Santa Fe, New Mexico

Attention: Mr. W. B. Macey

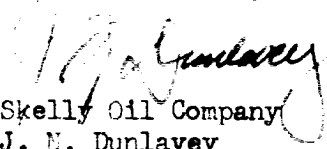

Gentlemen:

Reference is made to Administrative Order NFO-218 in which permission was granted to flare low pressure casinghead gas from Skelly Oil Company's Hobbs "A" Wells Nos. 1 and 2.

We have recently completed our Hobbs "A" Well No. 3 in the SW/4 NW/4 Section 30, T25S, R38E. This well was completed October 24, 1955 and is presently flaring 56.8 MCF per day with a producing gas-oil ratio of 1420 cubic feet per barrel.

Since this well is producing into the same battery as the other two wells on the lease, it is requested that Order NFO-218 be amended to include the Hobbs "A" Well No. 3.

Yours very truly,

Skelly Oil Company
J. N. Dunlavy
