RE: Administrative Order SWD-2369 Extension of Injection Authority

Well: Wildrye Fee SWD #1

Surface location: 410 feet FNL, 240 feet FEL Section 20, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico (Lat: 32.652154, Long: -103.471636 NAD83)

Order Date: November 14, 2022

Injection formations: Devonian formation; 14050 to 15660 feet

Dear Mr. Alleman:

Reference is made to your October 10, 2023, request on behalf of Blackbuck New Mexico LLC, (the "operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is one year after issuance of the order: November 14, 2023.

It is the Division's understanding from your correspondence that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled in the one-mile Area of Review (AOR). Additionally, all new affected parties have been identified and notified in the AOR. Therefore, the extension request could be reviewed administratively for approval.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is hereby extended until November 14, 2024.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the

extended administrative order and the operator shall be required to submit a new application to obtain injection authority for the referenced well.
