Re: Application for Administrative Approval of Non-Standard Location for Armstrong Energy Corporation's Stinger 14 #1 well, 14-16S-36E, API 30-025-50755, Lovington; Wolfcamp, North

Dear Mr. Lowe,

Armstrong Energy Corporation respectfully requests administrative approval of a non-standard location for our Stinger 14 #1 (API 30-025-50755), to be completed in the Lovington; Wolfcamp, North (Pool Code 96625).

The Stinger 14 #1 is a directional well to be completed only at the bottom hole location. The special pool rules for the Lovington; Wolfcamp, North (Pool Code 96625) were set forth in Division Order R-10375. Pursuant to those special pool rules, each well shall be located on a standard unit containing 80 acres, more or less, consisting of the N2, S2, E2, or W2 of a governmental quarter section and, each well shall be located within 150 feet of the center of a governmental quarter-quarter section or lot.

As set forth below, Armstrong's application requests a non-standard location because the proposed bottom hole is located outside 150 feet of the center of the subject governmental quarter-quarter section. Armstrong has already filed the application for a drilling permit for this well.

1. Well name: Stinger 14 #1 (API 30-025-50755)
2. Pool: Lovington; Wolfcamp, North
3. Spacing Unit: W2NW of Section 14, Township 16 South, Range 36 East, NMPM, Lea County, New Mexico.
4. Acreage in Spacing Unit: 80 acres
5. Directional Well Location (C-102 attached):
 - a. Surface Location: 200' FSL, 230' FWL of Section 11, T16S, R36E, Lea County, New Mexico
 - b. Bottom Hole Location: 330' FNL, 330' FWL of Section 14, T16S, R36E, Lea County, New Mexico
 - c. Completed Interval: The well's entire completed interval will be located at the bottom hole location; 330' FNL, 330' FWL of Section 14, T16S, R36E, Lea County, New Mexico
6. Armstrong requests this non-standard location to allow for the most efficient development of this acreage, thereby preventing waste. Armstrong, using 3-D seismic, has identified the target reservoir within the Wolfcamp Formation. Armstrong's proposed bottom hole

location is located where the most efficient drainage of the reservoir could occur.

Armstrong does not believe it can efficiently drain this reservoir from a standard location within 150 feet of the center of a quarter-quarter section. A standard location, Armstrong believes, would leave significant product volumes in place, resulting in waste.

7. The well is in an oil pool, production of both oil and gas are anticipated.
8. Pursuant to NMAC 19.15.4.12(A)(2), the affected persons in this circumstance are those located in the adjoining quarter sections because the spacing unit that is the subject of this application is greater than 40 acres under the special pool rules. The areas of encroachment are:
 - a. The SE4 of Section 10, T16S, R36E, Lea County, New Mexico. The SE4 of Section 10 is entirely fee acreage, comprised of 4 tracts, each with multiple undivided interest owners. Armstrong will provide notice of this application to each of these persons, as shown on the attached exhibit.
 - b. The SW4 of Section 11, T16S, R36E, Lea County, New Mexico. The SW of Section 11 is entirely fee acreage, comprised of one tract with multiple undivided interest owners. Armstrong Will Provide notice of this application to each of these persons, as shown on the attached exhibit.
 - c. The NE4 of Section 15, T16S, R36E, Lea County, New Mexico. The NE of Section 15 is entirely fee acreage, comprised of one tract with multiple undivided interest owners. Armstrong Will Provide notice of this application to each of these persons, as shown on the attached exhibit.

If any additional information is required, please let me know. I can be reached by email at kklein@aecnm.com, or by phone at 575-623-2999, x 312.

Sincerely,

Kevin Klein
Vice President-Land
