Gas Allocation:

Production for the downhole commingle will be allocated using the subtraction method in agreement with local agencies. The base formation is the Dakota and the added formation to be commingled is the Mesaverde. The subtraction method applies an average monthly production forecast to the base formation using historic production. All production from this well exceeding the forecast will be allocated to the new formation.

After 3 years production will stabilize. A production average will be gathered during the 4th year and will be utilized to create a fixed percentage based allocation.

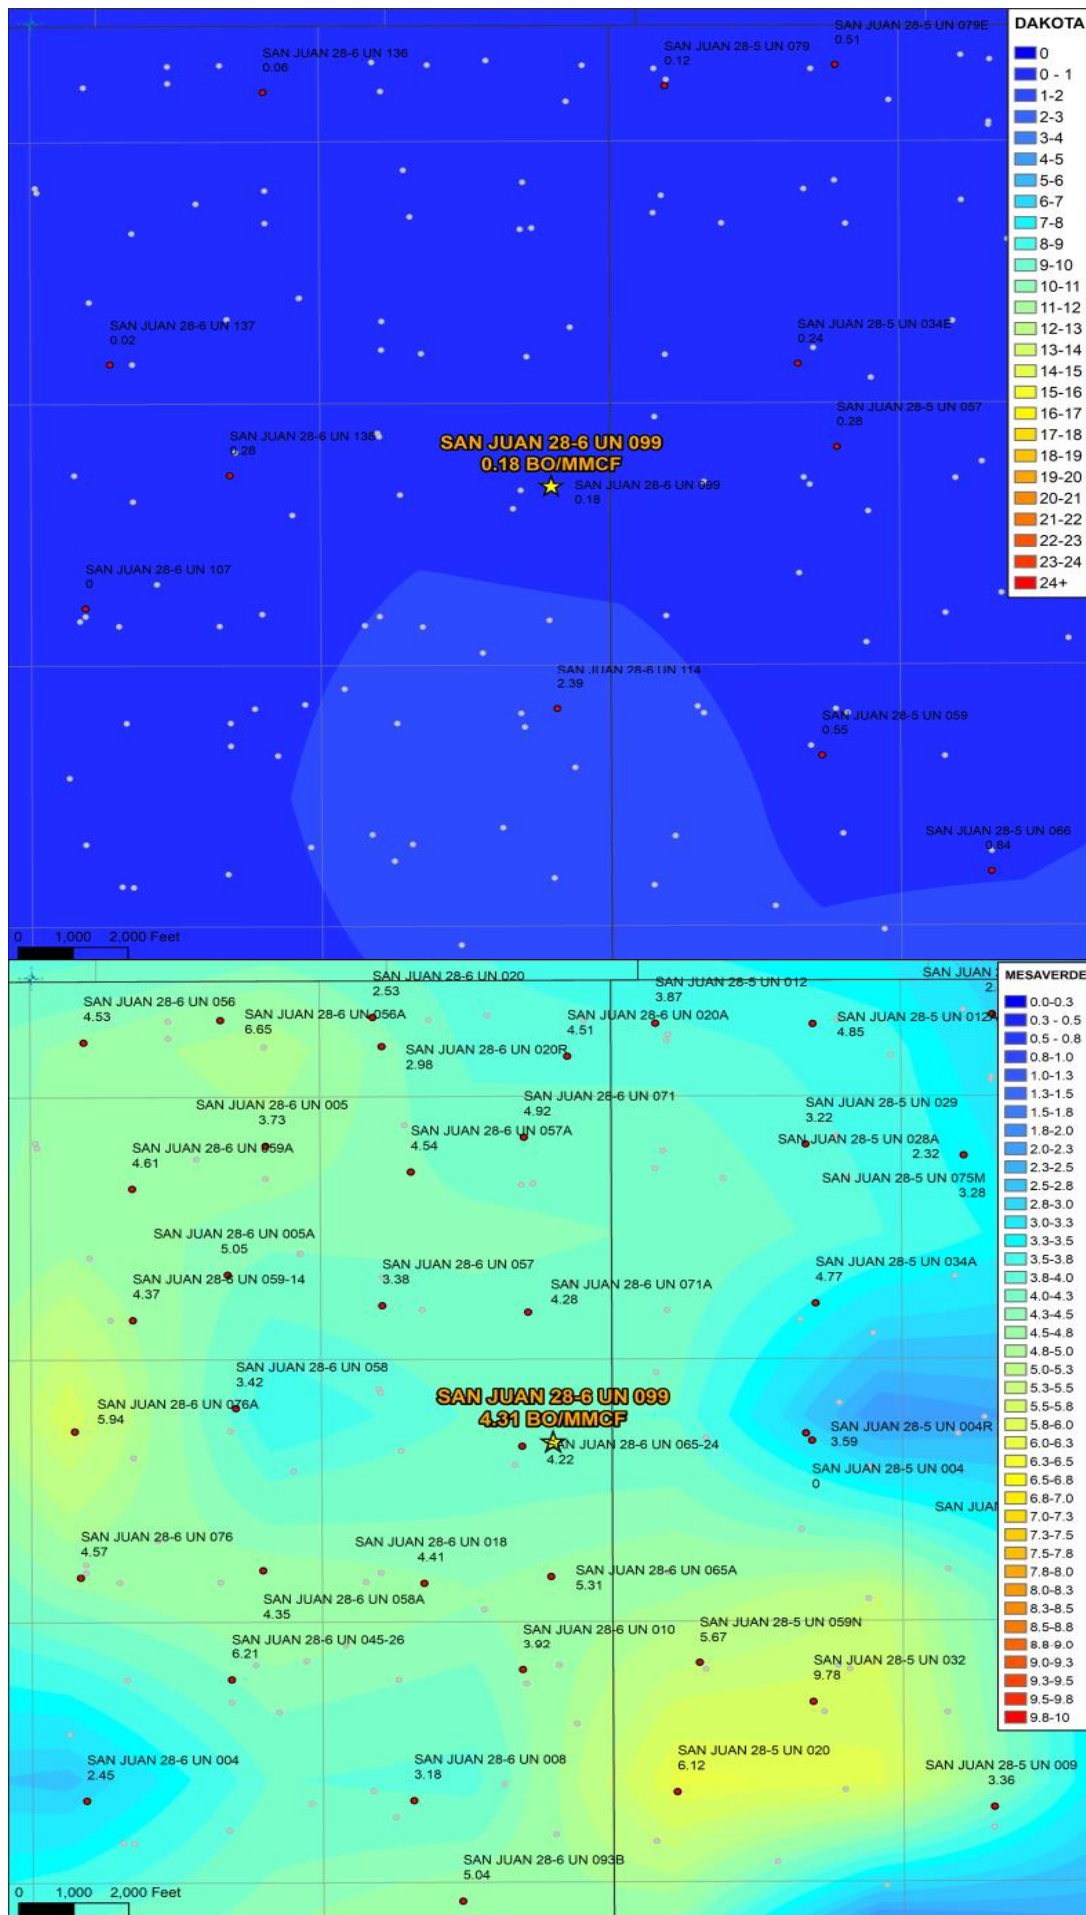

Oil Allocation:

Oil production will be allocated based on average formation yields from offset wells and will be a fixed rate for 4 years.

After 4 years oil will be reevaluated and adjusted as needed based on average formation yields and new fixed gas allocation.

Formation	Yield (bbl/MM)	Remaining Reserves (MMcf)	% Oil Allocation
DK	0.18	954	2%
MV	4.31	1602	98%

Good morning Dean,

That is exactly right, we adjusted the forecasts to better honor the rates we observed post-job.

Thanks,

Ray,

It appears that the estimated reserves have changed on the last 3 of the 4 wells listed below. I'm presuming that perhaps once the well was bought into production, its behavior deviated from projections and led to the recalculation that resulted in this new proposed allocation, but am looking to have that confirmed. I only need a high level statement regarding the reason for the allocation change rather than anything in depth.

Please reference each of the wells below for which the statement you provide is for.

Kandis,

Reviewing the proposed amended allocation for the San Juan 28-6 Unit #99N (30-039-08141) submitted under Action ID: 149277; it looks like the new fixed percentage for oil is due to a drastic change in estimated remaining reserves for the Dakota formation from what was submitted in the original application. Please provide a very brief description for this change. An example being that perhaps new data has been gathered and the calculated reserves was adjusted accordingly or perhaps a typo was made in the original application.
