STATEMENT OF THE CASES

Case No. 23686

Chevron seeks an order approving the Papa Squirrel State SWD #1 well (“Well”) in Section 13, Township 26 South, Range 32 East, NMPM, Lea County, New Mexico for the purpose of operating a salt water disposal well. Injection formations will be the Bell Canyon/Cherry Canyon from 4,625 feet to 8,939 feet. The tubing packer will be set at 4,525 feet, and production casing and cement will be set at 8,500 feet. The maximum anticipated injection rate will be 20,000 BWPD and maximum surface injection pressure will be 925 psi. Said area is located approximately 26 miles west of Jal, New Mexico.

The Well, as proposed in the C-108, will not cause waste, impair correlative rights, or harm public health or the environment, including through the risk of induced seismicity. Accordingly, Chevron’s application for the Well is reasonable, comports with the requirements of the Oil and Gas Act, and should be approved.
