You have requested to drill this horizontal well at an unorthodox well location described above in the referenced pool or formation. 19.15.16.15(B)(1)(a) NMAC governs this proposed well and provides that the operator dedicates a horizontal well at a standard horizontal spacing unit that comprises of one or more contiguous tracts that the horizontal well's completed interval penetrates, each of which consists of a governmental quarter - quarter section or equivalent. 19.15.16.15(C)(1)(a) NMAC governs the distance in the horizontal plane from any point in the completed interval to any outer boundary of the horizontal spacing unit, measured along a line perpendicular to the completed interval or to the tangent thereof, shall be a minimum of 330 feet

for an **oil** well. 19.15.16.15(C)(1)(b) NMAC governs the first and last take point of a horizontal well shall be no closer than 100 feet for a well within the horizontal plane, to any outer boundary of the horizontal spacing unit.

The request to deviate from an orthodox location has met all requirements of 19.15.16.15 (C)(5)(a) NMAC. It is understood that you are seeking this exception in order to create a non-standard location, comprised of First and Last Take Points referenced above within the described Horizontal Spacing Unit.

This well's completed interval is as close as 150 feet to the western edge of the horizontal spacing unit. Encroachment will impact the following tracts.

Section 36, encroachment to the W/2 W/2

The Division understands you have given notice of this application to all operators or owners who are "affected persons," as defined in 19.15.2.7(A)(8) NMAC, in all adjoining units towards which the proposed location encroaches.

Division understands you are seeking this unorthodox location to avoid the risk of collision with an existing well within the unit mitigating the risk of harm and damage to the land, reservoir, and safety. Thus, preventing waste within the Wolfcamp formation underlying E/2 W/2 of Section 36 and the E/2 W/2 of Section 25.

Your application has been filed under 19.15.16.15(C)(6) NMAC, 19.15.15.13 NMAC and 19.15.4.12 (A)(2) NMAC.

Per 19.15.15.13 (B) NMAC, **Division approves this unorthodox location.**

Reference this NSL order number on the As Drilled C-102 submitted with the Authorization to Transport, to place this well into production.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of further orders as Division deems necessary.

Devon has included as Exhibit B, a letter explaining why this application is needed. This well will produce from the WC-015 G-08 S233135D; Wolfcamp Pool (Pool Code 98236). Statewide rules require that an oil well's completed interval shall be no closer than a 330' distance from the outer boundary of the horizontal spacing unit.

The unorthodox location encroaches toward W/2 W/2 of Section 36, in Township 23 South, Range 31 East, NMPM, Eddy County, New Mexico.

Devon attests that, on or before submission of this application, it sent notice to the affected persons/parties in the adjoining horizontal spacing unit which covers the W/2 W/2 of Sections 36 and 25, in Township 23 South, Range 31 East, NMPM, Eddy County, New Mexico. Devon has also provided notice to the Bureau of Land Management ("BLM") and the New Mexico State Land Office ("NMSLO") to the extent that federal and state leases are involved, pursuant to NMAC 19.15.2.7A(8)(d); said notice as described satisfies all provisions of NMAC 19.15.4.12A(2); copies of the application and required plat maps were furnished. Devon provides herein a sectional map of this area, attached as Exhibit C. Proof of mailing, along with a copy of the notice letter sent to the affected persons, is attached hereto as Exhibit D. Devon has informed us that there is no pooling case associated with this application.

Your consideration in this matter is appreciated.

Sincerely,

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

RE: Application for Non-Standard Location
Engineering Statement
Devon Energy Production Company, L.P.
Todd 36-25 State Fed Com 812H
E2W2 of Sections 25 & 36 T23S-R31E
Eddy County, New Mexico

Dear Mr. Lowe:

Devon Energy Production Company, LP ("Devon") respectfully requests administrative approval of a non-standard location for the Todd 36-25 State Fed Com 812H (the "812H Well") referenced above. The Well is in the WC-015 G-08 S233135D; WOLFCAMP (Pool Code 98236) with a first take point at roughly 1,470' FWL and last take point at roughly 1650' FWL. The non-standard location is necessary due to the location an existing well within the spacing unit for the 812H Well, the Todd 36 State 625H Well (API No. 30-015-45939). In order to avoid the risk of collision, Devon intends to drill the first half of the 812H Well in a location closer than 330' to the W/2 W/2 of Section 36 before returning to a standard location in Section 25. Devon's responsibility as a prudent operator is to mitigate the risk of harm and damage to the land, reservoir, and safety, as well as to minimize reserves left in the ground. Altering the location of the wellbore in Section 36 to avoid the risk of collision is the prudent approach to development of this unit while also ensuring the ultimate recovery of reserves and thereby preventing the waste of natural resources.

Respectfully,

Devon Energy Production Company, L.P.
