**Re: Permian Resources Operating, LLC
Request for Administrative Approval of Non-Standard Horizontal Spacing
Unit**

Lajitas 5-4 State Com 123H (API No. Pending); Lajitas 5-4 State Com 124H (API No. Pending)
S/2 of Sections 4 and 5, Township 19 South, Range 28 East, Eddy County, New Mexico
Winchester, Bone Spring, West Pool (Code 97257)

Dear Mr. Chang,

Permian Resources Operating, LLC (“Permian Resources”) (OGRID No. 372165), pursuant to Division Rules 19.15.16.15(B)(5) and 19.15.15.11 NMAC, seeks administrative approval of Non-Standard Horizontal Spacing Unit for its Lajitas 5-4 State Com 123H and 124H wells, in a 640-acre, more or less, non-standard horizontal spacing unit, underlying the S/2 of Sections 4 and 5, Township 19 South, Range 28 East, Eddy County, New Mexico.

Approval of the non-standard horizontal spacing unit is requested to allow Permian Resources to consolidate surface facilities and maximize well count. Permian Resources’ request for approval of a non-standard spacing unit will allow it to consolidate surface facilities and will consequently prevent surface, environmental, and economic waste. The non-standard unit will allow Permian Resources to minimize surface use. Centralizing equipment facilities for the wells will reduce the total acreage needed for surface facilities by 20% of the total amount that would be necessary absent a non-standard unit. Surface facilities and equipment, pipelines, and rights of way for one well cost approximately \$695,000. While the centralized facilities will be larger, so they may handle production from multiple wells, the overall savings, if a non-standard unit is approved, will

be approximately \$390,000. This will reduce the overall well costs and improve economics for the wells. A common facility also reduces the number of flares Permian Resources may need to use in the case of emergency from 2 to 1. Additionally, the VOC reduction is nearly 50%.

Further, the non-standard horizontal spacing unit will allow Permian Resources to obtain maximum lateral length, properly place stimulation energy, and optimize pressure drawdown, which will create cost efficiencies, prevent waste, and protect correlative rights.

Exhibit A are Form C-102s for the Lajitas 5-4 State Com 123H and Lajitas 5-4 State Com 124H wells showing the location of the wells in the 640-acre non-standard horizontal spacing unit.

Exhibit B is a plat that shows Sections 4 and 5 of Township 19 South, Range 28 East, in relation to the adjoining tracts. Exhibit B also identifies the notice area surrounding the non-standard horizontal spacing unit. A list of all affected persons who received notice, along with their corresponding location and type of interest ownership (i.e. whether an operator, working interest owner, or record title owner), is set out in Exhibit C.

Exhibit C is a list that identifies all affected persons who were sent a copy of this application and attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application, along with the date notice was sent, and a copy of the notice letter to affected persons. For the offset tracts for which Permian Resources is the offset operator, notice was provided to all working interest owners.

Thank you for your attention to this matter. Please let me know if you require additional information.

Very truly yours,

HARDY McLEAN LLC
