RE: Proposed Allocation Method
Hartman 1Z API 30-045-23685 (Pool #77200)
Comingle of Fulcher Kutz PC & Fruitland Coal (Pool #71629)

Dear Ms. Katherine Pickford,

Holcomb Oil & Gas, Inc. has requested approval to commingle Fruitland Coal perforation 1418-30 with existing Fulcher Kutz PC perforations 1434-1498.

The past 18 months existing PC production has averaged 165 MCF per month or 5.43 MCFD. The proposed Fruitland completion is estimated to initially produce 20 MCFD as an average of offsetting FC completing shown by attached decline curves. Assuming these anticipated rates, we would suggest the wells production be allocated 79% to FC and 21% to PC.

Ownership for the FC will be consistent with the parent FC in the N/2 of sec 31, Hartman No. 2. However, ownership in the FC, in the referenced Hartman 1Z well will not be consistent with existing PC owners due to acreage allocations. All owners in the proposed recompletion have been notified. Enclosed are copies of the certified letters. We believe this approval will extend the economic life of the referenced wells.

Sincerely,

W.J. Holcomb

Dear Mr. Rice,

Enclosed you will find a copy of the above referred application that has been submitted to the New Mexico Oil Conservation Division for administrative approval. As an offset operator you are being notified of this application pursuant to NMOCDD rules.

If you desire to submit remarks concerning the application, please send them to Ms. Adrienne Sandoval, Director, New Mexico Oil Conservation Division, Santa Fe, New Mexico within 20 days from the receipt of this notice. If you have no objection to this proposal, no action is required on your part.

Thank you for your consideration in this matter and if you have any questions, please do not hesitate to call upon me.

Sincerely,

W.J. Holcomb
