Re: Application of Chevron U.S.A. Inc., for administrative approval of an unorthodox well location for its DL 10 3 Kraken Fed Com #207H well in the W/2 of Sections 3 and 10, Township 22 South, Range 33, N.M.P.M., Lea County, New Mexico.

Dear Ms. Sandoval:

Chevron U.S.A. Inc. ("Chevron") (OGRID No. 6137) seeks administrative approval of an unorthodox well location for its **DL 10 3 Kraken Fed Com #207H well** (API No. 30-025-pending) to be completed within the Red Tank; Bone Spring, East Pool (51687) underlying the W/2 of Sections 3 and 10, Township 22 South, Range 33, N.M.P.M., Lea County, New Mexico.

This well will be drilled as follows:

- **Surface location:** 370 feet from the south line and 1,790 feet from the west line (Unit N) of Section 10;
- **Bottom hole location:** 25 feet from the north line and 2,439 feet from the west line (Unit D) of Section 3;
- **First take point:** 25 feet from the south line and 330 feet from the west line (Unit N) of Section 10; and
- **Last take point:** 100 feet from the north line and 330 feet from the west line (Unit D) of Section 3.

Since this acreage is governed by the Division's statewide rules, the completed interval for this well will be unorthodox because it is closer than the standard offsets to the western boundary of the spacing unit and encroaches on the E/2 E/2 of Sections 4 and 9, and to the southern boundary and encroaches on the N/2 NW/4 of Section 15. Approval of the unorthodox completed interval

will allow Chevron to use its preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

Exhibit A is a Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **DL 10 3 Kraken Fed Com #207H well** encroaches on the drilling and spacing units to the west and south.

Exhibit B is a land plat that shows the proposed **DL 10 3 Kraken Fed Com #207H well** in relation to the adjoining spacing unit to the west in Sections 4 and 9, and to the south in Section 15.

Ownership is diverse between the subject spacing unit and the tracts to the west and south. **Exhibit C** includes the tracking information that reflects the “affected parties” were sent a copy of this application with all attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application. The following are the affected parties:

Type	Affected Party	Location	Date Sent

Exhibit D is a statement from a Chevron's petroleum engineer confirming that Chevron's requested unorthodox location is necessary to optimize well spacing, thereby preventing waste.

Your attention to this matter is appreciated.

Sincerely,

To Whom it may concern:

Chevron has planned to drill wells within the Bone Spring Formation, under the Red Tank field rules with 100' first and last take point setbacks.

Chevron respectfully request approval of the Non-Standard Location (NSL) for the First Take Point (FTP) of 25' for the wellbores between Section 10 & 15 in T22S-R33E for which Chevron is the operator of both. Granting the exception will increase the recoverability of oil and gas reserves from these sections and result in a more efficient development of the asset therefore protecting correlative rights.
