**Re: Application of Devon Energy Production Company, L.P., for administrative approval of unorthodox well location for its Uraninite 32-33 State Fed Com 333H Well located in the N/2 of Section 32 and the NW/4 of Section 33, Township 19 South, Range 29 East NMPM, Eddy County, New Mexico.**

Dear Director Sandoval:

Devon Energy Production Company, L.P., (“Devon”), OGRID No. 6137, is seeking administrative approval of an unorthodox well location (“NSL”) for the Uraninite 32-33 State Fed Com 333H Well (the “333H Well”) (API 30-015-46841) that was drilled within the Winchester, Bone Spring; (Pool Code 65010) (for Sec. 32) and the Parkway, Bone Spring (Pool Code 49622) (for Sec. 33) underlying the N/2 of Section 32 and the NW/4 of Section 33, Township 19 South, Range 29 East, NMPM, Eddy County, New Mexico. An “as-drilled” C-102 for the Well is attached as Exhibit A-1, which shows the following points of location:

- Surface Location (SL): Located in Section 32-T19S-R29E: 916’ from the North line and 222’ from the West line of said Section.
- Bottom Hole Location (BHL): Located in Section 33-T19S-R29E: 2181’ from the North line and 2628’ from the East line of said Section.
- First Take Point (FTP): Located in Section 32-T19S-R29E: 2167’ from the North line and 471’ from the West line of said Section.
- Last Take Point (LTP): Located in Section 33-T19S-R29E: 2178’ from the North line and 2625’ from the West line of said Section.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O : 970.385.4401 • F : 970.385.4901

Also included as Exhibit A-2 is the most recently proposed C-102 drafted prior to the drilling of the 333H well showing the projected locations for a comparison of the deviation incurred after the drilling of the well.

Devon has included as Exhibit B an Engineering Statement letter explaining why this application is needed. This well will produce from the Winchester, Bone Spring; (Pool Code 65010) in Section 32 and the Parkway, Bone Spring (Pool Code 49622) in Section 33. The laydown unit follows the Division's statewide rules for oil well locations, and the completed interval for the proposed well is closer than 100' from the east endpoint boundary of the spacing unit.

Because the lateral drifted slightly past the last take point to land at 2,625' FWL, the unorthodox location will encroach towards the (1) NE/4 of Section 33, Township 19 South, Range 29 East, part of an adjacent unit operated by Colgate Operating, LLC. However, the 333H Well is still within Devon's projected parameters for optimal development and prevention of waste.

Devon has provided notice to the affected parties in the adjacent unit pursuant to NMAC 19.15.4.12A(2). Devon has also provided notice to the Bureau of Land Management (BLM) and the New Mexico State Land Office (SLO), as affected persons, as is customary in an NSL application when they own royalty interest in federal and state leases with respect to an offset unit. Devon provides herein a sectional map of this area, attached as Exhibit C. Proof of mailing and a copy of the notice letter sent to listed affected persons and parties are attached hereto as Exhibit D and E, respectively.

The subject unit covering the N/2 of Section 32 and the NW/4 of Section 33, was involved in pooling Case No. 20986.

Your consideration in this matter is appreciated.

Sincerely,

A handwritten signature in black ink, appearing to read 'Darin C. Savage', written over a horizontal line.

Mr. Leonard Lowe  
New Mexico Oil Conservation Division  
1220 South Francis Drive  
Santa Fe, New Mexico 87505

RE: Application for Non-Standard Location  
Engineering Statement  
Devon Energy Production Company, L.P.  
Uraninite 32-33 State Fed Com 333H  
N/2 of Section 32 and NW/4 of Section 33; both in 19S-29E  
Eddy County, New Mexico

Dear Mr. Lowe,

Devon Energy Production Company, L.P. ("Devon") respectfully requests administrative approval of a non-standard location for the Uraninite 32-33 State Fed Com 333H Well (the "Well") referenced above. The Well was drilled in the Winchester, Bone Spring; (Pool Code 65010) and Parkway, Bone Spring (Pool Code 49622), based on a projected last take point of 2,536' FWL for an orthodox offset to an existing Bone Spring horizontal spacing unit. However, during drilling, the lateral drifted slightly past the intended last take point to land at 2,625' FWL for the "as drilled" last take point, creating a difference of 89' between the projected take point and the "as drilled" take point, and encroaching toward the NE/4 of Section 33 by 11'. In spite of the encroachment, the "as-drilled" last take point remains within the projected zone for optimal recovery of reserves and approval of the nonstandard location would allow Devon to complete operations and commence production, thereby preventing waste of natural resources.

Sincerely,

A handwritten signature in black ink, appearing to read "Keevin Barnes", written over a light blue horizontal line.

Keevin Barnes  
Reservoir Engineer
