Oil Measurement
Each of the wells will be equipped with continuous metering separators for oil production prior to oil being commingled for sales at the Farber BOB Federal #1H. Total sales/production will be allocated back to each individual well using the metered (daily well tests) volumes. Metered volumes will be compared to total battery volumes daily and monthly for accuracy. Any vapor recovery gas shall be included in this application.

Gas Measurement
Total gas production and sales/transferred volumes will be based on the measurement at the CDP and allocated back to each well based on EFM daily readings. The Agave's CDP meter #104095 is located at Sec.1-T25S-R32E, SWSW.

The purpose of the Surface Pool/lease Commingle of production is in the interest of conservation, the reduction of environmental impact area, and overall emissions. It will not result in reduced royalty or improper measurement of production. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well.

RE: Surface Pool/lease Commingle
Resolute BTO Federal #1H
Lea County, NM

Dear Interest Owner,

Yates Petroleum is requesting approval from the Bureau of Land Management and the Oil Conservation Division to Surface Pool/lease Commingle production for the following wells:

Federal Lease #NM-15317					
Well name	**Pool #97784**	**BOPD**	**Gravity**	**MCFPD**	**BTU**
Farber BOB Federal #1H	Bone Spring	21	44	86	1195
Sec. 1-T25S-R32E, SWSW					
API #30-025-39525					
Lea County, NM					
Federal Lease #NM-110835	**Pool #97903**				
Resolute BTO Federal #1H	Lower Bone Spring	*400	*45	*500	*1282
Sec. 12-T25S-R32E, NENE					
API #30-025-42214					
Lea County, NM					
(not yet drilled)					

* This is an estimated production and updated information will be provided to BLM when available.

The ownership is diversified.
The commingle production will be measured and sold/transferred at the Farber BOB tank battery facilities located at Sec. 1-T25S-R32E, SWSW.

Oil Measurement
Each of the wells will be equipped with continuous metering separators for oil production prior to oil being commingled for sales at the Farber BOB Federal #1H. Total sales/production will be allocated back to each individual well using the metered (daily well tests) volumes. Metered volumes will be compared to total battery volumes daily and monthly for accuracy. Any vapor recovery gas shall be included in this application.

Gas Measurement
Total gas production and sales/transferred volumes will be based on the measurement at the CDP and allocated back to each well based on EFM daily readings. The Agave CDP meter #104095 is located at Sec. 1-T25S-R32E, SWSW

The purpose of the Surface pool/lease commingle of production is in the interest of conservation, the reduction of environmental impact area, and overall emissions. It will not result in reduced royalty or improper measurement of production. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well.

Any objection must be filed in writing with the Oil Conservation Division in Santa Fe within 20 days from the date the division receives the application. Application will be sent in conjunction with notification to owners.

If you should have any questions, please give me a call at (575) 748-4200 (direct line).

Sincerely,

Miriam Morales
