Well No. Carlson B 26 7 is located 2310 ft. from N line and 1650 ft. from E line of sec. 26

258 37E N. M. P. M.
(Twp.) (Range) (Meridian)
Justis Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well using rotary tools to approximately 6000' to explore for commercial production in the Drinkard formation. It is proposed to set 11 3/4" casing into the top of the anhydrite formation at approximately 850' cementing the casing to surface. It is proposed to set 7" casing to total depth of commercial production cementing same to base of salt at approximately 2150'. State and Federal regulations will be complied with.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
