New Mexico Oil Conservation Commission P. O. Box 871 Santa Fe. New Mexico

> Attention: Mr. E. A. Uts, Gas Engineer

Dear Elvis:

In compliance with the instructions received by telephone from the Commission's Hobbs office, we are submitting herewithms corrected copy of the G-122-G applicable to our Moberly "G" No. 3 gas well located in Unit E of Section 21, T-26-S, R-37-E, Lea Sounty. New Mexico. Also, we are resubmitting the G-122, Multi-Point Back Pressure Test, now in effect on subject well for the purpose of pointing out the current slope of the back pressure curve. The list of slopes covering the Jalmat Pool that was recently published by your office shows a slope for subject well taken from a test conducted prior to workover. The new test was taken after workover and, accordingly, your list should be amended to show the new current slope for this well.

We hope this information meets with your approval. If there are further questions you have in this matter please do not hesitate to call upon us.

Yours truly,

EL PASO NATURAL GAS COMPANY

R. T. Wright
