COMPANY FOR COMPULSORY POOLING  
AND APPROVAL OF NON-STANDARD  
SPACING UNIT, EDDY COUNTY, NEW

**CASE NO. 25313**

**SELF-AFFIRMED STATEMENT  
OF MACIE VALLES**

1. I am a New Mexico land negotiator with ConocoPhillips Company (“COPC” or “Applicant”) and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division (“Division”) and my credentials as an expert in petroleum land matters were accepted and made a matter of record.

2. Copies of COPC’s (OGRID No. 217817) application and proposed hearing notice are attached as **Exhibit A-1**.

3. None of the parties proposed to be pooled in this case indicated opposition to this matter proceeding by affidavit; therefore, I do not expect any opposition at hearing.

4. COPC seeks to pool all uncommitted interests in the Bone Spring formation underlying a 1,920-acre, more or less, non-standard horizontal spacing unit comprised of all of Sections 27, 28 and 29, Township 23 South, Range 30 East, Eddy County, New Mexico (“Unit”).

5. The Unit will be dedicated to the following wells (“Wells”):

- a. **Iron Throne Federal Com #501H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 26 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 29;

**ConocoPhillips Company  
Case No. 25313  
Exhibit A**

- b. **Iron Throne Federal Com #502H** and **Iron Throne Federal Com #503H**, which will be drilled from surface hole locations in the SW/4 NW/4 (Unit E) of Section 26 to bottom hole locations in the SW/4 NW/4 (Unit E) of Section 29;
  - c. **Iron Throne Federal Com #504H**, which will be drilled from a surface hole location in the NW/4 SW/4 (Unit L) of Section 26 to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 29; and
  - d. **Iron Throne Federal Com #505H**, which will be drilled from a surface hole location in the NW/4 SW/4 (Unit L) of Section 26 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 29.
6. The completed intervals of the Wells will be orthodox.
7. **Exhibit A-2** contains the C-102s for the Wells.
8. **Exhibit A-3** contains a plat identifying ownership by tract in the Unit. This exhibit also includes any applicable lease numbers, a unit recapitulation, and the interests COPC seeks to pool highlighted in yellow.
9. **Exhibit A-4** is a map that depicts the non-standard spacing unit in relation to the offset tracts. The map also identifies the offset operators and affected parties in the tracts surrounding the proposed Unit, who were provided notice of COPC's application.
10. COPC's request for approval of a non-standard spacing unit will allow it to consolidate surface facilities and will consequently prevent surface, environmental, and economic waste.
11. The non-standard spacing unit will reduce surface waste. Centralizing equipment for facilities for the Wells will reduce the total acreage needed for surface facilities by 67% of the total amount that would be necessary absent a non-standard unit.

- a. Surface facilities and equipment, pipelines, and rights of way for one well cost approximately \$2,395,000. The centralized facilities will be larger, so that they may handle production from multiple wells. I estimate that a non-standard unit would result in savings of approximately \$2,971,700, which will reduce the overall well cost and improve economics for the Unit.
- b. A common facility also reduces the number of flares COPC may need to use in case of emergency from 5 to 1. Additionally, the gas sales line in the area averages approximately 150 psig and is gathered and compressed at 3<sup>rd</sup> party facilities.

12. Approval of a non-standard spacing unit is necessary to prevent waste and protect correlative rights.

13. In my opinion, COPC made a good-faith effort to reach voluntary joinder of uncommitted interests in the Wells as indicated by the chronology of contact described in **Exhibit A-5**.

14. COPC requests that it be designated as operator of the Unit and the Wells. COPC requests overhead and administrative rates of \$12,500 per month while the Wells are being drilled and \$1,250 per month while the Wells are producing. These rates are fair and are comparable to the rates charged by COPC and other operators in the vicinity.

15. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

16. In my opinion, the granting of COPC's application would serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

17. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date next to my electronic signature below.

**CASE NO. 25313**

**APPLICATION**

Pursuant to NMSA § 70-2-17, ConocoPhillips Company ("COPC" or "Applicant") applies for an order pooling all uncommitted interests in the Bone Spring formation underlying a 1,920-acre, more or less, non-standard horizontal spacing unit comprised of all of Sections 27, 28 and 29, Township 23 South, Range 30 East, Eddy County, New Mexico ("Unit"). In support of its application, COPC states the following:

1. COPC (OGRID No. 217817) is a working interest owner in the Unit and has the right to drill wells thereon.
2. The Unit will be dedicated to the following wells ("Wells"):
  - a. **Iron Throne Federal Com #501H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 26 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 29;
  - b. **Iron Throne Federal Com #502H** and **Iron Throne Federal Com #503H**, which will be drilled from surface hole locations in the SW/4 NW/4 (Unit E) of Section 26 to bottom hole locations in the SW/4 NW/4 (Unit E) of Section 29;
  - c. **Iron Throne Federal Com #504H**, which will be drilled from a surface hole location in the NW/4 SW/4 (Unit L) of Section 26 to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 29; and

**ConocoPhillips Company  
Case No. 25313  
Exhibit A-1**

d. **Iron Throne Federal Com #505H**, which will be drilled from a surface hole location in the NW/4 SW/4 (Unit L) of Section 26 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 29.

3. The completed intervals of the Wells will be orthodox.
4. Approval of a non-standard horizontal spacing unit is necessary to prevent waste and protect correlative rights.
5. Applicant has undertaken diligent, good faith efforts to obtain voluntary agreements from all interest owners to participate in the drilling of the Wells but has been unable to obtain voluntary agreements from all interest owners.
6. The pooling of uncommitted interests will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
7. In order to allow Applicant to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in the Unit should be pooled, and Applicant should be designated the operator of the Unit and the Wells.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on May 8, 2025, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the Unit;
- B. Approving a non-standard horizontal spacing unit pursuant to 19.15.16.15(B)(5) NMAC;
- C. Approving the Wells in the Unit;
- D. Designating Applicant as the operator of the Unit and the Wells to be drilled thereon;

- E. Authorizing Applicant to recover its costs of drilling, equipping, and completing the Wells;
- F. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the Wells against any working interest owner who does not voluntarily participate in the drilling of the Wells.

Respectfully submitted,

## ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

## ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

**CASE NO. 25313**

**SELF-AFFIRMED STATEMENT  
OF SHARIVA DARMAOEN**

1. I am a geologist with ConocoPhillips. I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division ("Division") and my credentials as an expert in petroleum geology were accepted and made a matter of record.

2. I am familiar with the geological matters that pertain to the application filed by ConocoPhillips Company ("COPC") in this case.

3. **Exhibit B-1** is a location map that identifies the Iron Throne project area for the Bone Spring horizontal spacing units that are the subject of these applications. The approximate wellbore paths for the proposed **Iron Throne Federal Com #501H, Iron Throne Federal Com #502H, Iron Throne Federal Com #503H, Iron Throne Federal Com #504H, and Iron Throne Federal Com #505H** wells ("Wells") are represented by dashed lines. Existing producing wells in the targeted interval are represented by solid lines.

4. **Exhibit B-2** is a True Vertical Depth structure map for the Bone Spring formation that is representative of the targeted intervals for the proposed Wells. The data points are indicated by green crosses. The approximate wellbore paths of the Wells are depicted by dashed lines. The map demonstrates the formation is gently dipping to the southeast in this area. I do not observe

**ConocoPhillips Company  
Case No. 25313  
Exhibit B**

any faulting, pinch-outs, or geologic impediments to developing the targeted interval with horizontal wells.

5. **Exhibit B-3** is a cross section map that identifies three wells penetrating the targeted interval and used to construct a structural cross-section from A to A'. I used these well logs because they penetrate the targeted interval, are of good quality, and are representative of the geology in the area.

6. **Exhibit B-4** is a stratigraphic cross-section using the representative wells identified on Exhibit B-3. It contains gamma ray, resistivity and porosity logs, where available. The proposed landing zone for the Wells is labeled on the exhibit. This cross section demonstrates the target interval is continuous across the Unit.

7. In my opinion, a laydown orientation for the Wells is appropriate to properly develop the subject acreage because of consistent rock properties throughout the Unit and the preferred fracture orientation in this portion of the trend.

8. Based on my geologic study of the area, the targeted interval underlying the Unit is suitable for development by horizontal wells and the tracts comprising the Unit will contribute more or less equally to the production of the Wells.

9. In my opinion, the granting of COPC's application will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

10. The exhibits attached hereto were either prepared by me or under my supervision or were compiled from company business records.

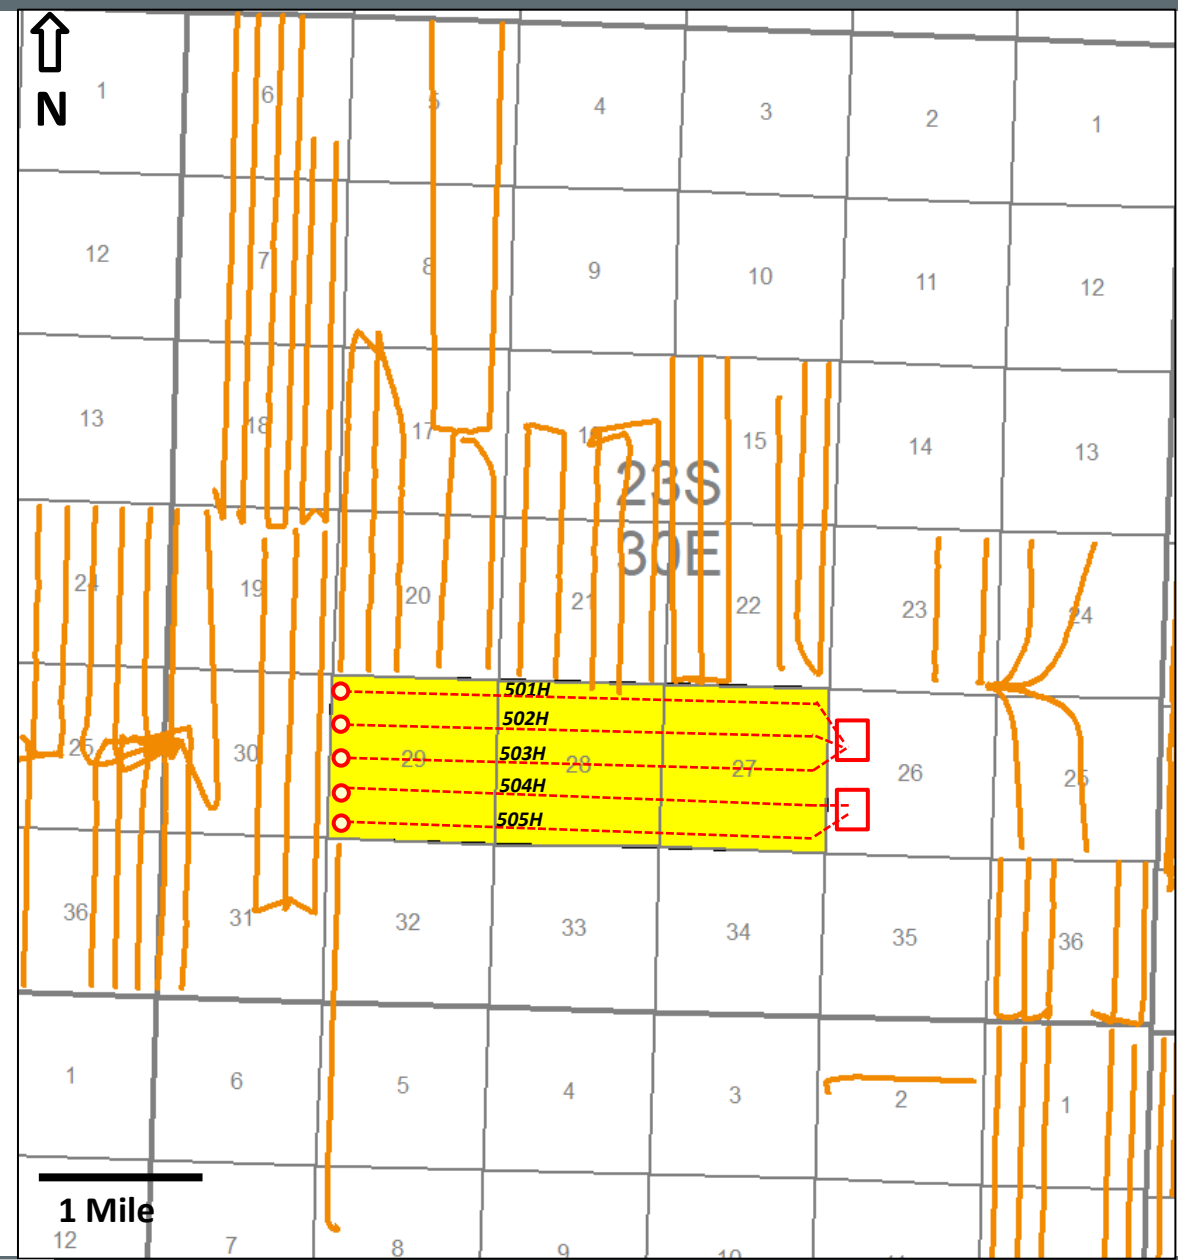

11. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm my testimony above is true and correct and is made under penalty of perjury under

the laws of the State of New Mexico. My testimony is made as of the date identified next to my signature below.
