**Re: Novo Oil & Gas Northern Delaware, LLC
Request for Administrative Approval of Unorthodox Well Location**

Rana Picante 12 Fed Com 412H (API No. 30-015-54289)
N/2 of Section 12, Township 23 South, Range 28 East, Eddy County, New Mexico
Purple Sage; Wolfcamp Pool (Code 98220)

Dear Mr. Razatos,

In accordance with Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC and applicable rules governing acreage and well location requirements for the Purple Sage; Wolfcamp Pool (Code 98220), Novo Oil & Gas Northern Delaware, LLC ("Novo") (OGRID No. 372920) seeks administrative approval of an unorthodox well location for its Rana Picante 12 Fed Com 412H well, in a 320-acre, more or less, horizontal spacing unit underlying the N/2 of Section 12, Township 23 South, Range 28 East, Eddy County, New Mexico.

The location for the **Rana Picante 12 Fed Com 412H** well is as follows:

- Surface Hole Location: 1687' FNL and 362' FWL (Unit E) of Section 12
- First Take Point: 1420' FNL and 100' FWL (Unit E) of Section 12
- Last Take Point: 1420' FNL and 180' FEL (Unit H) of Section 12
- Bottom Hole Location: 1420' FNL and 180' FEL (Unit H) of Section 12

Since this acreage is governed by the Division's special pool rules included in Order No. R-14262, the completed interval of the well will be unorthodox because it is closer than 330' offset to the eastern and western boundaries of the existing horizontal spacing unit. As explained in the engineering statement included as **Exhibit A**, approval of the unorthodox, completed interval is necessary to allow Novo to use a non-standard location for the Rana Picante 12 Fed Com 412H well in order to reduce stranded resources, accelerate recovery time, and overall improve productivity of the well and spacing unit. The approval of an unorthodox well location will prevent

Exhibit C is a plat for Sections 11 and 12 of Township 23 South, Range 28 East, and Sections 7 and 8 of Township 24 South, Range 28 East, that shows the Rana Picante 12 Fed Com 412H well in relation to the adjoining tracts/proposed spacing units. The designated operator of the Ochoa 8703 Fed Com spacing unit is BTA Oil Producers, LLC and the designated operator of the Hades 2 WXY & WB Fed Com spacing unit is Marathon Oil Permian LLC.

To Whom It May Concern,

Novo Oil and Gas Northern Delaware, LLC, as a wholly owned subsidiary of Permian Resources Operating, LLC ("Permian"), respectfully requests administrative approval of a non-standard location for the Rana Picante 12 Fed Com 412H to allow the completed interval of the well to be less than 330 feet from the eastern and western boundary of the existing 320-acre horizontal spacing unit. Approval of a non-standard location will maximize the wellbore's direct contact with the reservoir in this unit, reducing stranded resources, accelerating recovery time, and improving overall productivity. The request for a non-standard location is therefore in the best interests of the mineral owners as well as the operator.

Sincerely,

Clay Pollard

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
