

## NEW MEXICO OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Place

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the \_\_\_\_\_  
The Texas Company's State New Mexico "AD" Well No. 2 in NW<sup>1</sup> NW<sup>4</sup>  
Company or Operator Lease  
 of Sec. 27, T. 26-S, R. 37-E, N. M. P. M., Rhodes Field.  
Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

TD: 3340 - Dolomite

Well was deepened and cleaned out to 3340. Well swabbed 16 bbls. oil in 24 hours. We propose to shoot well from 3319-3334 with 30 qts. LNG. Hole is to be loaded with oil, using approximately 1 yard gravel tamp on top of shot and a 6' cushion on bottom.

Approved \_\_\_\_\_, 19\_\_\_\_

1. The first part of the paper is devoted to the study of the

properties of the function  $f(x)$ .

2. In the second part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

3. In the third part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

4. In the fourth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

5. In the fifth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

6. In the sixth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

7. In the seventh part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

8. In the eighth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

9. In the ninth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

10. In the tenth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

11. In the eleventh part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

12. In the twelfth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

13. In the thirteenth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

14. In the fourteenth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

15. In the fifteenth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

16. In the sixteenth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

17. In the seventeenth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

18. In the eighteenth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.

19. In the nineteenth part, we study the case when

the function  $f(x)$  is discontinuous and the measure  $\mu$  is absolutely continuous with respect to the Lebesgue measure.

20. In the twentieth part, we consider the case when

the function  $f(x)$  is continuous and the measure  $\mu$  is singular with respect to the Lebesgue measure.
