Monica and Kenny,

Attached is the CBL pulled today on the SAN JUAN 28-7 UNIT 219E. The approved NOI intervals are **FRC(2604'-2856')** and **PC(2856'-3025')**. The MIT was witnessed and passed yesterday, but the CBL shows insufficient cement across the target formations. We plan to abandon this project and return the well to production in its previous state. Let me know if you have any questions.

Thanks,

**Matthew Esz**
