Greetings Mr. Sherrell,

Attached is the signed Extension of Injection Authority for the subject administrative order. Ensure that you understand the provisions of the extension order. Don't hesitate to contact the UIC team with any questions about the extension order or its content.

Thank you,

Stacy Sandoval

Petroleum Specialist

Good morning Deana,

The extension request for the Glacier SWD #1 SWD-2617 is in for Director signature. As soon as I receive the signed extension of injection authority, I will send it to you.

Thank you,

Stacy Sandoval

Petroleum Specialist

Re: Glacier SWD #1
API No. 30-015-31436
SWD-2617

Dear Mr. Goetze:

Mack Energy Corporation (Mack) respectfully requests approval for an extension of one year for the UIC permit for SWD-2617 (Issued 3/12/2025). Mack was notified by Central Valley Electric that Southwestern Public Service Company is restricting new load connections until they have completed upgrades to their transmission system. Anticipated completion in the second ½ of 2026.

Mack Energy is evaluating which wells we can drill and produce based on available power supply. The Glacier SWD #1 is within the restricted area. We anticipate being able to drill the Glacier in late 2026. I am attaching a copy of the letter from Central Valley Electric along with a current AOR. Below is a list of new affected person within the Glacier SWD #1 AOR. They have been notified by certified mail on 12/5/2025.

Lessee-

Wade Nelson, General Manager

April 4, 2025

Dear CVE Member,

Southwest Public Service Company (SPS) has recently imposed restrictions on the load that can be connected to Central Valley Electric Cooperative's "PCA" transmission interconnection point, which provides power to our easternmost four substations. Despite CVE's consistent submission of new load requests along with our standard load forecasts, SPS has analyzed the loads on their transmission system and abruptly determined that no more loads can be added until upgrades to their transmission infrastructure are completed, and a further load analysis is performed.

Additionally, SPS is evaluating their transmission capacity feeding our "8 Mile" transmission interconnection point, which serves another portion of our oil field distribution system. We are currently awaiting further data and clarification regarding the available capacity at this delivery point prior to making any new connections. Unfortunately, we do not have a timeline for this process, however we are actively working with various entities to assess specific power availability and explore alternatives in the event of limited capacity at this delivery point. Central Valley Electric Coop will provide updates as new information becomes available.

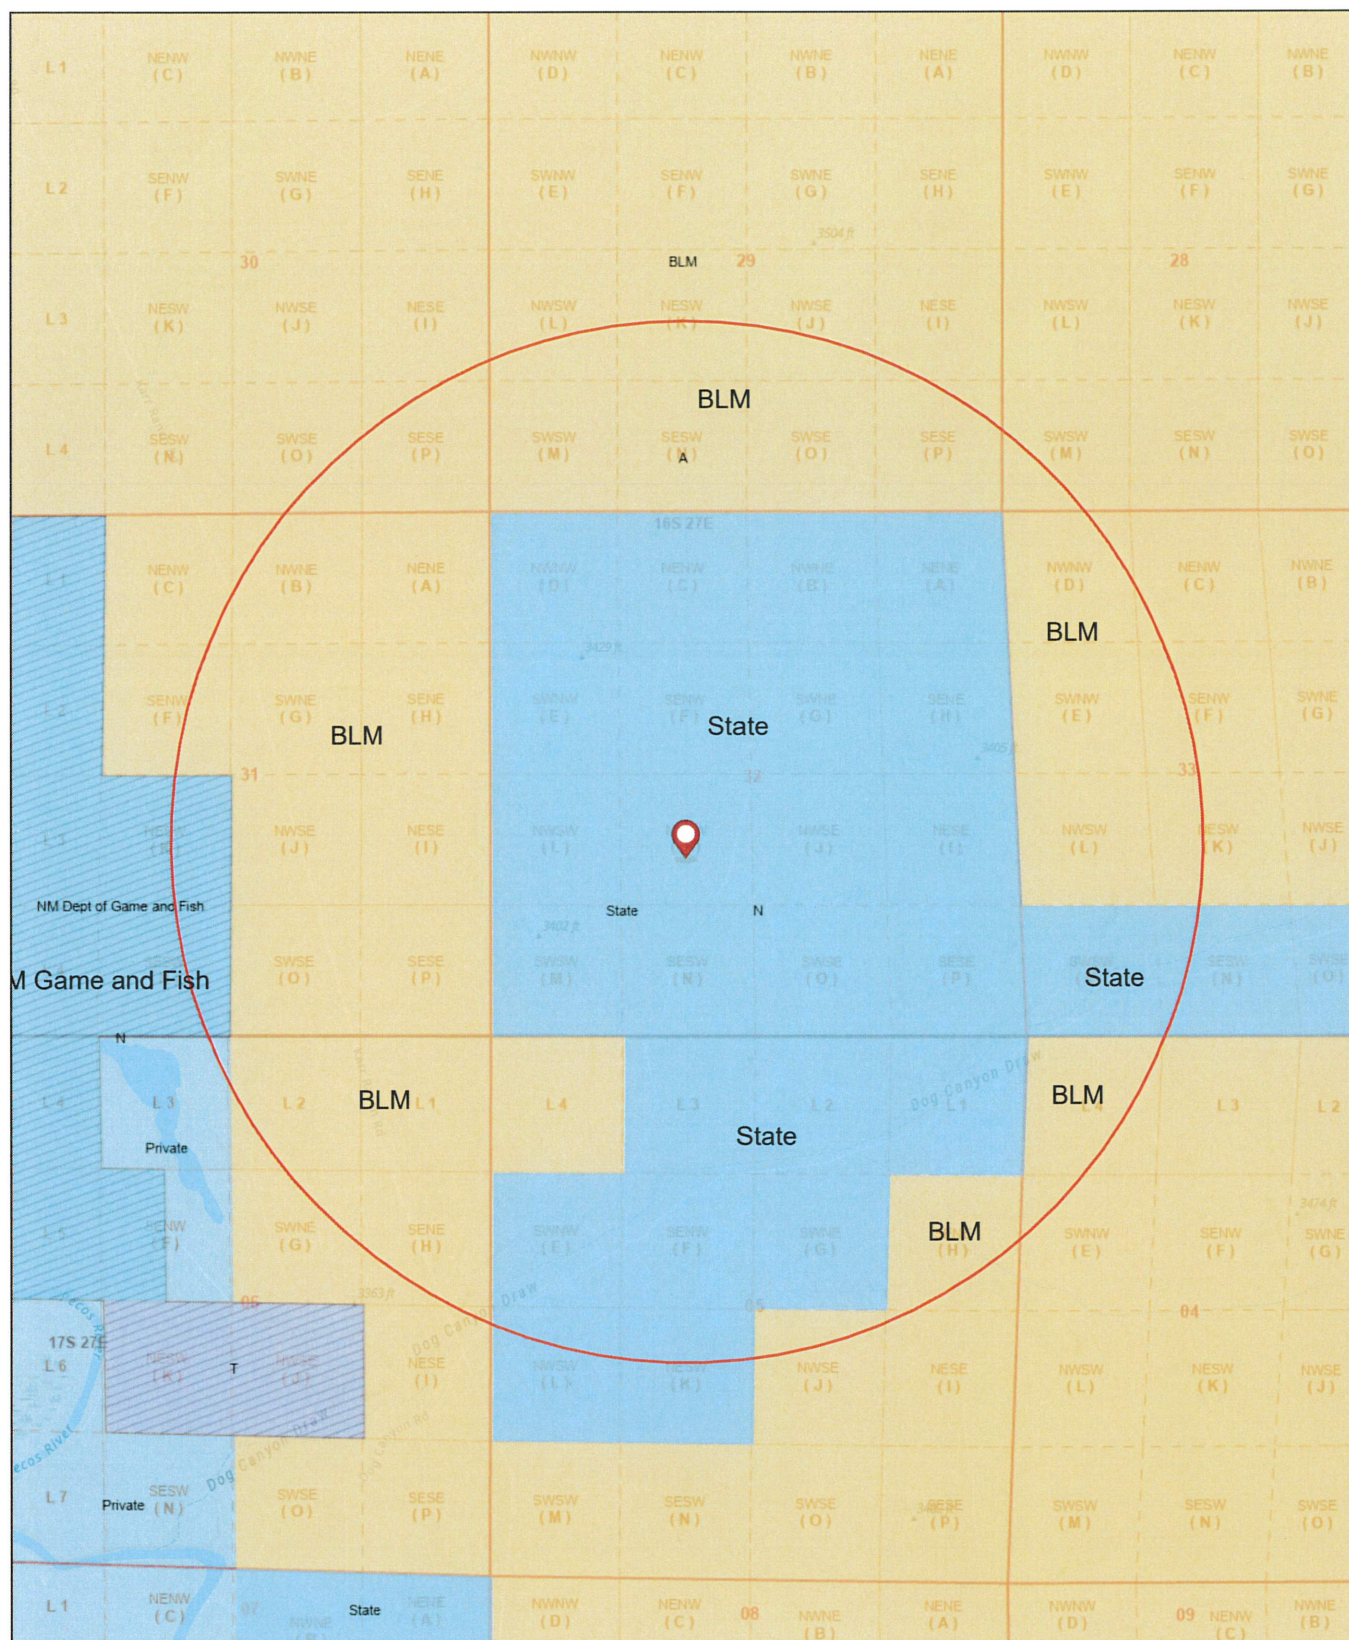

Sincerely,

Ransom Spencer
