Re: Application of FAE II Operating, LLC for Administrative Approval to Surface Commingle and Sell Gas Production from the Jalmat; Tan-Yates-7 RVRs Pool for the Harrison Federal WB #1 well and the Santa Fe Federal #1 well to the Dabbs #4 well located in Unit E, Sec. 34, T-25S, R-37E, Lea County, New Mexico

Dear Mr. McClure:

FAE II Operating LLC, OGRID: 329326, requests administrative approval for surface commingling of gas production for its Dabbs lease located in Section 34 of Township 25S, Range 37E as shown on the map in Exhibit A. The lease is also identified by outline and legend. Exhibit B offers further detail on the relevant wells.

The attached battery diagrams, Exhibits C and D, are accurate schematics of the current facility and the proposed commingled facility, respectively. A new 2-inch gas flowline will be laid from the Harrison Federal WB #1 and the Santa Fe Federal #001 and tie into the gas sales meter at the Dabbs #004. The mentioned wells production contribution will be determined using the shut-in method.

After a review of internal records, the interest owners are not identical for the wells mentioned above. As such, we have notified all relevant parties of our intent to commingle production (see attached letter). The working, royalty, and overriding royalty interest owners have been notified of this application by certified mail, please see attached list with tracking numbers. Copies of the certified mail receipts have been attached with this application.

This proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. If there are further questions concerning this application, please feel free to contact the undersigned by email at tyler@faenergyus.com or by telephone at (281) 798-4516.

Very truly yours,

FAE II Operating, LLC

Re: Application of FAE II Operating, LLC for Administrative Approval to Surface Commingle and Sell Gas Production from the Jalmat; Tan-Yates-7 RVERS Pool for the Harrison Federal WB #1 well and the Santa Fe Federal #1 well to the Dabbs #4 well located in Unit E, Sec. 34, T-25S, R-37E, Lea County, New Mexico

Dear Mr. McClure:

FAE II Operating LLC, OGRID: 329326, requests administrative approval for surface commingling of gas production for its Dabbs lease located in Section 34 of Township 25S, Range 37E as shown on the map in Exhibit A. The lease is also identified by outline and legend. Exhibit B offers further detail on the relevant wells.

The attached battery diagrams, Exhibits C and D, are accurate schematics of the current facility and the proposed commingled facility, respectively. A new 2-inch gas flowline will be laid from the Harrison Federal WB #1 and the Santa Fe Federal #001 and tie into the gas sales meter at the Dabbs #004. The mentioned wells production contribution will be determined using the shut-in method.

After a review of internal records, the interest owners are not identical for the wells mentioned above. As such, we have notified all relevant parties of our intent to commingle production (see attached letter). The working, royalty, and overriding royalty interest owners have been notified of this application by certified mail, please see attached list with tracking numbers. Copies of the certified mail receipts have been attached with this application.

This proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. If there are further questions concerning this application, please feel free to contact the undersigned by email at tyler@faenergyus.com or by telephone at (281) 798-4516.

Very truly yours,

FAE II Operating, LLC

ORDER

1. Applicant is authorized to surface commingle gas production from the pools and leases as described in Exhibit A.

Applicant is authorized to surface commingle gas production from the wells included in Exhibit A provided that they produce from a pool and lease described in Exhibit A.

Applicant is authorized to store and measure gas production off-lease, as applicable, from the pools and leases as described in Exhibit A at a central tank battery or gas title transfer meter described in Exhibit A.

2. The gas production allocated to each well identified in Exhibit A shall be determined by shutting-in the production from all other wells for a minimum of twenty-four (24) consecutive hours and metering the production from that well during that period. Applicant shall conduct this test a minimum of one (1) time per month for each well.
3. If Applicant recovers gas production from produced water prior to Applicant injecting it or transferring custody of it, then that production shall be allocated to each well in the proportion that it contributed to the total produced water.
4. If Applicant recovers gas production using a vapor recovery unit (VRU), then that gas production shall be allocated to each well in the proportion that it contributed to the total oil production.
5. Applicant shall measure and market the commingled gas at a well pad, central delivery point, central tank battery, or gas title transfer meter described in Exhibit A in accordance with this Order and 19.15.19.9 NMAC, provided however that if the gas is vented or flared, and regardless of the reason or authorization pursuant to 19.15.28.8(B) NMAC for such venting or flaring, Applicant shall measure or estimate the gas in accordance with 19.15.28.8(E) NMAC.
6. Applicant shall calibrate the meters used to measure or allocate gas production in accordance with 19.15.12.10(C)(2) NMAC.
7. Applicant shall install and utilize vessels that are appropriately designed to ensure sufficient separation of the fluids and to accurately measure gas production.
8. If the commingling of gas production from any pool, lease, or well reduces the value of the commingled gas production to less than if it had remained segregated, no later than sixty (60)

days after the decrease in value has occurred Applicant shall submit a new surface commingling application to OCD to amend this Order to remove the pool, lease, or well whose gas production caused the decrease in value. If Applicant fails to submit a new application, this Order shall terminate on the following day, and if OCD denies the application, this Order shall terminate on the date of such action.

9. Applicant shall not commence commingling gas production from state, federal, or tribal leases until approved by the BLM or NMSLO, as applicable.
10. If OCD determines that Applicant has failed to comply with any provision of this Order, OCD may take any action authorized by the Oil and Gas Act or the New Mexico Administrative Code (NMAC).
11. OCD retains jurisdiction of this matter and reserves the right to modify or revoke this Order as it deems necessary.
