DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

TD: 3300 - Sand & Sandy Lime

5 1/2" casing cemented at 3162 with 300 sacks.

This well was completed 8-11-44 with an initial production of 156 bbls oil in 13 hours. Production has declined to 4 bbls. oil in 24 hours, swabbing, in September, 1948.

In an effort to increase production well has been cleaned out to total depth, and on test 11-5-48 well swabbed 10 bbls. oil in 10 hours. We desire permission to shoot well 3217-3278 with 90 qts. LNC (American Glycerine Co.) using 3/4 yd. gravel tamp and oil load.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
