Re: Flour #1-M, Sec 35, T22S, R37E

Gentlemen:

The Oil Conservation Division recently witnessed a bradenhead test on the above well.

It is noted that the well has not been produced for an extended period of time.

The information obtained from the bradenhead test indicates that the well has a casing leak.

The following options are available:

- 1> Make any repairs necessary, temporarily abandon and pressure test.
- 2> Make the necessary repairs and reactivate the well.
- 3> Submit your proposal for plugging and abandonment.

We are enclosing a copy of the test sheet for your information.

We request 24 hours notice prior to the procedure which you select from the above options.

Very truly yours

OIL CONSERVATION DIVISION
