OTHER PARTIES

None at this time.

STATEMENT OF THE CASE

In this case, Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) in a standard ~320-acre, more or less, horizontal spacing and proration unit ("HSU"), with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico. Applicant proposes to drill the following wells:

- Petty Federal Com 31CD 001H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,717' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 2,628' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 002H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,697' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 2,319' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 003H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,677' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 2,159' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 004H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,657' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 1,785' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 005H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,637' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 1,410' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 006H well, to be horizontally drilled from a surface hole location approximately 1,085' FWL and 676' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 1,250' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 007H well, to be horizontally drilled from a surface hole location approximately 1,086' FWL and 656' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 875' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 008H well, to be horizontally drilled from a surface hole location approximately 1,086' FWL and 636' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 500' FSL of Section 31-16S-31E; and
- Petty Federal Com 31CD 009H well, to be horizontally drilled from a surface hole location approximately 1,087' FWL and 616' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 340' FSL of Section 31-16S-31E.

The completed interval of the Petty Federal Com 31 CD 001H well ("001H") will be a non-standard location. Longfellow will seek administrative approval of the non-standard location. The Petty Federal Com 31CD 006H well is a proximity well. With the proximity tracts, the completed intervals of all wells other than the 001H will meet standard setback requirements. The first and last take points meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation

of the costs, the designation of Applicant as Operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 6 miles Northeast of Loco Hills, New Mexico. The application was filed August 11, 2025.
