Cheryl,

I spoke with Mr. Rankin and looked into the mineral ownership a bit closer. My initial review of this application was prompted by the Division's land search function showing that the W/2 of the SW/4 of section 19 in Township 27 North, Range 8 West is federal rather than tribal. However, upon closer inspection of other sources and with Hilcorp's assertion that it is 100% tribal interest, it appears that the Division's land search function is in error.

As such, the Division will be withdrawing its questions below and will accept for record the sundry referenced in the subject line of this email by EOB.

Dean McClure

Dean,

I don't recall if I sent you the perf ranges for the Navajo B 6 NOI. Land is looking into the Chacra density.

CH 2513' - 3268'  
MV 3268' - 4813'  
MC 4813' - 6288'

Thanks,  
Cheryl

Chuck,

Did you respond to this email? I don't see it in my inbox if you did, or I accidentally deleted it.

Cheryl

Chuck,

Dean at OCD is requesting a breakout of the perf intervals that I will get from the Bennett and Scott. Also, and more importantly, he is saying there is already a Chacra producer in this quarter section. Is there a special pool rule or hearing order we can reference?

Thanks,  
Cheryl

**CAUTION:** External sender. DO NOT open links or attachments from UNKNOWN senders.

Cheryl,

I am reviewing the C-103E referenced within the subject line of this email.

Please provide the proposed perforations separated out by pool.

There appears to already be a well producing from the [82329] OTERO CHACRA (GAS) pool within this spacing unit; that being the 30-045-06319 NAVAJO INDIAN B #003. Presuming that there is a special pool rule allowing for the additional well within this quarter section, please provide the hearing order establishing it. Otherwise, please note that a SD will be required for the 30-045-11706 NAVAJO B #006 to be completed into the [82329] OTERO CHACRA (GAS) pool.
