### **EDUCATION**

**Louisiana State University**, Baton Rouge, LA  
*Bachelor of Science in Petroleum Engineering*; August 2010 - May 2014

**University of Alberta**, Edmonton, Alberta Canada  
*Bachelor of Commerce in International Business & Law*; August 2004 - May 2008

### **EXPERIENCE**

**Senior Facilities Engineer**; May 2022-Present

*Permian Resources*; Midland, TX

- Design, plan, and execute the construction of central tank batteries for Texas and New Mexico Delaware Basin production operations
- Design and execute the construction of produced water, crude, and low/high pressure gas pipelines
- Monitor and optimize vapor recovery systems, increasing company vapor recovery in 2023 by 7% in TX and 9% in New Mexico
- Interface with PR marketing team and midstream companies on project execution and operations
- Implemented a flare reduction system utilizing a mobile natural gas processing system and NGL handling facility. Able to reduce single-site gas takeaway needs by 196 MMSCF over a two-month period. Consumed over 1.0 BSCF of gas in gas takeaway constrained areas.
- Implemented multiphase flow meter (MPFM) production allocation design in TX and NM resulting in average capital savings of \$125,000 per well
- Designed and executed the installation of crude oil sweetening systems, saving \$300,000 a month on chemical treatment at production facilities
- Manage all facility equipment RFQs and procurement

**Water Resources Manager**; September 2021 – May 2022

*EOG Resources*; Midland, TX

- Managed a team of forty people including engineers, admin, techs, foreman and field personnel
- Managed a \$29MM indirect capital and \$93MM direct capital budgets
- Interfaced with divisional management teams and Houston executive team

**Senior Water Resources Engineer**; February 2020 – September 2021

*EOG Resources*; Midland, TX

- Implemented leak detection on all reuse water transfer lines, safely handling over 1MM BWPD
- Reduced reuse water spill intensity rate by 60%
- Developed automated transfer systems to reduce cost and increase safety
- Decreased operating cost by 23% YOY
- Permitted, designed, and built produced water treatment facilities capable of treating 120,000 BWPD

Submitted by: Read & Stevens, Inc.  
Hearing Date: September 18, 2025  
Case No. 25371

**Completions Engineer II; October 2017 – February 2020***EOG Resources; Gillette, WY/Denver, CO*

- Write new well completion procedures including perforating and hydraulic fracturing design
- Optimize stimulation cost and production volumes
- Developed a real-time drillout operation monitoring system
- Supervise field consultants and evaluate completion operation techniques

**Senior Production Engineer; January 2016 – October 2017***EOG Resources; Stanley, ND*

- Wrote initial artificial lift installation and well workover procedures
- Analyzed well performance and implemented changes to increase oil recovery
- Worked with production foreman to reduce lease operating expenses (LOE)

**Facilities Engineer I; June 2014 – January 2016***EOG Resources; Stanley, ND*

- Served as a project manager for the construction of a new salt water disposal
- Designed new salt water disposals and optimized existing salt water disposal facilities
- Implemented new recording procedures to monitor injection pressures to prevent wellbore damage

**Drilling Engineer Intern; May 2013-August 2013***EOG Resources; Calgary, AB Canada*

- Reviewed a proposed infill well, crossing nine existing offsets, and recommended risk mitigation techniques
- Evaluated surface equipment rental expenditures for drilling and proposed cost-cutting measures to potentially save \$280,000 per year
- Gained field experience in Drumheller, AB by sitting on an exploratory well from pad construction through production

**Completions Engineer Intern; May 2012-August 2012***EOG Resources; Calgary, AB Canada*

- Developed a new completions AFE budget
- Attended targeting meetings and wrote perforation programs
- Gained field experience in Waskada, MB by watching perforating, hydraulic fracturing, and installation of production equipment

**HONORS/ACTIVITIES**

- Fundamentals of Engineering (FE) exam

## Facilities Overview

Exhibit D-1

Permian Resources plan to split wells between the proposed Joker CTB and Riddler CTB

- Riddler CTB commissioning date: 1/5/2026

Joker CTB

- 350' x 450' pad

Riddler CTB

- 350' x 450' pad

Total surface impact: 9.46 acres

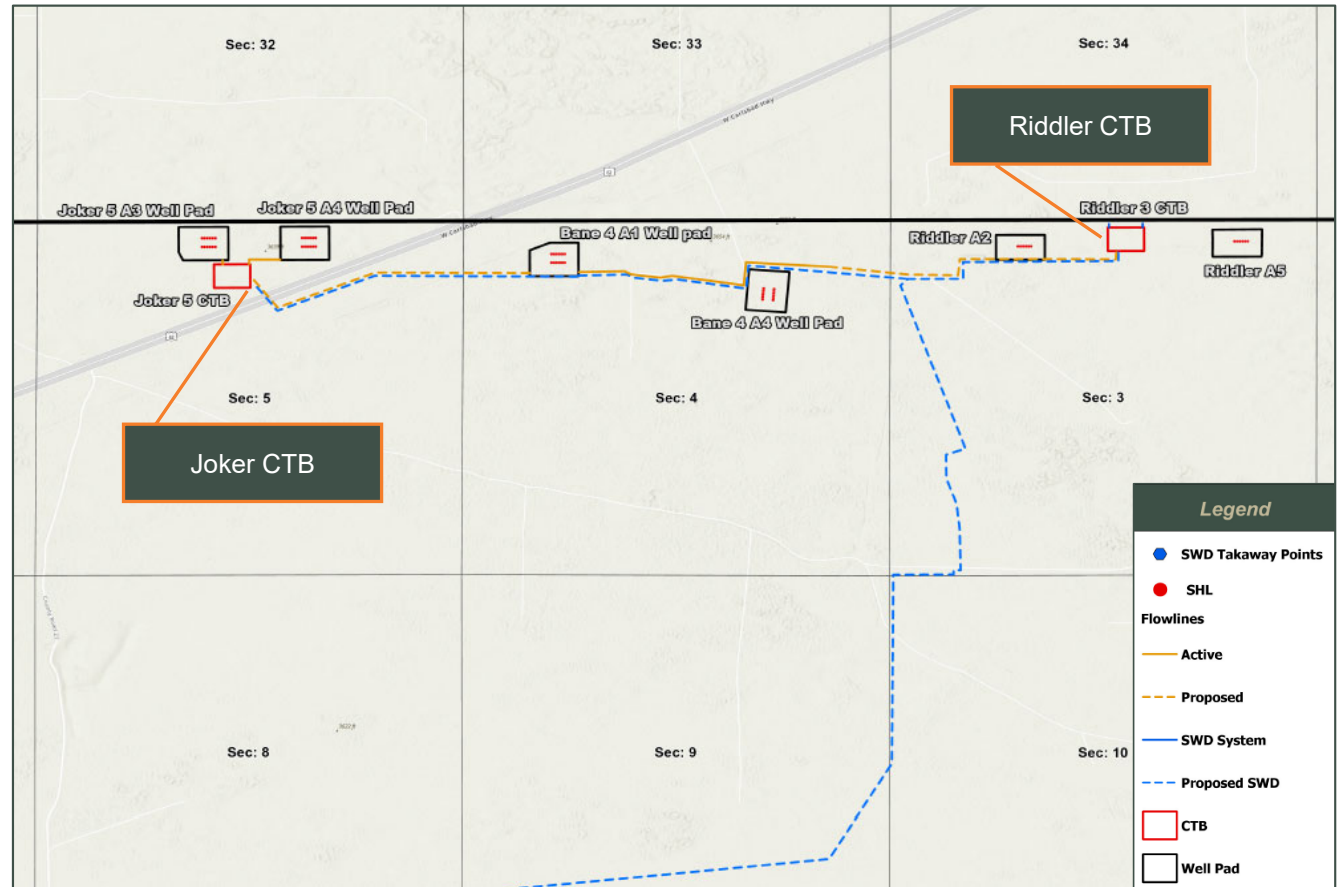

- Permanent (CTB): 3.61 acres
- Temporary (flowline): 5.85 acres

All CTB pad locations and have been on-site approved by the Bureau of Land Management

Joker and Bane flowline routes have been on-site approved by the Bureau of Land Management

Permian Resources is continuing to work on Bane to Riddler CTB flowline ROW

Locations thoughtfully selected to avoid several CEHMM-identified habitat

## Dunes Sagebrush Lizard Proactive Planning

Exhibit D-2

### Ongoing Conservation Effort:

- The U.S. Fish and Wildlife Service announced that effective June 20, 2024, that the Dunes Sagebrush Lizard (DSL) is listed as endangered under the Endangered Species Act
- DSL is a species of spiny lizard found exclusively in the shinnery oak dunelands and shrublands of the Mescalero and Monahan's Sandhills in southeastern New Mexico and west Texas.

### Permian Resources Proactivity:

- Permian has entered into Candidate Conservation Agreements and has enrolled its acreage within the DSL habitat.
- As part of such Candidate Conservation Agreements, Permian Resources is currently taking all precautions to ensure that DSL habitat is not disturbed in connection with our drilling, completion, and production operations.

## Operations & Environmental Overview

Exhibit D-3

### CTB Design

- **Well Testing**
  - Dedicated test vessels for every well
  - No bulk/test or interpolated well production allocations
- **Separation**
  - Four stages of fluid separation
  - Maximize product recovery and minimize potential for emissions
- **Facility Capacity**
  - Thorough production forecast review for each phase of development
  - Hydraulic modelling to ensure proper line and equipment sizing
  - Ability to expand and upsize facility as needed
  - Proven track record of high-well count/high-volume facilities
- **Environmental**
  - Full-facility containment for soil impact mitigation
  - Oversized vapor recovery equipment
  - Vapor Recovery Unit field team
  - Tank Vapor Control System operable up to 40 psi
  - No planned truck hauling to/from CTB
  - Air-supplied pneumatic device operation

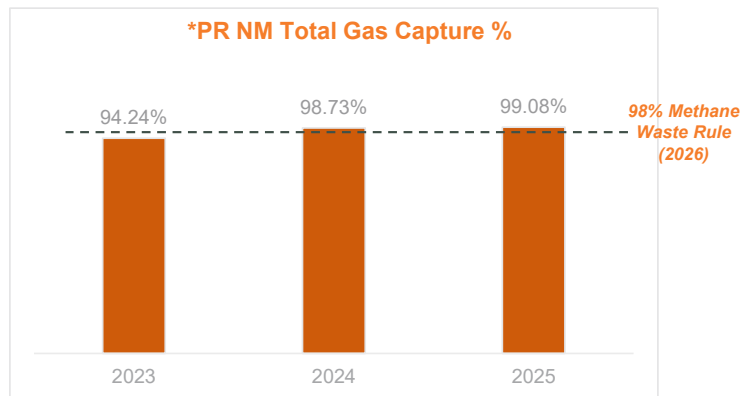

## Gas Capture & Vapor Recovery Performance

**Exhibit D-4**

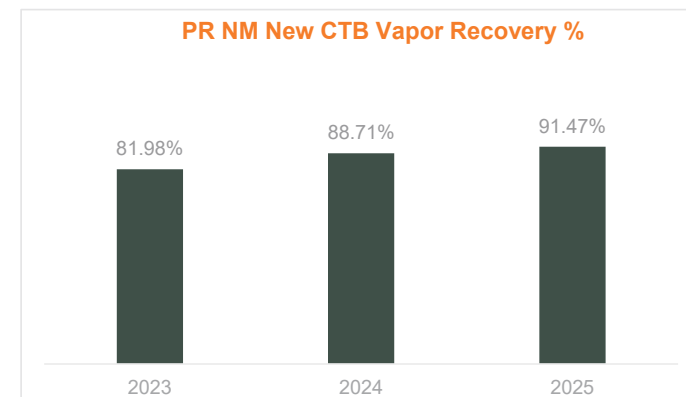

### Gas Capture

- Permian Resources, from the executive team to field pumpers, are committed to meeting gas capture goals and has evidence to support commitment.
- 99.0% of all gas produced in NM was captured, well ahead of New Mexico's methane waste management rule of 98% by December 31, 2026
- Aggressive shut-in strategy and advanced technology, including automated shut-in valves on the wellheads, ensure flared gas volumes are minimized when midstream upsets occur
- All flared volume events are reported via C-129 and C-115B forms

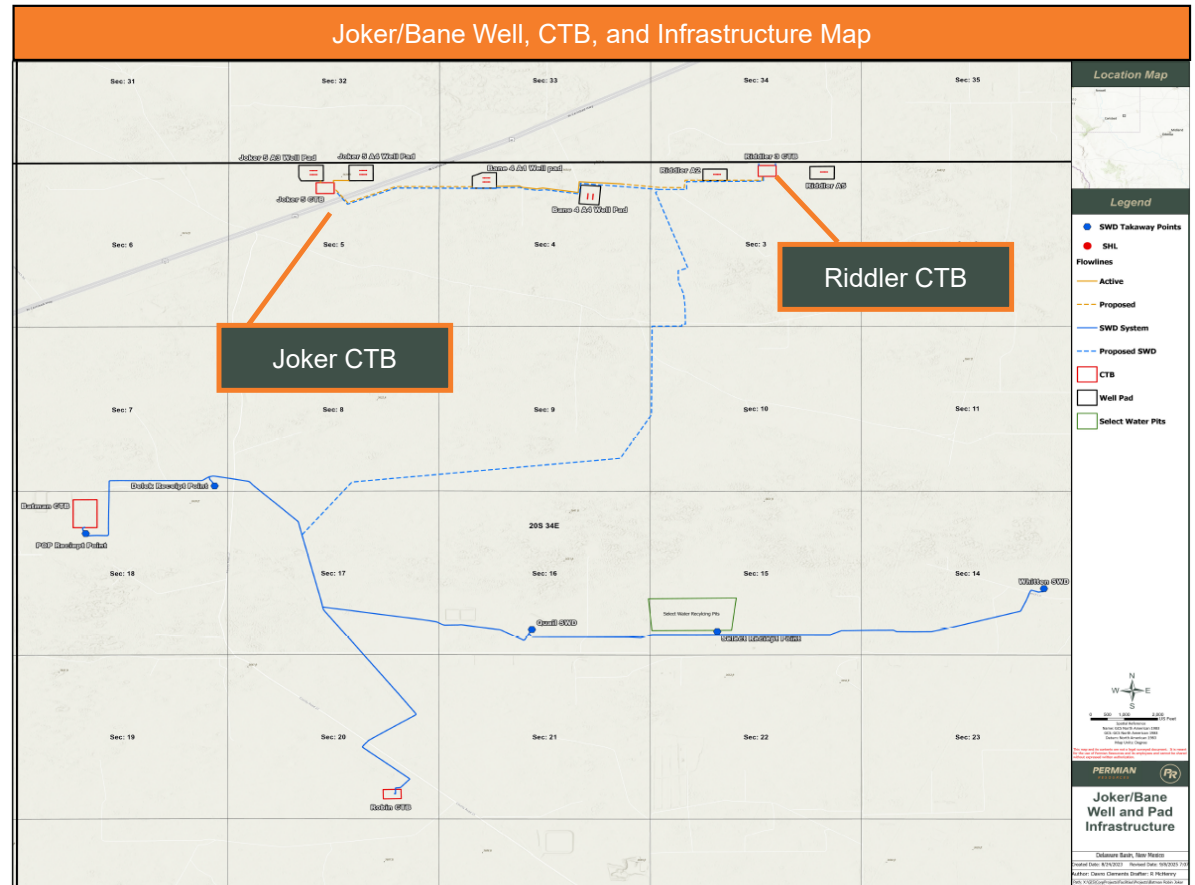

### Vapor Recovery

- Vapor recovery from gas flashed in production storage tanks and vapor recovery towers (VRT) is a primary focus for PR
- In-house vapor recovery team, including foreman and techs, ensure VRU maintenance requirements and run-time KPIs are met
- Continuous emissions monitoring systems are installed on sites that account for 80% of PR's oil production
  - Monitoring system will alarm operators of fugitive emissions events

\*Based on filed C-115Bs. 2025 includes filings through June.

- Joker, Bane, and Riddler DSUs are dedicated to Targa
- Riddler ROW has been acquired, and construction will begin in Q4 25
- Joker CTB lateral ROW in progress

# Water Recycling Overview

Exhibit D-6

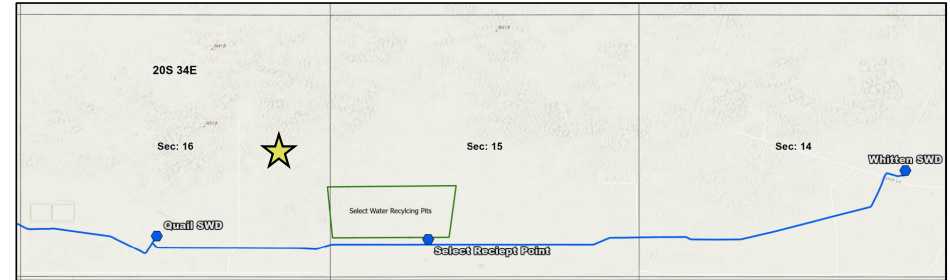

## Historical Water Recycle Usage

- 62% YTD recycled water utilization in NM
  - Development has been focused on new areas near Carlsbad, lacking infrastructure until Q1 2026
- 44% YTD recycled water utilization across all PR assets
- <1% YTD freshwater utilization across all PR assets, the rest coming from recycled water and brackish water
- Jewett (Batman/Robin/Joker/Bane/Riddler) has seen a step-change in recycling % since Select's water recycling pit was commissioned in Q1 2025

Jewett Stimulation Recycle %

NM Stimulation Water Sources

Select Water Solutions' Jewett Water Recycling Facility

- (2) 1.0MM BBL treated water pits connected to Joker/Bane via PR's company owned water gathering system
- Able to treat and reuse 120,000 BWP

Brackish water source is defined as water with Total Dissolved Solids (TDS) >1,000 PPM and < 30,000 PPM  
Fresh Water source is defined as water with Total Dissolved Solids (TDS) < 1,000 PPM

### **RELEVANT EXPERIENCE**

NM Asset Geoscience Manager, Permian Resources, Midland Tx December 2023 – Present

- Responsible for Managing Permian Resources New Mexico geology team. Responsible for regional drilling strategy, target delineation, and exploration mapping.

Sr. Staff Geologist, Permian Resources, Midland Tx December 2022 – December 2023

- Responsible for maturing Permian Resources Lea County, New Mexico assets to make them drill ready. Primary duties included geologic mapping of target intervals, planning data collection programs, working with Reservoir Engineering and Land to mature prospects, working with Regulatory, Surface Land and Drilling to get prospects drill ready.

Geoscience Supervisor, ConocoPhillips/COG Operating, Midland Tx July 2017 – November 2022

- Lead team through ConocoPhillips's acquisition of Concho. Ensured continuity with project maturation and execution during company transition. Had a lead role in geoscience software and database transfer/merging between companies.
- 2018-Present: Delaware Basin East Geoscience Supervisor– Currently managing a team of 7-10 reports comprised of Geologists, Geophysicists, and Geo techs. The team's core responsibilities include identifying, planning and executing drilling projects for 6-10 rigs and updating geologic maps of the asset area as new data becomes available. This team has been at the forefront of integrating seismic data into the preplanning of drilling projects, resulting in improved geosteering workflows and improved maintenance of wellbore spacing on large well-count projects. Other responsibilities include identifying new drilling inventory, identifying and working trades with partners/competitors, and working with state and federal agencies on well permitting.
- 2017 – 2018: Delaware Basin Reservoir Characterization Supervisor – Managed a team of 7 geologists and geotechs with the primary goal of applying the resource mapping workflows established in previous position to the remainder of the targets in North Delaware Basin. Primary responsibilities included setting priorities for mapping projects and mentoring the geologists through mapping and modeling workflows. Team was successful in creating regional oil in place, pressure, maturity, and water saturation maps for the First Bone Spring Sand & Shale, Second Bone Spring Sand, Charky, Wolfcamp B-C-D and Penn Shale formations. Team was also responsible for monitoring competitor activity and evaluating Operated By Other (OBO) ballots.

Staff Geologist, COG Operating, Midland Tx April 2013 – July 2017

- 2013-2022: Senior mentor for COG geologists.
- 2016-2017: Delaware Basin Regional Geologist – Mapped regional oil in place, pressure, maturity and water saturation for the Avalon, Third Bone Spring, and Wolfcamp A payzones. Worked closely with a petrophysicist to develop a facies-based petrophysical model for these formations and generated resource maps with good correlations to production in both sand and shale targets. Created a regional set of conformed surfaces in Petrel that were used to accurately automate horizontal well target coding in the Delaware Basin. Designed and executed 5-well pilot hole and coring program designed around quantifying moveable hydrocarbon in unconventional targets. Responsible for testing alternate technical software packages and comparing them back to software that was being utilized by COG at the time.
- 2013 – 2016: Exploration Geologist – Generated conventional and unconventional play ideas across the entire Permian basin, which provided exposure to most of the major geologic pay zones in Delaware and Midland Basins, on the Central Basin Platform and on the Northern Delaware Basin Shelf. Part of a team that evaluated acquisition/divestment opportunities and attended data rooms. Continuously monitored competitor activity, provided operations support on any Exploration or Delineation wells drilled by COG and was responsible for the planning and execution of multiple pilot hole data collection programs.

Senior Geologist, ConocoPhillips (COP), Midland Tx April 2011 – April 2013

- Worked on the Bakken Implementation Team as an Operations Lead and Development Planner.
- Planned downspacing strategy for 120,000 COP operated acres in the Bakken Leasehold. Planned downspacing of 20+ individual drill spacing units, managed 3+ years of drilling inventory for 8 active drilling rigs, collaborated with land,

Ira Bradford

2022

regulatory and field staff to resolve issues with the North Dakota Industrial Commission (NDIC), Bureau of Land Management (BLM) and Forest Service, and evaluated and made recommendations on OBO ballots.

- Planned regional data acquisition and pilot project strategy that focused on collecting data to better understanding reservoir properties and completions practices. Team lead for the planning and implementation of two data collection pilot programs including planning and implementing whole core, and wireline collection programs.
- Operations Lead providing operations and horizontal geosteering support for 3 active rigs, mentored and trained 7 new hire operations geologists, provided as-needed geosteering support for other COP assets operated out of Midland (Heath, Granite Wash and Niobara), evaluated mudlogging bids and invoices, and was the primary point of contact with mudlogging vendors.

Senior Geologist, Murphy Exploration and Production Company, Houston Tx December 2008 – April 2011

- Eagleford Operations/Development Geologist: Performed well control structure mapping, well-log correlation; picked viable well locations based on geologic, lease and legal data, created well proposals, planned formation evaluation programs and provided day to day geologic operations support for 2 drilling rigs over Murphy's 300,000+ acre Eagleford position. Evaluated bids from service companies, evaluated core data, evaluated new acreage opportunities, trained 2 new operations geologists, and planned proration unit layouts across large acreage tracts. Also planned and executed two conventional cores and 4 rotary sidewall coring jobs.
- Gulf of Mexico Operations Geologist: provided geologic operations support to active drilling wells. Supported Green Canyon Team providing: well-log correlation, Openworks paleontology database construction and maintenance, seismic interpretation, analogue field studies on K2 and Pony fields, and core data evaluation.

Senior Geologist, Integrated Reservoir Solutions Division, Core Labs, Houston Tx June 2007 – December 2008

- Described reservoirs and characterized sands from the deepwater Gulf of Mexico and shale from the continental United States.
- Deepwater Gulf of Mexico work centered on reservoir description based on the analysis of whole rock core. Techniques included sedimentologic description, thin section analysis and point counting, scanning electron microscope analysis, physical property and geochemical analysis, and well log interpretation and correlation. I characterized sand reservoirs from a wide variety of Miocene, Oligocene, and Paleogene plays.
- Characterized and evaluated cores in the Gas Shale Consortium based on sedimentology, petrography, organic geochemistry, and physical properties.
- Described and analyzed shale cores from the following formations: Barnett, Caney, Woodford, New Albany, Marcellus, Bossier, Eagleford and Pearsall.

Intern Geologist, Integrated Reservoir Solutions Division, Core Labs, Houston, Tx June 2006 – August 2006

- Worked on the Gas Shale Consortium learning how to characterize gas shale reservoirs through core description, geochemistry, and petrography.

Intern Geologist, Equitable Production, Pittsburgh, PA June 2003- August 2003

- Digitized and analyzed well logs. Used well logs to pick formation tops and to correlate subsurface formations. Catalogued/interpreted maps for teams working in Virginia, West Virginia, and Kentucky.

## EDUCATION

New Mexico State University, Las Cruces, NM 2005 -2007

- Completed M.S. in Geology with a focus on sedimentary petrography and sedimentology.

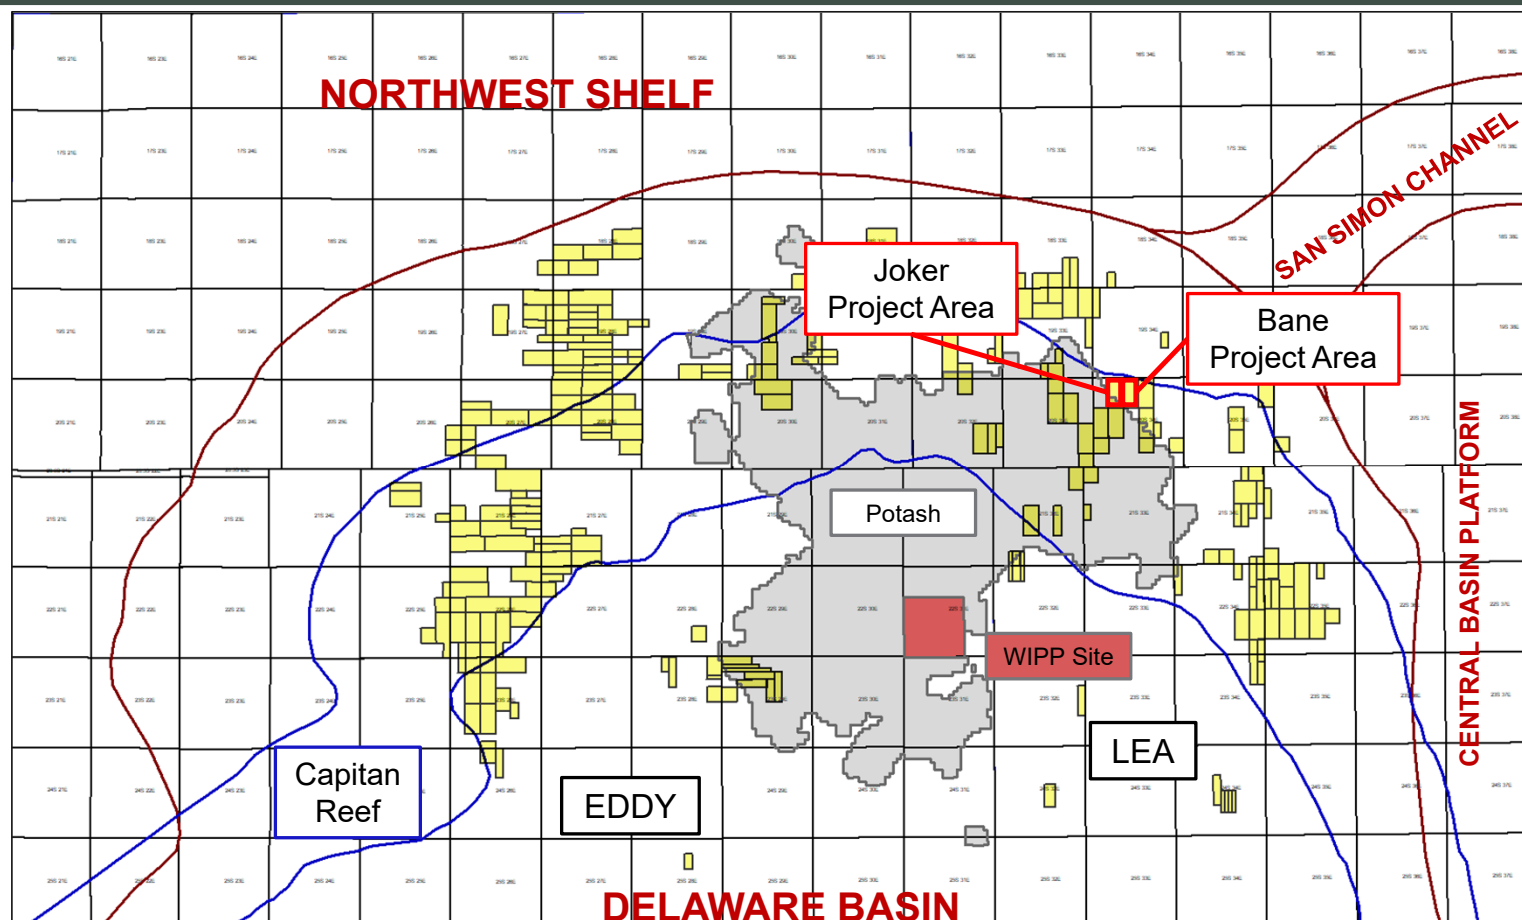

Allegheny College, Meadville, PA 1999 - 2003

- Completed B.S. in Geology with a minor in German language and culture.

 Permian Resources

# Permian Resources Offset Activity

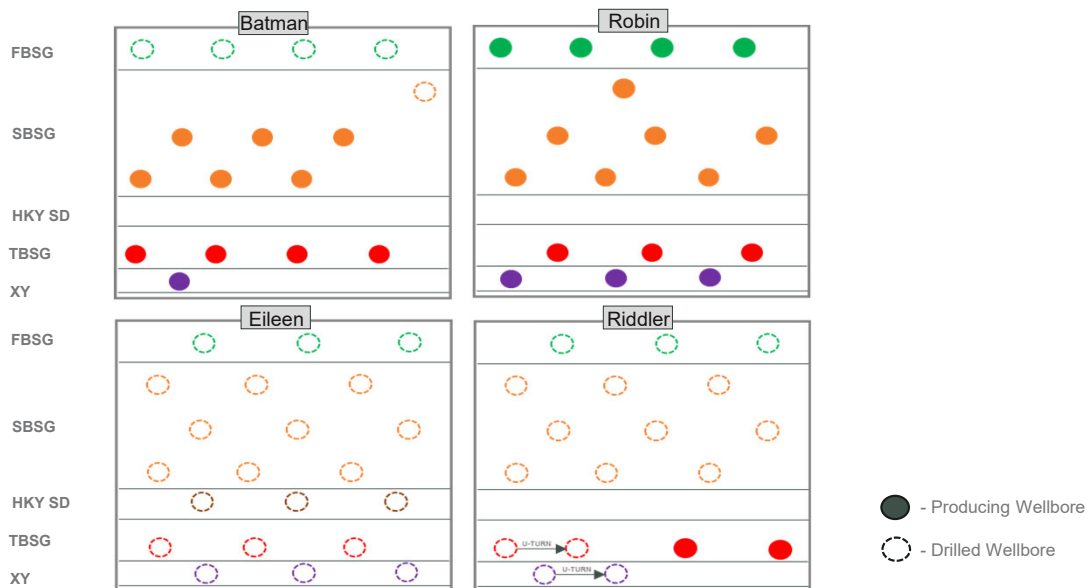

PR continues to set the standard for full DSU development in this area

Exhibit E-2

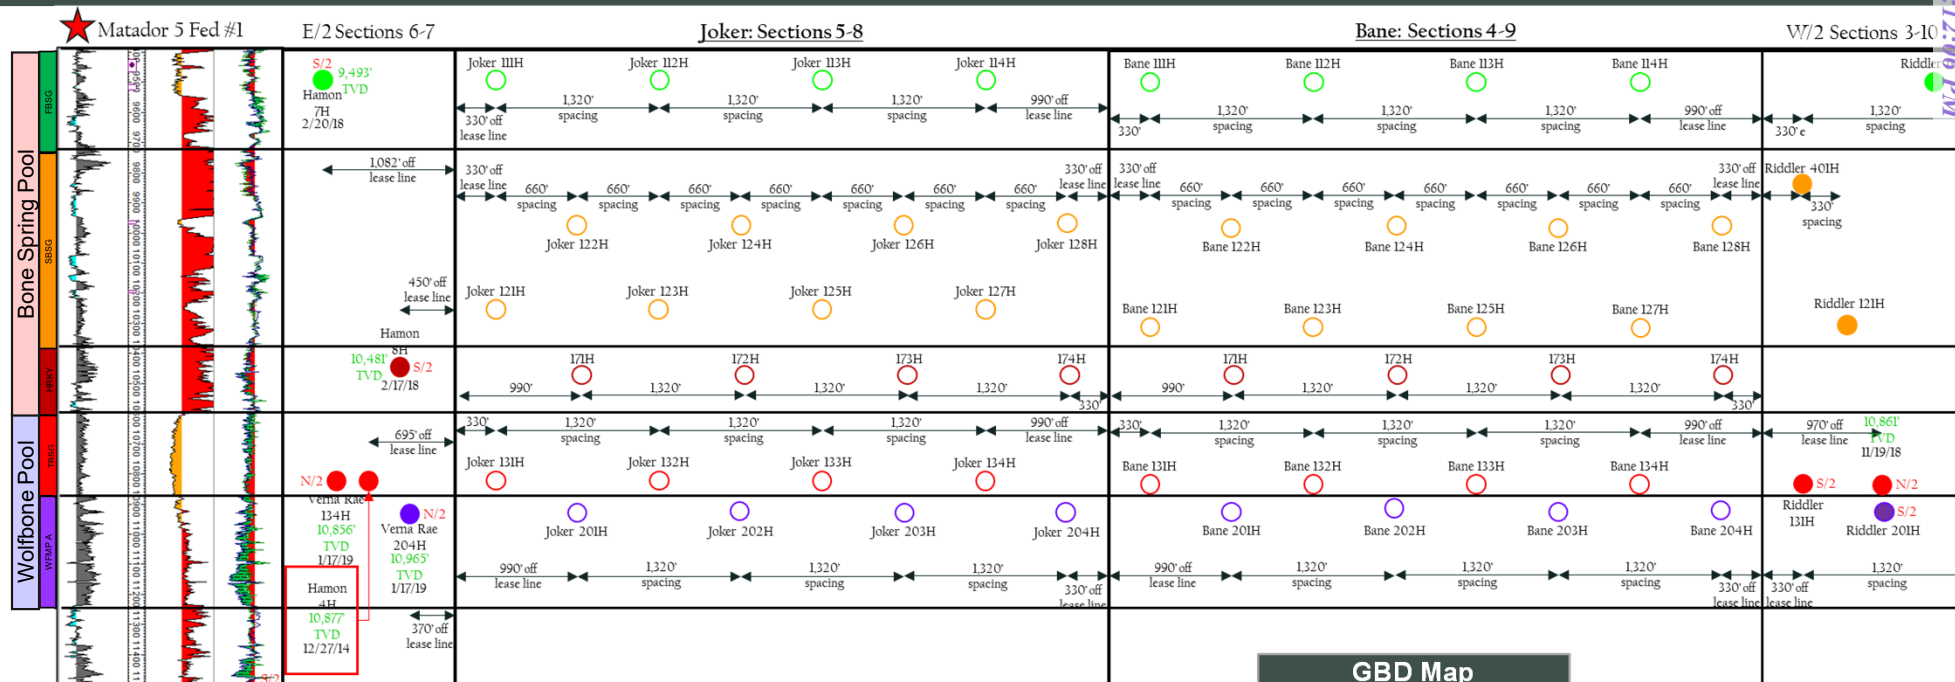

Permian Resources continues to be one of the most active operators in this AOI

- PR will have drilled 68 horizontal wellbores in the Bone Spring and Wolfcamp formations in DSU's directly offset the Joker/Bane by the end of 2025.
- PR's Proposals on Joker/Bane are not simply posturing, but represent the development plan PR intends to drill, as seen in the offsets.
- PR has also invested in multiple pilot hole and core studies to better understand the resource distribution and reservoir properties in this area.

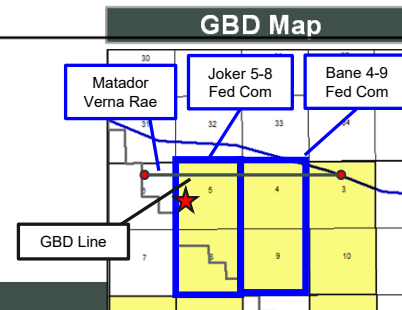

# Full Scale Development Plan Joker, Bane, Riddler

**Exhibit E-3**

## Development Plan

- PR's plan of development accounts for co-developed target zone spacing across multiple offsetting units
- Development plan expands upon the learnings from Batman and Robin DSU's of TBSG and WFMP A co-development, which are geologically analogous to the Joker and Bane units

# Co-Development Resource Mapping TBSG vs WFMP A

Exhibit E-5

TBSG and WFMP A PHIH Map Cutoff: DPHI > 4%

TBSG Wells WFMP A Wells

## Key Points

- The Wolfbone pooled interval encompasses 3 hydrocarbon bearing intervals that contribute reserves to wells drilled in the Pool: The Third Bone Spring Sand, The Wolfcamp XY Sand and the Wolfcamp A Shale
  - PR plans to target the Basal TBSG Lobe and Y Sand, which PR believes are the primary hydrocarbon bearing units in this Pool.
  - The WFMP A Shale and Upper TBSG contribute hydrocarbons to these wellbores to a lesser extent.
  - Due to a lack of baffles in the different reservoir units, it is impossible to accurately allocate out where the oil is being produced from in this Pool, so PR believes the only equitable way to honor depth-severed interests is to drill wells on both sides of the severance and allocate on a surface acreage basis.
- TBSG PHIH Map
  - Calculated from the Top of Third Bone Spring Sand to the Top of Wolfcamp A using a greater than 4% Density Porosity Cutoff
  - Mapping shows that the TBSG in the Joker and Bane Unit's is analogous to recently co-developed PR Batman wells offset to the SW
- WFMP A PHIH Map
  - Calculated from the Top of Wolfcamp A to the Top of Wolfcamp B using a greater than 4% Density Porosity Cutoff
  - Mapping shows that the WFMP A in the Joker and Bane Unit's is analogous to recently co-developed PR Batman wells offset to the SW

# Cimarex's Allocation formula ignores hydrocarbon bearing rocks in the WFMP A Shale

Cimarex's allocation formula completely ignores hydrocarbons contained in the Wolfcamp A shale, which is part of the Wolfbone pool. Core data indicates that the Wolfcamp A shale is a porous, organic-rich, thermally-mature, hydrocarbon rich shale, and offset wellbores targeting this interval in the Black and Tan and Little Bear projects prove that it is a productive hydrocarbon reservoir.

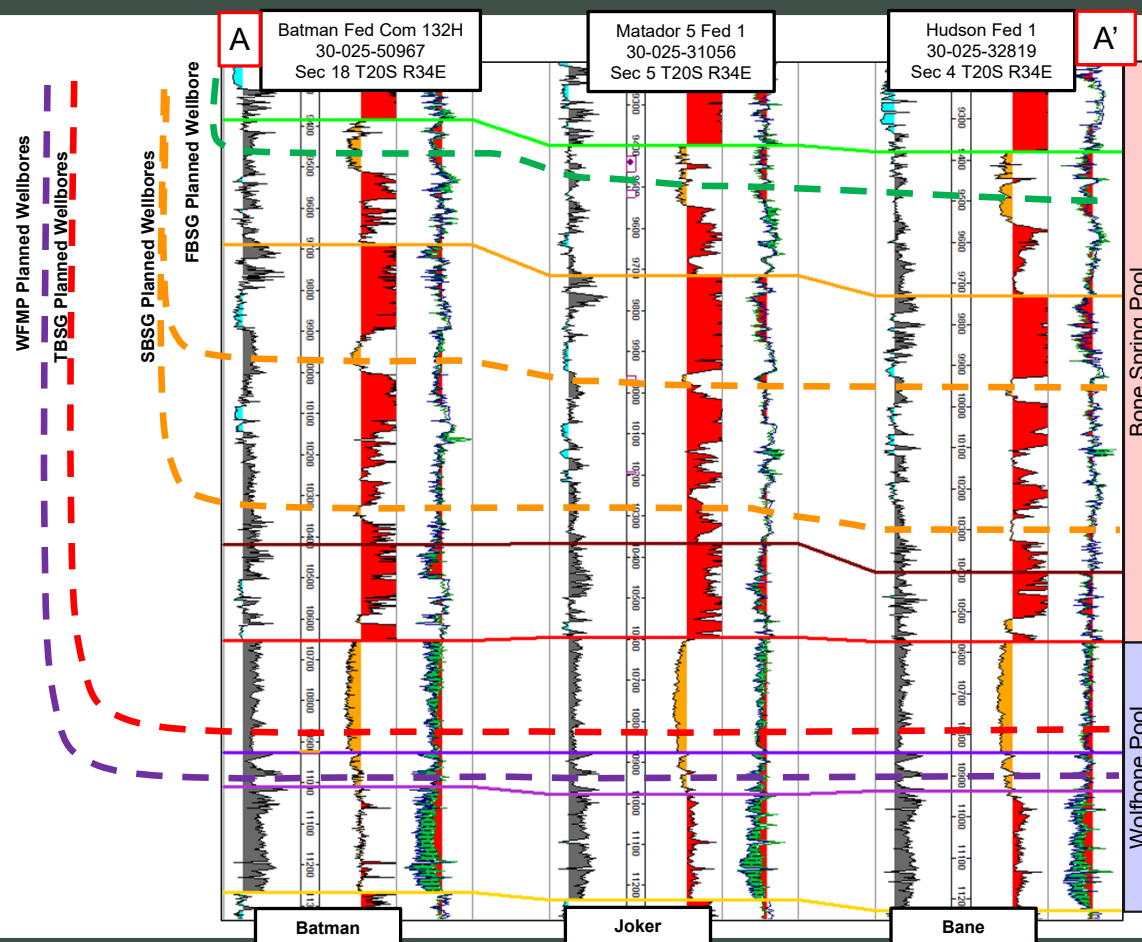

PR maintains the stance the PHIT is not sufficient to account for where the oil is being drained from in this pool since it does not account for differences in oil saturations or rock type.

The following exhibits will show:

- PR's development plan is realistic
- PR's development plan appropriately develops the sections
  - The Second Bone Spring (SBSG) has been developed successfully at 8 WPS spacing
  - The Harkey Sand (HKY) has been developed successfully at 4 WPS
  - Inclusion of the Wolfcamp (WFMP) in offsetting sections has driven significant value
- PhiH is not a reasonable or logical production allocation method

<sup>1</sup> Metrics reflect PR's internal underwriting and are intended only to illustrate why WI owners like PR resist Coterra's proposal, actual results will differ materially due to risks and assumptions

<sup>2</sup> Actual examples that follow provide a more concrete contrast between the plans

<sup>3</sup> Cases run with same production, capital, and expenses between operators, commodity price assumption of \$70 oil, \$2 natural gas, and \$21 NGLs, ownership of 100% WI, 100% NRI, and 75% lease NRI

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>.

**Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.**

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or [travis.macha@permianres.com](mailto:travis.macha@permianres.com).

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>.

**Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.**

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or [travis.macha@permianres.com](mailto:travis.macha@permianres.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "A. Rankin".

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>.

**Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.**

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or [travis.macha@permianres.com](mailto:travis.macha@permianres.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "A.G. Rankin".

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>.

**Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.**

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or [travis.macha@permianres.com](mailto:travis.macha@permianres.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "AG Rankin".

**Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.**

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or [travis.macha@permianres.com](mailto:travis.macha@permianres.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "AG Rankin".
