13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

A recent NMOCD witnessed bradenhead test on this well failed to exhibit mechanical integrity. It is proposed to enter this wellbore with a packer and retrievable bridge plug to isolate the leak. When the leak is located and the well condition assessed a decision will be made whether to T. & A. or to P. & A. this well. As verbally approved by your office, if it is decided to T. & A. it, this work will be performed while we are rigged up on the well and the results will be reported on a subsequent notice. The OCD and BLM will both be notified if an integrity test is scheduled. If it is decided to P. & A. it, an intent to P. & A. will be submitted.

14 I hereby certify that the foregoing is true and correct
