Kaiser-Francis Oil Company plans to reduce surface footprint and potential emissions sources from an excess of production tanks and equipment on its Red Hills Facility Pad 2, which 3 distinct facilities at present: an Avalon side, a Bone Springs side, and a Wolfcamp side. KFOC would like to surface commingle the different pools as well as the leases, to reduce the number of active production tanks on the site.

The current facility isolates the (3) Avalon wells, (4) Bone Springs wells and (7) Wolfcamp wells, on all 3 phases: oil, gas, and water. It was designed with IP rates in mind, and now that the wells have been online for ~3.5 years and experienced significant decline, it makes sense to further reduce our surface footprint through surface commingling.

Each well flows full well-stream into its own, unique three-phase separator. Gas from each separator goes through separate, electronic flow meters (EFM) for allocation purposes before going to sales meters provided by MPLX. Currently, for gas sales, the Avalon wells are isolated to their own twin sales meters, the Bone Springs wells to their own twin sales meters, and the Wolfcamp to their own twin sales meters. KFOC does not plan to surface commingle the gas currently, due to higher levels of CO2 present in the Avalon and Bone Springs wells. Thus, the lower CO2 is required to be isolated and not commingled, as it used for gas lift gas for the field via centralized compression. Thus, at this time, the gas will not be commingled, and the gas infrastructure already in place will remain relatively unchanged for this project.

On the liquid side, the ultimate plan for this facility will involve reducing the total storage tank count by at least 50%, as well as the current heater treater count, which in turn would reduce the current containment space significantly. There are currently 39 production storage tanks and 8 heaters treaters on this site. Each well would continue to have its own unique three-phase separator as described above. At present time, the oil flows from each separator to a shared heater treater (1-2 wells per heater). The oil would be commingled on a trunkline (downstream of allocation Coriolis meters) once leaving the separators and combined to flow into a reduced number of heater treaters, with 1 heater treater serving as a spare and handling LACT divert. The oil would leave the heaters and be commingled in a reduced number of oil tanks.

Water would be handled in a similar fashion to oil described above. Water from each three-phase separator would be metered with individual turbine meters for allocation purposes, before being commingled into a reduced number of common water tanks.

Once commingled oil is stored in common storage tanks, the oil would be pumped and sold via a common LACT, reducing the number of LACT skids from 3 to 1. Similarly, once commingled water is stored in common storage tanks, it would be pumped down the SWD line for disposal, reducing the number of water pumps in the process. KFOC would also replace/upgrade any tanks as needed once the project has been undertaken.

Vent lines on both the oil tanks and water tanks would be upgraded and fabricated to fit the new commingled tank set-up, including vent line to flare. Oil tank vapors from the commingled oil tanks would be collected by a single VRU and allocated based on oil Coriolis allocation meters. Similarly, heater treater vapors would be collected by another VRU. The gas from both tanks and heaters VRUs would be commingled and metered, then allocated based on oil Coriolis allocation meters. Vent line to flare would also be re-routed and upgraded to simplest, most efficient path. The vent header system will also be upgraded as well as the thief hatches on the production tanks. All current slop tanks would be removed, and LACT reject and/or circulating line from the oil tanks would be plumbed to one of the active heater treaters.

Ultimately, this project would see up to 50% of its current tank count and heater count decommission and removed from the site. Additionally, 2 LACT skids and multiple water pumps would be decommissioned and removed from the facility.

KAISER-FRANCIS OIL COMPANY

Federal Communitization Agreement

Contract No. NMNM 105785709

THIS AGREEMENT entered into as of the 1st day of December, 2020, by and between the parties subscribing, ratifying, or consenting hereto, such parties being hereinafter referred to as "parties hereto."

WITNESSETH:

WHEREAS, the Act of February 25, 1920 (41 Stat. 437), as amended and supplemented, authorizes communitization or drilling agreements communitizing or pooling a Federal oil and gas lease, or any portion thereof, with other lands, whether or not owned by the United States, when separate tracts under such Federal lease cannot be independently developed and operated in conformity with an established well-spacing program for the field or area and such communitization or pooling is determined to be in the public interest; and

WHEREAS, the parties hereto own working, royalty or other leasehold interests, or operating rights under the oil and gas leases and lands subject to this agreement which cannot be independently developed and operated in conformity with the well-spacing program established for the field or area in which said lands are located; and

WHEREAS, the parties hereto desire to communitize and pool their respective mineral interests in lands subject to this agreement for the purpose of developing and producing communitized substances in accordance with the terms and conditions of this agreement:

NOW, THEREFORE, in consideration of the premises and the mutual advantages to the parties hereto, it is mutually covenanted and agreed by and between the parties hereto as follows:

1. The lands covered by this agreement (hereinafter referred to as "communitized area") are described as follows:

E/2 of Section 31 T. 25S, R. 33E, and E/2 of Section 6 T. 26S, R. 33E, Lea County, New Mexico;

Containing 640 acres, and this agreement shall include only the Lower Bone Spring Formation underlying said lands and the natural gas and associated liquid hydrocarbons hereafter referred to as "communitized substances," producible from such formation.

- 2. Attached hereto, and made a part of this agreement for all purposes is Exhibit "A", a plat designating the communitized area and, Exhibit "B", designating the operator of the communitized area and showing the acreage, percentage and ownership of oil and gas interests in all lands within the communitized area, and the authorization, if any, for communitizing or pooling any patented or fee lands within the communitized area.
- 3. The Operator of the communitized area shall be Kaiser-Francis Oil Company, PO Box 21468, Tulsa, OK, 74121-1468. All matters of operations shall be governed by the operator under and pursuant to the terms and provisions of this agreement. A successor operator may be designated by the owners of the working interest in the communitized area and four (4) executed copies of a designation of successor operator shall be filed with the Authorized Officer.
- 4. Operator shall furnish the Secretary of the Interior, or his authorized representative, with a log and history of any well drilled on the communitized area, monthly reports of operations, statements of oil and gas sales and royalties and such other reports as are deemed necessary to compute monthly the royalty due the United States, as specified in the applicable oil and gas operating regulations.
- 5. The communitized area shall be developed and operated as an entirety, with the understanding and agreement between the parties hereto that all communitized substances produced there from shall be allocated among the leaseholds comprising said area in the proportion that the acreage interest of each leasehold bears to the entire acreage interest committed to this agreement.
 - All proceeds, 8/8ths, attributed to unleased Federal lands included within the CA area are to be paid into the appropriate Unleased Lands Account by the designated operator until the land is leased or ownership is established.
- The royalties payable on communitized substances allocated to the individual 6. leases comprising the communitized area and the rentals provided for in said leases shall be determined and paid on the basis prescribed in each of the individual leases. Payments of rentals under the terms of leases subject to this agreement shall not be affected by this agreement except as provided for under the terms and provisions of said leases or as may herein be otherwise provided. Except as herein modified and changed, the oil and gas leases subject to this agreement shall remain in full force and effect as originally made and issued. It is agreed that for any Federal lease bearing a sliding- or step-scale rate of royalty, such rate shall be determined separately as to production from each communitization agreement to which such lease may be committed, and separately as to any noncommunitized lease production, provided, however, as to leases where the rate of royalty for gas is based on total lease production per day, such rate shall be determined by the sum of all communitized production allocated to such a lease plus any noncommunitized lease production.

- 7. There shall be no obligation on the lessees to offset any well or wells completed in the same formation as covered by this agreement on separate component tracts into which the communitized area is now or may hereafter be divided, nor shall any lessee be required to measure separately communitized substances by reason of the diverse ownership thereof, but the lessees hereto shall not be released from their obligation to protect said communitized area from drainage of communitized substances by a well or wells which may be drilled offsetting said area.
- 8. The commencement, completion, continued operation, or production of a well or wells for communitized substances on the communitized area shall be construed and considered as the commencement, completion, continued operation, or production on each and all of the lands within and comprising said communitized area, and operations or production pursuant to this agreement shall be deemed to be operations or production as to each lease committed hereto.
- 9. Production of communitized substances and disposal thereof shall be in conformity with allocation, allotments, and quotas made or fixed by any duly authorized person or regulatory body under applicable Federal or State statutes. This agreement shall be subject to all applicable Federal and State laws or executive orders, rules and regulations, and no party hereto shall suffer a forfeiture or be liable in damages for failure to comply with any of the provisions of this agreement if such compliance is prevented by, or if such failure results from, compliance with any such laws, orders, rules or regulations.
- The date of this agreement is December 1, 2020, and it shall become effective as of 10. this date or from the onset of production of communitized substances, whichever is earlier upon execution by the necessary parties, notwithstanding the date of execution, and upon approval by the Secretary of the Interior or by his duly authorized representative, and shall remain in force and effect for a period of 2 years and for as long as communitized substances are, or can be, produced from the communitized area in paying quantities: Provided, that prior to production in paying quantities from the communitized area and upon fulfillment of all requirements of the Secretary of the Interior, or his duly authorized representative, with respect to any dry hole or abandoned well, this agreement may be terminated at any time by mutual agreement of the parties hereto. This agreement shall not terminate upon cessation of production if, within 60 days thereafter, reworking or drilling operations on the communitized area are commenced and are thereafter conducted with reasonable diligence during the period of nonproduction. The 2year term of this agreement will not in itself serve to extend the term of any Federal lease which would otherwise expire during said period.
- 11. The covenants herein shall be construed to be covenants running with the land with respect to the communitized interests of the parties hereto and their successors in interests until this agreement terminates and any grant, transfer, or conveyance of any such land or interest subject hereto, whether voluntary or not, shall be and hereby is conditioned upon the assumption of all obligations hereunder by the

grantee, transferee, or other successor in interest, and as to Federal land shall be subject to approval by the Secretary of the Interior, or his duly authorized representative.

- 12. It is agreed between the parties hereto that the Secretary of the Interior, or his duly authorized representative, shall have the right of supervision over all Fee and State mineral operations within the communitized area to the extent necessary to monitor production and measurement, and assure that no avoidable loss of hydrocarbons occur in which the United States has an interest pursuant to applicable oil and gas regulations of the Department of the Interior relating to such production and measurement.
- 13. This agreement shall be binding upon the parties hereto and shall extend to and be binding upon their respective heirs, executors, administrators, successors, and assigns.
- 14. This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument, in writing, specifically referring hereto, and shall be binding upon all parties who have executed such a counterpart, ratification or consent hereto with the same force and effect as if all parties had signed the same document.
- 15. <u>Nondiscrimination</u>. In connection with the performance of work under this agreement, the operator agrees to comply with all the provisions of Section 202(1) to (7) inclusive, of Executive Order 11246 (30F.R. 12319), as amended, which are hereby incorporated by reference in this agreement.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written and have set opposite their respective names the date of execution.

Federal Communitization Agreement

Contract No. Nmnm 105780582

THIS AGREEMENT entered into as of the 1st day of December, 2020, by and between the parties subscribing, ratifying, or consenting hereto, such parties being hereinafter referred to as "parties hereto."

WITNESSETH:

WHEREAS, the Act of February 25, 1920 (41 Stat. 437), as amended and supplemented, authorizes communitization or drilling agreements communitizing or pooling a Federal oil and gas lease, or any portion thereof, with other lands, whether or not owned by the United States, when separate tracts under such Federal lease cannot be independently developed and operated in conformity with an established well-spacing program for the field or area and such communitization or pooling is determined to be in the public interest; and

WHEREAS, the parties hereto own working, royalty or other leasehold interests, or operating rights under the oil and gas leases and lands subject to this agreement which cannot be independently developed and operated in conformity with the well-spacing program established for the field or area in which said lands are located; and

WHEREAS, the parties hereto desire to communitize and pool their respective mineral interests in lands subject to this agreement for the purpose of developing and producing communitized substances in accordance with the terms and conditions of this agreement:

NOW, THEREFORE, in consideration of the premises and the mutual advantages to the parties hereto, it is mutually covenanted and agreed by and between the parties hereto as follows:

1. The lands covered by this agreement (hereinafter referred to as "communitized area") are described as follows:

E/2 of Section 31 T. 25S, R. 33E, and E/2 of Section 6 T. 26S, R. 33E, Lea County, New Mexico;

Containing 640 acres, and this agreement shall include only the Wolfcamp Formation underlying said lands and the natural gas and associated liquid hydrocarbons hereafter referred to as "communitized substances," producible from such formation.

- 2. Attached hereto, and made a part of this agreement for all purposes is Exhibit "A", a plat designating the communitized area and, Exhibit "B", designating the operator of the communitized area and showing the acreage, percentage and ownership of oil and gas interests in all lands within the communitized area, and the authorization, if any, for communitizing or pooling any patented or fee lands within the communitized area.
- 3. The Operator of the communitized area shall be Kaiser-Francis Oil Company, PO Box 21468, Tulsa, OK, 74121-1468. All matters of operations shall be governed by the operator under and pursuant to the terms and provisions of this agreement. A successor operator may be designated by the owners of the working interest in the communitized area and four (4) executed copies of a designation of successor operator shall be filed with the Authorized Officer.
- 4. Operator shall furnish the Secretary of the Interior, or his authorized representative, with a log and history of any well drilled on the communitized area, monthly reports of operations, statements of oil and gas sales and royalties and such other reports as are deemed necessary to compute monthly the royalty due the United States, as specified in the applicable oil and gas operating regulations.
- 5. The communitized area shall be developed and operated as an entirety, with the understanding and agreement between the parties hereto that all communitized substances produced there from shall be allocated among the leaseholds comprising said area in the proportion that the acreage interest of each leasehold bears to the entire acreage interest committed to this agreement.
 - All proceeds, 8/8ths, attributed to unleased Federal lands included within the CA area are to be paid into the appropriate Unleased Lands Account by the designated operator until the land is leased or ownership is established.
- The royalties payable on communitized substances allocated to the individual 6. leases comprising the communitized area and the rentals provided for in said leases shall be determined and paid on the basis prescribed in each of the individual leases. Payments of rentals under the terms of leases subject to this agreement shall not be affected by this agreement except as provided for under the terms and provisions of said leases or as may herein be otherwise provided. Except as herein modified and changed, the oil and gas leases subject to this agreement shall remain in full force and effect as originally made and issued. It is agreed that for any Federal lease bearing a sliding- or step-scale rate of royalty, such rate shall be determined separately as to production from each communitization agreement to which such lease may be committed, and separately as to any noncommunitized lease production, provided, however, as to leases where the rate of royalty for gas is based on total lease production per day, such rate shall be determined by the sum of all communitized production allocated to such a lease plus any noncommunitized lease production.

- 7. There shall be no obligation on the lessees to offset any well or wells completed in the same formation as covered by this agreement on separate component tracts into which the communitized area is now or may hereafter be divided, nor shall any lessee be required to measure separately communitized substances by reason of the diverse ownership thereof, but the lessees hereto shall not be released from their obligation to protect said communitized area from drainage of communitized substances by a well or wells which may be drilled offsetting said area.
- 8. The commencement, completion, continued operation, or production of a well or wells for communitized substances on the communitized area shall be construed and considered as the commencement, completion, continued operation, or production on each and all of the lands within and comprising said communitized area, and operations or production pursuant to this agreement shall be deemed to be operations or production as to each lease committed hereto.
- 9. Production of communitized substances and disposal thereof shall be in conformity with allocation, allotments, and quotas made or fixed by any duly authorized person or regulatory body under applicable Federal or State statutes. This agreement shall be subject to all applicable Federal and State laws or executive orders, rules and regulations, and no party hereto shall suffer a forfeiture or be liable in damages for failure to comply with any of the provisions of this agreement if such compliance is prevented by, or if such failure results from, compliance with any such laws, orders, rules or regulations.
- The date of this agreement is December 1, 2020, and it shall become effective as of 10. this date or from the onset of production of communitized substances, whichever is earlier upon execution by the necessary parties, notwithstanding the date of execution, and upon approval by the Secretary of the Interior or by his duly authorized representative, and shall remain in force and effect for a period of 2 years and for as long as communitized substances are, or can be, produced from the communitized area in paying quantities: Provided, that prior to production in paying quantities from the communitized area and upon fulfillment of all requirements of the Secretary of the Interior, or his duly authorized representative. with respect to any dry hole or abandoned well, this agreement may be terminated at any time by mutual agreement of the parties hereto. This agreement shall not terminate upon cessation of production if, within 60 days thereafter, reworking or drilling operations on the communitized area are commenced and are thereafter conducted with reasonable diligence during the period of nonproduction. The 2year term of this agreement will not in itself serve to extend the term of any Federal lease which would otherwise expire during said period.
- 11. The covenants herein shall be construed to be covenants running with the land with respect to the communitized interests of the parties hereto and their successors in interests until this agreement terminates and any grant, transfer, or conveyance of any such land or interest subject hereto, whether voluntary or not, shall be and hereby is conditioned upon the assumption of all obligations hereunder by the

grantee, transferee, or other successor in interest, and as to Federal land shall be subject to approval by the Secretary of the Interior, or his duly authorized representative.

- 12. It is agreed between the parties hereto that the Secretary of the Interior, or his duly authorized representative, shall have the right of supervision over all Fee and State mineral operations within the communitized area to the extent necessary to monitor production and measurement, and assure that no avoidable loss of hydrocarbons occur in which the United States has an interest pursuant to applicable oil and gas regulations of the Department of the Interior relating to such production and measurement.
- 13. This agreement shall be binding upon the parties hereto and shall extend to and be binding upon their respective heirs, executors, administrators, successors, and assigns.
- 14. This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument, in writing, specifically referring hereto, and shall be binding upon all parties who have executed such a counterpart, ratification or consent hereto with the same force and effect as if all parties had signed the same document.
- 15. <u>Nondiscrimination.</u> In connection with the performance of work under this agreement, the operator agrees to comply with all the provisions of Section 202(1) to (7) inclusive, of Executive Order 11246 (30F.R. 12319), as amended, which are hereby incorporated by reference in this agreement.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written and have set opposite their respective names the date of execution.

Red Hills Facility Pad 2 – Prorated Allocation

GAS ALLOCATION

Each well has a Wellhead (WH) meter and a Gas Lift (GL) meter. The CTB has (6) Sales Meters that measure the volume of gas that leaves the CTB, 2 twin meters apiece on the Avalon side, Bone Springs side and Wolfcamp side of the CTB. These Sales meters (CTB Sales) are considered FMPs. This CTB has 2 different drilling pads that feed into it: Drilling Pad 7 which has (10) wellheads and Drilling Pad 8 which has (4) wellheads. There are (2) INJ meters that measure gas coming back to the pads from the discharge of the centralized compressor station, 1 apiece for each of drilling pads 7 and 8. These INJ meters are considered FMPs.

- 1. Net CTB Gas is the volume of lease gas produced/sold from the CTB. Net CTB Gas is calculated by subtracting HPGL INJ & VRU volume from the CTB Sales.
- 2. Each well's theoretical gas production is calculated by subtracting the well's GL meter volume from the WH meter volume.
- 3. Each well's gas production allocation percentage is calculated by dividing the well's theoretical gas production by the sum of all well theoretical gas production volumes.
- 4. Well Net CTB Gas is calculated by multiplying each well's gas production allocation percentage by Net CTB Gas volume.
- 5. HP flare volume for each well is calculated by multiplying each well's gas production allocation percentage by the HP flare meter volume.
- VRU Meter measures the gas recovered from the oil tanks and heater treaters. Well VRU volume is determined by oil production. Each well's oil production allocation percentage is multiplied by the VRU meter to determine the well VRU volume.
- 7. Total Net FMP Gas Volume is the total volume sold from the CTB to the gathering line. Total Net FMP Gas is calculated by adding VRU volume and Net CTB Gas.
- 8. Total Allocated Gas Production for each well is calculated by adding the Net CTB Gas, HP flare, Lease Use, and VRU volume

OIL ALLOCATION

Each well has an oil meter measuring the volume of oil produced by the well. The volume measured by a well's oil meter is used to allocate the total production and the total sales (FMP) back to each well.

- Allocated CTB Production is the volume of oil produced by the CTB and is calculated by subtracting the beginning inventory from the sum of the ending tank inventory and the pipeline LACT volume.
- 2. Theoretical Oil Production % is calculated by dividing each oil meter volume into the sum of oil meters
- 3. Allocated Production is calculated by multiplying Theoretical Oil Production % by Allocated CTB Production

- 4. Total Allocated Oil Sales are calculated using the first-in, first-out (FIFO) method. The beginning inventory is the previous accounting period's Ending Tank Inventory.
- 5. The first step to calculating a well's Total Allocated Oil Sales is to calculate the Theoretical Beginning Tank Inventory % for each well by dividing the well's Beginning Tank Inventory by the total CTB Beginning Tank Inventory.
- 6. If the Oil Sales (FMP) volume is less than or equal to the CTB Beginning Tank Inventory, multiply the Theoretical Beginning Tank Inventory % by the Oil Sales (FMP) volume to get the Beginning Tank Inventory Sales volume.
- 7. If the Oil Sales (FMP) volume is greater than the CTB Beginning Tank Inventory, the New Inventory Oil Sales is calculated by multiplying the difference between the Oil Sales and Beginning Tank Inventory Sales by the Theoretical Oil Production %.
- 8. Total Allocated Oil Sales is the sum of Beginning Tank Inventory Sales and New Inventory Oil Inventory Sales.

WATER ALLOCATION

Each well has a water meter that measures the volume of water produced by the well. The volume measured by a well's water meter is used to allocate the total production and total disposed volume back to each well.

- 1. Allocated CTB Water Production is the volume of water produced by the CTB and is calculated by subtracting the beginning inventory from the sum of the ending tank inventory and the Water Transfer Meter (Disposal Volume).
- 2. Theoretical Water Production % is calculated by dividing each well's water meter volume by the sum of the water meters.
- 3. Allocated Water Production is calculated by multiplying Theoretical Water Production % by Allocated CTB Water Production.
- 4. Disposed Water Volume is calculated using the first-in, first-out (FIFO) method. The beginning inventory is the previous accounting period's Ending Tank Inventory.
- 5. The first step to calculating a well's Total Disposed Water Volume is to calculate the Theoretical Beginning Tank Inventory % for each well by dividing the well's Beginning Tank Inventory by the total CTB Beginning Tank Inventory.
- 6. If the Water Transfer Meter (Disposal) volume is less than or equal to the CTB Beginning Tank Inventory, multiply the Theoretical Beginning Tank Inventory % by the Water Transfer Meter volume to get the Beginning Tank Inventory Disposal volume.
- 7. If the Water Transfer Meter volume is greater than CTB Beginning Tank Inventory, the New Water Inventory Disposal is calculated by multiplying the difference between the Water Transfer Meter Volume and Beginning Tank Inventory Sales by Theoretical Water Production %.
- 8. Total Disposed Water Volume is the sum of Beginning Tank Inventory Disposal and New Inventory Disposal Volume.

| ID | IDENTIFICATION | Unique number assinged to each meter used to measure gas. |
|----------------------|----------------------|---|
| WH METER | WELLHEAD | Measures the volume of gas that leaves a well's separator. |
| GL METER | GAS LIFT | Measures the volume of gas that is injected into a well for gas lift. |
| Theo Gas Production | | Formula to calculate the volume of native gas produced from the well. (WH-GL) |
| Hours On | | Number of hours the well produced, used to allocate Lease Use gas. |
| Net CTB Gas | | Formula to calculate the volume of gas for royalty purposes. HPGL INJ Gas is subtracted from the CTB Sales FMP. |
| HPGL INJ (FMP) | Multiple Meters | Meters that measure the volume of gas-lift gas that comes back to the wells for gas lift injection via centralized field compression. |
| CTB Sales (FMP) | Multiple Meters | Meters that measures the volume of gas that leaves the CTB. |
| HP Flare | HIGH PRESSURE FLARE | Measures the high pressure flare from the CTB |
| СТВ | CENTRAL TANK BATTERY | A group of wells producing into shared FMPs. |
| VRU | VAPOR RECOVERY UNIT | Measures gas vapors recovered from oil tanks and heaters. Allocated based on oil production |
| Allocated Production | | Total gas produced from the CTB. Calculated by Net CTB Gas + HP Flare + Lease Use + VRU |
| Total Net FMP Gas | | Total gas sold from CTB. Calculated by Net CTB Gas + VRU |
| Lease Use | | Gas that is used to operate CTB equipment (heaters, pilot). |

| Oil Meter | Measures the volume of oil that leaves a well's separator. |
|--------------------------------|---|
| Oil Production % | Theoretical Oil Production %, calculated by dividing the Oil Meter volume by the sum of all Oil Meter volumes. |
| Allocated Production | Calculated by multiplying the Oil Production % by the CTB Oil Production |
| CTB Production | Calculation to determine the volume produced by the CTB during accounting period. (Ending Inventory - Beginning Inventory + Oil Sales) |
| % of Beginning Inventory | Calculated by dividing a well's Beginning Tank Inventory by the CTB Beginning Tank Inventory. |
| Beginning Tank Inventory Sales | If the Oil Sales (FMP) volume is less than or equal to the CTB Beginning Tank Inventory, multiply % of Beginning Tank Inventory by the Oil Sales (FMP) volume to get the Beginning Tank Inventory Sales volume. |
| New Inventory Oil Sales | If Oil Sales (FMP) volume exceeds CTB Beginning Tank Inventory, New Inventory Oil Sales is calculated by multiplying the difference between Oil Sales and Beginning Tank Inventory Sales by Oil Production %. |
| Oil Sales | Volume measured by the Pipeline LACT (FMP), which is sold to purchaser |
| Total Allocated Sales | The total Oil Sales measured by the Pipeline LACT (FMP) which is allocated to each well by summing Beginning Tank Inventory Sales and New Inventory Oil Sales. |
| Beginning Tank Inventory | Inventory from previous accounting period's calculated Ending Inventory. If CTB is new, Beginning Inventory is zero. |
| Ending Tank Inventory | Calculated Inventory based on Allocated production, Total Allocated Sales, and Beginning Tank Inventory, (Beginning Tank Inventory - Total Allocated Sales + Allocated Production) |

6733 South Yale Avenue, 74136 (918) 494-0000 Fax: (918) 491-4385

3c. All meters comply with BLM regulations.

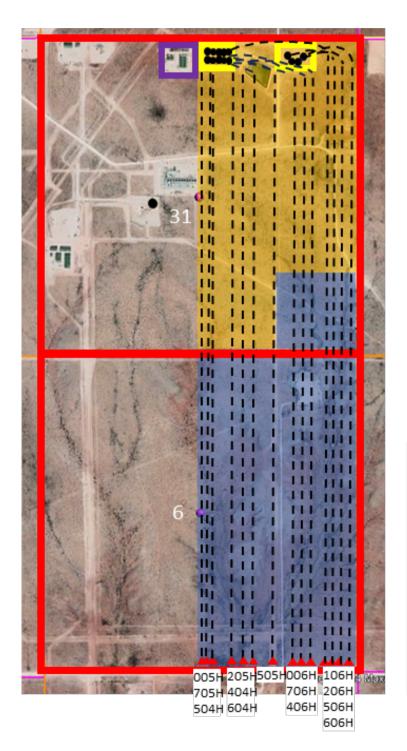

All allocation meters installed shall comply with the Bureau of Land Management (BLM) Facility Measurement Point (FMP) regulations, specifically as outlined in **43 CFR 3175**, and shall meet the applicable American Petroleum Institute (API) standards, including **API MPMS Chapter 14.3 (Orifice Metering of Natural Gas)** and **API MPMS Chapter 21.1 (Flow Measurement Using Electronic Metering Systems)**. These regulations and standards ensure that all measurement devices meet federal accuracy requirements and industry best practices for the allocation and reporting of production data.

Notice of Intent

Sundry ID: 2841246

Type of Submission: Notice of Intent

Date Sundry Submitted: 03/11/2025

Date proposed operation will begin: 03/11/2025

Type of Action: Commingling (Surface) and Off-Lease

Measurement

Time Sundry Submitted: 02:20

Procedure Description: Kaiser-Francis Oil Company requests to commingle production at Red Hills Facility Pad 2, NMNM126620, under 43 CFR 3173.14.a.1.i. Commingling will reduce equipment on site and emissions. Commingling will not negatively affect royalties to the BLM.

Surface Disturbance

Is any additional surface disturbance proposed?: No

(Instructions on page 2)

GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area or regional procedures and practices, are either shown below, will be issued by or may be obtained from the local Federal office.

SPECIFIC INSTRUCTIONS

Item 4 - Locations on Federal or Indian land should be described in accordance with Federal requirements. Consult the local Federal office for specific instructions.

Item 13: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by the local Federal office. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to the top of any tubing left in the hole; method of closing top of well and date well site conditioned for final inspection looking for approval of the abandonment. If the proposal will involve **hydraulic fracturing operations**, you must comply with 43 CFR 3162.3-3, including providing information about the protection of usable water. Operators should provide the best available information about all formations containing water and their depths. This information could include data and interpretation of resistivity logs run on nearby wells. Information may also be obtained from state or tribal regulatory agencies and from local BLM offices.

NOTICES

The privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. 396; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is used to: (1) Evaluate, when appropriate, approve applications, and report completion of subsequent well operations, on a Federal or Indian lease; and (2) document for administrative use, information for the management, disposal and use of National Resource lands and resources, such as: (a) evaluating the equipment and procedures to be used during a proposed subsequent well operation and reviewing the completed well operations for compliance with the approved plan; (b) requesting and granting approval to perform those actions covered by 43 CFR 3162.3-2, 3162.3-3, and 3162.3-4; (c) reporting the beginning or resumption of production, as required by 43 CFR 3162.4-1(c)and (d) analyzing future applications to drill or modify operations in light of data obtained and methods used.

ROUTINE USES: Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions in connection with congressional inquiries or to consumer reporting agencies to facilitate collection of debts owed the Government.

EFFECT OF NOT PROVIDING THE INFORMATION: Filing of this notice and report and disclosure of the information is mandatory for those subsequent well operations specified in 43 CFR 3162.3-2, 3162.3-4.

The Paperwork Reduction Act of 1995 requires us to inform you that:

The BLM collects this information to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

Response to this request is mandatory.

The BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collection unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT: Public reporting burden for this form is estimated to average 8 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management (1004-0137), Bureau Information Collection Clearance Officer (WO-630), 1849 C St., N.W., Mail Stop 401 LS, Washington, D.C. 20240

| Red Hills Federal 106H | 30-025-47036 | 45.7 |

- 7) FMPs are off lease, located on federal surface, on an approved built facility location.
- 8) No new surface disturbance is included as part of the proposed CAA.
- 9) Additional documentation that would be required under 3173.15 (f-j) relating to right of way grant applications: N/A if 8 is correct.
 - 3173.15 (f): Surface use plan not required since there won't be any no new surface disturbance for the FMP.
 - 3173.15 (g): Right of way grant application isn't required since there won't be any new surface disturbance for the FMP.
 - 3173.15 (h): Written approval from surface-management agency isn't required since there won't be any new surface disturbance for the FMP.
 - 3173.15 (i): Right of way grant application isn't required since the surface facility isn't on Indian land.

Kaiser-Francis Oil Company plans to reduce surface footprint and potential emissions sources from an excess of production tanks and equipment on its Red Hills Facility Pad 2, which 3 distinct facilities at present: an Avalon side, a Bone Springs side, and a Wolfcamp side. KFOC would like to surface commingle the different pools as well as the leases, to reduce the number of active production tanks on the site.

The current facility isolates the (3) Avalon wells, (4) Bone Springs wells and (7) Wolfcamp wells, on all 3 phases: oil, gas, and water. It was designed with IP rates in mind, and now that the wells have been online for ~3.5 years and experienced significant decline, it makes sense to further reduce our surface footprint through surface commingling.

Each well flows full well-stream into its own, unique three-phase separator. Gas from each separator goes through separate, electronic flow meters (EFM) for allocation purposes before going to sales meters provided by MPLX. Currently, for gas sales, the Avalon wells are isolated to their own twin sales meters, the Bone Springs wells to their own twin sales meters, and the Wolfcamp to their own twin sales meters. The long-term goal for this facility, as production volumes continue to decline, would be to surface commingle all produced gas into one stream that leaves the production site via sales, delivered via gathering line to centralized compression. Each well would continue to have its own separator and EFMs for allocation purposes, while any flash gas would be metered and allocated based on oil production, as described below.

On the liquid side, the ultimate plan for this facility will involve reducing the total storage tank count by at least 50%, as well as the current heater treater count, which in turn would reduce the current containment space significantly. There are currently 39 production storage tanks and 8 heaters treaters on this site. Each well would continue to have its own unique three-phase separator as described above. At present time, the oil flows from each separator to a shared heater treater (1-2 wells per heater). The oil would be commingled on a trunkline (downstream of allocation Coriolis meters) once leaving the separators and combined to flow into a reduced number of heater treaters, with 1 heater treater serving as a spare and handling LACT divert. The oil would leave the heaters and be commingled in a reduced number of oil tanks.

Water would be handled in a similar fashion to oil described above. Water from each three-phase separator would be metered with individual turbine meters for allocation purposes, before being commingled into a reduced number of common water tanks.

Once commingled oil is stored in common storage tanks, the oil would be pumped and sold via a common LACT, reducing the number of LACT skids from 3 to 1. Similarly, once commingled water is stored in common storage tanks, it would be pumped down the SWD line for disposal, reducing the number of water pumps in the process. KFOC would also replace/upgrade any tanks as needed once the project has been undertaken.

Vent lines on both the oil tanks and water tanks would be upgraded and fabricated to fit the new commingled tank set-up, including vent line to flare. Oil tank vapors from the commingled oil tanks would be collected by a single VRU and allocated based on oil Coriolis allocation meters. Similarly, heater treater vapors would be collected by another VRU. The gas from both tanks and heaters VRUs would be commingled and metered, then allocated based on oil Coriolis allocation meters. Vent line to flare would also be re-routed and upgraded to simplest, most efficient path. The vent header system will also be upgraded as well as the thief hatches on the production tanks. All current slop tanks would be removed, and LACT reject and/or circulating line from the oil tanks would be plumbed to one of the active heater treaters.

Ultimately, this project would see up to 50% of its current tank count and heater count decommissioned and removed from the site. Additionally, 2 LACT skids and multiple water pumps would be decommissioned and removed from the facility.

Federal Communitization Agreement

Contract No. NMNM 105785709

THIS AGREEMENT entered into as of the 1st day of December, 2020, by and between the parties subscribing, ratifying, or consenting hereto, such parties being hereinafter referred to as "parties hereto."

WITNESSETH:

WHEREAS, the Act of February 25, 1920 (41 Stat. 437), as amended and supplemented, authorizes communitization or drilling agreements communitizing or pooling a Federal oil and gas lease, or any portion thereof, with other lands, whether or not owned by the United States, when separate tracts under such Federal lease cannot be independently developed and operated in conformity with an established well-spacing program for the field or area and such communitization or pooling is determined to be in the public interest; and

WHEREAS, the parties hereto own working, royalty or other leasehold interests, or operating rights under the oil and gas leases and lands subject to this agreement which cannot be independently developed and operated in conformity with the well-spacing program established for the field or area in which said lands are located; and

WHEREAS, the parties hereto desire to communitize and pool their respective mineral interests in lands subject to this agreement for the purpose of developing and producing communitized substances in accordance with the terms and conditions of this agreement:

NOW, THEREFORE, in consideration of the premises and the mutual advantages to the parties hereto, it is mutually covenanted and agreed by and between the parties hereto as follows:

1. The lands covered by this agreement (hereinafter referred to as "communitized area") are described as follows:

E/2 of Section 31 T. 25S, R. 33E, and E/2 of Section 6 T. 26S, R. 33E, Lea County, New Mexico;

Containing 640 acres, and this agreement shall include only the Lower Bone Spring Formation underlying said lands and the natural gas and associated liquid hydrocarbons hereafter referred to as "communitized substances," producible from such formation.

- 2. Attached hereto, and made a part of this agreement for all purposes is Exhibit "A", a plat designating the communitized area and, Exhibit "B", designating the operator of the communitized area and showing the acreage, percentage and ownership of oil and gas interests in all lands within the communitized area, and the authorization, if any, for communitizing or pooling any patented or fee lands within the communitized area.
- 3. The Operator of the communitized area shall be Kaiser-Francis Oil Company, PO Box 21468, Tulsa, OK, 74121-1468. All matters of operations shall be governed by the operator under and pursuant to the terms and provisions of this agreement. A successor operator may be designated by the owners of the working interest in the communitized area and four (4) executed copies of a designation of successor operator shall be filed with the Authorized Officer.
- 4. Operator shall furnish the Secretary of the Interior, or his authorized representative, with a log and history of any well drilled on the communitized area, monthly reports of operations, statements of oil and gas sales and royalties and such other reports as are deemed necessary to compute monthly the royalty due the United States, as specified in the applicable oil and gas operating regulations.
- 5. The communitized area shall be developed and operated as an entirety, with the understanding and agreement between the parties hereto that all communitized substances produced there from shall be allocated among the leaseholds comprising said area in the proportion that the acreage interest of each leasehold bears to the entire acreage interest committed to this agreement.
 - All proceeds, 8/8ths, attributed to unleased Federal lands included within the CA area are to be paid into the appropriate Unleased Lands Account by the designated operator until the land is leased or ownership is established.
- The royalties payable on communitized substances allocated to the individual 6. leases comprising the communitized area and the rentals provided for in said leases shall be determined and paid on the basis prescribed in each of the individual leases. Payments of rentals under the terms of leases subject to this agreement shall not be affected by this agreement except as provided for under the terms and provisions of said leases or as may herein be otherwise provided. Except as herein modified and changed, the oil and gas leases subject to this agreement shall remain in full force and effect as originally made and issued. It is agreed that for any Federal lease bearing a sliding- or step-scale rate of royalty, such rate shall be determined separately as to production from each communitization agreement to which such lease may be committed, and separately as to any noncommunitized lease production, provided, however, as to leases where the rate of royalty for gas is based on total lease production per day, such rate shall be determined by the sum of all communitized production allocated to such a lease plus any noncommunitized lease production.

- 7. There shall be no obligation on the lessees to offset any well or wells completed in the same formation as covered by this agreement on separate component tracts into which the communitized area is now or may hereafter be divided, nor shall any lessee be required to measure separately communitized substances by reason of the diverse ownership thereof, but the lessees hereto shall not be released from their obligation to protect said communitized area from drainage of communitized substances by a well or wells which may be drilled offsetting said area.
- 8. The commencement, completion, continued operation, or production of a well or wells for communitized substances on the communitized area shall be construed and considered as the commencement, completion, continued operation, or production on each and all of the lands within and comprising said communitized area, and operations or production pursuant to this agreement shall be deemed to be operations or production as to each lease committed hereto.
- 9. Production of communitized substances and disposal thereof shall be in conformity with allocation, allotments, and quotas made or fixed by any duly authorized person or regulatory body under applicable Federal or State statutes. This agreement shall be subject to all applicable Federal and State laws or executive orders, rules and regulations, and no party hereto shall suffer a forfeiture or be liable in damages for failure to comply with any of the provisions of this agreement if such compliance is prevented by, or if such failure results from, compliance with any such laws, orders, rules or regulations.
- The date of this agreement is December 1, 2020, and it shall become effective as of 10. this date or from the onset of production of communitized substances, whichever is earlier upon execution by the necessary parties, notwithstanding the date of execution, and upon approval by the Secretary of the Interior or by his duly authorized representative, and shall remain in force and effect for a period of 2 years and for as long as communitized substances are, or can be, produced from the communitized area in paying quantities: Provided, that prior to production in paying quantities from the communitized area and upon fulfillment of all requirements of the Secretary of the Interior, or his duly authorized representative, with respect to any dry hole or abandoned well, this agreement may be terminated at any time by mutual agreement of the parties hereto. This agreement shall not terminate upon cessation of production if, within 60 days thereafter, reworking or drilling operations on the communitized area are commenced and are thereafter conducted with reasonable diligence during the period of nonproduction. The 2year term of this agreement will not in itself serve to extend the term of any Federal lease which would otherwise expire during said period.
- 11. The covenants herein shall be construed to be covenants running with the land with respect to the communitized interests of the parties hereto and their successors in interests until this agreement terminates and any grant, transfer, or conveyance of any such land or interest subject hereto, whether voluntary or not, shall be and hereby is conditioned upon the assumption of all obligations hereunder by the

grantee, transferee, or other successor in interest, and as to Federal land shall be subject to approval by the Secretary of the Interior, or his duly authorized representative.

- 12. It is agreed between the parties hereto that the Secretary of the Interior, or his duly authorized representative, shall have the right of supervision over all Fee and State mineral operations within the communitized area to the extent necessary to monitor production and measurement, and assure that no avoidable loss of hydrocarbons occur in which the United States has an interest pursuant to applicable oil and gas regulations of the Department of the Interior relating to such production and measurement.
- 13. This agreement shall be binding upon the parties hereto and shall extend to and be binding upon their respective heirs, executors, administrators, successors, and assigns.
- 14. This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument, in writing, specifically referring hereto, and shall be binding upon all parties who have executed such a counterpart, ratification or consent hereto with the same force and effect as if all parties had signed the same document.
- 15. <u>Nondiscrimination</u>. In connection with the performance of work under this agreement, the operator agrees to comply with all the provisions of Section 202(1) to (7) inclusive, of Executive Order 11246 (30F.R. 12319), as amended, which are hereby incorporated by reference in this agreement.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written and have set opposite their respective names the date of execution.

KAISER-FRANCIS OIL COMPANY Operator/Lessee

Federal Communitization Agreement

Contract No. Nmnm 105780582

THIS AGREEMENT entered into as of the 1st day of December, 2020, by and between the parties subscribing, ratifying, or consenting hereto, such parties being hereinafter referred to as "parties hereto."

WITNESSETH:

WHEREAS, the Act of February 25, 1920 (41 Stat. 437), as amended and supplemented, authorizes communitization or drilling agreements communitizing or pooling a Federal oil and gas lease, or any portion thereof, with other lands, whether or not owned by the United States, when separate tracts under such Federal lease cannot be independently developed and operated in conformity with an established well-spacing program for the field or area and such communitization or pooling is determined to be in the public interest; and

WHEREAS, the parties hereto own working, royalty or other leasehold interests, or operating rights under the oil and gas leases and lands subject to this agreement which cannot be independently developed and operated in conformity with the well-spacing program established for the field or area in which said lands are located; and

WHEREAS, the parties hereto desire to communitize and pool their respective mineral interests in lands subject to this agreement for the purpose of developing and producing communitized substances in accordance with the terms and conditions of this agreement:

NOW, THEREFORE, in consideration of the premises and the mutual advantages to the parties hereto, it is mutually covenanted and agreed by and between the parties hereto as follows:

1. The lands covered by this agreement (hereinafter referred to as "communitized area") are described as follows:

E/2 of Section 31 T. 25S, R. 33E, and E/2 of Section 6 T. 26S, R. 33E, Lea County, New Mexico;

Containing 640 acres, and this agreement shall include only the Wolfcamp Formation underlying said lands and the natural gas and associated liquid hydrocarbons hereafter referred to as "communitized substances," producible from such formation.

- 2. Attached hereto, and made a part of this agreement for all purposes is Exhibit "A", a plat designating the communitized area and, Exhibit "B", designating the operator of the communitized area and showing the acreage, percentage and ownership of oil and gas interests in all lands within the communitized area, and the authorization, if any, for communitizing or pooling any patented or fee lands within the communitized area.
- 3. The Operator of the communitized area shall be Kaiser-Francis Oil Company, PO Box 21468, Tulsa, OK, 74121-1468. All matters of operations shall be governed by the operator under and pursuant to the terms and provisions of this agreement. A successor operator may be designated by the owners of the working interest in the communitized area and four (4) executed copies of a designation of successor operator shall be filed with the Authorized Officer.
- 4. Operator shall furnish the Secretary of the Interior, or his authorized representative, with a log and history of any well drilled on the communitized area, monthly reports of operations, statements of oil and gas sales and royalties and such other reports as are deemed necessary to compute monthly the royalty due the United States, as specified in the applicable oil and gas operating regulations.
- 5. The communitized area shall be developed and operated as an entirety, with the understanding and agreement between the parties hereto that all communitized substances produced there from shall be allocated among the leaseholds comprising said area in the proportion that the acreage interest of each leasehold bears to the entire acreage interest committed to this agreement.
 - All proceeds, 8/8ths, attributed to unleased Federal lands included within the CA area are to be paid into the appropriate Unleased Lands Account by the designated operator until the land is leased or ownership is established.
- The royalties payable on communitized substances allocated to the individual 6. leases comprising the communitized area and the rentals provided for in said leases shall be determined and paid on the basis prescribed in each of the individual leases. Payments of rentals under the terms of leases subject to this agreement shall not be affected by this agreement except as provided for under the terms and provisions of said leases or as may herein be otherwise provided. Except as herein modified and changed, the oil and gas leases subject to this agreement shall remain in full force and effect as originally made and issued. It is agreed that for any Federal lease bearing a sliding- or step-scale rate of royalty, such rate shall be determined separately as to production from each communitization agreement to which such lease may be committed, and separately as to any noncommunitized lease production, provided, however, as to leases where the rate of royalty for gas is based on total lease production per day, such rate shall be determined by the sum of all communitized production allocated to such a lease plus any noncommunitized lease production.

- 7. There shall be no obligation on the lessees to offset any well or wells completed in the same formation as covered by this agreement on separate component tracts into which the communitized area is now or may hereafter be divided, nor shall any lessee be required to measure separately communitized substances by reason of the diverse ownership thereof, but the lessees hereto shall not be released from their obligation to protect said communitized area from drainage of communitized substances by a well or wells which may be drilled offsetting said area.
- 8. The commencement, completion, continued operation, or production of a well or wells for communitized substances on the communitized area shall be construed and considered as the commencement, completion, continued operation, or production on each and all of the lands within and comprising said communitized area, and operations or production pursuant to this agreement shall be deemed to be operations or production as to each lease committed hereto.
- 9. Production of communitized substances and disposal thereof shall be in conformity with allocation, allotments, and quotas made or fixed by any duly authorized person or regulatory body under applicable Federal or State statutes. This agreement shall be subject to all applicable Federal and State laws or executive orders, rules and regulations, and no party hereto shall suffer a forfeiture or be liable in damages for failure to comply with any of the provisions of this agreement if such compliance is prevented by, or if such failure results from, compliance with any such laws, orders, rules or regulations.
- The date of this agreement is December 1, 2020, and it shall become effective as of 10. this date or from the onset of production of communitized substances, whichever is earlier upon execution by the necessary parties, notwithstanding the date of execution, and upon approval by the Secretary of the Interior or by his duly authorized representative, and shall remain in force and effect for a period of 2 years and for as long as communitized substances are, or can be, produced from the communitized area in paying quantities: Provided, that prior to production in paying quantities from the communitized area and upon fulfillment of all requirements of the Secretary of the Interior, or his duly authorized representative, with respect to any dry hole or abandoned well, this agreement may be terminated at any time by mutual agreement of the parties hereto. This agreement shall not terminate upon cessation of production if, within 60 days thereafter, reworking or drilling operations on the communitized area are commenced and are thereafter conducted with reasonable diligence during the period of nonproduction. The 2year term of this agreement will not in itself serve to extend the term of any Federal lease which would otherwise expire during said period.
- 11. The covenants herein shall be construed to be covenants running with the land with respect to the communitized interests of the parties hereto and their successors in interests until this agreement terminates and any grant, transfer, or conveyance of any such land or interest subject hereto, whether voluntary or not, shall be and hereby is conditioned upon the assumption of all obligations hereunder by the

grantee, transferee, or other successor in interest, and as to Federal land shall be subject to approval by the Secretary of the Interior, or his duly authorized representative.

- 12. It is agreed between the parties hereto that the Secretary of the Interior, or his duly authorized representative, shall have the right of supervision over all Fee and State mineral operations within the communitized area to the extent necessary to monitor production and measurement, and assure that no avoidable loss of hydrocarbons occur in which the United States has an interest pursuant to applicable oil and gas regulations of the Department of the Interior relating to such production and measurement.
- 13. This agreement shall be binding upon the parties hereto and shall extend to and be binding upon their respective heirs, executors, administrators, successors, and assigns.
- 14. This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument, in writing, specifically referring hereto, and shall be binding upon all parties who have executed such a counterpart, ratification or consent hereto with the same force and effect as if all parties had signed the same document.
- 15. <u>Nondiscrimination.</u> In connection with the performance of work under this agreement, the operator agrees to comply with all the provisions of Section 202(1) to (7) inclusive, of Executive Order 11246 (30F.R. 12319), as amended, which are hereby incorporated by reference in this agreement.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first above written and have set opposite their respective names the date of execution.

| 2 | 40 | 6.250000% |
| 3 | 320 | 50.000000% |
| TOTAL | 640.00 | 100.000000% |

Red Hills Facility Pad 2 – Prorated Allocation

GAS ALLOCATION

Each well has a Wellhead (WH) meter and a Gas Lift (GL) meter. The CTB has (6) Sales Meters that measure the volume of gas that leaves the CTB, 2 twin meters apiece on the Avalon side, Bone Springs side and Wolfcamp side of the CTB. These Sales meters (CTB Sales) are considered FMPs. This CTB has 2 different drilling pads that feed into it: Drilling Pad 7 which has (10) wellheads and Drilling Pad 8 which has (4) wellheads. There are (2) INJ meters that measure gas coming back to the pads from the discharge of the centralized compressor station, 1 apiece for each of drilling pads 7 and 8. These INJ meters are considered FMPs.

- 1. Net CTB Gas is the volume of lease gas produced/sold from the CTB. Net CTB Gas is calculated by subtracting HPGL INJ & VRU volume from the CTB Sales.
- 2. Each well's theoretical gas production is calculated by subtracting the well's GL meter volume from the WH meter volume.
- 3. Each well's gas production allocation percentage is calculated by dividing the well's theoretical gas production by the sum of all well theoretical gas production volumes.
- 4. Well Net CTB Gas is calculated by multiplying each well's gas production allocation percentage by Net CTB Gas volume.
- 5. HP flare volume for each well is calculated by multiplying each well's gas production allocation percentage by the HP flare meter volume.
- VRU Meter measures the gas recovered from the oil tanks and heater treaters. Well VRU volume is determined by oil production. Each well's oil production allocation percentage is multiplied by the VRU meter to determine the well VRU volume.
- 7. Total Net FMP Gas Volume is the total volume sold from the CTB to the gathering line. Total Net FMP Gas is calculated by adding VRU volume and Net CTB Gas.
- 8. Total Allocated Gas Production for each well is calculated by adding the Net CTB Gas, HP flare, Lease Use, and VRU volume

OIL ALLOCATION

Each well has an oil meter measuring the volume of oil produced by the well. The volume measured by a well's oil meter is used to allocate the total production and the total sales (FMP) back to each well.

- Allocated CTB Production is the volume of oil produced by the CTB and is calculated by subtracting the beginning inventory from the sum of the ending tank inventory and the pipeline LACT volume.
- 2. Theoretical Oil Production % is calculated by dividing each oil meter volume into the sum of oil meters
- 3. Allocated Production is calculated by multiplying Theoretical Oil Production % by Allocated CTB Production

- 4. Total Allocated Oil Sales are calculated using the first-in, first-out (FIFO) method. The beginning inventory is the previous accounting period's Ending Tank Inventory.
- 5. The first step to calculating a well's Total Allocated Oil Sales is to calculate the Theoretical Beginning Tank Inventory % for each well by dividing the well's Beginning Tank Inventory by the total CTB Beginning Tank Inventory.
- 6. If the Oil Sales (FMP) volume is less than or equal to the CTB Beginning Tank Inventory, multiply the Theoretical Beginning Tank Inventory % by the Oil Sales (FMP) volume to get the Beginning Tank Inventory Sales volume.
- 7. If the Oil Sales (FMP) volume is greater than the CTB Beginning Tank Inventory, the New Inventory Oil Sales is calculated by multiplying the difference between the Oil Sales and Beginning Tank Inventory Sales by the Theoretical Oil Production %.
- 8. Total Allocated Oil Sales is the sum of Beginning Tank Inventory Sales and New Inventory Oil Inventory Sales.

WATER ALLOCATION

Each well has a water meter that measures the volume of water produced by the well. The volume measured by a well's water meter is used to allocate the total production and total disposed volume back to each well.

- 1. Allocated CTB Water Production is the volume of water produced by the CTB and is calculated by subtracting the beginning inventory from the sum of the ending tank inventory and the Water Transfer Meter (Disposal Volume).
- 2. Theoretical Water Production % is calculated by dividing each well's water meter volume by the sum of the water meters.
- 3. Allocated Water Production is calculated by multiplying Theoretical Water Production % by Allocated CTB Water Production.
- 4. Disposed Water Volume is calculated using the first-in, first-out (FIFO) method. The beginning inventory is the previous accounting period's Ending Tank Inventory.
- 5. The first step to calculating a well's Total Disposed Water Volume is to calculate the Theoretical Beginning Tank Inventory % for each well by dividing the well's Beginning Tank Inventory by the total CTB Beginning Tank Inventory.
- 6. If the Water Transfer Meter (Disposal) volume is less than or equal to the CTB Beginning Tank Inventory, multiply the Theoretical Beginning Tank Inventory % by the Water Transfer Meter volume to get the Beginning Tank Inventory Disposal volume.
- 7. If the Water Transfer Meter volume is greater than CTB Beginning Tank Inventory, the New Water Inventory Disposal is calculated by multiplying the difference between the Water Transfer Meter Volume and Beginning Tank Inventory Sales by Theoretical Water Production %.
- 8. Total Disposed Water Volume is the sum of Beginning Tank Inventory Disposal and New Inventory Disposal Volume.

| IDENTIFICATION | Unique number assinged to each meter used to measure gas. |
|----------------------|---|
| WELLHEAD | Measures the volume of gas that leaves a well's separator. |
| GAS LIFT | Measures the volume of gas that is injected into a well for gas lift. |
| | Formula to calculate the volume of native gas produced from the well. (WH-GL) |
| | Number of hours the well produced, used to allocate Lease Use gas. |
| | Formula to calculate the volume of gas for royalty purposes. HPGL INJ Gas is subtracted from the CTB Sales FMP. |
| Multiple Meters | Meters that measure the volume of gas-lift gas that comes back to the wells for gas lift injection via centralized field compression. |
| Multiple Meters | Meters that measures the volume of gas that leaves the CTB. |
| HIGH PRESSURE FLARE | Measures the high pressure flare from the CTB |
| CENTRAL TANK BATTERY | A group of wells producing into shared FMPs. |
| VAPOR RECOVERY UNIT | Measures gas vapors recovered from oil tanks and heaters. Allocated based on oil production |
| | Total gas produced from the CTB. Calculated by Net CTB Gas + HP Flare + Lease Use + VRU |
| | Total gas sold from CTB. Calculated by Net CTB Gas + VRU |
| | Gas that is used to operate CTB equipment (heaters, pilot). |
| | WELLHEAD GAS LIFT Multiple Meters Multiple Meters HIGH PRESSURE FLARE CENTRAL TANK BATTERY |

| Oil Meter | Measures the volume of oil that leaves a well's separator. |
|--------------------------------|---|
| Oil Production % | Theoretical Oil Production %, calculated by dividing the Oil Meter volume by the sum of all Oil Meter volumes. |
| Allocated Production | Calculated by multiplying the Oil Production % by the CTB Oil Production |
| CTB Production | Calculation to determine the volume produced by the CTB during accounting period. (Ending Inventory - Beginning Inventory + Oil Sales) |
| % of Beginning Inventory | Calculated by dividing a well's Beginning Tank Inventory by the CTB Beginning Tank Inventory. |
| Beginning Tank Inventory Sales | If the Oil Sales (FMP) volume is less than or equal to the CTB Beginning Tank Inventory, multiply % of Beginning Tank Inventory by the Oil Sales (FMP) volume to get the Beginning Tank Inventory Sales volume. |
| New Inventory Oil Sales | If Oil Sales (FMP) volume exceeds CTB Beginning Tank Inventory, New Inventory Oil Sales is calculated by multiplying the difference between Oil Sales and Beginning Tank Inventory Sales by Oil Production %. |
| Oil Sales | Volume measured by the Pipeline LACT (FMP), which is sold to purchaser |
| Total Allocated Sales | The total Oil Sales measured by the Pipeline LACT (FMP) which is allocated to each well by summing Beginning Tank Inventory Sales and New Inventory Oil Sales. |
| Beginning Tank Inventory | Inventory from previous accounting period's calculated Ending Inventory. If CTB is new, Beginning Inventory is zero. |
| Ending Tank Inventory | Calculated Inventory based on Allocated production, Total Allocated Sales, and Beginning Tank Inventory, (Beginning Tank Inventory - Total Allocated Sales + Allocated Production) |

| Water Meter | Measures the volume of water that leaves a well's separator. |
|-----------------------------------|--|
| Water Production % | Theoretical Water Production %, calculated by dividing the Water Meter volume by the sum of all Water Meter volumes. |
| Allocated Production | Calculated by multiplying the Water Production % by the CTB Water Production |
| CTB Production | Calculation to determine the volume produced by the CTB during accounting period. (Ending Inventory - Beginning Inventory + Disposal Volume) |
| % of Beginning Inventory | Calculated by dividing a well's Beginning Tank Inventory by the CTB Beginning Tank Inventory. |
| Beginning Tank Inventory Disposal | If the Disposal Vol. is less than or equal to the CTB Beginning Tank Inventory, multiply % of Beginning Tank Inventory by the Water Transfer volume to get the Beginning Tank Inventory Sales volume. |
| New Water Inventory Disposal | If Disposal exceeds CTB Beginning Tank Inventory, New Water Inventory Disposal is calculated by multiplying the difference between Disposal Vol. and Beginning Tank Inventory Sales by Water Production %. |
| Disposal Volume | Volume measured the Water Transfer Meter which leaves the CTB for disposal. |
| Total Disposal | The total Disposal Volime measured by the Water Transfer Meter which is allocated to each well by summing Beginning Tank Inventory Disposal and New Water Inventory Disposal. |
| Beginning Tank Inventory | Inventory from previous accounting period's calculated Ending Inventory. If CTB is new, Beginning Inventory is zero. |
| Ending Tank Inventory | Calculated Inventory based on Allocated production, Total Allocated Sales, and Beginning Tank Inventory, (Beginning Tank Inventory - Total Disposal + Allocated Production) |

3c. All meters comply with BLM regulations.

All allocation meters installed shall comply with the Bureau of Land Management (BLM) Facility Measurement Point (FMP) regulations, specifically as outlined in **43 CFR 3175**, and shall meet the applicable American Petroleum Institute (API) standards, including **API MPMS Chapter 14.3 (Orifice Metering of Natural Gas)** and **API MPMS Chapter 21.1 (Flow Measurement Using Electronic Metering Systems)**. These regulations and standards ensure that all measurement devices meet federal accuracy requirements and industry best practices for the allocation and reporting of production data.

Steve Ledford

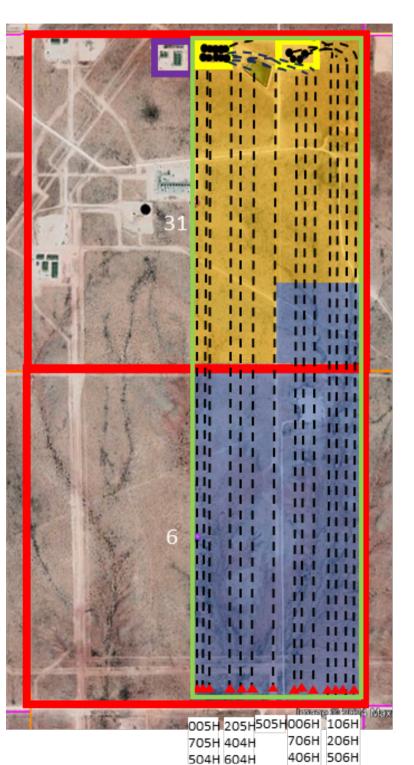

Gas Measurement Supervisor

Sample Information

| | | Sample Information |
|--------------------------------|------------------------|-------------------------------------|
| Sample Name | | TF 1140 |
| Operator | | Kaiser Francis |
| Lease | | RH 005H FP2 |
| Sample Date/Time | Effective Date: | 7-11-24 11:00 AM |
| Sample End Date | | |
| Laboratory | | Laboratory Services and Measurement |
| Technician | | LC |
| Analyzer Type | | Gas Chromatograph - TCD |
| Analyzer Make & Model | | Agilent Micro GC 3000 |
| Last Calibration/Validation Da | te | 7-22-2024 |
| Sample Temperature | | 78 F |
| Sample Pressure | | 145 PSI |
| Sample Flow Rate | | 1313 MCF |
| Ambient Temperature | | 86 F |
| Heat Tracing | | No |
| Sample Type | | Spot |
| Sampling Method | | Fill and Purge |
| Company Collecting Sample | | LSM |
| Sampled By | | James Hill |
| Cylinder # | | 3191 |
| Mole, Weight, or Percent (For | Flowcal DON'T EDIT) | M |
| Sample Calculation Method(F | or Flowcal DON'T EDIT) | GPA 2145 |
| Report Date | | 2024-07-24 10:39:28 |

Component Results

Bureau of Land Management

Carlsbad Field Office 620 East Greene Street Carlsbad, New Mexico 88220 575-234-5972

Conditions of Approval Off-Lease Storage and Lease/CA/PA Commingling of Measurement and Sales of Oil and Gas Production

- 1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
 - a. All well tests for allocation shall be performed per NMOCD requirements.
- This agency reserves the right to modify or rescind approval whenever it determines continued
 use of the approved method may adversely affect the public's interest (surface and/or
 subsurface).
- 3. Submittal of a new surface commingling sundry is required if:
 - a. There are any changes to the allocation methodology
 - b. Proposed Communitization Agreements (CA) or Participating Areas (PA) are not approved or are approved with changes to the original proposal
- 4. If new surface disturbance on BLM managed land is proposed, the operator shall submit appropriate surface use plan of operations and right-of-way grant applications to the Carlsbad Field Office for approval prior to any construction.
- 5. Off-lease measurement, storage, and sales from sources in this package are approved.
- 6. Non-FMP meters will meet the standards the operator proposed in the sundry.
- 7. Within 30 days of implementing the allocation methodology in this application, the operator shall submit a new site facility diagram via Sundry Notice which meets the requirements of **43 CFR 3173.11**. Include the effective date for the allocation methodology with the sundry notice.
 - a. In lieu of FMP numbers on the site facility diagram, include all meter serial numbers or assign unique meter ID numbers that are reflected and identifiable in the field. This is to include allocation meters.
- 8. This approval does not allow for a variance from 43 CFR 3170.4. This approval does not authorize bypasses around any approved measurement point, nor does it approve the use of headers capable of acting as a bypass.
- 9. This approval does not authorize royalty-free fuel usage at the compressor station downstream of the CTB's FMPs; it must be an additional request separate from this application:
 - a. Submit an additional Sundry Notice containing the information required under **43 CFR 3178.9**. Note: A variance to 43 CFR 3178.7(b)(2) may be granted as long as the fuel gas is being metered and is allocable back to the participating wells.

Sorry to hear about your car, what a bummer!

Please see the attached Admin Checklist. I also attached the Proof of Notice and BLM Acceptance just in case you haven't seen those.

Please let me know if I can provide anything else.

Hi Christina,

I apologize, I had a bit of a car issue this morning.

I have attached a blank copy of the admin checklist. The checklist should be included in the packet that is submitted to the Division.

Thanks.

Sarah Clelland

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good Morning,

Dean usually emails the Admin Checklist as part of his review, but I haven't seen one yet for this Action ID or the other. Two questions-

- 1. Is there a different (preferred) way you would like to handle this?
- 2. Will you send a copy of the admin checklist PDF please?

Best,

Christina Opfer

To whom it may concern (c/o Christina Opfer for Kaiser Francis Oil Company),

The Division is reviewing the following application:

| Action ID | 405465 | |
|-----------|----------------------------|--|
| Admin No. | | |
| Applicant | Kaiser Francis Oil Company | |
| Title | Red Hills Facility Pad 2 | |
| Sub. Date | 11/21/2024 | |

Please provide the following additional supplemental documents:

• Admin Checklist is missing. Please email as a PDF file so it can be added to application.

Please provide additional information regarding the following:

•

Additional notes:

•

All additional supplemental documents and information may be provided via email and should be done by replying to this email. The produced email chain will be uploaded to the file for this application.

Please note that failure to take steps to address each of the requests made in this email within 10 business days of receipt of this email may result in the Division rejecting the application requiring the submittal of a new application by the applicant once it is prepared to address each of the topics raised.

Thanks.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION FOR SURFACE COMMINGLING SUBMITTED BY KAISER-FRANCIS OIL COMPANY

ORDER NO. PLC-972

ORDER

The Director of the New Mexico Oil Conservation Division ("OCD"), having considered the application and the recommendation of the OCD Engineering Bureau, issues the following Order.

FINDINGS OF FACT

- 1. Kaiser-Francis Oil Company ("Applicant") submitted a complete application to surface commingle the oil and gas production from the pools, leases, and wells as described in Exhibit A ("Application").
- 2. Applicant proposed a method to allocate the oil and gas production to the pools, leases, and wells to be commingled.
- 3. Applicant provided notice of the Application to all persons owning an interest in the oil and gas production to be commingled, including the owners of royalty and overriding royalty interests, regardless of whether they have a right or option to take their interests in kind, and those persons either submitted a written waiver or did not file an objection to the Application.
- 4. Applicant provided notice of the Application to the Bureau of Land Management ("BLM") or New Mexico State Land Office ("NMSLO"), as applicable.
- 5. Applicant certified the commingling of oil and gas production from the pools, leases, and wells will not in reasonable probability reduce the value of the oil and gas production to less than if it had remained segregated.

CONCLUSIONS OF LAW

- 6. OCD has jurisdiction to issue this Order pursuant to the Oil and Gas Act, NMSA 1978, §§ 70-2-6, 70-2-11, 70-2-12, 70-2-16, and 70-2-17, 19.15.12. NMAC, and 19.15.23. NMAC.
- 7. Applicant satisfied the notice requirements for the Application in accordance with 19.15.12.10 A.(2) NMAC, 19.15.12.10 C.(4)(c) NMAC, and 19.15.12.10 C.(4)(e) NMAC, as applicable.
- 8. Applicant satisfied the notice requirements for the Application in accordance with 19.15.23.9 A.(5) NMAC and 19.15.23.9 A.(6) NMAC, as applicable.
- 9. Applicant's proposed method of allocation, as modified herein, complies with 19.15.12.10 B.(1) NMAC or 19.15.12.10 C.(1) NMAC, as applicable.

Order No. PLC-972 Page 1 of 3

- 10. Commingling of oil and gas production from state, federal, or tribal leases shall not commence until approved by the BLM or NMSLO, as applicable, in accordance with 19.15.12.10 B.(3) NMAC and 19.15.12.10 C.(4)(h) NMAC.
- 11. By granting the Application with the conditions specified below, this Order prevents waste and protects correlative rights, public health, and the environment.

ORDER

- 1. Applicant is authorized to surface commingle oil and gas production from the pools, leases, and wells as described in Exhibit A.
 - Applicant is authorized to store and measure oil and gas production off-lease from the pools, leases, and wells as described in Exhibit A at a central tank battery or gas title transfer meter described in Exhibit A.
- 2. The oil and gas production for each well identified in Exhibit A shall be separated and metered prior to commingling it with production from another well.
- 3. Applicant shall measure and market the commingled oil at a central tank battery described in Exhibit A in accordance with this Order and 19.15.18.15. NMAC or 19.15.23.8. NMAC.
- 4. Applicant shall measure and market the commingled gas at a well pad, central delivery point, central tank battery, or gas title transfer meter described in Exhibit A in accordance with this Order and 19.15.19.9. NMAC, provided however that if the gas is vented or flared, and regardless of the reason or authorization pursuant to 19.15.28.8 B. NMAC for such venting or flaring, Applicant shall measure or estimate the gas in accordance with 19.15.28.8 E. NMAC.
- 5. Applicant shall calibrate the meters used to measure or allocate oil and gas production in accordance with 19.15.12.10 C.(2) NMAC.
- 6. If the commingling of oil and gas production from any pool, lease, or well reduces the value of the commingled oil and gas production to less than if it had remained segregated, no later than sixty (60) days after the decrease in value has occurred Applicant shall submit a new surface commingling application to OCD to amend this Order to remove the pool, lease, or well whose oil and gas production caused the decrease in value. If Applicant fails to submit a new application, this Order shall terminate on the following day, and if OCD denies the application, this Order shall terminate on the date of such action.
- 7. Applicant shall not commence commingling oil or gas production from state, federal, or tribal leases until approved by the BLM or NMSLO, as applicable.
- 8. If OCD determines that Applicant has failed to comply with any provision of this Order, OCD may take any action authorized by the Oil and Gas Act or the New Mexico Administrative Code (NMAC).

Order No. PLC-972 Page 2 of 3

9. OCD retains jurisdiction of this matter and reserves the right to modify or revoke this Order as it deems necessary.
