(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

J. T. Lynn B-26 No. 3 (Gas Well) Hobbs, New Mexico March 10, 1949

Well No. 3 is located 990 ft. from N line and 1650 ft. from W line of sec. 26

NW/4 Section <u>26</u>	23-S	36-E	NMPM
(1/4 Sec. and Sec. No.)	(Twp.)	(Range)	(Meridian)
Langlie Matrix	Lea	New Mexico	
(Field)	(County or Subdivision)	(State or Territory)	

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a depth of approximately 3600' unless commercial gas production is encountered at a lesser depth. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

The following casing pattern will be used: 7 5/8" casing will be set at approximately 1300' and cemented with 450 sacks. 5 1/2" casing will be set at approximately 3000' or on top of the main pay and cemented with 600 sacks.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
