S/2 N/2 Section 18			

You have requested to drill this horizontal well at an unorthodox well location described above in the referenced pool or formation. 19.15.16.15(B)(3)(a) NMAC governs this proposed well and provides that the operator shall dedicate to each horizontal gas well a standard horizontal spacing unit that comprises of one or more contiguous tracts that the horizontal well's completed interval penetrates, each of which consists of a governmental quarter section or equivalent. 19.15.16.15(C)(1)(a) NMAC governs the distance in the horizontal plane from any point in the completed interval to any outer boundary of the horizontal spacing unit, measured along a line perpendicular to the completed interval or to the tangent thereof, shall be a minimum of 660 feet

for a **gas** well. 19.15.16.15(C)(1)(b) NMAC governs the first and last take point of a horizontal well shall be no closer than 330 feet for a **gas** in the horizontal plane, to any outer boundary of the horizontal spacing unit.

The request to deviate from an orthodox location has met all requirements of 19.15.16.15 (C)(5)(a) NMAC. It is understood that you are seeking this exception in order to create a non-standard location, comprised of First and Last Take Points referenced above within the described Horizontal Spacing Unit.

This well's completed interval is as close as 165 feet to the southern edge, 100 feet to the eastern and western edge of the horizontal spacing unit. Encroachment will impact the following tracts.

Section 16, encroachment to the NW/4
Section 17, encroachment to the S/2
Section 18, encroachment to the S/2
Section 13, encroachment to the NE/4

The Division understands you have given notice of this application to all operators or owners who are "affected persons," as defined in 19.15.2.7(A)(8) NMAC, in all adjoining units towards which the proposed location encroaches.

Division understands you are seeking this unorthodox location in order to achieve optimal spacing of planned wells by maximizing lateral length, to properly place stimulation energy, to optimize pressure drawdown, creating cost efficiencies and to prevent waste within the Wolfcamp formation underlying the S/2 N/2 Section 17 and the S/2 N/2 of Section 18.

Your application has been filed under 19.15.16.15(C)(6) NMAC, 19.15.15.13 NMAC and 19.15.4.12 (A)(2) NMAC.

Per 19.15.15.13 (B) NMAC, **Division approves this unorthodox location.**

Reference this NSL order number on the As Drilled C-102 submitted with the Authorization to Transport, to place this well into production.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of further orders as Division deems necessary.

Dear Mr. Chang,

In accordance with Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC, Permian Resources Operating, LLC ("Permian Resources") (OGRID No. 372165) seeks administrative approval of an unorthodox well location for the Esky 17-18 Fed Com 202H well, which is located in a 320 acre, more or less, non-standard horizontal spacing unit, comprised of all of the S/2 N/2 of Sections 17 and 18, Township 20 South, Range 28 East, Eddy County, New Mexico.

The location for the **Esky 17-18 Fed Com 202H** well is as follows:

- Surface Hole Location: 1,179' FNL and 452' FEL, Section 17, Township 20 South, Range 28 East
- First Take Point: 2,475' FNL and 100' FEL, Section 17, Township 20 South, Range 28 East
- Last Take Point: 2,475' FNL and 100' FWL, Section 18, Township 20 South, Range 28 East

The completed interval of the well will be unorthodox because the well is located in a gas pool and will be located 100' from offset spacing units to the east and west, as well as 168' from the offset spacing unit to the south. As explained in the engineering statement, included as **Exhibit A**, approval of the unorthodox, completed interval is necessary to allow Permian Resources to maximize lateral length, properly place stimulation energy, and optimize pressure drawdown, which will prevent waste and protect correlative rights.

Exhibit B is a Form C-102 showing the location of the Esky 17-18 Fed Com 202H well in relation to the offset tracts.

Exhibit C is a plat that shows the Esky 17-18 Fed Com 202H well in relation to the adjoining tracts. Permian Resources is the offset operator to the east. Permian Resources is the offset operator of the adjoining tracts. Therefore, notice was provided to the working interest owners, record title, and royalty interest owners in the offset tracts. The notice list attached as Exhibit D identifies all affected persons who were provided notice of this application.

Exhibit D is a list that identifies all affected persons who were sent a copy of this application and attachments by certified mail, advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application, along with the date notice was sent, and a copy of the notice letter to affected persons.

Thank you for your attention to this matter. Please let me know if you require additional information.

Very truly yours,

To Whom It May Concern,

Permian Resources Operating, LLC ("Permian") respectfully requests administrative approval on a non-standard location for the ESKY FED COM 202H as it is being drilled 100' from the East line of the spacing unit at the First Take Point, and 100' from the West line of the spacing unit at the Last Take Point. To achieve optimal spacing of the planned wells in this section, Permian has planned the ESKY FED COM 202H at this location 100' from the West line, 100' from the East line, and 168' from the South line to obtain maximum lateral length, properly place stimulation energy, and optimize pressure drawdown, which will create cost efficiencies, prevent waste, and protect correlative rights. For these reasons, Permian respectfully requests approval of this non-standard location.

Sincerely,

Sam Hamilton
Sr. Reservoir Engineer
