Gentlemen:

Re: Application for non-standard proration
unit - W. A. Combest Well No. 1 - Jalmat
Gas Pool, Lea County, New Mexico
Order K-520

By this letter of application, Albert Leckie, Operator, states as follows:

1. The applicant seeks a non-standard gas proration unit of 320 acres comprising the south half of Section 27, Township 23 South, Range 36 East, and attributed to the above described well, in accordance with the provisions of Order K-520, Rule 5, Paragraph (c).
2. The W. A. Combest No. 1 is located 1650 feet from the south line and 390 feet from the east line of the section as herein described. The dry gas well was completed April 9, 1949, and the Operator is requesting the 330 foot tolerance rule as defined in Order K-520.
3. The entire unit of 320 acres can be reasonably assumed to be productive of dry gas.
4. The operating and royalty interests are the same over the entire south half of Section 27 as herein described.
5. The dry gas well was recently "sand-oil fraced" to increase its productive capacity, and thereby assure the Operator of a top allowable proration unit of 320 acres.
6. The applicant has notified the offset operators herein listed of the intent to form the unit in accordance with K-520. This notification has been effected by copies of this application being sent to each by registered mail.
