to acidize this section in an attempt to obtain commercial production

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
