- The central tank battery to service the subject wells is located in the NE/4 of Section 12, Township 22 South, Range 34 East.
- State ownership in the four spacing units is identical. Working interest ownership is diverse and Centennial will notify all owners of the planned commingling.
- The approval of this commingling application will not negatively affect the royalty revenue of the State of New Mexico due to the allocation methodology described in the application. The approval of this application will also provide for reduced surface disturbance in this development area.

## Process Narrative – Chimichangas 12 CTB 2

*Update: Connecting two new wells: Margarita 12 State Com 601H & 602H*

*Existing Wells: Chimichangas 12 State 501H, Chimichangas 12 State 502H, Chimichangas 12 State 503H, Chimichangas 12 State Com 601H, Chimichangas 12 State Com 602H*

The production from each well flows from the well head to a dedicated 3-phase separator. The production is separated into 3 independent streams and each stream is measured as it leaves the separator. The gas is measured using a dual-chamber orifice meter which is used to allocate sales volume, flare volume, and on-site beneficial use volume. Serial numbers for these meters can be found in Table 1 below. Note- the 601H and 602H meter info will be provided when installed.

The oil from each separator is measured using an Endress & Hauser Coriolis Meter. Downstream of the oil meter, each well's oil is commingled in a common header and flows to two heated horizontal separators (heater treaters) to aid in separation of water entrained in the oil. Oil from the heater treaters is routed to three 1000-bbl steel tanks. APG MPX tank level transmitters are installed on each tank to measure oil volumes in each tank. Oil from these tanks is pumped into a sales pipeline using three LACT units. Serial Numbers for these meters can be found in Table 2 below. Note- the 601H and 602H meter info will be provided when installed.

The water from each separator is measured using an Endress & Hauser Mag Meter. Downstream of the meter, each well's water is commingled in a common header and flows to one 1250-bbl gun barrel tanks. Water settles in the gun barrel tanks and then flows into three 1000-bbl water tanks. APG MPX tank level transmitters are installed on each tank to measure water volumes in each tank. From these tanks, the water is pumped into a pipeline and sent to be reused or to an SWD. Serial Numbers for water allocation meters can be found in Table 3 below. Note - the 601H and 602H meter info will be provided when installed.

Gas that flashes from Oil in the tanks is captured with a VRU and is metered using a TMC SureShot orifice meter with Total Flow. If the VRU shuts down, flash gas is routed to a low-pressure flare and is metered using a Kurz Thermal Mass Meter.

Gas evolved from the oil in the Heater Treaters is captured with a VRU, metered using the same VRU meter as the tank VRU, and routed to the gas sales pipeline. If this VRU shuts down, gas is routed to a medium-pressure flare and is metered using a RJ orifice meter with Total Flow. Gas volumes measured with these meters are allocated back to wells based on oil production volumes from each well since the gas is evolved from the oil.

If the gas sales pipeline or midstream company experiences any problems and cannot take gas, it will flow to a high-pressure flare and is metered used a TMC SureShot orifice meter with Total Flow. Serial Numbers for these meters can be found in Table 4 below.

OIL CONSERVATION DIVISION**

**APPLICATION FOR SURFACE COMMINGLING  
SUBMITTED BY PERMIAN RESOURCES OPERATING, ORDER NO. PLC-1015  
LLC**

**ORDER**

The Director of the New Mexico Oil Conservation Division (“OCD”), having considered the application and the recommendation of the OCD Engineering Bureau, issues the following Order.

**FINDINGS OF FACT**

1. Permian Resources Operating, LLC (“Applicant”) submitted a complete application to surface commingle the oil and gas production from the pools, leases, and wells as described in Exhibit A (“Application”).
2. Applicant proposed a method to allocate the oil and gas production to the pools, leases, and wells to be commingled.
3. Applicant provided notice of the Application to all persons owning an interest in the oil and gas production to be commingled, including the owners of royalty and overriding royalty interests, regardless of whether they have a right or option to take their interests in kind, and those persons either submitted a written waiver or did not file an objection to the Application.
4. Applicant provided notice of the Application to the Bureau of Land Management (“BLM”) or New Mexico State Land Office (“NMSLO”), as applicable.
5. Applicant certified the commingling of oil and gas production from the pools, leases, and wells will not in reasonable probability reduce the value of the oil and gas production to less than if it had remained segregated.

**CONCLUSIONS OF LAW**

6. OCD has jurisdiction to issue this Order pursuant to the Oil and Gas Act, NMSA 1978, §§ 70-2-6, 70-2-11, 70-2-12, 70-2-16, and 70-2-17, 19.15.12. NMAC, and 19.15.23. NMAC.
7. Applicant satisfied the notice requirements for the Application in accordance with 19.15.12.10 A.(2) NMAC, 19.15.12.10 C.(4)(c) NMAC, and 19.15.12.10 C.(4)(e) NMAC, as applicable.
8. Applicant satisfied the notice requirements for the Application in accordance with 19.15.23.9 A.(5) NMAC and 19.15.23.9 A.(6) NMAC, as applicable.

9. Applicant's proposed method of allocation, as modified herein, complies with 19.15.12.10 B.(1) NMAC or 19.15.12.10 C.(1) NMAC, as applicable.
10. Commingling of oil and gas production from state, federal, or tribal leases shall not commence until approved by the BLM or NMSLO, as applicable, in accordance with 19.15.12.10 B.(3) NMAC and 19.15.12.10 C.(4)(h) NMAC.
11. By granting the Application with the conditions specified below, this Order prevents waste and protects correlative rights, public health, and the environment.

### **ORDER**

1. Applicant is authorized to surface commingle oil and gas production from the pools, leases, and wells as described in Exhibit A.

Applicant is authorized to store and measure oil and gas production off-lease from the pools, leases, and wells as described in Exhibit A at a central tank battery or gas title transfer meter described in Exhibit A.

2. The oil and gas production for each well identified in Exhibit A shall be separated and metered prior to commingling it with production from another well.
3. Applicant shall measure and market the commingled oil at a central tank battery described in Exhibit A in accordance with this Order and 19.15.18.15. NMAC or 19.15.23.8. NMAC.
4. Applicant shall measure and market the commingled gas at a well pad, central delivery point, central tank battery, or gas title transfer meter described in Exhibit A in accordance with this Order and 19.15.19.9. NMAC, provided however that if the gas is vented or flared, and regardless of the reason or authorization pursuant to 19.15.28.8 B. NMAC for such venting or flaring, Applicant shall measure or estimate the gas in accordance with 19.15.28.8 E. NMAC.
5. Applicant shall calibrate the meters used to measure or allocate oil and gas production in accordance with 19.15.12.10 C.(2) NMAC.
6. If the commingling of oil and gas production from any pool, lease, or well reduces the value of the commingled oil and gas production to less than if it had remained segregated, no later than sixty (60) days after the decrease in value has occurred Applicant shall submit a new surface commingling application to OCD to amend this Order to remove the pool, lease, or well whose oil and gas production caused the decrease in value. If Applicant fails to submit a new application, this Order shall terminate on the following day, and if OCD denies the application, this Order shall terminate on the date of such action.
7. Applicant shall not commence commingling oil or gas production from state, federal, or tribal leases until approved by the BLM or NMSLO, as applicable.
8. If OCD determines that Applicant has failed to comply with any provision of this Order, OCD may take any action authorized by the Oil and Gas Act or the New Mexico Administrative Code (NMAC).

9. OCD retains jurisdiction of this matter and reserves the right to modify or revoke this Order as it deems necessary.
