Dear Mr. McClure:

FAE II Operating LLC, as operator, will be filing applications with the New Mexico Oil Conservation Division for approval of the aforementioned commingling project. After a review of internal records, this letter serves as notice that the operator and interest owners are identical for the wells listed above.

If you have any questions, please feel free to contact the undersigned phone at (832) 209-0809 or by email at rebecca@faenergyus.com.

Thank you for your attention to this matter.

Re: Application of FAE II Operating, LLC for Administrative Approval to Surface Commingle and Sell Gas Production from the Eumont Gas Pool for the State A Com #5 and #6 wells at the State A Com #8 Tank Battery located in Unit P, Sec. 5, T-21S, R-36E, Lea County, New Mexico

Dear Mr. McClure:

FAE II Operating LLC, OGRID: 329326, requests administrative approval for surface commingling of gas production for its State A Com leases located in Sections 5 and 8 of Township 21S, Range 36E as shown on the map in Exhibit A. The leases are also identified by outline and legend. Exhibit B offers further detail on the relevant leases and wells.

The attached battery diagrams, Exhibits C and D, are accurate schematics of the current facility and the proposed commingled facility, respectively. A new 2-inch gas flowline will be laid from the State A Com #5 and #6 wells and tie in to the suction side of the compressor at the State A Com #8 CTB.

After a review of internal records, the interest owners are identical for the wells mentioned above. As such, notification to the interest owners will not be necessary.

This proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. If there are further questions concerning this application, please feel free to contact the undersigned by email at marshall@faenergyus.com or by telephone at (832) 241-8080.

Very truly yours,

FAE II Operating, LLC

Ms. Storfa,

It is the Division's understanding that a permit is not required for the commingling project proposed in surface commingling application CTB-985. As such it is now rejected. If new information comes to light or the proposed project changes such that a commingling permit is required, Forty Acres will need to submit another commingling application at that time.

Dean,
I would agree with you. It looks like the previous submitter thought that these wells maybe on different leases. If you are saying they are on the same lease then I also do not see a reason that we would need a surface commingle permit. Thank you for you for your feedback on this project.

Thank you,
Brittney

Subject: RE: [EXTERNAL] RE: surface commingling application CTB-985

Ms. Storfa,

Based upon my review of this application, a commingling permit seems unnecessary for the proposed work.

This is based upon the following factors:

- All wells produce from a common lease; "CA Yates, Seven Rivers, Queen NMSLO PUN 1391693"

- All wells produce from a common pool; "EUMONT; YATES-7 RVRS-QUEEN (GAS)"
- Production is proposed to be commingled and sold from a battery on lease; "State A Com 8 Central Tank Battery"
- Interest is identical

Please provide any relevant information that may not be clear from my initial review to demonstrate the reason for which the commingling application was submitted.

If a commingling permit is required; please provide an allocation method for how the gas production from these wells will be allocated.
