Lauri,

Please see the attached for an email and example applications I had sent to Chevron recently regarding pre-approval of infill wells and the C4g exemption.

What that actually looks like in our orders is shown below. While it tends to be easier to call it infill wells, that may not be the best description.

[Pre-approved Wells – General] Applicant is authorized to surface commingle oil and gas production from wells not included in Exhibit A but that produce from a pool and lease identified in Exhibit A.

Exhibit A for the orders is a list of wells, leases, and pools authorized to be commingled.

If you have any questions, please feel free to reach back out.

Hi Dean,

I just arrived in Hobbs, and wanted to let you know I'll be by the office in the morning around 8-8:15. Let me know if that will work for you. I must leave Hobbs by 10am to get back to Midland to catch my flight back to Houston.

There are a few things that have transpired the past few days regarding the commingle permits that I would like to discuss.

Please let me know if that time works for you.

Thank you,

Lauri Stanfield

Dean,

We submitted a surface commingling application PO Number [4MDEB-221221-C-107B](#), on the 21st of December.

I was curious how long approval typically takes on processing and approving these applications with the NMOCD.

Thanks in advance.

APPLICATION FOR CENTRAL TANK BATTERY, LEASE COMMINGLE, ON LEASE MEASUREMENT, SALES & STORAGE

Proposal for the two (2) separate batteries, the Vac ABO 3 CTB to Vac SAT 6 CTB. Maverick Permian LLC is requesting approval for Central Tank Battery, Lease Commingle, Off Lease Measurement, Sales & Storage from the following attached well list.

Attached map shows the State leases and well locations in Section 33, T 17S – R 35E & Section 34, T 17S – R 35E.

The State interest in these leases is 100% Working Interest. Lease B-2273 has a royalty rate of 0.125%.

Gas Metering:

Gas volumes from each well producing to the VAC ABO 3 CTB will be determined by using dedicated production separators. Production will be allocated by monthly tests. The oil and water production will not be commingled. Volume of gas from the VAC ABO 3 CTB commingled to the VAC SAT 6 CTB will be measured by an orifice gas meter.

A central tank battery will be located the VAC SAT 6 CTB in Section 34, T17S, R35E on State Lease B-2273 in Lea County, NM. A gas meter will be located the VAC SAT 6 CTB. This meter will be calibrated on a regular basis per API and NMOCD specifications. The OCD will be notified of any future changes in the facility.

Process and Flow Descriptions:

Please see attached diagram for the VAC ABO 3 CTB and the VAC SAT 6 CTB. The flow of produced fluids and valve positions during production and sales phases is shown on the diagram.

The commingling of production is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the 19 shut-in wells and will not result in reduced royalty or improper measurement of production but increased royalty for returning production from these wells. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

Maverick Permian LLC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per the NMOCD and the NMSLO requirements.

The working interest, royalty interest and overriding royalty interest owners have been notified of this proposal by certified mail (see attached).
