## STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO., FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

## **APPLICATION**

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320-acre, more or less, spacing and proration unit comprised of the W/2 E/2 of Sections 21 and 28, Township 19 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from the top of the Quail Ridge; Bone Spring Pool [Code 50460] to a depth of 10,290 feet, designated as an oil pool, underlying said unit.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- Cimarex proposes and dedicates to the HSU the Mescalero Ridge 21-28 Fed Com
   Well and Mescalero Ridge 21-28 Fed Com 5H Well as initial wells, to be drilled to a depth sufficient to test the Bone Spring formation.
- 3. Cimarex proposes the **Mescalero Ridge 21-28 Fed Com 3H Well**, an oil well, to be horizontally drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 21 to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 28.

- 4. Cimarex proposes the **Mescalero Ridge 21-28 Fed Com 5H Well**, an oil well, to be horizontally drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 21 to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 28.
- 5. The proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
- 6. A depth severance exists in the Bone Spring formation within the proposed HSU. Accordingly, Cimarex seeks to pool a portion of the Quail Ridge; Bone Spring pool [Code 50460], to include the 1<sup>st</sup> and 2<sup>nd</sup> Bone Spring formations of said pool, from the top of the pool at a stratigraphic equivalent of 8,085 feet measured depth, as defined in the Triple Combo Log in the Mescalero Ridge 20 Federal 1 Well (API No. 30-025-36099), to a depth of 10,290 feet, that being the base of the 2<sup>nd</sup> Bone Spring. Cimarex will provide notice of this hearing to the vertical offset parties within the pool who are not subject to the pooling application. Concurrently with this application, Cimarex is also seeking to pool the portion of this pool below the depth severance, to include the 3<sup>rd</sup> Bone Spring, in a separate application.
- 7. Cimarex has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for development within the proposed HSU.
- 8. The pooling of all interests in the specified depths of the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 7, 2022, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by

law, the Division enter an order:

A. Establishing a standard 320-acre, more or less, spacing and proration unit

comprised of the W/2 E/2 of Sections 21 and 28, Township 19 South, Range 34 East, NMPM,

Lea County, New Mexico;

B. Pooling all uncommitted mineral interests in the specified depths of the Bone

Spring formation underlying the proposed HSU;

C. Approving the Mescalero Ridge 21-28 Fed Com 3H Well and Mescalero Ridge

21-28 Fed Com 5H Well as wells for the HSU;

D. Designating Cimarex as operator of this HSU and the horizontal wells to be drilled

thereon;

E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the

wells;

F. Approving actual operating charges and costs of supervision, to the maximum

extent allowable, while drilling and after completion, together with a provision adjusting the rates

pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing

the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

ABADIE & SCHILL, PC

**Attorneys for Cimarex Energy Co.** 

Application of Cimarex Energy Co. for a Horizontal Spacing Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 320-acre, more or less, spacing and proration unit comprised of the W/2 E/2 of Sections 21 and 28, Township 19 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all mineral interests from the top of the Quail Ridge; Bone Spring Pool [Code 50460] to the base of the 2<sup>nd</sup> Bone Spring formation of said pool, measured by Cimarex at a depth of 10,290 feet, designated as an oil pool, underlying the unit, the intent being to include the 1st and 2nd Bone Spring of said pool. The proposed oil wells to be dedicated to the horizontal spacing unit are the Mescalero Ridge 21-28 Fed Com 3H Well, and Mescalero Ridge 21-28 Fed Com 5H Well, each to be horizontally drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 21 to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 28. The wells will be orthodox, and the take points and completed intervals will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approximately 24 miles southwest from Hobbs, NM.
