RE: Injection Pressure Increase; Administrative Order IPI-556
Empire State 9 SWD No. 4
SWD; Cisco (Pool code: 96099)
UIC Class II Disposal Well

Greetings Mr. Stone:

Reference is made to your request on behalf of Spur Energy Partners, LLC (OGRID 328947; the "operator") for the application received on September 7, 2025, to increase the maximum surface injection pressure ("MSIP") on the following well:

Well No.	API Number	UL-S-T-R	Injection Authority	Existing MSIP Limit (psi)	Existing Tubing OD (in)
Empire State 9 SWD No.4	30-015-38972	A-09-17S-29E	Order No. SWD-1281	1670	3.5

It is our understanding that the requested pressure increase is needed to increase the rate of injection and this pressure increase will not result in:

1. the fracturing of the permitted disposal interval;
2. the fracturing of either the upper or lower confining strata; or
3. induced-seismic events as a consequence of the higher injection pressure.

Based on the results of the submitted step rate injection test, the following shall be the new pressure limit while equipped with injection tubing:

Administrative Order IPI-556
Spur Energy Partners, LLC
Page 2 of 2

Well No.	Step Rate Test Date	New MSIP Limit (psi)	While Injecting	Injection Interval (ft)	Pressure Gradient (psi/ft)
Empite State 9 SWD No. 4	9/16/2025	2115	Water (SG ~ 1.05)	8385 - 8805	0.252

This approval is based on the provision that the tubing size, packer setting depth and completion interval for the well does not change. Any future requested pressure increase will require resubmission of additional data and/or a new step-rate test. The Director retains the right to require, at any time, wireline verification of completion and packer setting depths in the well. This approval is subject to your being in compliance with all other OCD rules including, but not limited to, Rule 19.15.5.9 NMAC.

The Director may rescind any injection pressure increase permit if it becomes apparent that the injected fluid is not being confined to the permitted disposal interval, impacts correlative rights, is endangering any freshwater aquifer or endangers public health and safety.

ALBERT C.S. CHANG
Division Director
