RE: Administrative Order SWD-2628 - First Extension of Injection Authority

Well: Rooster SWD No.1
Surface location: 1650 feet FNL, 1650 feet FWL, Unit F, Section 34, Township 14 South,
Range 31 East, NMPM, Chaves County, New Mexico
(Latitude: 33.0622508; Longitude: -103.8128126 NAD83)
Order Date: July 3, 2025
Injection formations: Devonian formation, 12,900 feet – 13,600 feet.

Greetings Ms. Weaver:

Reference is made to your May 27, 2026, request on behalf of Mack Energy Corporation (the current “operator”) to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is one year after issuance of the order: July 3, 2026.

The Oil Conservation Division (“OCD”) has reviewed your correspondence. Two new Affected persons have been identified within the one-mile AOR that have been notified of this extension request and no protests were received. Further, OCD has reviewed the AOR and has not identified new penetrating wells drilled since the date of issuance of this permit. Therefore, the extension request could be reviewed administratively for approval.

The OCD finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is **hereby extended until July 3, 2027.**

SWD-2628: First Extension of Injection Authority
Mack Energy Corporation
Page 2 of 2

All requirements of the above-mentioned administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order, and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

ALBERT C.S. CHANG
Division Director
