CASE NOS. 25283-25284

SELF-AFFIRMED STATEMENT OF CLAY WOOTEN, LANDMAN

1. My name is Clay Wooten and I work for MRC Energy Company, an affiliate of MRC Permian Company ("MRC"), as a Landman.

2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of public record.

3. I am familiar with the applications filed by Permian Resources Operating, LLC ("Permian") in these consolidated cases and I am familiar with the status of the lands in the subject area with respect to MRC's development plans, as described herein.

4. In these consolidated cases, Permian seeks to pool standard horizontal well spacing units for two-mile laydown laterals in the Bone Spring formation underlying the S/2 of Section 7 and 8, Township 20 South, Range 27 East, Eddy County, New Mexico, as follows:

- Under **Case No. 25283**, Permian seeks to pool a standard 320-acre horizontal spacing unit in the Bone Spring formation underlying the N/2 S/2 of Sections 7 and 8, for the proposed **Fiero 7 Fed Com 133H**; and
- Under **Case No. 25284**, Permian seeks to pool a standard 320-acre horizontal spacing unit in the Bone Spring formation underlying the S/2 S/2 of Sections 7 and 8, for the proposed **Fiero 7 Fed Com 134H**.

5. Attached as **MRC Exhibit A-1** is a copy of the well proposals that MRC received from Permian for Permian's Fiero project. As shown in MRC Exhibit A-1, when Permian proposed

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. A
Submitted by: MRC Permian Company
Hearing Date: May 27, 2025
Permian Case Nos. 25283-25284**

the wells, it proposed both (i) the initial wells listed in Permian's current applications (the Fiero 7 Fed Com #133H and #134H), which MRC understands are located in the Third Bone Spring formation; and (ii) two additional wells (the Fiero 7 Fed Com #123H and #124H), which MRC understands are located in the Second Bone Spring formation.

6. MRC objects to Permian's applications and requests that they be denied for a number of reasons. I will be addressing the land-related reasons that Permian's applications should be denied.

The SE/4 of Section 8 is Already Fully Committed to MRC's JOA

7. **MRC Exhibit A-2** contains a map showing Permian's Fiero project outlined in green.

8. MRC Exhibit A-2 also shows MRC's current development plans for its Becky project outlined in blue, which includes the SE/4 of Section 8, as well as the SW/4 and NW/4 SE/4 of Section 9.

9. As shown on MRC Exhibit A-2, Permian's and MRC's development plans overlap in the SE/4 of Section 8. Notably, MRC's title information shows that 100% of the working interest in the SE/4 of Section 8 is committed to a joint operating agreement ("JOA") under which MRC owns an interest and its affiliate, Matador Production Company, is the designated operator. MRC's JOA also covers the SW/4 and NW/4 SE/4 of Section 9, among other lands, and MRC's title information shows that 100% of the working interest in the entirety of MRC's Becky project shown in blue is committed to MRC's JOA. Therefore, MRC does not need to force pool any working interest owners in its current Becky project, which is the reason MRC has not filed competing applications in this case.

10. With respect to the overlap between Permian's and MRC's development plans in the SE/4 of Section 8, not only does MRC's title information show that 100% of the working interest is subject to MRC's JOA, but MRC's title information shows that Permian's affiliate (by virtue of its acquisition of the interest previously owned by Read & Stevens, Inc.) is a party to MRC's JOA. Moreover, MRC's title information shows that Permian's affiliate only owns a 1.171875% working interest in the SE/4 of Section 8 (which is committed to MRC's JOA), while MRC owns a 26.100619% working interest the SE/4 of Section 8.

11. Because MRC controls 100% of the working interest in the SE/4 of Section 8 and intends to develop that acreage under its existing JOA, Permian's request to include the SE/4 of Section 8 in its Fiero project should be denied.

MRC's Development Plans

12. MRC's current preferred development for its Becky development would be to locate surface pads on the Eastern boundary, which would allow development using U-turn wells. MRC plans to initially target the Third Bone Spring and Second Bond Spring intervals. A general depiction of this potential development plan is shown on **MRC Exhibit A-3**.

13. Alternatively, if such surface location was not available, and MRC was required to locate its drilling pad on the Western boundary of the Becky project area, then MRC would plan to develop the N/2 SE/4 of Section 8 and the N/2 SW/4 and NW/4 SE/4 of Section 9 on a 1.25-mile basis and the S/2 SE/4 of Sections 8 and S/2 SW/4 of Section 9 on a 1-mile basis, also initially targeting the Third Bone Spring and Second Bone Spring intervals. A general depiction of this potential development plan is shown on **MRC Exhibit A-4**.

14. MRC's Federal team plans to discuss the potential pad locations for this project with the Bureau of Land Management ("BLM") as MRC gets closer to filing its applications for federal drilling permits.

15. In addition, to the extent the current working interest owners in the E/2 SE/4 of Section 9 and potential future lessee of the SW/4 SE/4 of Section 9 (discussed further below) were interested in that acreage being included in MRC's development, MRC would be open to discussing amending MRC's JOA to include that acreage.

16. MRC's plan to develop its Becky project is part of MRC's larger development plans for this area. **MRC Exhibit A-5** shows MRC's current development plans for its Rik Schenck, Helma Ling, and Jim Minor three-mile units directly North of the Becky project, outlined in blue. In addition, MRC Exhibit A-5 shows the contract area for MRC's JOA, referenced above, outlined in yellow.

**Permian's Application May Potentially Strand
MRC's Acreage in the S/2 SW/4 of Section 9**

17. As shown MRC Exhibit A-2, there is an unleased federal tract located in the SW/4 SE/4 of Section 9, highlighted in purple.

18. It is unknown if or when the BLM will place that unleased federal tract onto a federal lease sale, although MRC is in the process of nominating it.

19. If Permian's applications were granted it would create a risk of stranding the development of the S/2 SW/4 of Section 9 because, absent the ability to get approved surface on the Eastern boundary of MRC's Becky project in a location that would allow for U-turn wells, the unleased federal tract in the SW/4 SE/4 of Section 9 would prevent MRC from developing the S/2 SW/4 of Section 9 on a laydown basis with anything longer than a half-mile well.

20. Denial of Permian's application would remove that stranding risk for the S/2 SW/4 of Section 9 because it could be included in MRC's current Becky development plans, discussed above, that is already committed to a 100% voluntary agreement.

**Permian Should Drill 1.5-Mile Laterals (or 3-Mile U-Turn wells)
in the S/2 of Section 7 and SW/4 of Section 8**

21. MRC understands that Permian has lease expirations in or around June 2026 located in its fee acreage in the S/2 of Section 7 and/or SW/4 of Section 8.

22. To facilitate meeting its lease expiration deadlines, and to protect MRC's correlative rights and the correlative rights of MRC's JOA partners, Permian should develop its acreage in the S/2 of Section 7 and SW/4 of Section 8 on either a 1.5-mile basis or using 3-mile U-turn wells.

23. A map showing this alternative development is shown on **MRC Exhibit A-6**.

24. By excluding the SE/4 of Section 8 for its development, and developing its acreage using 1.5-mile laterals or 3-mile U-turn wells, this would allow Permian to meet any lease expirations in that acreage while at the same time allowing MRC to develop the acreage that is fully committed to its JOA.

25. For all these reasons, it is unclear to MRC why if Permian was concerned with lease expirations in the S/2 of Section 7 and/or SW/4 of Section 8 that it would seek to include the SE/4 of Section 8 (where its affiliate owns only a 1.171875% working interest that is subject to MRC's JOA) in its development plans.

26. In my opinion, denying Permian's applications would be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

27. **MRC Exhibits A-2 through A-6** were either prepared by me or compiled under my direction and supervision.

28. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

RE: Well Proposals – Fiero 7 Fed Com
Township 20 South – Range 27 East, N.M.P.M.
Section 7: S/2
Section 8: S/2
Eddy County, New Mexico

To Whom It May Concern:

Permian Resources Operating, LLC ("Permian"), as operator, hereby proposes the drilling and completion of the following four (4) wells, the Fiero 7 Fed Com Wells at the following approximate locations within Township 20 South, Range 27 East, Eddy Co., NM:

1. Fiero 7 Fed Com 123H

SHL: 912' FSL & 358' FWL or a legal location in the SW/4 of Section 9
BHL: 2,310' FSL & 100' FWL of Section 7
FTP: 2,310' FSL & 100' FEL of Section 8
LTP: 2,310' FSL & 100' FWL of Section 7
TVD: Approximately 6,675'
TMD: Approximately 16,960'
Proration Unit: N/2S/2 of Sections 7 & 8, T20S-R27E
Targeted Interval: 2nd Bone Spring
Total Cost: See attached AFE

2. Fiero 7 Fed Com 133H

SHL: 846' FSL & 358' FWL or a legal location in the SW/4 of Section 9
BHL: 2,310' FSL & 100' FWL of Section 7
FTP: 2,310' FSL & 100' FEL of Section 8
LTP: 2,310' FSL & 100' FWL of Section 7
TVD: Approximately 7,880'
TMD: Approximately 18,165'
Proration Unit: N/2S/2 of Sections 7 & 8, T20S-R27E
Targeted Interval: 3rd Bone Spring
Total Cost: See attached AFE

3. Fiero 7 Fed Com 124H

SHL: 879' FSL & 358' FWL or a legal location in the SW/4 of Section 9
BHL: 990' FSL & 100' FWL of Section 7
FTP: 990' FSL & 100' FEL of Section 8
LTP: 990' FSL & 100' FWL of Section 7
TVD: Approximately 6,676'
TMD: Approximately 16,961'
Proration Unit: S/2S/2 of Sections 7 & 8, T20S-R27E
Targeted Interval: 2nd Bone Spring
Total Cost: See attached AFE

300 N. MARIENFELD STREET, SUITE 1000
MIDLAND, TX 79701

OFFICE 432.695.4222
FAX 432.695.4063

4. Fiero 7 Fed Com 134H

SHL: 813' FSL & 359' FWL or a legal location in the SW/4 of Section 9
BHL: 990' FSL & 100' FWL of Section 7
FTP: 990' FSL & 100' FEL of Section 8
LTP: 990' FSL & 100' FWL of Section 7
TVD: Approximately 7,931'
TMD: Approximately 18,216'
Proration Unit: S/2S/2 of Sections 7 & 8, T20S-R27E
Targeted Interval: 3rd Bone Spring
Total Cost: See attached AFE

The locations, TVDs, and targets are approximate and subject to change dependent on surface or subsurface issues encountered. Permian is proposing to drill these wells under the modified terms of the 1989 AAPL Operating Agreement and a form of said Operating Agreement is available upon request. The Operating Agreement has the following general provisions:

- 100%/300%/300% non-consent provisions
- \$10,000/\$1,000 drilling and producing rates
- Permian Resources Operating, LLC named as Operator

Please indicate your election to participate in the drilling and completion of the proposed wells on the enclosed ballot. Please sign and return one copy of this letter, signed copies of the proposed AFEs, a signed copy of the enclosed insurance declaration, and your geologic well requirements.

In the interest of time, should we not reach an agreement within thirty (30) days of the date of your receipt of this letter, Permian will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into spacing units for the proposed wells. If you do not wish to participate, Permian would be interested in acquiring your interest in the subject lands which is subject to further mutually agreeable negotiation.

Thank you for your time and consideration, if you have any questions at all, please don't hesitate to contact Erin Lloyd at Erin.Lloyd@permianres.com or myself at, Ryan.Curry@permianres.com.

Respectfully,

A handwritten signature in blue ink that reads "RC Curry".

OPERATING, LLC FOR COMPULSORY POOLING
EDDY COUNTY, NEW MEXICO**

Case Nos. 25283-25284

SELF-AFFIRMED STATEMENT OF ANDREW PARKER, GEOLOGIST

1. My name is Andrew Parker. I work for MRC Energy Company, an affiliate of Matador Production Company ("Matador"), as a Senior Vice President of Geosciences.
2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Permian Resources Operating, LLC ("Permian") in these consolidated cases, as well as MRC's current development plans for its Becky project, and I have conducted a geologic study of the lands in the subject area.
4. **MRC Exhibit B-1** contains two maps that generally depict MRC's two potential development plans for our Becky project in the SE/4 of Section 8 and the SW/4 and NW/4 SE/4 of Section 9, depending on where MRC can locate surface pads. The first map shows a development plan where MRC would use u-turn wells, which would be MRC's preferred development plan if MRC was able to locate surface on the Eastern side of the project that would allow for u-turn development. The second map shows an alternative development plan, in the event MRC was not able to locate surface on the Eastern side of the project and was able to locate surface on the Western boundary of the project, where MRC would use a combination of 1.25-mile wells

and 1-mile wells. In either scenario, MRC would plan to initially target both the Second Bone Spring and Third Bone Spring of the Bone Spring formation.

5. **MRC Exhibit B-2** is a locator map with a large red box in the top left corner. The yellow shaded rectangle within this larger red box identifies the acreage included in MRC's current Becky development plan.

6. **MRC Exhibit B-3** is a subsea structure map prepared off the top of the Bone Spring formation. The contour interval is 100 feet. The structure map shows the Bone Spring formation gently dipping to the southeast. The structure appears consistent within MRC's Becky project across the proposed wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments to horizontal drilling.

7. Also included on MRC Exhibit B-3 is a line of cross section from A to A'.

8. **MRC Exhibit B-4** is a structural cross-section prepared displaying open-hole logs run over the Bone Spring formation from the four representative wells denoted from A to A'. For each well in the cross-section, the following logs are included: gamma ray, caliper, resistivity, and porosity. The proposed target interval for each of MRC's wells (under either development described above), which are in the Second Bone Spring and Third Bone Spring of the Bone Spring formation, is labeled and marked with a yellow shaded area. The logs in the cross-section demonstrate that the targeted intervals within MRC's Becky project is consistent in thickness, across the entirety of the proposed spacing units.

9. In my opinion, the laydown orientation is the strongly preferred orientation for development in this area for Bone Spring wells.

10. Based on my geologic study of the area, I have not identified any geologic impediments to drilling horizontal wells within the Bone Spring formation within MRC's Becky project.

11. In my opinion, each quarter-quarter section within MRC's Becky project will be productive and contribute more-or-less equally to production from the proposed wells (under either of the two development plans described above).

12. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to result in the greatest ultimate recovery.

13. **MRC Exhibits B-2 through B-4** were either prepared by me or compiled under my direction and supervision.

14. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

CASE NOS. 25283-25284

SELF-AFFIRMED STATEMENT OF TANNER SCHULZ

1. My name is Tanner Schulz and I am employed by MRC Energy Company, an affiliate of MRC Permian Company ("MRC"), as the Vice President of Reservoir Engineering and the Reserves Team.

2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum engineering. My credentials as a petroleum engineer have been accepted by the Division and made a matter of public record.

3. I am familiar with the applications filed by Permian Resources Operating, LLC ("Permian") in these consolidated cases and I am also familiar with MRC's current development plans for its Becky project.

4. Permian's applications in these cases seek to pool spacing units for two-mile laydown laterals in the Bone Spring formation underlying the S/2 of Sections 7 and 8, Township 20 South, Range 27 East, Eddy County, New Mexico. MRC understands that the initial wells proposed in Permian's applications are for the Third Bone Spring of the Bone Spring formation.

5. MRC objects to Permian's applications and requests that they be denied, which would still allow Permian to develop its acreage in the S/2 of Section 7 and SW/4 of Section 8 utilizing 1.5-mile laterals or 3-mile U-turn laterals. I will be addressing the potential risk of waste

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. C
Submitted by: MRC Permian Company
Hearing Date: May 27, 2025
Permian Case Nos. 25283-25284**

that could be caused if the approval of Permian's applications led to the acreage in the S/2 SW/4 of Section 9 being undeveloped.

6. For purposes of my testimony, I conducted an analysis that assumed (i) the 40 acre tract in the SW/4 SE/4 of Section 9 was an unleased federal tract that would remain unleased, and (ii) that MRC was unable to locate drilling pads on the Eastern portion of its Becky project that would enable it to include the S/2 SW/4 of Section 9 in development using U-turn wells.

7. **MRC Exhibit C-1** contains a map showing Permian's Fiero two-mile spacing units in green, which would be the result if Permian's current applications were approved. The remaining portion of MRC's Becky project (assuming Permian's applications were approved) is shown in yellow. The 40 acre tract in the SW/4 SE/4 of Section 9 that I understand is an unleased federal tract is shown on the map in purple.

8. As mentioned above, my analysis was based on an assumed scenario where MRC was unable to locate its drilling pad on the Eastern portion of the remaining Becky project to allow for U-turn development and was required to locate its drilling pad on the Western boundary of its remaining Becky project area. In that instance, the development of the 80 acres comprised of the S/2 SW/4 of Section 9 (outlined in red on the map) would be limited to one-half mile development if developed on the preferred laydown orientation for this area.

9. The chart at the bottom of Exhibit C-1 contains a summary of an economic analysis of the potential for one-half mile development of the Second Bone Spring and Third Bone Spring targets in that acreage. In conducting this analysis, I surveyed the production results from the wells shown in **MRC Exhibit C-2** (for the Second Bone Spring) and **MRC Exhibit C-3** (for the Third Bone Spring). For purposes of simplicity and objectivity, I used the EURs calculated by a third

party for such wells to calculate an average barrels of oil per foot and gas oil ratio for each respective target using that data set of wells.

10. As shown in the chart at the bottom of Exhibit C-1, this data indicated a Second Bone Spring well result of approximately 55 barrels of oil per foot and a Third Bone Spring well result of approximately 60 barrels of oil per foot. Using an assumed economic run of \$70 per barrel of oil and \$3 per Mcf of gas, the chart on Exhibit C-1 shows that I believe neither a half-mile Second Bone Spring well nor a half-mile Third Bone Spring well would be economically viable because both returns-on-investment ("ROI") are well below one and both rates of return ("RoR") are 0.00% under this analysis. Accordingly, MRC would not elect to drill those half-mile wells under that cost and pricing scenario.

11. If the S/2 SW/4 of Section 9 went undeveloped, the chart on Exhibit C-1 also shows, using the same well result assumptions described above, that there would be approximately 207,000 barrels of oil and 1,345,000 Mcf of gas that would be undeveloped and therefore wasted in the Second Bone Spring and Third Bone Spring within that acreage.

12. However, if Permian's applications were denied, even in a scenario where the federal lease remained unleased and MRC was required to locate drilling pads on the Western boundary of its Becky project, then the S/2 SW/4 of Section 9 could be developed on a one-mile basis as generally depicted on **MRC Exhibit A-4**, which would avoid the waste described above.

13. Accordingly, in my opinion, denying Permian's applications would be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

14. **MRC Exhibits C-1 through C-3** were either prepared by me or compiled under my direction and supervision.

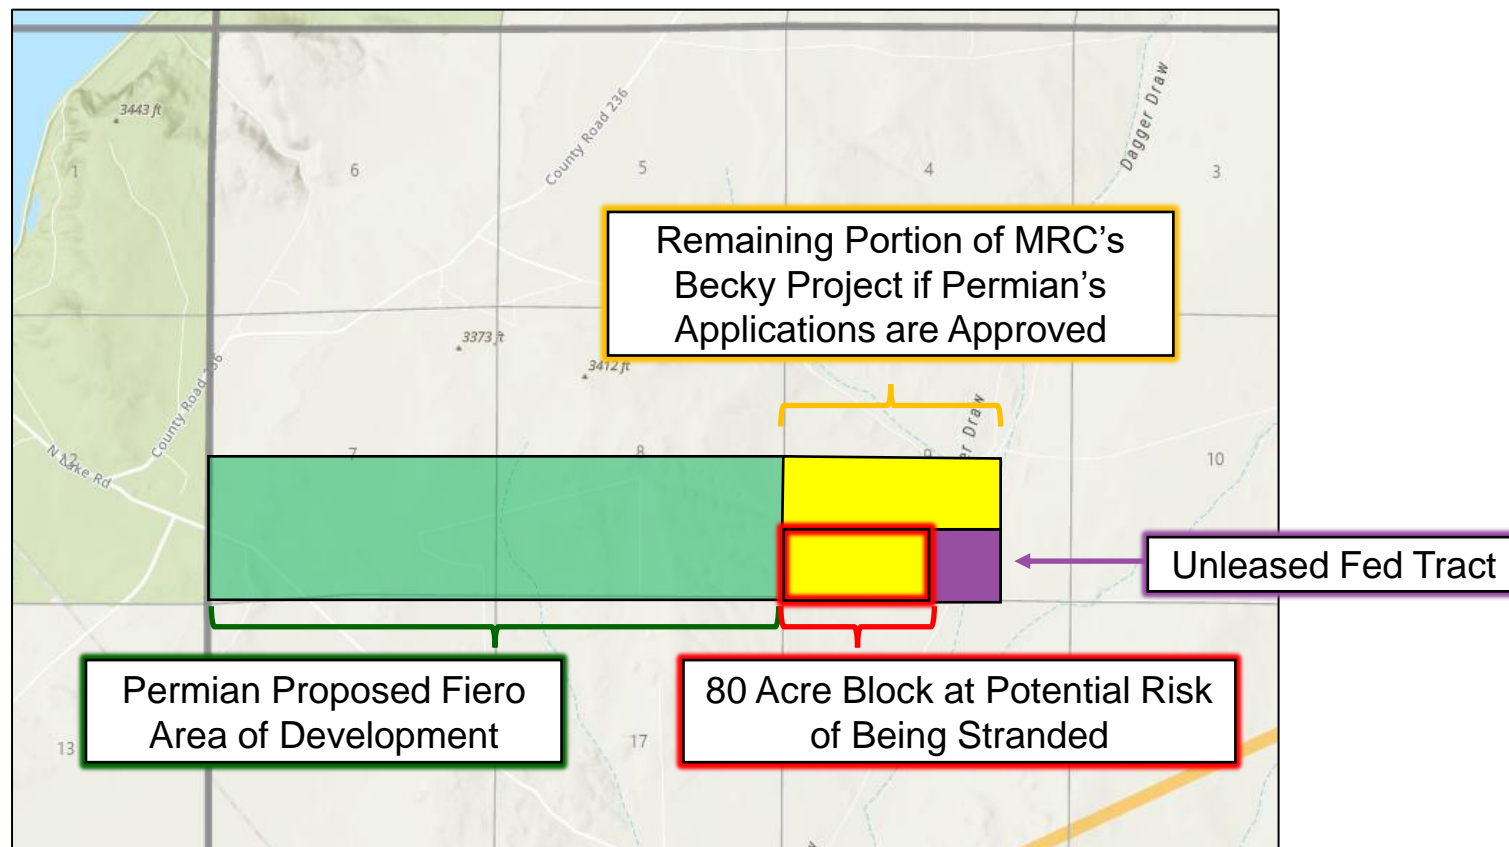

15. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.
