APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23448

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.09-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. Section 5 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the Mighty Pheasant 5-8 Fed Com 204H Well and the Mighty Pheasant 5-8 Fed Com 304H Well, as the initial wells, to be drilled to a sufficient depth to test the Bone Spring formation.

- 3. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 204H Well,** an oil well, to be horizontally drilled from a surface location in SW/4 SE/4 (Unit O) of Section 32, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East, NMPM.
- 4. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 304H Well,** an oil well, to be horizontally drilled from a surface location in SW/4 SE/4 (Unit O) of Section 32, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East, NMPM.
- 5. The proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
 - 6. Cimarex's review of the land records did not reveal any overlapping units.
- 7. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the wells or the commitment of their interests to the wells for their development within the proposed HSU.
- 8. The pooling of all interests in the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing a standard 320.09-acre, more or less, spacing and proration unit

comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and

the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New

Mexico;

B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying

the proposed HSU;

C. Approving the Mighty Pheasant 5-8 Fed Com 204H Well and the Mighty

Pheasant 5-8 Fed Com 304H Well as the wells for the HSU.

D. Designating Cimarex as operator of this HSU and the horizontal wells to be drilled

thereon;

E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the

wells;

F. Approving actual operating charges and costs of supervision, to the maximum

extent allowable, while drilling and after completion, together with a provision adjusting the rates

pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing

the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

ABADIE & SCHILL, PC

Attorneys for Cimarex Energy Co.

Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 320.09-acre, more or less, horizontal spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. Section 5 is an irregular section containing correction lots. The proposed wells to be dedicated to the horizontal spacing unit are the Mighty Pheasant 5-8 Fed Com 204H Well and the Mighty Pheasant 5-8 Fed Com 304H Well, both oil wells, to be horizontally drilled from surface locations in the SW/4 SE/4 (Unit O) of Section 32, Township 19 South, Range 34 East, NMPM, to bottom hole locations in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East, NMPM. The wells will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23449

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.01-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. The proposed well to be dedicated to the horizontal spacing unit is the Mighty Pheasant 5-8 Fed Com 301H Well, an oil well, to be horizontally drilled from a surface location in Lot 4 (NW/4 NW/4 equivalent) of Section 5 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 8. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23450

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.04-acre, more or less, spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. Section 5 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- Cimarex proposes and dedicates to the HSU the Mighty Pheasant 5-8 Fed Com
 302H Well, as the initial well, to be drilled to a sufficient depth to test the Bone Spring formation.

- 3. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 302H Well,** an oil well, to be horizontally drilled from a surface location in Lot 4 (NW/4 NW/4 equivalent) of Section 5 to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 8.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Establishing a standard 320.04-acre, more or less, spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico;
- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU;

- C. Approving the Mighty Pheasant 5-8 Fed Com 302H Well as the well for the HSU.
- D. Designating Cimarex as operator of this HSU and the horizontal well to be drilled thereon;
- E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

Attorneys for Cimarex Energy Co.

Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) creating a standard 320.04-acre, more or less, horizontal spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. Section 5 is an irregular section containing correction lots. The proposed well to be dedicated to the horizontal spacing unit is the Mighty Pheasant 5-8 Fed Com 302H Well, an oil well, to be horizontally drilled from a surface location in Lot 4 (NW/4 NW/4 equivalent) of Section 5 to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 8. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23451

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.06-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. Section 5 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- Cimarex proposes and dedicates to the HSU the Mighty Pheasant 5-8 Fed Com
 303H Well, as the initial well, to be drilled to a sufficient depth to test the Bone Spring formation.

- 3. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 303H Well,** an oil well, to be horizontally drilled from a surface location in SW/4 SE/4 (Unit O) of Section 32, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 8, Township 20 South, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing a standard 320.06-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico;

- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU;
 - C. Approving the **Mighty Pheasant 5-8 Fed Com 303H Well** as the well for the HSU.
- D. Designating Cimarex as operator of this HSU and the horizontal well to be drilled thereon;
- E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

ABADIE & SCHILL, PC

APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No.	23601

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.89-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.

- 2. Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com 204H Well and the Loosey Goosey 4-9 Fed Com 304H Well, as initial wells, to be drilled to a sufficient depth to test the Bone Spring formation.
- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 204H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 9, Township 20, Range 34 East, NMPM.
- 4. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 304H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 9, Township 20, Range 34 East, NMPM.
- 5. The proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
 - 6. Cimarex's review of the land records did not reveal any overlapping units.
- 7. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the wells or the commitment of their interests to the wells for their development within the proposed HSU.
- 8. The pooling of all interests in the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by

law, the Division enter an order:

A. Establishing of a standard 320.89-acre, more or less, spacing and proration unit

comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the

E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico;

B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying

the proposed HSU;

C. Approving the Loosey Goosey 4-9 Fed Com 204H Well and the Loosey Goosey 4-

9 Fed Com 304H Well as the wells for the HSU.

D. Designating Cimarex as operator of this HSU and the horizontal wells to be drilled

thereon;

E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the

wells;

F. Approving actual operating charges and costs of supervision, to the maximum extent

allowable, while drilling and after completion, together with a provision adjusting the rates

pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing

the wells in the event a working interest owner elects not to participate in the wells.

Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 320.44-acre, more or less, horizontal spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. Section 4 is an irregular section containing correction lots. The proposed well to be dedicated to the horizontal spacing unit is the Loosey Goosey 4-9 Fed Com 302H Well, an oil well, to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 9, Township 20 South, Range 34 East, NMPM. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 320.66-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a stratigraphic equivalent of 9,373 feet (that being the top of 1st Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], a depth as defined on the log for the Hudson Federal #1 Well (API No. 30-025-32819), to a stratigraphic equivalent of 10,845 feet, as defined by same Well, that being the base of the Bone Spring formation, designated as an oil pool, underlying said unit. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com
 303H Well, as the initial well, to be drilled to a sufficient depth to test the Bone Spring formation.

- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 303H Well**, an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 9, Township 20, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Bone Spring formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing of a standard 320.66-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico;

- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU;
 - C. Approving the **Loosey Goosey 4-9 Fed Com 303H Well** as the well for the HSU.
- D. Designating Cimarex as operator of this HSU and the horizontal well to be drilled thereon;
- E. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 320.66-acre, more or less, horizontal spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. Section 4 is an irregular section containing correction lots. The proposed well to be dedicated to the horizontal spacing unit is the Loosey Goosey 4-9 Fed Com 303H Well, an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 9, Township 20 South, Range 34 East, NMPM. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23594

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.01-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 5 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the **Mighty Pheasant 5-8 Fed Com 301H Well,** as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 301H well described in the application filed by Cimarex in Case No. 23449. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp

formation, based on the geology of the lands, is achieved by drilling the **Mighty Pheasant 5-8 Fed Com 301H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23520, for the Wolfcamp formation.

- 3. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 301H Well,** an oil well, to be horizontally drilled from a surface location in Lot 4 (NW/4 NW/4 equivalent) of Section 5 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 8.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the Wolfcamp formation underlying the proposed HSU.
- B. Approving the **Mighty Pheasant 5-8 Fed Com 301H Well** as the proper well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **301H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- E. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures;
- F. To the extent necessary, approving downhole commingling, or in the alternative, allowing Cimarex to seek, if necessary, administrative approval for downhole commingling; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23597

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.09-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 5 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the **Mighty Pheasant 5-8 Fed Com 304H Well,** as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 304H well described in the application filed by Cimarex in Case No. 23448. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp

formation, based on the geology of the lands, is achieved by drilling the **Mighty Pheasant 5-8 Fed Com 304H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23523, for the Wolfcamp formation.

- 3. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 304H Well,** an oil well, to be horizontally drilled from a surface location in SW/4 SE/4 (Unit O) of Section 32, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the Wolfcamp formation underlying the proposed HSU.
- B. Approving the **Mighty Pheasant 5-8 Fed Com 304H Well** as the proper well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **304H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- E. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures;
- F. To the extent necessary, approving downhole commingling, or in the alternative, allowing Cimarex to seek, if necessary, administrative approval for downhole commingling; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.21-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com 301H Well, as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 301H well described in the application filed by Cimarex in Case No. 23453. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp

formation, based on the geology of the lands, is achieved by drilling the **Loosey Goosey 4-9 Fed Com 301H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23512, for the Wolfcamp formation.

- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 301H Well,** an oil well, to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 9, Township 20, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU;
- B. Approving the **Loosey Goosey 4-9 Fed Com 301H Well** as the proper well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **301H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- E. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures;
- F. To the extent necessary, approving downhole commingling, or in the alternative, allowing Cimarex to seek, if necessary, administrative approval for downhole commingling; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Application of Cimarex Energy Co. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.21-acre, more or less, horizontal spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section containing correction lots. The proposed well to be dedicated to the horizontal spacing unit is the Loosey Goosey 4-9 Fed Com 301H Well, an oil well, to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East, NMPM. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; downhole commingling, to the extent and if necessary; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. <u>23599</u>

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.44-acre, more or less, spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com 302H Well, as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 302H well described in the application filed by Cimarex in Case No. 23454. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp

formation, based on the geology of the lands, is achieved by drilling the **Loosey Goosey 4-9 Fed Com 302H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23513, for the Wolfcamp formation.

- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 302H Well,** an oil well, to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 9, Township 20, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU;
- B. Approving the **Loosey Goosey 4-9 Fed Com 302H Well** as the well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **302H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23600

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.66-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com 303H Well, as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 303H well described in the application filed by Cimarex in Case No. 23455. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp

formation, based on the geology of the lands, is achieved by drilling the **Loosey Goosey 4-9 Fed Com 303H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23514, for the Wolfcamp formation.

- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 303H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 9, Township 20, Range 34 East, NMPM.
- 4. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on July 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU;
- B. Approving the **Loosey Goosey 4-9 Fed Com 303H Well** as the well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **303H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- E. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures;
- F. To the extent necessary, approving downhole commingling, or in the alternative, allowing Cimarex to seek, if necessary, administrative approval for downhole commingling; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Attorneys for Cimarex Energy Co.

Application of Cimarex Energy Co. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.66-acre, more or less, horizontal spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section containing correction lots. The proposed well to be dedicated to the horizontal spacing unit is the Loosey Goosey 4-9 Fed Com 303H Well, an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 9, Township 20 South, Range 34 East, NMPM. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; downhole commingling, to the extent and if necessary; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 40 miles northeast of Carlsbad, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23601

APPLICATION

Cimarex Energy Co. ("Cimarex"), OGRID No. 215099, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order pooling all uncommitted interests in the Wolfcamp formation, designated as an oil pool, underlying a standard 320.89-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Section 4 is an irregular section with correction Lots.

In support of its Application, Cimarex states the following:

- 1. Cimarex is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.
- 2. Cimarex proposes and dedicates to the HSU the Loosey Goosey 4-9 Fed Com 304H Well, as the initial well, to be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation. This well is the same 304H well described in the application filed by Cimarex in Case No. 23452. Cimarex's geology shows that, because there are no natural barriers between formation, the hydrocarbons freely communicate between the Third Sand of the Bone Spring and the Wolfcamp, and thus, optimal development of the Wolfcamp formation, based on the

geology of the lands, is achieved by drilling the **Loosey Goosey 4-9 Fed Com 304H Well,** which will properly produce both the Wolfcamp and Third Bone Spring, as demonstrated by the history of production in this area, and the drilling of this one well will avoid the drilling of unnecessary wells into the Wolfcamp, a practice shown to be inefficient, uneconomical, and wasteful for these particular lands based on their unique geology. This application competes with the application filed by Read & Stevens, Inc., in Case No. 23515, for the Wolfcamp formation.

- 3. Cimarex proposes the **Loosey Goosey 4-9 Fed Com 304H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 9, Township 20, Range 34 East, NMPM.
- 4. The proposed well is orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
 - 5. Cimarex's review of the land records did not reveal any overlapping units.
- 6. Cimarex has sought in good faith but has been unable to obtain voluntary agreement from all interest owners to participate in the drilling of the well or the commitment of their interests to the well for their development within the proposed HSU.
- 7. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.
- 8. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Cimarex requests that all uncommitted interests in this HSU be pooled and that Cimarex be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Cimarex requests that this Application be set for hearing on April 6, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU;
- B. Approving the **Loosey Goosey 4-9 Fed Com 304H Well** as the well for the HSU, and recognizing, based on geological evidence to be provided by Cimarex, that the **304H Well** is properly placed and located to develop the hydrocarbons of the HSU in a manner that will avoid the drilling of unnecessary wells.
- C. Designating Cimarex as operator of this HSU and the horizontal well drilled to produce from the HSU, and because of the communication between the Wolfcamp and Bone Spring, restricting to the extent prescribed by statewide rules, other operators from drilling into the Wolfcamp formation;
- D. Authorizing Cimarex to recover its costs of drilling, equipping, and completing the well;
- E. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures;
- F. To the extent necessary, approving downhole commingling, or in the alternative, allowing Cimarex to seek, if necessary, administrative approval for downhole commingling; and
- G. Setting a 200% charge for the risk assumed by Cimarex in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Formation Name(s) or Vertical Extent:	Third Bone Spring & Upper Wolfcamp formations (Wolfbone Pool)		
Primary Product (Oil or Gas):	Oil		
Pooling this vertical extent:	From the top of the Third Bone Spring Sand to the Base of the Wolfcamp A formation		
Pool Name and Pool Code:	Quail Ridge, Wolfbone Pool; Pool Code: [98396]		
Well Location Setback Rules:	Statewide Rules		
Spacing Unit			
Type (Horizontal/Vertical)	Horizontal		
Size (Acres)	320.66-acre, more or less		
Building Blocks:	Quarter-Quarter Sections (40 Acre Blocks)		
Orientation:	North to South		
Description: TRS/County	Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico		
Standard Horizontal Well Spacing Unit (Y/N), If No, describe and is approval of non-standard unit requested in this application?	Yes, Standard Spacing Unit		

requirements.

Pooled Parties (including ownership type)	All uncommitted WI owners; ORRI owners; and Record Title owners; including as shown on Exhibit A-2	
Unlocatable Parties to be Pooled	orignal Exhibit A, Para. 12 (Case 23454)	
Ownership Depth Severance (including percentage above & below)	There is a depth severance in the Wolfbone Pool between the base of the Third Bone Spring Sand and the top of the Upper Wolfcamp where the Third Bone Spring Sand contributes 70% of production form the Wolfbone and the Upper Wolfcamp contributes 30% of Upper Wolfcamp.

STATE OF NEW MEXICO DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES OIL CONSERVATION COMMISSION

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION FOR THE PURPOSE OF CONSIDERING:

OCC CASE NO. 25371

APPLICATIONS OF COTERRA ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING LEA COUNTY, NEW MEXICO

Case Nos. 23448-23455

APPLICATIONS OF COTERRA ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23594-23601

APPLICATIONS OF READ & STEVENS, INC. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23508-23523

APPLICATION OF READ & STEVENS, INC. FOR THE CREATION OF A SPECIAL WOLFBONE POOL IN SECTIONS 4, 5, 8 AND 9, TOWNSHIP 20 SOUTH, RANGE 34 EAST, NMPM, LEA COUNTY, NEW MEXICO

Case No. 24528

APPLICATION OF COTERRA ENERGY CO. FOR THE CREATION OF A SPECIAL POOL, A WOLFBONE POOL, PURSUANT TO ORDER NO. R-23089 AND TO REOPEN CASE NOS. 23448 – 23455, 23594 – 23601, AND 23508 – 23523, LEA COUNTY, NEW MEXICO

Case No. 24541 Order No. R-23089 Order No. R-23089-A

SELF-AFFIRMED STATEMENT OF ASHLEY ST. PIERRE

- I, Ashley St. Pierre, being duly sworn on oath, state the following:
- 1. I am over the age of eighteen years and have the capacity to execute this Self-

Affirmed Statement, which is based on my personal knowledge.

- 2. I am employed as a Senior Landman Permian Business Unit with Coterra Energy Inc. The applicant, Coterra Energy Operating Co. ("Coterra"), formerly known as Cimarex Energy Co., is a subsidiary of Coterra Energy Inc. I am familiar with the subject application and the lands involved. I have testified previously before the Oil Conservation Division ("Division") as an expert Petroleum Landman and my credentials have been made a matter of record, and I have been qualified as an expert by the Division.
- 3. This Statement is submitted to the Division in support of Coterra's development plans that are the subject of OCC Case No. 25371.
- 4. I replaced John Coffman, the landman and expert witness who previously testified and presented exhibits in the original cases to these proceedings (Case Nos. 23448-23455 and 23594-23601). Mr. Coffman no longer works for Coterra. I have reviewed his testimony and exhibits, and amendments to certain exhibits, find them to be generally accurate, and adopt them as valid background for approving Coterra's original Applications for developing the Wolfbone Pool and remaining Bone Spring formations and reviewing the original cases so the Commission can continue its adjudication of the pooling applications to determine the best development plan for operatorship between the competing plans. However, where my statements in the present cases contradict or vary in certain instances from Mr. Coffman's prior statements, I ask the Commission to accept my statements in the present cases as revisions, edits, and/or clarifications of Mr. Coffman's prior statements. The creation of a special pool, the Wolfbone Pool, creates a new and different context for a development plan, and although Coterra's development plan remains the same, in certain instances explanations may vary to account for the special pool.

COTERRA'S MIGHTY PHEASANT WELLS: SECTIONS 5 AND 8

- 5. Under <u>Case No. 23448</u>, Coterra seeks an order pooling all uncommitted mineral interest in the Second Bone Spring formation, more specifically, the Quail Ridge; Bone Spring, South [Pool Code 50461], designated as an oil pool, underlying a standard 320.09-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate the **Mighty Pheasant 5-8 Fed Com 204H Well** to this unit, intended to be completed in the Second Bone Spring formation. The First and Second Bone Spring formations are located in the Bone Spring Pool which excludes the Third Bone Spring Sand after creation of the Wolfbone Pool.
- 6. In addition, under Case No. 23488, Coterra seeks an order pooling all uncommitted mineral interest in Wolfbone Pool, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], designated as an oil pool, underlying a standard 320.89-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate the Mighty Pheasant 5-8 Fed Com 304H Well to this unit, to be completed in the Third Bone Spring Sand. *See* my Footnote 1 below.
- 7. Coterra proposes the **Mighty Pheasant 5-8 Fed Com 204H Well** to be horizontally drilled from a surface location 281' FSL and 1443' FEL of Section 32, Township 19 South, Range 34 East to a bottom hole location 100' FSL and 708' FEL of Section 8, Township

¹ The original applications were drafted for the Bone Spring and the Wolfcamp formations separately because the Division had classified the Third Bone Spring formation and the Wolfcamp formations as two separate pools. However, based on Coterra's geological analysis, the Division agreed that the Third Bone Spring and Upper Wolfcamp constituted a single reservoir and created the Wolfbone Pool.

20 South, Range 34 East; approximate TVD of 10,308'; approximate TMD of 20,465'; FTP in Section 5: 100' FNL, 708' FEL; LTP in Section 8: 100' FSL, 708' FEL.

- 8. Coterra proposes the **Mighty Pheasant 5-8 Fed Com 304H Well** to be horizontally drilled from a surface location 281' FSL and 1423' FEL of Section 32 to a bottom hole location 100' FSL and 708' FEL of Section 8; approximate TVD of 10,840'; approximate TMD of 21,040'; FTP in Section 5: 100' FNL, 708' FEL; LTP in Section 8: 100' FSL, 708' FWL.
- 9. In related Case No. 23597, Coterra submitted an application to pool the Upper Wolfcamp formation, which would complete the pooling of the single reservoir that included the Third Bone Spring Sand and Upper Wolfcamp formations. Because the Third Bone Spring Sand and Upper Wolfcamp formations constituted a common source of supply, proposing an additional well in the Upper Wolfcamp formation would result in an unnecessary well to produce the reservoir. Therefore, Coterra dedicated its Mighty Pheasant 5-8 Fed Com 304H Well, located in the Third Bone Spring Sand to the unit that connected the Wolfcamp formation to the Third Bone Sand in order to produce the entire common source of supply and single reservoir. Thus, Coterra's applications in Case Nos. 23448 and 23597 together would be needed to produce the common source of supply that consists of the Third Bone Spring Sand and Upper Wolfcamp formation, which Coterra proposed to the Division in its Option II.
- 10. Pooling the Wolfcamp formation was the only option available to Coterra to protect correlative rights, prevent waste, and avoid drilling unnecessary wells when the Division denied Coterra's request for Prehearing Conference by siding with Permian Resources' arguments that the Third Bone Spring and Upper Wolfcamp were properly classified as two pools and thus did not need reclassification. Therefore, Coterra was forced to submit two applications in **Case Nos.**

23448 and **23597** to pool the Third Bone Spring and Upper Wolfcamp as a common source of supply and to produce this single reservoir with Coterra's Mighty Pheasant 304H Well.

- 11. Nine months after the contested hearing, the Division ruled that the geology of the Third Bone Spring Sand and Upper Wolfcamp formation needed to be reclassified as a single pool instead of two pools based on the geological analysis presented by Coterra. As a result of its ruling, the Division created the Wolfbone Pool to encompass the Third Bone Spring Sand and the Upper Wolfcamp formation. However, when Coterra asked the Division to allow it to update its pooling applications to include a necessary allocation formula and update its Closing Arguments to account for the creation of the new Wolfbone Pool, the Division denied the request based on Permian Resources' stated opposition. As a result, Coterra's only option was to present two original applications in two cases for each unit, where one case covered the Third Bone Spring Sand and the other case covered the Upper Wolfcamp formation, as follows: Applications in Case Nos. 23448 and 23597 seek to develop the Wolfbone Pool underlying the E/2 E/2 of Sections 5 and 8; Applications in Case Nos. 23449 and 23594 seek to develop the Wolfbone Pool underlying the W/2 W/2 of Sections 5 and 8; Applications in Case Nos. 23450 and 23595 seek to develop the Wolfbone Pool underlying the E/2 W/2 of Sections 5 and 8; and Applications in Case Nos. 23501 and 23596 seek to develop the Wolfbone Pool underlying the W/2 E/2 of Section 5 and 8.
- 12. Therefore under Case Nos. 23449 and 23594, Coterra seeks an order pooling all uncommitted mineral interest Third Bone Spring Sand and Upper Wolfcamp Formations, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], underlying a standard 320.01-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4 and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate to the units the

Mighty Pheasant 5-8 Fed Com 301H Well, to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling additional unnecessary wells in the Upper Wolfcamp.

- 13. Coterra proposes the **Mighty Pheasant 5-8 Fed Com 301H Well** to be horizontally drilled from a surface location 483' FNL and 1272' FWL of Section 5, Township 20 South, Range 34 East, to a bottom hole location 100' FSL and 330' FWL of Section 8 Township 20 South, Range 34 East; approximate TVD of 10,870'; approximate TMD of 21,057'; FTP in Section 5: 100' FNL, 330' FWL; LTP in Section 8: 100' FSL, 330' FWL.
- 14. Under Case Nos. 23450 and 23595, Coterra seeks an order pooling all uncommitted mineral interest in Third Bone Spring Sand and Upper Wolfcamp formation, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], encompassing both the Third Bone Spring Sand and Upper Wolfcamp formation, a single reservoir designated as an oil pool, underlying a standard 320.04-acre, more or less, spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4 and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate to the units the Mighty Pheasant 5-8 Fed Com 302H Well, to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp.
- 15. Coterra proposes the **Mighty Pheasant 5-8 Fed Com 302H Well** to be horizontally drilled from a surface location 484' FNL and 1312' FWL of Section 5 Township 20 South, Range 34 East, to a bottom hole location in the 100' FSL and 1744' FWL of Section 8, Township 20 South, Range 34 East; with an approximate TVD of 10,860'; approximate TMD of 20,992'; FTP in Section 5: 100' FNL, 1,744' FWL; LTP in Section 8: 100' FSL, 1,744' FWL.

- 16. Under Case Nos. 23451 and 23596, Coterra seeks an order pooling all uncommitted mineral interest in the Wolfcamp formation, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396]), designated as an oil pool, underlying a standard 320.06-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4 and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate to the units the Mighty Pheasant 5-8 Fed Com 303H Well, to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp.
- 17. Coterra proposes the **Mighty Pheasant 5-8 Fed Com 303H Well** to be horizontally drilled from a surface location 281' FSL and 1463' FEL of Section 5, to a bottom hole location 100' FSL and 2122' FEL of Section 8; approximate TVD of 10,860'; approximate TMD of 21,019'; FTP in Section 5: 100' FNL, 2,122' FEL; LTP in Section 8: 100' FSL, 2,122' FEL.

COTERRA'S LOOSEY GOOSEY WELLS: SECTIONS 4 AND 9

18. As in Coterra's cases for its Mighty Pheasant wells, which have a set of two applications in two cases to cover the Wolfbone Pool, Coterra's applications for its Loosey Goosey Wells for Sections 4 and 9 are structured in the same manner pursuant to the Division's post-hearing rulings. As a result, Applications in Case Nos. 23452 and 23601 seek to develop the Wolfbone Pool underlying the E/2 E/2 of Sections 4 and 9; Applications in Case Nos. 23453 and 23598 seek to develop the Wolfbone Pool underlying the W/2 W/2 of Sections 4 and 9; Applications in Case Nos. 23454 and 23599 seek to develop the Wolfbone Pool underlying the E/2 W/2 of Sections 4 and 9; and Applications in Case Nos. 23455 and 23600 seek to develop the Wolfbone Pool underlying the W/2 E/2 of Section 4 and 9.

- 19. Therefore, in **Case Nos. 23452** and **23601**, Coterra seeks an order pooling all uncommitted mineral interest in Wolfbone Pool, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], designated as an oil pool, underlying a standard 320.89-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate the **Loosey Goosey 4-9 Fed Com 304H Well** to the units to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp formation.
- 20. Coterra proposes the **Loosey Goosey 4-9 Fed Com 304H Well** to be horizontally drilled from a surface location 194' FSL and 1408' FEL of Section 33 to a bottom hole location 100' FSL and 330' FEL of Section 9; approximate TVD of 10,800'; approximate TMD of 21,075'; FTP in Section 4: 100' FNL, 330' FEL; LTP in Section 9: 100' FSL, 330' FEL.
- Also, in Case No. 23452, Coterra seeks an order pooling all uncommitted mineral interest in the First and Second Bone Spring formations, more specifically, the Quail Ridge; Bone Spring, South [Pool Code 50461], designated as an oil pool, underlying a standard 320.89-acre, more or less, spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate the Loosey Goosey 4-9 Fed Com 204H Well (API #30-025-52500) to this unit, which covers the remaining upper Bone Spring formations following the creation of the Wolfbone Pool.
- 22. For the Bone Spring, Coterra proposes the **Loosey Goosey 4-9 Fed Com 204H Well** (API #30-025-52500) to be horizontally drilled from a surface location 194' FSL and 1428'
 FEL of Section 33, Township 19 South, Range 34 East to a bottom hole location 100' FSL and

330' FEL of Section 9, Township 20 South, Range 34 East; approximate TVD of 10,300'; approximate TMD of 20,518'; FTP in Section 4: 100' FNL, 330' FEL; LTP in Section 9: 100' FSL, 330' FEL.

- Under Case Nos. 23453 and 23598, Coterra seeks an order pooling all uncommitted mineral interest in the Third Bone Spring Sand and Upper Wolfcamp formation, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], designated as an oil pool, underlying a standard 320.21-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4 and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate to the Loosey Goosey 4-9 Fed Com 301H Well (API #30-025-52501) to the units to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp formation.
- 24. Coterra proposes the **Loosey Goosey 4-9 Fed Com 301H Well** (API #30-025-52501) to be horizontally drilled from a surface location 1189' FSL and 1464' FWL of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location 100' FSL and 706' FWL of Section 9 Township 20 South, Range 34 East, NMPM; approximate TVD of 10,830'; approximate TMD of 21,091'; FTP in Section 4: 100' FNL, 706' FWL; LTP in Section 9: 100' FSL, 706' FWL.
- 25. Under Case Nos. 23454 and 23599, Coterra seeks an order pooling all uncommitted mineral interest in the Third Bone Spring Sand and Upper Wolfcamp formation, more specifically, the Quail Ridge, Wolfbone Pool; [Pool Code 98396], designated as an oil pool, underlying a standard 320.44-acre, more or less, spacing and proration unit comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4 and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate

the **Loosey Goosey 4-9 Fed Com 302H Well** (API #30-025-52502) to this unit to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp formation.

- 26. Coterra proposes the **Loosey Goosey 4-9 Fed Com 302H Well** (API #30-025-52502) to be horizontally drilled from a surface location 1189' FSL and 1484' FWL of Section 33 Township 19 South, Range 34 East, NMPM, to a bottom hole location in the 100' FSL and 2120' FWL of Section 9, Township 20 South, Range 34 East; with an approximate TVD of 10,820'; approximate TMD of 21,100'; FTP in Section 4: 100' FNL, 2,120' FWL; LTP in Section 9: 100' FSL, 2,120' FWL.
- Under Case Nos. 23455 and 23600, Coterra seeks an order pooling all uncommitted mineral interest in the Third Bone Spring Sand and Upper Wolfcamp formation, more specifically, the Quail Ridge, Wolfbone Pool [Pool Code 98396], designated as an oil pool, underlying a standard 320.66-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4 and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Coterra intends to dedicate the Loosey Goosey 4-9 Fed Com 303H Well (API #30-025-25203) to the unit to be completed in the basal Third Bone Spring Sand in order to produce the Wolfbone Pool without drilling unnecessary wells in the Upper Wolfcamp formation.
- 28. Coterra proposes the **Loosey Goosey 4-9 Fed Com 303H Well** (API #30-025-25203) to be horizontally drilled from a surface location 194' FSL and 1448' FEL of Section 33, Township 19 South, Range 34 East, NMPM, to a bottom hole location 100' FSL and 1,744' FEL of Section 9; approximate TVD of 10,810'; approximate TMD of 20,966'; FTP in Section 4: 100' FNL, 1,744' FEL; LTP in Section 9: 100' FSL, 1,744' FEL.

COTERRA'S FIVE-YEAR PLAN TO DEVELOP SECTIONS 4, 5, 8, AND 9

- 29. Coterra is proposing to drill and complete one (1) well in the Second Bone Spring and four (4) wells in the Third Bone Spring that will produce from the Wolfbone Pool in Sections 4 and 9 (the Loosey Goosey wells) and in Section 5 and 8 (the Mighty Pheasant wells).
- 30. In addition, within five (5) years of the issuance of the requested pooling orders, Coterra plans to drill and complete four (4) wells in the First Bone Spring, and three (3) additional wells in the Second Bone Spring in Sections 4 and 9 (the Loosey Goosey wells) and in Sections 5 and 8 (the Mighty Pheasant wells).
- 31. The following is a table setting forth Coterra's estimated five-year development plan for Sections 4 and 9 (the Loosey Goosey wells):

Well Name	Target Formation/Pool	Timeline of Spud (estimated)	
Fed Com 204H Well	2 nd Bone Spring	Within one year of signature	
Fed Com 301H Well	3 rd Bone Spring/ Wolfbone	Within one year of signature	
Fed Com 302H Well	3 rd Bone Spring /Wolfbone	Within one year of signature	
Fed Com 303H Well	3 rd Bone Spring /Wolfbone	Within one year of signature	
Fed Com 304H Well	3 rd Bone Spring /Wolfbone	Within one year of signature	
Fed Com 101H Well	1 st Bone Spring	Within five years of signature	
Fed Com 102H Well	1st Bone Spring	Within five years of signature	
Fed Com 103H Well	1 st Bone Spring	Within five years of signature	
Fed Com 104H Well	Fed Com 104H Well 1st Bone Spring		
Fed Com 201H Well	2 nd Bone Spring	Within five years of signature

EXHIBITS

GENERAL WELL AND POOLING INFORMATION

33. The proposed C-102 for each well is attached as **Exhibit A-1**.

- 34. A general location plat and a plat outlining the units being pooled are attached hereto as **Exhibit A-2.1** through **Exhibit A-2.2**, which show the location of the proposed wells within the units. The location of each well is orthodox, and it meets the Division's offset requirements
- 35. The parties being pooled in the Second Bone Spring and the Wolfbone Pool, the nature of their interests, and their last known addresses are listed in **Exhibit A-2.3** attached hereto. These Exhibits include information regarding working interest owners.
- 36. **Exhibit A-3** is a sample from the proposal letter and the Authority for Expenditure ("AFE") for each proposed well in the Mighty Pheasant and Loosey Goosey development. The estimated cost of the wells set forth in the original AFEs are fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico. After the Division issued its Final Order, Coterra submitted updated proposal letters and AFEs to the owners; however, the updated proposal letters were not allowed to be permitted into the record.
- 37. **Exhibit A-4.1** and **A-4.2** show that prior to the original hearing and at the hearing, Coterra had majority interest based on substantial support in favor of Coterra's development plan. Coterra maintained that majority interest and support after the hearing and through the next related hearing for the creation of the Wolfbone Pool. Coterra only lost some of its support when the Division issued its Final Order R-23089-A granting operatorship to Permian Resources. These proceedings have been drawn out over the course of a long and costly two years. To understand the change in support, I spoke with a representative for two of the owners, who had previously supported Coterra, but who switched their support to Permian Resources after the OCD issued its Final Order. When asked why they changed their minds,, I was told they have fatigue from the extended proceedings (including the Read & Stevens litigation) and wanted to see a resolution, not

that they felt Permian Resources's plan was better. I realize these comments are hearsay, but the conversations I had with owners' representative were very recent, and I clearly recollect their content. It is my understanding that in an administrative proceeding, the Commission can consider hearsay evidence if it is relevant and probative. I respectfully ask the Commission to take my comments into consideration, and I am open to answer any questions about these conversations. I sincerely believe that if the Division had granted Coterra operatorship, that Coterra would have maintained the support it had at the original hearing if not expanded its support.

38. Coterra's review of the lands shows no overlapping units.

DEPTH SEVERANCES

- 39. There are no depth severances in the First and Second Bone Spring Formations.
- 40. There is a depth severance in the Wolfbone Pool between working interest owners in the Third Bone Spring Sand and the Wolfcamp Formation. **Exhibit A-5** through **A-12** sets forth the ownership in the Bone Spring Sand, Wolfcamp Formation, and the Wolfbone Pool.

COTERRA OWNERSHIP AND OPERATORSHIP

41. I believe that Coterra is a top-tier operator especially regarding the knowledge it takes to drill in this area. Coterra has been and continues to be a pioneer and leader in development of oil and gas in the state of New Mexico. Coterra operates over 1,500 wells in New Mexico. In 2025, Coterra's North Lea County activity consists of eighteen (18) wells spud and twenty-four (24) wells completed for a total of forty-two (42) wells. Coterra's 2025 New Mexico activity encompassing Lea and Eddy Counties includes seventy-four (74) wells spud and forty-nine (49) wells completed for a total of one hundred twenty-three (123) wells.

DELAYING COTERRA'S DEVELOPMENT

- 42. John Coffman, the former Coterra landman who handled the negotiations, made a good faith effort to negotiate with the interest owners, but had been unable to obtain voluntary agreement from all interest owners to participate in the drilling of a well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-13** provides a chronology and history of contacts with the owners. (**Exhibit A-13** was accepted into evidence at the August 9, 2003 hearing (covering **Cases 23448 23451**) as Exhibit A-4 [Hearing Packet I] [Tr. (August 9, 2023), 24:18 26:5]).
- 43. Coterra's history with Read & Stevens is set forth in Paragraphs 24 through 32 of Mr. Coffman's Landman Statement contained in Hearing Packet I submitted to the OCD on August 2, 2023 (covering Cases 23448 23451) and accepted into evidence at Tr. (August 9, 2023), 24:18 26:5. Pursuant to Rule 19.15.4.17.C, Coterra incorporates Paragraphs 24 through 32 of Coffman's Landman Statement into this hearing as well as the pertinent portions of the Transcript regarding the matters raised in Paragraphs 24 through 32 of Coffman's Landman Statement. A copy of the pertinent pages of Mr. Coffman's Landman Statement and the pertinent pages of the Transcript of the August 9, 2023 Hearing are attached hereto as Exhibit E-1.
- 44. A review of the history between Read & Stevens, Inc. and Coterra, as set forth in **Exhibit E-1**, suggests that Read & Stevens attempted to delay and obstruct Coterra's efforts to develop the Subject Lands over a number of years. Per Mr. Coffman's testimony, Read & Stevens aggressively pursued unnecessary litigation against Coterra, which needed to be resolved before Coterra could develop the lands. Coterra ultimately prevailed in the litigation; however, subsequent actions by Read & Stevens such as spudding and casing wells without proper proposals created additional challenges that Coterra was required to address and resolve. Coterra would have developed and produced the Subject Lands years ago but for Read & Stevens' bad

faith antics and tactics of obstruction. Although Permian Resources was not the party who engaged in this bad faith actions, they are the direct beneficiary of these actions when they acquired Read & Stevens and its interest, and Permian Resources has been provided the opportunity to continue contesting Coterra's development plans. Coterra respectfully submits that, under these circumstances, when a company such as Permian Resources acquires another entity, it also assumes responsibility for the historical conduct of that entity. Accordingly, it would be inappropriate for Permian Resources to derive benefit from actions that may have been undertaken—and advantages gained—under questionable circumstances.

- 45. Coterra has worked for over four (4) years to find a resolution so that this acreage may be developed. The majority of the working interest owners in these sections have expressed support for development, having long awaited the opportunity to realize a return on their respective investment. Coterra has consistently sought to obtain term assignments, actively evaluated potential trades with other working interest owners, and extended purchase offers within this area. Coterra was the first operator to do the groundwork and file applications for the Subject Lands.
- 46. The interest owners subject to pooling have been contacted regarding the proposed wells but have either declined or failed to voluntarily commit their interest in the wells. Nonetheless, Coterra has continued engaging in discussions with certain interest owners to voluntarily enter into a Joint Operating Agreement. If a mutually agreeable Joint Operating Agreement is reached between Coterra and another interest owner or owners, Coterra requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

47. Coterra's development plan for the Wolfbone Pool includes a single set of eight (8) wells targeting the basal Third Bone Spring Sand, while Permian Resources proposes an additional set of eight (8) wells in the Upper Wolfcamp formation. Therefore, Coterra's comprehensive development plan for the acreage presents a significantly lower cost approach to developing the First and Second Bone Spring formations, as well as the Wolfbone Pool, which encompasses the Third Bone Spring Sand and Upper Wolfcamp formations. Permian Resources' development plan proposes excessive drilling on the Subject Lands and would impose unnecessary costs, disproportionately impacting smaller interest owners. In contrast, Coterra's plan offers a more efficient and cost-effective approach, designed to maximize production while minimizing costs.

PROGRESS MADE TOWARD DEVELOPMENT SINCE THE HEARING

- 48. Coterra has approved APDs for the Loosey Goosey 4-9 Federal Com #301H, #302H, #303H, and #204H wells. Coterra is prepared to reform permits as required to bring them to current standards.
- 49. **Exhibit A-14** shows the recent good faith communications and negotiations between Coterra and Permian Resources to try to reach a resolution regarding the development of the Subject Lands. Coterra offered to split the Subject Lands and units with a trade that would let Permian Resources develop its interests in its units and let Coterra develop its interests in its prescribed units. Coterra's offer was premised on Coterra maintaining its separate units and interest and developing them with a proper allocation formula to protect correlative rights, and Permian Resources could develop its units and interests and face whatever consequences might occur without having an allocation formula to protect correlative rights and prevent a taking. Coterra was adamant about separating ownership because it is unwilling to take a non-operator position in either development plan based on the fact that Permian Resources' proposed

development of eight (8) wells per section in the Wolfbone Pool is a fundamentally unsound allocation of capital as demonstrated in **Exhibits C-5** and **C-6** of Kent Weinkauf's Reservoir Engineering Exhibits. However, Permian Resources refused Coterra's offer, which has led to the hearing before the Commission. Moreover, Permian Resources did not provide a counter-offer that would ensure the protection of correlative rights and prevent economic waste.

COTERRA'S PLAN INCLUDES A NECESSARY ALLOCATION FORMULA TO PREVENT WASTE AND TAKING WITHOUT COMPENSATION

- 50. **Exhibits A-15** through **A-19** provide a visual basis for Coterra's Allocation formula. The Division has established as facts that well drilled in the Upper Wolfcamp formation or Third Bone Spring Sand will produce both formations, meaning that a well located in the Wolfbone Pool will share in production from both formations in the Wolfbone. So, for example, a well drilled in the Upper Wolfcamp formation will produce both the Third Bone Spring Sand and the Upper Wolfcamp. Coterra's geologist, who was the one to have initially determined and informed the Division that the Third Bone Spring Sand and Upper Wolfcamp constituted a single reservoir and common source of supply, has determined that a reasonable allocation formula for a well in the Wolfbone Pool allocates approximately 70% of production will be taken from the Third Bone Spring Sand and approximately 30% of the production will be taken from the Upper Wolfcamp itself. As a result, an operator cannot distribute the production from a well in the Wolfbone Pool without an allocation formula to protect correlative rights.
- 51. There are several approaches that one could take to arrive at a proper allocation formula, and the Commission can select which approach would be best as seen on Staci Frey's Geology **Exhibit B-14**. Coterra proposes that the working interest of each owner in the Third Bone Spring interval of the Wolfbone be determined by assigning each owner in the Third Bone Spring interval/unit a share in the production in the same ratio as the owner's acreage bears to the acreage

of the whole interval/unit. And, then do the same for the Upper Wolfcamp interval/unit. This will give you the percentage of ownership each owner has in each interval/unit. Then, to distribute the proper amount of production from the Wolfbone well to each owner in the Wolfbone Pool, one would distribute 70% of the owner's percentage of ownership in the Third Bone Spring interval/unit plus 30% of the owner's percentage of ownership in the Upper Wolfcamp interval/unit. The bottom line is that an appropriate allocation formula must be utilized to account for the 70/30 split of production from each well drilled in the Wolfbone Pool underlying the Subject Lands in order to protect correlative rights and prevent the taking of hydrocarbons without compensation.

COMPARSION BETWEEN THE COSTS OF THE PARTIES' RESPECTIVE DEVELOPMENT PLANS

- 52. **Exhibit A-20** shows the costs between the development plans of Coterra and Permian Resources as of July 2024. Coterra's development plan outlines four (4) First Bone Spring Sand wells, seven (7) Second Bone Spring Sand wells, and four (4) Wolfbone wells for the Mighty Pheasant unit. Coterra's Mighty Pheasant development plan totals fifteen (15) wells and was estimated to cost \$148.2 million dollars in July of 2024. Between both Mighty Pheasant and Loosey Goosey units, Coterra would develop thirty (30) wells at a total cost of \$296.4 million dollars.
- 53. In 2024, Permian Resources' development plan for Joker/Bane outlines four (4) First Bone Spring Sand wells, eight (8) Second Bone Spring Sand wells, four (4) Third Bone Spring Carbonate wells, and four (4) Wolfbone wells. Permian Resources Joker/Bane development plan totals twenty-four (24) wells and was estimated to cost \$261.1 million dollars in July of 2024.

Between both Joker and Bane units, Permian Resources would develop forty-eight (48) wells at a total cost of \$522.2 million dollars.

- 54. Based on 2024 costs, provided by both companies, Permian resources plan would require 18 more wells to be developed between both units and would cost working interest owners an additional \$225.8 million dollars.
- 55. **Exhibit A-21** shows Coterra's updated development costs for Mighty Pheasant and Loosey Goosey. Coterra's development plan remains unchanged at 15 total wells for the Mighty Pheasant and 15 total wells for the Loosey Goosey. However, costs have decreased since July 2024. Coterra's September 2025 Mighty Pheasant development costs are estimated at \$141.6 million dollars. The development plan and cost estimates are the same between Mighty Pheasant and Loosey Goosey, and the total cost is estimated to be \$283.3 million dollars for both units.
- 56. For the Wolfbone Pool, Coterra proposes eight (8) wells, two (2) per Section, while Permian Resources is proposing sixteen (16) wells, four (4) per Section. Exhibit A-14 shows that the costs of Coterra's eight (8) wells totals \$88,438,072.00 compared to \$167,836,712.00 for the costs of Permian Resources' sixteen (16) wells, a difference of \$79,396,640.00.

PERMIAN RESOURCES' BATMAN & ROBIN DEVELOPMENTS

- 57. In 2022, the Division issued compulsory pooling orders in Permian Resources' favor for their Batman and Robin developments, located in Sections 18 & 19 (Batman) and 17 & 20 (Robin) of Township 20 South, Range 34 East, NMPM Lea County, New Mexico. These developments are adjacent to Mighty Pheasant/Loosey Goosey. **Exhibit A-22** shows a wine rack of both developments indicating wells that have been drilled or not drilled.
- 58. Orders R-22277 to R-22284, issued in September 2022 for Batman, specified a oneyear term to fulfill the order obligations totaling twenty-four (24) wells to be drilled in the Bone

Spring and Wolfcamp formations. Using public data published by the Division, in 2025 the twenty-four (24) well Batman development has yielded only ten (10) wells drilled, eleven (11) wells were permitted but not drilled, a rig is currently on location per Enverus, and one (1) well was not permitted. There were no extension or amendment orders issued for Batman. Specifically, to the Wolfbone interval, Permian only drilled four (4) Third Bone Spring wells and one (1) Wolfcamp well. To date, no additional Wolfcamp wells have been drilled in Batman.

- 59. Orders R-22319 to R-22326, issued in October 2022 for Robin, specified a one-year term to fulfill the order obligations totaling twenty-four (24) wells to be drilled in the Bone Spring and Wolfcamp formations. Using public data published by the Division, in 2025, the original twenty-four (24) well Robin development has yielded only eighteen (18) wells drilled, five (5) wells permitted but not drilled, and one (1) well not permitted. Many of the orders under Robin received extensions to 2024 because the wells were not drilled within the original term. Robin was drilled after the Batman development, and Order R-22948 was issued in November 2023 to replace many of the original/extended orders to modify the spacing for the wells. Specifically, to the Wolfbone interval, Permian only drilled three (3) Third Bone Spring and three (3) Wolfcamp wells, as compared to four (4) Third Bone Spring and four (4) Wolfcamp wells proposed at Joker/Bane.
- 60. It is Coterra's belief that Permian Resources proposed excessive well counts to win operatorship, particularly in contested compulsory pooling hearings. The Batman and Robin development timelines are an example of excessive initial well counts across all formations that cannot be drilled within the order obligation timeframe. Many times, the orders require time extensions or amendments to adjust the well spacing which allows Permian Resources to reduce the original well count.

61. Order R-23089-A granted Permian Resources operatorship of Subject Lands for their Joker/Bane development across all formations with a forty-eight (48) well count, which is the total well count of the Batman and Robin combined. Referring to **Exhibit A-22**, the wine rack again demonstrates that Batman/Robin units have not been developed to the original forty-eight (48) well standard set by Permian Resources. Coterra will protect correlative rights with the creation of an equitable allocation formula and the ability to honor all wells from the initial pooling order time requirement.

OVERHEAD COSTS AND RISK ASSESSMENT

- 62. Coterra requests overhead and administrative rates of \$12,000/month for drilling each well and \$2,000/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in southeastern New Mexico. Coterra requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.
- 63. Coterra requests the maximum cost, plus 200% risk charge be assessed against nonconsenting working interest owners.
- 64. For any unleased open acreage being pooled, Coterra requests that the acreage be pooled pursuant to statutory one-eighth (1/8) royalty.

CONCLUSION

- 65. Coterra requests that it be designated as operator of the units and wells.
- 66. Granting this Application serves the interests of conservation, prevents waste, and protects correlative rights by avoiding the drilling of unnecessary wells. Leveraging Coterra's established operational footprint and expertise in the area, we are able to cost-effectively develop the acreage through drilling efficiencies, and access to third-party takeaway. Our firm

understanding of the local geology enables full development of the Subject Lands without excessive drilling.

- 67. The Exhibits to this Self-Affirmed Statement either were prepared by me or compiled from Coterra's business records under my direct supervision.
 - 68. The foregoing is correct and complete to the best of my knowledge and belief.

EXPERIENCE

COTERRA ENERGY INC. | Midland, TX

1/2025 to Present

Senior Landman

- Manage land responsibilities for assigned Lea County assets in the New Mexico Delaware Basin. Coordinate with the asset team to execute deliverables for drilling program.
- Prepare land exhibits/materials and testify at Oil Conservation Division compulsory pooling hearings.
- Complete mineral title review, create pay decks, obtain curative, determine risks, and ensure timing obligations for releasing wells to drill.
- Engage with the Bureau of Land Management to ensure obligations for federal units are met throughout the year and understand compliance requirements for terminating older units and the formation of new units.
- Interpret, negotiate, and prepare various land contracts including assignments, communization agreements, joint operating agreements, and letter agreements.

VENCER ENERGY, LLC (sold to Civitas Resources, Inc. in 2024) | Midland, TX

7/2021 to 1/2025

Senior Staff Landman

- Managed land responsibilities for assigned assets in the Midland Basin on a 2 rig drilling program.
- Completed mineral title review, create pay decks, obtain curative, determine risks, and ensure timing obligations for releasing wells to drill. Coordinate with asset team to execute deliverables for drilling programs.
- Acted as primary contact for University Lands and manage ~9,600 acre development area with active 2024-2023 drilling program. Coordinate with asset team to ensure UL contractual obligations are satisfied.
- Partnered with accounting department to formalize account code standards for land department. Reviewed \$13MM in land charges and made coding corrections as needed.
- Interpreted, negotiated, and prepared various land contracts including assignments, joint operating agreements, farm-out/farm-in agreements, and letter agreements.
- Identified non-op partners with delinquent accounts and negotiated no cash acquisitions of their leasehold and working interest in key properties.

SENIOR LANDMAN | Actively Job Seeking During COVID-19

4/2020 to 6/2021

During period of global pandemic, worked to further expertise pending permanent engagement.

• For several short-term engagements perform independent landman responsibilities for projects including inhouse asset reviews, examining title/curative in the public records, and assisting land administration departments with ownership validation.

APACHE CORPORATION | Midland, TX

3/2014 to 03/2020

Senior Landman

- Managed land responsibilities for assets in the Midland Basin, New Mexico Delaware Basin, and Central Basin Platform, including an Upton County asset in the Midland Basin with ~20,000 acres on a 3 rig drilling program.
- Cut team response time from 45 days to <5 days post shut-in by developing a formal process to handle critical or shut-in wells between production, land, and field teams for Upton County asset.
- Completed mineral title review, created pay decks, obtained curative, determined risks, and ensured timing obligations for releasing wells to drill. Coordinated with asset team to execute deliverables for drilling programs (~3-8 rigs).
- Increased New Mexico Delaware Basin position in priority sections from 10%-30% up to a 65%-85% working interest position by formulating and executing acreage trades with various operators.
- Generated ~\$6M in bonus income via out-leasing programs while managing ~100,000 net acres of companyowned minerals.
- Interpreted, negotiated, and prepared various land contracts including assignments, joint operating agreements, farm-out/farm-in agreements, and letter agreements.
- Testified before commissions in Texas and New Mexico for regulatory hearings for various issues including nonstandard locations, Rule 40 as applied to Spraberry (Trend) depth severances, and correlative rights.
- Acted as primary contact for non-consenting cotenants regarding after payout issues in the Midland Basin and worked closely with legal, accounting, and division order departments to resolve various cotenant issues.

ENCANA OIL & GAS (USA) | Plano, TX

2007 to 2014

Land Negotiator (Landman)

- Worked with asset team to manage properties on drill schedule and ensure timing obligations for leasehold.
- Acted as a contact for partners, outside operators, and internal teams; managed field brokers, created DOI spreadsheets and reviewed title/curative for all operated and non-operated properties.
- Completed mineral title review, obtained curative, and determined risks before well clearance for drilling.
- Drafted and negotiated JOA's, letter agreements, data exchanges and divestiture documents with third parties and legal team. Assisted on various legal issues across entire East Texas asset base.
- Managed all mineral activities for ~14,000 acres in East Texas during a 15 rig drilling program. In North Louisiana, assets included a checkerboard AMI with ~64,000 acres for multi-rig programs (5-20 rigs).
- Divested ~\$1.0MM in non-operated Haynesville leasehold, saving ~\$55M in future drilling obligations for sections with multiple well programs.

Re: Mighty Pheasant 5-8 Fed Com Wells & Loosey Goosey 4-9 Fed Com Wells Township 20 South, Range 34 East

Lea County, New Mexico

Compulsory Pooling Order No. R-23089

Dear Working Interest Owner:

Cimarex Energy Co. ("Cimarex"), Operator of the above-proposed developments, presented its argument to the New Mexico Oil Conservation Division ("OCD") from August 9 to August 11, 2023, and received an official order on April 8, 2024. Please see the official Order attached to this letter.

Under the OCD's Order No. R-23089 ("Order"), the OCD stated that "the lands proposed for drilling by both parties lacks natural barriers that would prevent communication between the Third Bone Spring Sand and Upper Wolfcamp, thereby creating a single reservoir or common source of supply located predominantly in the Third Bone Spring Sand." This finding confirmed Cimarex's original and prevailing argument that the Third Bone Spring and Upper Wolfcamp consist of one reservoir and rejected the other applicant's position that the pools were separate.

From the beginning, Cimarex has designed its development plan around the fact, now confirmed by the Order, that only one reservoir is involved, which allows Cimarex to optimize production and revenue for the owners while minimizing waste and drilling costs.

Per the OCD's Order, Cimarex plans to propose the single reservoir as one special pool, a Wolfbone pool, that would account for the lack of frac baffles between the Bone Spring and Wolfcamp formations, a geological characteristic that Cimarex's analysis identified initially and on which the OCD based its findings.

Lastly, Cimarex thanks the owners who have supported its proposed development plan through this process. If you are an undecided or neutral owner, we ask for your support of Cimarex's plan based on the OCD findings.

Re: Supplement to Proposal to Drill

Mighty Pheasant 5-8 Fed Com 301H, 302H, 303H, and 304H Wells Sections 5 & 8, Township 20 South, Range 34 East ("Subject Lands")

Lea County, New Mexico

Dear Working Interest Owner:

Cimarex Energy Co. ("Cimarex") is providing this Supplement to the Proposal to Drill for the above-referenced wells ("Supplement") as an addition to the Supplement to the Proposal to Drill sent to you as an owner on August 2, 2023. This Supplement is incorporated by reference into the original Proposal to Drill that was sent on August 25, 2022 in order to clarify the extent and scope of the projected production from the Mighty Pheasant 5-8 Fed Com 301H, 302H, 303H and 304H, as Wolfbone Wells ("Wells") given their respective formation described in the original proposal in light of the OCD Order No. R-23089 issued April 8, 2024.

The Wells were initially proposed as Bone Spring wells. However, our geologists and engineers, now confirmed by the OCD per Order No. 23089, determined that due to the extensive communication between the Bone Spring and the Wolfcamp, the Wells will now be proposed under a single reservoir as one special pool, a Wolfbone pool. The original Proposal to Drill specifications were as follows:

Mighty Pheasant 5-8 Fed Com 301H — The intended surface hole location for the wells is 390' FNL and 1,190' FWL of Section 5, Township 20 South, Range 34 East, and the intended bottom hole location is 100' FSL and 330' FWL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,870' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Mighty Pheasant 5-8 Fed Com 302H – The intended surface hole location for the wells is 390' FNL and 1,230' FWL of Section 5, Township 20 South, Range 34 East, and the intended bottom hole location is 100' FSL and 1,744' FWL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,860' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Mighty Pheasant 5-8 Fed Com 303H — The intended surface hole location for the wells is 280' FSL and 1,540' FEL of Section 32, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 2,122' FEL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,850' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Mighty Pheasant 5-8 Fed Com 304H — The intended surface hole location for the wells is 280' FNL and 1,500' FEL of Section 32, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 708' FEL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,840' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Except for the creation of the new pool, specifications of the Wells, including location and well count, as described in the original Proposal to Drill, remain the same. Based on the initial proposed specifications in the Proposal to Drill, this Supplement confirms that new Wolfbone pool includes both the 3rd Bone Spring and Upper Wolfcamp, and the wells will be classified as Wolfbone wells.

The supplemental Wolfbone pool information is added to the original well specifications as follows:

Mighty Pheasant 5-8 Fed Com 301H — The intended surface hole location for the wells is 390' FNL and 1,190' FWL of Section 5, Township 20 South, Range 34 East, and the intended bottom hole location is 100' FSL and 330' FWL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,870' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Mighty Pheasant 5-8 Fed Com 302H — The intended surface hole location for the wells is 390' FNL and 1,230' FWL of Section 5, Township 20 South, Range 34 East, and the intended bottom hole location is 100' FSL and 1,744' FWL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,860' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Mighty Pheasant 5-8 Fed Com 303H — The intended surface hole location for the wells is 280' FSL and 1,540' FEL of Section 32, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 2,122' FEL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,850' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Mighty Pheasant 5-8 Fed Com 304H — The intended surface hole location for the wells is 280' FNL and 1,500' FEL of Section 32, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 708' FEL of Section 8, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,840' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Pursuant to NMOCD Order No. R-23089, competing Applicants are submitting proposals for the creation of the special Wolfbone Pool, and contested hearing proceedings involving applications for pooling the Subject Lands will commence pursuant to review and consideration of the Wolfbone proposals. A copy of Order No. R-23089 is attached for your information.

If you have any questions or concerns, please do not hesitate to contact me at (432)-620-1639 or bella.sikes@coterra.com.

Sincerely,

Re: Supplement to Proposal to Drill

Loosey Goosey 4-9 Fed Com 301H, 302H, 303H, and 304H Wells Sections 4 & 9, Township 20 South, Range 34 East ("Subject Lands")

Lea County, New Mexico

Dear Working Interest Owner:

Cimarex Energy Co. ("Cimarex") is providing this Supplement to the Proposal to Drill for the above-referenced wells ("Supplement") as an addition to the Supplement to the Proposal to Drill sent to you as an owner on August 2, 2023. This Supplement is incorporated by reference into the original Proposal to Drill sent on August 25, 2022 in order to clarify the extent and scope of the projected production from the Loosey Goosey 4-9 Fed Com 301H, 302H, 303H and 304H, as Wolfbone Wells ("Wells") given their respective formation described in the original proposal in light of the OCD Order No. R-23089 issued April 8, 2024.

The Wells were initially proposed as Bone Spring wells. However, our geologists and engineers, now confirmed by the OCD per Order No. 23089, determined that due to the extensive communication between the Bone Spring and the Wolfcamp, the Wells will now be proposed under a single reservoir as one special pool, a Wolfbone pool. The original Proposal to Drill specifications were as follows:

Loosey Goosey 4-9 Fed Com 301H – The intended surface hole location for the wells is 1300' FSL and 1,520' FWL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 706' FWL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,830' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

<u>Loosey Goosey 4-9 Fed Com 302H</u> – The intended surface hole location for the wells is 1300' FSL and 1,500' FWL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 2,120' FWL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,820' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Loosey Goosey 4-9 Fed Com 303H – The intended surface hole location for the wells is 280' FSL and 1,540' FEL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 1,744' FEL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,810' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Loosey Goosey 4-9 Fed Com 304H – The intended surface hole location for the wells is 280' FSL and 1,500' FEL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 330' FEL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,800' to the Bone Spring formation and laterally within the formation to the referenced bottom hole location.

Except for the creation of the new pool, the specifications of the Wells, including location and well count, as described in the original Proposal to Drill, remain the same. Based on the initial proposed specifications in the Proposal to Drill, this Supplement confirms that the new Wolfbone pool includes both the 3rd Bone Spring and Upper Wolfcamp, and the wells will be classified as Wolfbone wells.

The supplemental Wolfbone pool information is added to the original well specifications as follows:

Loosey Goosey 4-9 Fed Com 301H – The intended surface hole location for the wells is 1300' FSL and 1,520' FWL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 706' FWL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,830' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Loosey Goosey 4-9 Fed Com 302H – The intended surface hole location for the wells is 1300' FSL and 1,500' FWL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 2,120' FWL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,820' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

<u>Loosey Goosey 4-9 Fed Com 303H</u> – The intended surface hole location for the wells is 280' FSL and 1,540' FEL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 1,744' FEL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,810' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

<u>Loosey Goosey 4-9 Fed Com 304H</u> – The intended surface hole location for the wells is 280' FSL and 1,500' FEL of Section 33, Township 19 South, Range 34 East, and the intended bottom hole location is 100' FSL and 330' FEL of Section 9, Township 20 South, Range 34 East. The well is proposed to be drilled vertically to a depth of approximately 10,800' to a special Wolfbone pool that consists of the Third Bone Spring formation and the Upper Wolfcamp formation.

Pursuant to NMOCD Order No. R-23089, competing Applicants are submitting proposals for the creation of the special Wolfbone Pool, and contested hearing proceedings involving applications for pooling the Subject Lands will commence pursuant to review and consideration of the Wolfbone proposals. A copy of Order No. R-23089 is attached for your information.

If you have any questions or concerns, please do not hesitate to contact me at (432)-620-1639 or bella.sikes@coterra.com.

Re: Mighty Pheasant 5-8 Fed Com Wells & Loosey Goosey 4-9 Fed Com Wells

Lea County, New Mexico

Support of Application for Special Wolfbone Pool (Case No. 24541)

Dear Working Interest Owner:

I am writing to seek your support for Cimarex's proposed development plan for drilling oil and gas wells in Sections 4, 5, 8 and 9, T20S-R34E (the "Subject Lands"). We believe that our proposed development plan will provide all working interest owners with a superior return on investment than the competing development plan.

By way of background, after an evidentiary hearing on the competing development proposals, the New Mexico Oil Conservation Division ("OCD") stated that "the lands proposed for drilling by both parties lacks natural barriers that would prevent communication between the Third Bone Spring Sand and Upper Wolfcamp, thereby creating a single reservoir or common source of supply located predominantly in the Third Bone Spring Sand." The OCD's finding confirmed our original geological analysis that the Third Bone Spring and Upper Wolfcamp underlying the Subject Lands consist of one reservoir and rejected the opposing applicant's position that the Third Bone Spring and Wolfcamp formations were separate pools.

The OCD decided that the manner in which the single reservoir extends from the Third Bone Spring formation into the upper part of the Wolfcamp warrants the need to create a new special pool and invited the competing Parties to submit proposals for a new Wolfbone pool that encompasses both the Third Bone Spring and Upper Wolfcamp formations.

Cimarex's proposal submitted to the OCD on May 13, 2024, is attached to this letter for your review. Our proposal explains why Cimarex views its plan as the better plan that will generate more revenue for the owners by targeting a single drilling location in Third Bone Spring formation for optimal production of the Wolfbone Pool while avoiding the duplicate drilling of

unnecessary wells in the Upper Wolfcamp formation, the cost of which would be imposed on the owners.

After its review, if you choose to support Cimarex's Application for a Special Pool and its development plan, you may elect your support below in the indicated space and return a copy to Bella.Sikes@coterra.com or the mailing address provided below.

For additional information and for ease of access, the application can also be viewed in the address below:

Cimarex Wolfbone Application:

Comments On Well Costs

Total Well Cost

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

\$11,054,759

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

Nonoperator Approval			
Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Comments On Well Costs

1. All tubulars, well or lease equipment is priced by COPAS and CEPS guidelines using the Historic Price Multiplier.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

 Ionoperator Approval			
Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

1. All tubulars, well or lease equipment is priced by COPAS and CEPS guidelines using the Historic Price Multiplier.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

Nonoperator Approval			
Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

Nonoperator Approval			
Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Comments On Well Costs

1. All tubulars, well or lease equipment is priced by COPAS and CEPS guidelines using the Historic Price Multiplier.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

Nonoperator Approval			
Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Comments On Well Costs

1. All tubulars, well or lease equipment is priced by COPAS and CEPS guidelines using the Historic Price Multiplier.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

1	Ionoperator Approval			
	Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Comments On Well Co	osts			

1. All tubulars, well or lease equipment is priced by COPAS and CEPS guidelines using the Historic Price Multiplier.

Well Control Insurance

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

1	Ionoperator Approval			
	Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Well Control Insurance				

Unless otherwise indicated below, you, as a non-operating working interest owner, agree to be covered by Operator's well control insurance procured by Operator so long as Operator conducts operations hereunder and to pay your prorated share of the premiums therefore. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance acceptable to Operator, as to form and limits, at the time this AFE is returned, if available, but in no event later than commencement of drilling operations. You agree that failure to provide the certificate of insurance, as provided herein, will result in your being covered by insurance procured by Operator.

I elect to purchase my own well control insurance policy.

Marketing Election

Cimarex sells its gas under arm's-length contracts with third party purchasers. Such contracts may include fees. In addition, penalties may be incurred for insufficient volumes delivered over time. Should you choose to market your share of gas with Cimarex, you will be subject to all of the terms of such contracts. Upon written request to Cimarex's Marketing Department, we will share with you the terms and conditions pursuant to which gas will be sold. Failure to make an election below shall be deemed an election to market your gas with Cimarex under the terms and conditions set forth above.

I elect to take my gas in kind.

I elect to market my gas with Cimarex pursuant to the terms and conditions of its contract.

Comments on AFE

The above costs are estimates only and anticipate trouble free operations without any foreseeable change in plans. The actual costs may exceed the estimated costs without affecting the authorization for expenditure herein granted. By approval of this AFE, the working interest owner agrees to pay its proportionate share of actual legal, curative, regulatory and well costs under term of the joint operating agreement, regulatory order or other applicable agreement covering this well.

1	Ionoperator Approval			
	Company	Approved By (Print Name)	Approved By (Signature)	Date

NOTICE TO NONOPERATOR: Costs shown on this form are estimates only. By executing this AFE, the consenting party agrees to pay its proportionate share of actual costs incurred. Overhead will be charged in accordance with the Joint Operating Agreement.

Chronology of Contacts with Non-Joined Working Interest Owners

Sent all Working Interest Owners Well Proposals with a copy of the proposed Operating Agreement. Followed up with emails and phone calls.

Read and Stevens-

10/2021 – Reached out to Harrison Read, Vice President of Land and Business Development for Read and Stevens to have an in-person meeting over the development of the area.

1/24/22 – Reached out to Harrison with no response.

2/18/22-3/31/22 – Received response from Harrison with a few dates, none of which were viable and attempted to reschedule. Meeting never took place.

8/25/22- Elections were sent to Read and Stevens for both developments.

<u>Permian Resources</u>- We were notified Permian Resources had acquired Read and Stevens Inc. and were open to talks.

March 1-7, 2023 – Met with Travis Macha and Skyler Fast from Permian Resources to exchange information on potential trade tracts.

March 15, 2023 – Sent email about separate contested hearing to "trade out of each others way". PR was still evaluating the trade.

April 27, 2023- Sent a follow up Email to Travis Macha, Skyler Fast, Mark Hajdik on trade tracts.

April 28, 2023- Emails exchanged to have a follow up in-person meeting of the minds.

May 18, 2023- Meeting with Bob Heller, Travis Macha and Patrick Godwin from Permian Resources and Dylan Park from Coterra to discuss other potential trade tracts.

May 25, 2023- Call with Travis Macha to discuss next steps on potential trade.

June 1 2023- Emails/discussions with Travis Macha on a potential 3 company trade.

June 6, 2023- Follow up to 3 company trade.

June 20, 2023- Followed up on 3 company trade, decision made to move forward with hearing

HOG Partnership

9/7/22 – Email Discussion about proposals received

9/8/22 – Email discussion about proposals received

Challenger Crude (Henry Resources)

9/27/22 – Discussed election timing and general development plan after receipt of proposals with Kymberly Holman

- 3/23/23 Discussed ownership figures for both developments
- 4/3/23 Confirmed that we received executed Operating Agreements from Challenger and elections back
- 6/16/23- Discussed supplemental Wolfcamp notice that was sent
- 7/10/23 Phone call with Kymberly to update her on hearing moving forward.

Randall Hudson, Edward Hudson, Javelina Partners, Zorro Partners, William Hudson II (Hudson Group)

- 2/9/22 Email discussion to communicate plans to develop both developments in which the Hudson group owns
- 6/2/22 Updated the Hudson Group of our AFE's and full development of the leasehold
- 8/25/22 Let the groups know that proposals were heading their way
- 10/26/22 Confirmed each entities interest via email to confirm with what ownership they were showing
- 2/7/23 Discussed with Randall and Edward about potential trades that may come of the Permian Resources acquisition and next steps for pooling
- 3/7/23 Provided Randall and Edward with timing of development in order for them to secure a term assignment from Lindy's Living Trust
- 3/22/23 Sent OA's for their files and confirmed they were executed
- 6/26/23 Met with Randall and Edward with Lea Team to discuss fine details of plans and landing zones etc.

Frost Bank, Trustee of the Josephine T. Hudson Testamentary Trust FBO J. Terrell Ard

- 2/10/23- Spoke to Brad Ince about a potential Term Assignment and terms for the trust
- 2/14/23- Sent an email to Brad Ince at Frost bank to confirm best time to negotiate and hash out terms of the contract
- 4/17/23 Sent an email with the Term assignment form for redline and review
- 5/18/23 Email exchange to discuss best time for a call
- 5/20/23 Call with Brad to confirm details of the Term assignment
- 6/9/23 Sent changes to form along with Net acre figures to calculate bonus payment
- 6/27/23 Forwarded Staci's information for geologic questions concerning the development

7/10-12/23- Provided Debbie Dorsett with AFE's and other information to get the Term assignment routed.

Ard Oil LTD.

- 10/19/22-Received email from Reid Marley to discuss Loosey Goosey and Mighty Pheasant proposals and discussed with development plan and path Coterra would be making forward
- 2/27/23- Phone call with Reid to discuss term assignment offer and provided Operating agreements via email
- 7/10/23 Discussed development timing with Reid
- 7/11/23 Reid emailed that he would like to not be considered committed

Chase Oil Corporation

- 9/12/22 Received email from Morgan Buckles confirming receipt of the proposals.
- 9/12/22 Phone call with Morgan Buckles to discuss proposals and plan of development
- 6/7/23 Received email from Morgan Buckles stating that they would like to sign AFE's and move forward with the operator the OCD decides post hearing.

Wilbanks Reserve Corporation/Marks Oil

- 9/1/22 Phone call with Hannah Frederick confirming receipt of the proposals and request to confirm interest in the contract area
- 9/6/22- Received email from Hannah Frederick following up on working interest figures and sent ownership at the time
- 9/27/22 Email correspondence to set up a phone call to discuss moving forward with title run
- 11/3/22 Discussion of timing for force pooling filing and next steps
- 1/30/23 Discussed Permian Resources development and proposals in the area
- 2/22/23 Reached out to determine if Wilbanks Reserve had signed OA's. Hannah mentioned she would bring this up to upper management and get a decision since there was traction on development
- 7/10/23 Confirmed DOTO figures with Hannah
- 7/11/23 Wilbanks Reserve would like to wait until the Commission has made a decision on operator

Union Hill Oil and Gas

- 3/1/23- Spoke with Robert Buchholz about proposals he received
- 3/1/23 Sent Robert the corresponding Operating agreements for both developments and provided ownership

Highland Texas Energy Company and Richardson Oil Company

10/11/22- Received elections back from Gary Richardson for the development

3/9/23 – Followed up with Gary to confirm they would like to participate under the OA

3/21/23 – Discussed force pooling matters via email

Released to Imaging: 9/19/2025 8:24:05 AM 422 13

- For the purpose of determining the portions of production owned by the persons owning interests in the
 pooled oil or gas, or both, such production shall be allocated to the respective tacts within the unit in the
 proportion that the number of surface acres included within each tract bears to the number of surface acres
 included in the entire unit.
- 2. The portion of the production allocated to the owner or owners of each tract or interest included in a well spacing or proration unit formed by a pooling order shall, when produced, be considered as if produced from the seperately owned tract or interest by a well drilled theron.

 NMSA 1978 Section 70-2-17 (c)

Owner 1 owns 20 net acres in Tract 5

Owner 1 owns 20 net acres

Owner 1

Owner 1

in Tract 5

$$\left(\frac{80}{320}\right) = 0.25$$

$$\left(\frac{80}{320}\right)\left(\frac{20}{80}\right) = 0.0625$$

$$\left(\frac{20}{320}\right) = 0.0625$$

- 1. For the purpose of determining the portions of production owned by the persons owning interests in the pooled oil or gas, or both, such production shall be allocated to the respective tacts within the unit in the proportion that the number of surface acres included within each tract bears to the number of surface acres included in the entire unit.
- 2. The portion of the production allocated to the owner or owners of each tract or interest included in a well spacing or proration unit formed by a pooling order shall, when produced, be considered as if produced from the seperately owned tract or interest by a well drilled theron. Released to Imaging: 9/19/2025~8:24:05~AM

Allocation Example Formula – Bone Spring + Wolfcamp

Owner 1 owns 40 net acres in Tract 2

Owner 1 owns 40 net acres in Tract 2

$$\left(\frac{160}{320}\right) = 0.50$$

The OCC established a formula giving each owner in the unit a share in production in the same ratio as his acreage bears to the acreage of the whole unit.

Rutter & Wilbanks Corp v. OCC

1975 - NMSC - 006, ¶ 28

Owner 1

$$\left(\frac{160}{320}\right)\left(\frac{40}{160}\right) = 0.125$$

Owner 1

$$\left(\frac{40}{320}\right) = 0.125$$

Owner 1 owns 20 net acres in Tract 5

$$\left(\frac{80}{320}\right) = 0.25$$

Owner 1

$$\left(\frac{80}{320}\right)\left(\frac{20}{80}\right) = 0.0625$$

Owner 1

$$\left(\frac{20}{320}\right) = 0.0625$$

0.70(0.125) + 0.30(0.0625) = 0.10625

3rd BS

- 1. A well completed in the Wolfcamp formation will share production from both the Bone Spring and Wolf Camp formations. Order No. R-23089, ¶ 10
- 2. The Third Bone Spring and Upper Wolfcamp formations together represent a combined source of supply located predominently in the Third Bone Spring Sand. Order No. R-23089, ¶ 6
- 3. For the purpose of determining the <u>portions of production owned</u> by the persons owning interests in the pooled oil or gas, or both, such production shall be allocated to the respective tracts within the unit in the proportion that the number of surface acres included within each tract bears to the number of surface acres included in the entire unit. 70-2-17 (c)

Released to Imaging: 9/19/2025 8:24:05 AM

In 2024, PR's Development Plan Would Cost Working Interest Holders \$225.9MM More

- In 2024 Coterra submitted a Capital Plan Comparison Exhibit to the OCD (see slide below)
- In 2024 PR's proposed plan would have cost an additional \$113MM to develop the same formations on a 1280-acre basis compared to Coterra's plan (Updated July 2024 costs)
- Cost difference would be \$226MM for both Mighty Pheasant and Loosey Goosey (Updated July 2024 costs)
- PR's additional development cost come from proposing 9 additional wells and generally having higher well costs for the Upper Bone Spring landings
- PR's July 2024 costs for 1st Bone Spring and 2nd Bone Spring are ~16% higher than Coterra's, or \$1.47MM extra per well on average

			Mighty Pheasant 213H	\$9.122
			Mighty Pheasant 224H	\$9.122
	4	\$41.471	Mighty Pheasant 351H	\$10.368
Wolfbone			Mighty Pheasant 352H	\$10.368
	4		Mighty Pheasant 353H	\$10.368
			Mighty Pheasant 354H	\$10.368
Total	15	\$141.625	n/a	\$141.625

- Coterra estimates that it will take approximately \$142MM gross to fully develop the 1st Bone Spring, 2nd Bone Spring, and Wolfbone landings within the 1280-acre Mighty Pheasant unit
- Difference in 2024 and 2025 cost is mainly related to Coterra's market conditions
- Mighty Pheasant development plan and costs can be applied to the Loosey Goosey 1280-acre unit

Permian Resources – Pooling Orders – Wells Drilled v. Undrilled

STATE OF NEW MEXICO DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES OIL CONSERVATION COMMISSION

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION FOR THE PURPOSE OF CONSIDERING:

OCC CASE NO. 25371

APPLICATIONS OF COTERRA ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING LEA COUNTY, NEW MEXICO

Case Nos. 23448-23455

APPLICATIONS OF COTERRA ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23594-23601

APPLICATIONS OF READ & STEVENS, INC. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23508-23523

APPLICATION OF READ & STEVENS, INC. FOR THE CREATION OF A SPECIAL WOLFBONE POOL IN SECTIONS 4, 5, 8 AND 9, TOWNSHIP 20 SOUTH, RANGE 34 EAST, NMPM, LEA COUNTY, NEW MEXICO

Case No. 24528

APPLICATION OF COTERRA ENERGY CO. FOR THE CREATION OF A SPECIAL POOL, A WOLFBONE POOL, PURSUANT TO ORDER NO. R-23089 AND TO REOPEN CASE NOS. 23448 – 23455, 23594 – 23601, AND 23508 – 23523, LEA COUNTY, NEW MEXICO

Case No. 24541 Order No. R-23089 Order No. R-23089-A

AMENDED SELF-AFFIRMED DECLARATION OF STACI FREY

Staci Frey hereby states and declares as follows:

1. I am over the age of 18, I am a geologist for Coterra Energy Operating Co.

("Coterra") and have personal knowledge of the matters stated herein.

- 2. I have previously testified before the Oil Conservation Division ("Division") and my credentials as an expert in petroleum geology have been accepted as a matter of record.
- 3. My area of responsibility at Coterra includes the area of Lea County in New Mexico.
- 4. I am familiar with the applications Coterra filed in Case Nos. 23448-23455 and 23594-23601. I am also familiar with the applications filed by Read & Stevens, Inc. in Case Nos. 23508-23523 and 24528. I am also familiar with Case No. 24541 which covers the creation of the new Wolfbone Pool.
- 5. I conducted a geological study of the Bone Spring and Wolfcamp formations underlying Coterra's Mighty Pheasant and Loosey Goosey development area.
- 6. **Exhibit B-1** is a locator map showing the approximate location of the Mighty Pheasant and Loosey Goosey development area, identified by a black/yellow box. This locator map also shows an outline of Coterra's 3-D seismic covering the development area, which will aid in geosteering wells. This exhibit also includes an excerpt from Snee & Zoback, 2018, identifying the horizontal stress orientation in this area. The preferred well orientation in this area is North South due to the S_{Hmax} direction.
- 7. **Exhibit B-2** contains structure and isopach maps of the 3rd Bone Spring Sand. The structure is shown with a 100ft contour interval and dips gently to the south. The isopach map is shown with a 25ft contour interval and ranges between approximately 270-295ft at the subject lands. The type log is located at the blue star on the maps, representing the geology at the subject lands.
- 8. **Exhibit B-3** shows a structural cross section from west to east (A-A') across the subject lands. The green line represents Coterra's approximate 3rd Bone Spring Sand target in the

basal sand lobe. There are no significant frac baffles that separate the Bone Spring from the Wolfcamp.

- 9. **Exhibit B-4** contains structure and isopach maps of the 2nd Bone Spring Sand. The structure is shown with a 100ft contour interval and dips gently to the south. The isopach map is shown with a 25ft contour interval and ranges between approximately 400-445ft at the subject lands. The type log is located at the blue star on the maps, representing the geology at the subject lands.
- 10. **Exhibit B-5** shows a structural cross section from west to east (B-B') across the subject lands. The green line represents Coterra's approximate 2nd Bone Spring Sand landing in the basal sand lobe. Permian Resources' additional 3rd Bone Spring Carbonate landing is approximately 135ft below the Lower 2nd Sand landing (red dashed lines), and no significant frac baffle separates the two reservoirs.
- 11. **Exhibit B-6** contains structure and isopach maps of the 1st Bone Spring Sand. The structure is shown with a 100ft contour interval and dips gently to the south. The isopach map is shown with a 25ft contour interval and ranges between approximately 310-350ft at the subject lands. The type log is located at the blue star on the maps, representing the geology at the subject lands.
- 12. **Exhibit B-7** shows a structural cross section from west to east (C-C') across the subject lands. The green line represents Coterra's approximate 1st Bone Spring Sand landing in the Upper low resistivity sand lobe.
- 13. **Exhibit B-8** is a wine rack diagram showing Coterra's Mighty Pheasant and Loosey Goosey development plan, with the initial wells shaded pink and all other wells in the development

shaded blue. We are currently vetting the Upper 2nd Bone Spring Sand formation as an additional landing zone and may target that in a future development.

- 14. **Exhibit B-9** is a wine rack diagram showing Coterra's development plan on the left versus Permian Resources' development plan on the right. The two main differences are that Coterra is not targeting the 3rd Carbonate/Harkey formation or the Wolfcamp Sands. We believe that the additional wells that Permian Resources has proposed in those zones are unnecessary and would cause economic waste.
- Loosey Goosey development area. The well logs on the cross-section give a representative sample of the 3rd Bone Spring Sand and Upper Wolfcamp within the Wolfbone Pool in the area. The Wolfbone Pool is highlighted with orange shading, and Coterra plans to target the basal 3rd Bone Spring Sand at approximately the middle of the Pool as shown by the bold black line. **Exhibit B-10** also contains an inset map that identifies four wells in the vicinity of the proposed wells, which I used for the cross-section, shown by a red line running from D to D'.
- 16. Based on the cross section, I conclude that the formations within the Wolfbone Pool are present and porous in the Mighty Pheasant and Loosey Goosey development area.
- 17. **Exhibit B-11**: As concluded by Order No. R-23089, there are no frac baffles separating the Bone Spring from the Wolfcamp at the subject lands; therefore, Coterra believes an allocation formula is necessary to protect correlative rights of both the Bone Spring and Wolfcamp owners. In an effort to quantify the allocation of potential production from the 3rd Bone Spring Sand versus the Wolfcamp, I calculated porosity*height (PhiH) of both formations. The density porosity logs are publicly available; therefore, any operator can calculate an allocation formula using this log. This simple PhiH calculation accounts for height and pore space, while other

allocation formulas in past cases have only used height – we believe that this method more accurately allocates production from each productive interval. Coterra's approach is "reasonable" and "logical" and generally accurate and therefore meets the standards of the Division and Commission for approval of an allocation formula. It is certainly much more accurate than relying on height as the single factor, an approach that has also been approved by the Division and Commission in past cases. By including porosity as an additional factor with height, Coterra is going the extra step in its measurements.

- 18. There are a couple of assumptions in using this method: the first is that porosity*height accounts for *total* pore space but does not distinguish fluid type. This method predicts total fluid production rather than oil production. The second assumption is that the Wolfcamp Shale has negligeable contribution to the total reservoir tank. Neither Coterra nor Permian Resources is targeting the Wolfcamp Shale.
- 19. In conclusion, this method of calculating Phi*H results in the 3rd Bone Spring Sand being the primary reservoir, with an allocation of approximately 73%.
- Bone Spring Sand and the Upper Wolfcamp. **Exhibit B-12** highlights the primary well targets throughout the Bone Spring and Upper Wolfcamp by displaying a histogram of the average TVDs of laterals relative to Bone Spring Structure maps (within 4 miles of the development area as shown on the locator map). This histogram shows that operators primarily target low resistivity sand reservoirs within approximately 4 miles of the subject lands, not the carbonates or shales. The primary reservoir targeted within the Wolfbone Pool is the 3rd Bone Spring Sand followed by the Wolfcamp X and Y Sands. There are very few wells that target the Wolfcamp Shale below (<10 wells) because the main reservoir lies in the low resistivity (shaded red on RDEEP track) sand

interval above. Therefore, I used both a resistivity cutoff below 50 ohmm and a neutron-density separation cutoff of less than 3 porosity units to highlight pay (yellow shading on the type log) where the highest quality reservoir exists. Using this method, the 3rd Bone Spring Sand is approximately 79% of the Wolfbone productive reservoir tank, while the Wolfcamp is approximately 21% of the productive reservoir tank.

- 21. An assumption made for this method is that the Upper 3rd Bone Spring Sand contributes equally to the Wolfbone reservoir tank even though operators do not land there. This assumption was made because the Upper 3rd Sand is composed of the same low resistivity sands that the Lower 3rd Sand is composed of (along with all other targeted Bone Spring benches).
- 22. **Exhibit B-13**: Finally, I used one more method to calculate the allocation of productive reservoir between the 3rd Bone Spring Sand and Wolfcamp. Permian Resources had previously submitted their Exhibit J, which shows measured oil saturation and porosity from sidewall cores approximately 1 mile west of the subject lands (shown on locator map). I calculated So*Phi*H for the same reservoir interval that they provided data for by using their average oil saturation (So) and porosity (Phi). Based on their measured data, the 3rd Bone Spring Sand accounts for approximately 74% of the productive reservoir tank and the Wolfcamp accounts for 26% of the productive reservoir tank.
- 23. There are a couple of assumptions in using this method: the first is that the geology at the Batman section is equivalent to the geology at the subject lands. Secondly, in core studies, the highest quality reservoirs under-predict oil and water saturations because the high permeability allows for fluids to escape before being measured, this is the term "voidage". An assumption is made that no voidage occurred in the sidewall core samples; therefore, the fluids within the rock samples are assumed to be the same in the subsurface as they are at the surface.

- 24. **Exhibit B-14** summarizes the three methods used to calculate an allocation formula. There are several ways of attempting to allocate productive reservoir between the 3rd Bone Spring Sand and Wolfcamp, each with a slightly different ratio. All methods conclude that the 3rd Bone Spring Sand is the predominant reservoir, which supports the OCD's findings in Order No. R-23089. Coterra is in favor of a 70% Bone Spring/30% Wolfcamp allocation formula, which is the lowest Bone Spring ratio of three methods presented. There might be a question as to the accuracy of the results if only one method of measurement were used, such as only PhiH or only height, but when all three methods described herein are used and all three methods consistently demonstrate that the majority of production comes from the Third Bone Spring Sand and that the 70% Bone Spring/30% Wolfcamp allocation is the most reasonable and logical formula as shown by the combined results of all three approaches, then the accuracy of Coterra's allocation formula can be relied on and trusted to a high degree of confidence, and correlative rights will be protected.
 - 25. I conclude from the maps that:
 - a. The horizontal spacing units are justified from a geologic standpoint.
 - b. There are no structural impediments or faulting that will interfere with horizontal development.
 - c. Each quarter quarter section in the proposed unit will contribute more or less equally to production.
- 26. In my opinion, the granting of Coterra's applications are in the best interests of conservation and the prevention of waste.
- 27. The attachments to my declaration were prepared by me or compiled under my direction or supervision.

28. Pursuant to Rule 1-011 NMRA, I declare and affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct to the best of my knowledge and belief.

Cross Section Highlighting Target Within Wolfbone – Coterra Exhibit B-10 OF COTERRA

1. Allocation Formula Based on DPHI*H (Original Method) – Coterra Exhibit B-11

Coterra's original proposed allocation method:

Assumptions:

- Porosity*height accounts for total pore space but does not distinguish fluid type. This method predicts total fluid rather than oil production.
- Assuming Wolfcamp Shale has negligeable contribution to total reservoir tank. Neither Coterra nor Permian Release uncess is targeting the Shale.

There are no frac baffles separating the Bone Spring from the Wolfcamp at the subject lands, therefore an allocation formula is necessary to protect correlative rights of both the Bone Spring and Wolfcamp owners.

In an effort to quantify the allocation of potential production from the 3rd Bone Spring Sand versus the Wolfcamp, I calculated porosity*height (PhiH) of both formations.

The density porosity logs are publicly available; therefore, any operator can calculate an allocation formula using this log.

This simple PhiH calculation accounts for height and pore space, while other allocation formulas in past cases have only used height – we believe that this method more accurately allocates production.

Conclusion: Primary reservoir within Wolfbone pool is the 3rd Bone Spring Sand, which accounts for 70% of the porosity*height.

3rd Bone Spring Sand: 73% Wolfcamp: 27%

In an effort to establish the primary targets throughout the Bone Spring, created histograms of the average TVDs of laterals relative to Bone Spring structure maps (bar chart next to log).

Conclusion: operators primarily target low resistivity sand reservoirs within approximately 4 miles of subject lands, not the carbonates or shales.

Net pay calculation based on above finding: Resistivity <50 Ohmm, Neutron-Density separation <3 pu

Conclusion: Primary reservoir targeted within Wolfbone pool is the 3rd Sand + Wolfcamp XY Sands.

> 3rd Bone Spring Sand: 79% Wolfcamp: 21%

3. Allocation Formula Based on So*Φ*H (Permian's Measurements)

Amended Exhibit B-13

Location of sidewall core

Permian Resources supplied oil saturation and porosity measurements from sidewall core at their Batman development approximately 1 mile west of the subject lands.

I calculated So* Φ *H for the same reservoir interval that they provided data for by using their average oil saturation (So) and porosity (Φ).

Based on their measured data, the following is the allocation:

3rd Bone Spring Sand: 74% Wolfcamp: 26%

Calculating So*Φ*H using Permian Resources Data:

	Phi Range (Measured)	Avg Sw (Measured)	So	Height	SoPhiH	Total %	Total %
Upper 3rd SS	0.075	0.615	0.385	202	5.83275	45.66474	73.67048
Basal 3rd SS	0.082	0.426	0.574	76	3.577168	28.00573	
WFMP XY	0.0735	0.442	0.558	82	3.363066	26.32952	26.32952

Conclusion: 3rd Sand is primary reservoir

Released to Imaging: 9/19/2025 8:24:05 AM

Allocation Formula Justification Summary

Amended Exhibit B-14

OCD Order No. R-23089 states that the single Wolfbone reservoir is located predominantly in the Third Bone Spring Sand...

6. The lands proposed for drilling by both parties lacks natural barriers that would prevent communication between the Third Bone Spring Sand and Upper Wolfcamp, thereby creating a single reservoir or common source of supply located predominantly in the Third Bone Spring Sand.

METHOD #3

So*Φ*H calculated using Permian Resource's measured porosity and oil saturation...

3rd Bone Spring Sand = 74%
Wolfcamp = 26%

METHOD #2

Net pay calculated based on log character of primary reservoir targets within 4 miles

3rd Bone Spring Sand = 79% Wolfcamp = 21%

In conclusion, there are several ways of attempting to allocate production between the 3rd Bone Spring Sand and Wolfcamp, each with a slightly different ratio. All methods have concluded that the 3rd Bone Spring Sand is the predominant reservoir, which supports the OCD's findings in Order No. R-23089. Coterra is in favor of a 70% Bone Spring/30% Wolfcamp allocation released formula which is the lowest Bone Spring ratio of the three methods presented.

SELF-AFFIRMED STATEMENT OF KENT WEINKAUF

- I, Kent Weinkauf, under penalty of perjury, state and affirm the following:
 - 1. I am over the age of 18 and have the capacity to provide this Statement.
 - 2. I am a Senior Reservoir Engineer for Coterra Energy, Inc. assigned to the Permian

Basin, North Lea County, New Mexico. The applicant in these cases, Coterra Energy Operating Co. ("Coterra"), formerly known as Cimarex Energy Co., is a subsidiary of Coterra Energy, Inc.

- 3. I hold two undergraduate degrees from The University of Tulsa. In 2014 I received a Bachelor of Science in Business and Finance, with a minor in Energy Management. I also received a Bachelor of Science in Petroleum Engineering in 2018.
- 4. In total, I have 11 years of oil and gas experience, including over 7 years as a reservoir engineer for Coterra Energy. I have worked as a Senior Reservoir Engineer within Coterra's Lea County Permian Region over the last 8 months. Prior to working the Permian region, I was a Senior Reservoir Engineer for Coterra's Asset Evaluation Team ("AET"), which handles acquisitions, divestitures, and supports the region teams with trades. During my 3 years on AET I have evaluated over \$315 billion worth of companies and assets within the Permian (New Mexico and Texas), Williston (North Dakota), Anadarko (Oklahoma), Eagle Ford (Texas), and Haynesville (Texas and Louisiana) basins. I also led the engineering evaluation and provided technical guidance on the acquisition of Avant Natural Resources, which was acquired by Coterra in early 2025. From 2018 through 2021 I worked in the Anadarko basin for Coterra Energy.
- 5. As a reservoir engineer, I evaluate the reservoir characteristics and analyze the recoverable hydrocarbons for areas of interest to Coterra. I am also involved in project management and modeling economics for Coterra's development plans. As part of my work, I deploy spacing models, decline curve analysis, rate transient analysis and material balance to improve the fluid recovery estimates of Coterra's inventory locations.
- 6. I have previously testified before the Oil Conservation Division ("Division") as an expert in Petroleum Engineering and my credentials have been accepted of record by the Division.
- 7. This Statement is submitted to the Division in support of Coterra's development plans that are the subject of OCC Case No. 25371.
- 8. Based on my educational background and my experience as a Reservoir Engineer, I find Coterra's development plan for the Mighty Pheasant and Loosey Goosey ("MPLG") units to be superior to Permian Resources ("PR") proposed development plan. I base these comments

on several key findings within the North Lea area of interest ("AOI"), specifically around the Mighty Pheasant and Loosey Goosey units.

- 9. Coterra Exhibit C-1 highlights Coterra's 2025 activity within the State of New Mexico and within North Lea County, New Mexico. Coterra has spudded 74 and completed 49 horizontal wells within New Mexico. Within the North Lea County AOI, Coterra has spudded 18 and completed 24 horizontal wells. Coterra's activity is expected to continue to ramp up within the North Lea County AOI, as development plans are finalized on the newly acquired Avant Natural Resources and Frankline Mountain Energy assets. These numbers signify that Coterra is actively developing within the MPLG AOI.
- 10. Coterra Exhibit C-2 showcases observations between edge wells and bound wells within the MPLG AOI. An initial indication that densely spaced infills are observing oil degradation (related to well spacing) is when edge wells achieve higher oil recoveries than bound wells within the same development. Effectively, a bound well's drainage area is directly impacted by the well spacing as the bound well will struggle to drain past offsetting wells. The tighter the well spacing (wells closer together) the smaller the drainage area width. As well counts are increased, the well spacing is tighter and the bound well drainage area decreases. Conversely, edge wells are not entirely impacted by spacing, as one side of the lateral is unbound (no well exists). This means that the edge well can potentially drain a larger area of rock on one side of the lateral. The edge to bound well oil EUR (Estimated Ultimate Recovery) ratio is simply a ratio that takes the edge well(s) average oil EUR and divides it by the bound well(s) average oil EUR for a given development. If an edge to bound EUR ratio is greater than 1.00, it means the edge well is recovering additional oil reserves that the bound well is not. There are numerous developments with edge to bound EUR ratios between 1.10 and 1.30, which means these edge wells are observing an addition 10% to 30% more oil reserves. These data points indicate the bound wells within the development might be too tightly spaced and could have overlapping drainage areas. Also

concerning, looking at the plot, is a \sim 7 WPS development with an edge to bound EUR ratio near 1.6. With this being the only development with bound wells spaced at \sim 7 wells per section (WPS) spacing, I have concerns about PR's 8 WPS proposal.

- Bone Spring Sand and Upper Wolfcamp) developments to MPLG, and it highlights the differences in fluid recovery between development plans with different Wolfbone well counts. PR developed the Batman and Robin Wolfbone developments near the MPLG unit. The Batman unit was developed with 5 total Wolfbone wells within the unit, and the Robin unit was developed with 6 total Wolfbone wells. Despite having one additional well drilled within the unit, the Robin unit achieved ~40 MBO less oil reserves and ~4,304 Mbbl less total fluid (total fluid accounts for oil and water) reserves than the Batman unit achieved. Both developments are modern completions and have similar completion volumes of over 2,300 lbs/ft proppant and 50 bbl/ft of frac fluid on average. Rock quality is similar between both units, as can be seen on the porosity height (DPhiH) map, which effectively shows the total pore space to be the same for both units. Total pore space does not differentiate between oil and water. However, both oil and total fluid reserves indicate that the additional well developed at Robin did not yield additional reserves.
- 12. Coterra Exhibit C-4 outlines Coterra's Wolfbone spacing model utilized for the MPLG units. Coterra deployed a recovery factor model to estimate oil recoveries. The recovery factor is calculated by taking a well's Oil EUR and dividing it by the well's Original Oil In-Place (OOIP). This gives a percentage that indicates how much of the Oil In-Place is drained. A plot of Recovery Factor vs Well Spacing can be used to derive a predictive model for estimating oil recoveries at various well spacings. The plot on the exhibit is Oil Recovery Factor vs Well Spacing. The black dotted line is Coterra's Wolfbone model. Coterra's recovery/spacing model is based on a line of best fit through offsetting well data. In addition to deriving the oil recoveries and well spacing for offsetting analogues, Coterra also considers analogues' characteristics such as the frac

volumes pumped, water cut of the production stream, and development configuration. Additionally, Coterra grounds the recovery model to bound wells. Bound wells can offer a more accurate representation of a given spacing, since a bound wells drainage area is constrained between offsetting wells. Also on the plot are recent offsetting projects. Coterra's model fits the recent data reasonably well. It's important to note that additional Wolfbone data points and projects were utilized to create this model, but Coterra wanted to show how recent results compare to the model. The bottom right table shows an output of the model for the MPLG units. The table shows how the well EUR is decreasing when additional wells are developed within a unit. As the development well counts increase, the unit oil EUR increases but at a diminishing rate for each additional well developed. Also on the table is a column called "Incremental unit Oil EUR, MBO". This column calculates how many additional oil barrels are recovered for each additional well drilled within a unit. For example, drilling 5 wells (or 5 WPS) within the Mighty Pheasant would yield a 7,260 MBO unit oil EUR. If 6 WPS was drilled, Coterra estimates unit oil EUR to be 7,626 MBO. This means that the additional well drilled would only add 366 MBO of oil reserves to the entire unit. This behavior is observed across North Lea and across other basins in with the United States. Effectively, the recovery of oil is less for every incremental well that is drilled. This dynamic is tied to physical properties of the reservoir. That is why it's important to look at the economics of each well spacing.

13. **Coterra Exhibit C-5** highlights the economics for each spacing configuration. Working interest owners need to consider the cost of drilling an incremental well to determine if the incremental oil reserves are adding value or losing value for the working interest owners. The top table shows Wolfbone development well counts from 4 to 8 WPS on a 1280-acre basis. Coterra estimates a Wolfbone well to cost ~\$10.4MM per well when 4 wells (4 WPS) are developed within a unit, which is \$41.47MM for the 4 WPS unit. The CAPEX number changes slightly as you add more wells because some fixed cost items are spread out over the additional wells. For 4 WPS,

Coterra estimates the unit will achieve \$124.5MM of BFIT (Before Federal Income Tax) PV10 (Present Value with 10% discount rate) on a flat \$65 oil price files. Based on Coterra's model, working interest owners are expected to only gain \$400,000 PV10 by spending an additional ~\$10MM to drill a 5th well in the development. Coterra expects any development with 6 or greater wells to deliver PV10 lower than the 4 WPS development. This means the additional CAPEX spent to drill 6, 7 or 8 wells is estimated to lose working interest owners money. The bottom table focuses on Coterra's and PR's proposed development plans and associated economics. While PR's 8 WPS development plan could yield additional unit oil reserves, the development will lose working interest owners ~\$9.5MM PV10 compared to Coterra's plan. Under PR's plan, working interest owners would have to pay ~\$39.42MM in additional CAPEX but ultimately lose ~\$9.5MM PV10. Additionally, Coterra's plan would deliver an extra 63 barrels of oil per \$1000 of CAPEX spent, illustrating the capital efficiency of Coterra's plan to extract oil from the reservoirs.

- 14. **Coterra Exhibit C-6** highlights the economics between Coterra's and PR's plan at a high oil price sensitivity. When determining which development plan is economically optimal, it's important to look at various pricing sensitivities. The economics within this exhibit are ran at a flat \$75 oil price, which is over ~15% more or \$10 more per barrel than what current oil is trading at. Under the flat \$75 oil pricing scenario, Coterra's development plan of 4 WPS would still deliver ~\$2.8MM more PV10 than PR's 8 WPS development plan.
- 15. **Coterra Exhibit C-7** shows the correlation between frac proppant pumped and the total fluid produced for wells within the MPLG AOI. The strong correlation indicates that increasing proppant volumes will increase the total fluid EUR and thus increase oil recoveries. This correlation suggests a well with 2,000 lbs/ft proppant could have observed a ~14% total fluid and oil EUR uplift if the operator had pumped 2,600 lbs/ft of proppant instead. Coterra plans to pump 2,600 lbs/ft proppant on the MPLG Wolfbone wells.

- and shows what those results look like when normalized to a 2,600 lbs/ft proppant frac. The Quail 16, which is a 4 WPS development, achieved an oil EUR of 5,116 MBO and a total fluid EUR of 13,863 Mbbl when normalized to a 2-mile unit ("10k" lateral length). However, this development only pumped an average proppant volume of ~800 lbs/ft. If I apply the frac correlation from the previous exhibit, the oil EUR and total fluid EUR would normalize to 9,788 MBO and 26,522 Mbbl respectively. The Quail 16 unit achieved a higher oil and total fluid recovery than the Robin unit, which the Robin achieved an oil EUR of 5,790 MBO and total fluid EUR of 22,336 Mbbl when frac proppant is normalized. The same exercise can be performed between the Batman and Robin units. When frac normalized, the Batman achieved 221 MBO more oil reserves and 5,336 Mbbl more total fluid reserves. Despite having more wells than developments on either side of it, the Robin's extra wells did not provide additional oil and fluid reserves.
- 17. **Coterra Exhibit C-9** investigates the Black and Tan development and compares the results of the unit through time. The Black and Tan unit is a 1-mile development where six 3rd Bone Spring Sand wells were initially drilled. These wells provided a unit oil EUR of 2,356 MBO prior to any additional development within the 3rd Bone Spring Sand or Upper Wolfcamp. Roughly 1.5 years later, five Upper Wolfcamp wells were drilled ~200' below the existing 3rd Bone Spring Sand wells. As of today, the total Black and Tan Wolfbone (3rd Bone Spring Sand and Upper Wolfcamp) unit oil recovery is 2,492 MBO. This means that the 5 additional Upper Wolfcamp wells added only 136 MBO of oil reserves. The Average Daily Oil vs Cumulative Oil plot highlights the performance differences between 3rd Bone Spring Sand wells (color red on the plot) and Upper Wolfcamp wells (colored blue on the plot). The performance difference is not surprising to Coterra as the 3rd Bone Spring Sand wells had ~1.5 years of drainage, without competition, before the Upper Wolfcamp wells were developed. When this dynamic is observed, it typically indicates a large amount of depletion occurred before the additional wells were drilled.

- Coterra Exhibit C-10 compares the production of the Black and Tan 3rd Bone 18. Spring Sand before and after the Upper Wolfcamp development. The black dotted line is an aggregate oil forecast of the six 3rd Bone Spring Sand wells. Before the Upper Wolfcamp development, the forecast fit well apart from operational down time for two months in late 2019. The Oil EUR estimate is 2,356 MBO prior to the Upper Wolfcamp wells coming online. After the Upper Wolfcamp wells are developed, the water rate initially increases and the oil rate is suppressed. This indicates that the 3rd Bone Spring Sand wells have been impacted hydraulicly by the Upper Wolfcamp wells. Effectively, the frac fluid pumped from the Wolfcamp wells is present with the 3rd Bone Spring drainage area. A key finding is that the 3rd Bone Spring Sand wells eventually return to the pre-Upper Wolfcamp oil decline forecast and continues this same decline forecast for about 1 year. This indicates limited mechanical damage was inflected on the 3rd Bone Spring Wells. After ~2.5 years of producing the 3rd Bone Spring wells' oil production starts to decline much quicker than is typically observed. The steeper oil decline also coincides with a rapid increase in the Gas Oil Ratio ("GOR"). The GOR increase occurs when the pressure in the reservoir decreases enough that gas starts to come out of the oil solution and is produced separately from the oil. Depleting and removing volumes from the reservoir causes the pressure to decrease. Coterra observes these oil declines and GOR signatures when a well is seeing a boundary or is in competition with other wells over the same drainage area. Given the rapid change and how early this dynamic is occurring, Coterra has confidence that the 3rd Bone Spring Sand wells are competing for drainage with the Upper Wolfcamp wells.
- 19. **Coterra Exhibit C-11** simply shows the aggregate oil forecast utilized to predict the units oil recovery for all eleven Wolfbone wells. This forecast is fit after the Upper Wolfcamp wells are online. The aggregate oil forecast estimates 2,492 MBO oil reserves and fits the actual production data well.
 - 20. Coterra Exhibit C-12 Shows PR's Batman and Robin Developments on a wine

rack. All wells on this exhibit were pooled by PR. In 2022, the Division issued compulsory pooling orders in Permian Resources' favor for their Batman and Robin developments, located in Sections 18 & 19 (Batman) and 17 & 20 (Robin) of Township 20 South, Range 34 East, NMPM Lea County, New Mexico. These developments are adjacent to Mighty Pheasant/Loosey Goosey.

21. Orders R-22277 to R-22284 issued in September 2022 for Batman, specified 24 wells to be drilled in the Bone Spring and Wolfcamp formations. Out of the 24 wells pooled within the Batman unit, only 11 wells, or ~46% of the pooled wells, were developed. This can be seen on the wine rack where grey wells (grey circles on visual) signify wells drilled by PR and red wells (red circles on visual) signify wells permitted but not drilled by PR. Looking at the Batman's 3rd Bone Spring Sand and Wolfcamp specifically, PR only drilled four 3rd Bone Spring wells and one Upper Wolfcamp well. The disparity between PR's pooled wells and developed wells calls into question what PR will actually drill within the MPLG (PR's Joker/Bane) units. Without an allocation formula, PR could develop a disproportionate amount of 3rd Bone Spring Sand wells and Upper Wolfcamp wells within the MPLG (PR's Joker/Bane) units, which would impact the correlative rights of working interest holders. Currently, PR's development plan includes four 3rd Bone Spring Sand wells and four Upper Wolfcamp wells for the Mighty Pheasant (PR's Joker) unit, and PR has proposed the same development plan for the Loosey Goosey (PR's Bane) unit. If PR drills an odd number of wells within Mighty Pheasant and/or Loosey Goosey (PR's Joker/Bane), working interest owners may not be compensated for their fair and equitable portion of reserves and monetary returns. For example, if PR decides to only drill two 3rd Bone Spring wells and three Upper Wolfcamp wells, the 3rd Bone Spring Sand working interest owners would not receive the same equitable return without an allocation formula. Given PR's record of not following through on the Batman's pooled development plan, this is a real concern for MPLG (PR's Joker/Bane) working interest owners. With respect to the Batman unit, Coterra is left to wonder if PR has decided not to develop these remaining Batman Upper Wolfcamp locations. Did

the Robin results, which did not yield additional oil nor total fluid reserves when an extra well was drilled, dissuade PR from drilling the additional wells? If PR decides to develop Batman's remaining Upper Wolfcamp wells at a later date, the existing 3rd Bone Spring Sand wells might have already depleted the common source of supply between both formations. These Batman locations could observe the same result that was observed at the Black and Tan unit.

- 22. Similarly, PR did not develop all of the Robin unit's pooled well locations. Orders R-22319 to R-22326 issued in October 2022 for Robin, specified 24 wells to be drilled in the 3rd Bone Spring Sand and Wolfcamp formations. Out of the 24 wells pooled within the Robin unit, only 18 wells were drilled and developed.
- 23. Coterra Exhibit C-13 highlights the cost from both Coterra and PR from July of 2024. Both companies updated costs, and these 2024 costs can be found within this exhibit. Coterra's development plan included four 1st Bone Spring Sand wells, seven 2nd Bone Spring Sand wells (3 of which are located in the upper 2nd Sand landing, which Coterra is evaluating), and four Wolfbone wells. In total, Coterra has 15 wells with the development plan on a 1280 acre unit. This would be 30 wells between Mighty Pheasant and Loosey Goosey. This development plan totaled \$148.2MM for Mighty Pheasant in July 2024 or \$296.4MM for both MPLG units. Between both MPLG units, Coterra's development plan was \$225.8MM less than PR's for the same formations. Additionally, PR proposed needing 9 additional wells per 1280-acre unit to develop and produce oil and gas reserves. The additional wells came from proposing 4 extra wells in the Wolfbone and 4 extra wells in the 3rd Bone Spring Carbonate landing. Additionally, Coterra's 1st Bone Spring and 2nd Bone Spring Sand wells are more economic than PR's by ~16% or \$1.47MM per well.
- 24. **Coterra Exhibit C-14** shows the updated development cost for Coterra as of September 2025. Coterra's updated development cost for Mighty Pheasant is \$141.6MM. This cost is to develop the 1st Bone Spring, 2nd Bone Spring Sand and Wolfbone, which are the same formations that Coterra has previously proposed to develop. Although Coterra does not have

updated 2025 costs for PR, Coterra's updated development costs are significantly less than PR's 2024 cost estimates. For both Mighty Pheasant and Loosey Goosey, Coterra estimates it will cost \$283.3MM.

- 25. **Coterra Exhibit C-15** contains a list of wells utilized within the exhibits.
- 26. The granting of this Application is in the best interests of conservation, the prevention of economic waste, and the protection of correlative rights. Coterra understands the reservoirs of this area, and Coterra does not need to over-drill the subject lands in order to fully and economically develop the acreage.
- 27. The Exhibits to this Self-Affirmed Statement were prepared by me or compiled from Coterra's company business records under my direct supervision.
 - 28. The foregoing is correct and complete to the best of my knowledge and belief.

Received by OCD: 9/17/2025 11:13:54 PM

Signature page of Self-Affirmed Statement of Kent Weinkauf:

I understand that this Self-Affirmed Statement will be used as written testimony before the Commission Case No. 24541 and affirm that my testimony herein is true and correct, to the best of my knowledge and belief and made under penalty of perjury under the laws of the State of New Mexico.

Coterra is currently running 9 drilling rigs and 3 frac crews within the Delaware side of the Permian Basin

Edge To Bound Well Oil EUR Ratio Indicates Degradation From Tighter Well Spacing – Coterra Exhibit C-2

- When the Edge to bound well EUR ratio is above 1.00 for a given development it means that the bound infill wells observed degradation to oil reserves
 - Edge well: One side is bound and the other side is unbound at the time of development
 - Bound well: Both sides of the well are bound at the time of development
- Each data point represents a development where an edge and bound well exist within a unit AOI focused around MPLG
- The plot shows that typically edge wells are recovering more oil reserves than the bound wells

Based these Edge to Bound ratios, bound wells may be tightly spaced and most likely have overlapping drainage areas with

other bound wells within the development

Bound wells

Bound on both sides

- Bound on one side
- No well on the other side

PR's Robin Development Proved Adding An Additional Well Did Not Add Oil Reserves – Coterra Exhibit C-3 🌘 COTERRA

- Batman and Robin are 2 Permian Resource developments offsetting the Mighty Pheasant and Loosey Goosey units (MPLG)
- 6x Wolfbone wells drilled within the Robin DSU and 5x Wolfbone wells drilled within the Batman unit
- All wells with Batman and Robin are similar modern completions (Proppant >2300) lbs/ft and fluid >50 bbl/ft)
- Despite drilling an additional well, Robin's development did not provide additional oil reserves for the section

Project Name	Wells Drilled Within Section	Unit Oil EUR, MBO	Unit Total Fluid EUR, Mbbl
Batman	5	5,636	25,891
Robin	6	5,597	21,587
Robin EUR Difference to Batman		-40	-4,304

Coterra's Wolfbone Spacing Model Indicates Significant Spacing Degradation At 8 WPS

Amended Exhibit C-4

- Coterra deployed a Recovery Factor model to determine optimum wells spacing
- Recovery Factor is effectively a percentage of Oil recovered by a well

Recovery Factor (%) =
$$\frac{Well's \ Oil \ EUR \ (MBO)}{Well's \ Original \ Oil \ In-Place \ (MBO)}$$

- By plotting Recovery Factor vs Well Spacing (WPS) we can derive a predicative model for oil recovery at various well spacings
- The Recovery Factor model is grounded to fully bound analogues, but the plot below shows it is also predicative of offsetting development's oil recoveries
- Coterra's model indicates a large oil recovery drop-off going from 4 WPS to 8 WPS (See table below)

Mighty Pheasant / Loosey Goosey Estimates Below

WPS	Well Oil EUR, MBO	1280-ac Unit Oil EUR, MBO	Incremental Unit Oil EUR, MBO
3	2,077	6,231	n/a
4	1,703	6,812	581
5	1,452	7,260	448
6	1,271	7,626	366
7	1,134	7,938	312
8	1,026	8,208	270

Welfbone Productivity and Economics Support 4 Wells Per 1280 Acre Unit On Flat \$65 Oil Price – Coterra Exhibit C-5 🦰

COTERRA

- To determine the optimum well spacing, Coterra compares incremental economics at every well spacing (See table below)
 - Example: Drilling 5 WPS yields a total unit PV10 of 124.9mm, which is \$0.4mm more than 4 WPS PV10 of \$124.5mm Extra well only added \$400,000 of gross value
- While additional wells do add a small amount of incremental oil reserves, the added reserves are not large enough to provide positive value to the working interest owners
- At a Flat \$65 oil price, every additional well after 5 wells per section is losing money for working interest owners
- Not only is 8 WPS a bad development plan for working interest owners but so is 7 WPS and 6 WPS

Wells Per Section	Unit Oil EUR, MBO	Incremental Unit Oil EUR, MBO	Unit CAPEX, MM\$	Oil Per CAPEX Spent, bbl/\$1000	Unit BFIT¹ PV10², MM\$	Incremental PV10 ² , MM\$
4	6,812	n/a	\$41.47	164	\$124.5	n/a
5	7,260	448	\$51.06	142	\$124.9	\$0.4
6	7,626	366	\$61.76	123	\$122.2	-\$2.7
7	7,938	312	\$71.35	111	\$119.1	-\$3.1
8	8,208	270	\$80.89	101	\$115.0	-\$4.1

- 1. BFIT = Before Federal Income Tax
- 2. PV10 = Present Value at 10% discount rate
- Coterra's proposed 1280-acre development plan would deliver and additional \$9.5mm PV10 to working interest owners compared to PR's
- While PR's 4 additional wells could add 1,396 MBO of unit oil reserves, the economics of those reserves are poor Net Value Loss
- Coterra's proposed plan would provide an additional 63 barrels of oil per \$1000 of CAPEX spent by working interest owner

Scenario	Wells Per Section	Unit Oil EUR, MBO	Incremental Unit Oil EUR, MBO	Unit CAPEX, MM\$	Oil Per CAPEX Spent, bbl/\$1000	Unit BFIT PV10, MM\$	Incremental PV10, MM\$	Incremental IRR ¹ , %
CTRA Proposal	4	6,812	n/a	\$41.47	164	\$124.5	n/a	n/a
PR Proposal	8	8,208	1,396	\$80.89	101	\$115.0	-\$9.5	0%

1. IRR = Internal Rate of Return

Higher Oil Price Sensitivities (Flat \$75 Oil Pricing) Support Coterra's 4 WPS Plan – Coterra Exhibit C-6 🔘 COTERRA

- Coterra also examined spacing economics at different oil price to determine potential upside in market conditions
- Even at a flat \$75 oil price, Coterra's proposed 1280-acre development plan (4 WPS) would deliver and additional \$2.8mm to working interest owners compared to PR's proposed plan
- PR's proposed development plan is still a Net Value Loss to working interest owners at higher oil price sensitivities

Scenario	Wells Per Section	Unit Oil EUR, MBO	Incremental Unit Oil EUR, MBO	Unit CAPEX, MM\$	Oil Per CAPEX Spent, bbl/\$1000	Unit BFIT PV10, MM\$	Incremental PV10, MM\$	Incremental IRR, %
CTRA Proposal	4	6,812	n/a	\$41.47	164	\$153.8	n/a	n/a
PR Proposal	8	8,208	1,396	\$80.89	101	\$151.0	-\$2.8	0%

Larger Proppant Volumes Can Improve Oil Recoveries For The Wolfbone – Coterra Exhibit C-7

- MPLG area suggest shows a strong frac proppant correlation with Total Fluid recovered (Total fluid = Oil EUR + Water EUR)
 - Total fluid normalizes differences in water cut across areas
- Strong proppant correlation with total fluid recovery indicates frac volumes can add significant oil reserves for a given well spacing
- Correlation suggests a well with 2,000 lbs/ft could have observed a ~14% total fluid EUR uplift if 2,600 lbs/ft had been pumped instead
- Coterra plans on pumping 2,600 lbs/ft of proppant at MPLG

474 **7**

Coterra's Spacing Model Outputted Oil Reserves Inline With Offsetting Results – Coterra Exhibit C-8

- Coterra investigated offset producers to observe spacing performance
- Table below highlights offsets performance on 10,000 lateral foot basis ("10k")
- Additionally, the table shows what offsetting results would look like if they were normalized for their frac volumes pumped – Utilizes proppant correlation outlined within the prior exhibit
- Despite having more wells drilled within it, the Robin did not observe higher oil nor total fluid recoveries compared to the offsetting Quail 16 and Batman projects when the frac volumes were normalized (Red box on table)

Project Name	Wells Per Section	Avg. Proppant, Ibs/ft	Unit 10k TF EUR, Mbbl	Unit 10k Oil EUR, MBO	Unit 10k Frac Norm. TF EUR ¹ , Mbbl	Unit 10k Frac Norm. Oil EUR¹, MBO
North Lea 3	4	1,834	12,048	5,441	16,555	7,476
Marathon Road	4	651	10,653	5,039	21,770	10,297
Quail 16	4	802	13,863	5,116	26,522	9,788
Robin	6	2,449	21,454	5,561	22,336	5,790
Batman	5	2,382	26,087	5,667	27,672	6,011
Sandra Jean	6	2588	17,090	6,151	17,149	6,172
Hamon	4	796	12,847	4,198	24,839	8,116

^{1.} Frac normalization takes the below plot's correlation to uplift well total fluid EURs to what a 2,600 lbs/ft proppant job could produce

Black and Yan Wolfcamp Landings Added Limited Reserves To Existing 3rd BSPSG Wells – Coterra Exhibit C-9

COTERRA

- Black & Tan 1 mile section was initially developed by drilling 6x 3rd BSPG wells
- Roughly 1.5 years later the Upper Wolfcamp was developed beneath the existing 3rd BSPG wells
- Wolfcamp laterals are much poorer than 3rd BSPG laterals
- Total section oil recovery only increased by ~136 MBO with the additional 5 Upper Wolfcamp wells

Black & Tan Section	Well Count	Unit Oil EUR, MBO
Prior to Wolfcamp (3 BSPG)	6	2,356
After Wolfcamp (3 BSPG +WFMP)	11	2,492
5x Upper Wolfcamp Wells Added:	136	

Black & Tan Development

Black & Tan 3rd BSFG 6 Well Composite Forecast (Before Wolfcamp development) – Coterra Exhibit C-10

- 6x 3rd BSPG were declining towards a 2.36 MMBO unit EUR prior to Black and Tan Wolfcamp development
- After Wolfcamp wells are completed and brought online, Composite 3rd BSPG oil rates climbed back to pre FDI decline rates –
 Indicative of limited to no mechanical damage
- 3rd BSPG wells prematurely observed steeper decline and rapid GOR increase Boundary flow created from competition with Wolfcamp

Black & Tan 3rd BSPG and Wolfcamp 11 Well Composite Forecast – Coterra Exhibit C-11

Above plot includes all eleven 3rd BSPG and Upper Wolfcamp Black & Tan laterals

FR Did Not Fully Develop The Pooled Plan At Batman and Robin – Coterra Exhibit C-12

In 2024, PR's Development Plan Would Cost Working Interest Holders \$225.9MM More – Coterra Exhibit C-13 🦰

COTERRA

- In 2024 Coterra submitted a Capital Plan Comparison Exhibit to the OCD (see slide below)
- In 2024 PR's proposed plan would have cost an additional \$113MM to develop the same formations on a 1280-acre basis compared to Coterra's plan (Updated July 2024 costs)
- Cost difference would be \$226MM for both Might Pheasant and Loosey Goosey (Updated July 2024 costs)
- PR's additional development cost come from proposing 9 additional wells and generally having higher well costs for the Upper Bone Spring landings
- PR's July 2024 costs for 1st Bone Spring and 2nd Bone Spring are ~16% higher than Coterra's, or \$1.47MM extra per well on average

STATE OF NEW MEXICO DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES OIL CONSERVATION COMMISSION

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION DIVISION FOR THE PURPOSE OF CONSIDERING:

APPLICATIONS OF CIMAREX ENERGY CO. FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING LEA COUNTY, NEW MEXICO

Case Nos. 23448-23455

APPLICATIONS OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23594-23601

APPLICATIONS OF READ & STEVENS, INC. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23508-23523

APPLICATION OF READ & STEVENS, INC. FOR THE CREATION OF A SPECIAL WOLFBONE POOL IN SECTIONS 4, 5, 8 AND 9, TOWNSHIP 20 SOUTH, RANGE 34 EAST, NMPM, LEA COUNTY, NEW MEXICO

Case No. 24528

APPLICATION OF CIMAREX ENERGY CO. FOR THE CREATION OF A SPECIAL POOL, A WOLFBONE POOL, PURSUANT TO ORDER NO. R-23089 AND TO REOPEN CASE NOS. 23448 – 23455, 23594 – 23601, AND 23508 – 23523, LEA COUNTY, NEW MEXICO

Case No. 24541 Order No. R-23089 Order No. R-23089-A OCC Case No. 25371

SELF-AFFIRMED STATEMENT OF CALVIN BOYLE

I, being duly sworn on oath, state the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.

- 2. I am employed as a Facility Engineer for Coterra Energy, Inc. The applicant, Coterra Energy Operating Co. ("Coterra"), formerly known as Cimarex Energy Co., is a subsidiary of Coterra Energy, Inc. I am familiar with the subject application.
- 3. I have a Bachelor of Science Degree in Petroleum Engineering from The University of Oklahoma, and a Master of Business Administration from Oklahoma State University.
- 4. I was employed by Haliburton Energy Services from June 2017 until March 2019, as a Technical Professional, responsible for designing and managing cementing programs for all of XTO Energy Inc.'s drilling rigs in the Mid-Continent.
- 5. I joined Cimarex Energy Co. ("Cimarex") in March 2019. Since October 1, 2021, when Cimarex merged with Cabot Oil & Gas Corporation to form Coterra Energy Inc., I have been an employee of Coterra Energy Inc..
- 6. I have been a Facility Engineer for Cimarex and then Coterra since April 2021. As the Facility Engineer, I am responsible for planning, designing, and managing production facilities operated by Cimarex. Coterra has charged me with ensuring that production facilities are designed and managed so as to minimize environmental impacts.
- 7. I have testified previously before the Oil Conservation Division ("Division") as an expert facility engineer; my credentials have been made a matter of record, and I have been qualified as an expert by the Division.
- 8. This Statement is submitted to the Division in support of Coterra's development plans that are the subject of OCC Case No. 25371.

Coterra Exhibit D-1: Development Plan

9. Exhibit D-1 illustrates Coterra wells and facilities for our Mighty Pheasant/Loosey Goosey development plans. Exhibit D-1 also includes Coterra's Chapadoniz development that is

adjacent to the Mighty Pheasant/Loosey Goosey. The Chapadoniz development consists of 320 acres (Township 19 South, Range 34 East, W/2 W/2 of Sections 28 and 33) and four oil and gas wells. Coterra will employ a single battery to develop 34 planned wells between MPLG and Chapadoniz, eliminating one battery worth of surface disturbances and high-risk emissions devices. The total surface disturbance will be approximately 33.9 acres in the 2,882.12-acre development area, or approximately 1.18% of the subject lands. Coterra does not allow routine flaring and our design has greater than 90% low pressure vapor capture.

Coterra Exhibit D-2: Tankless Comparison

10. Coterra has included additional data to show the effectiveness of our standard tankless design. Exhibit D-2 illustrates that Coterra's tankless facilities outperform the traditional tanked facilities. The average emissions device (End of lines and thief hatches) failure off Coterra's tankless facilities is 0% compared to an average of 8% on Coterra's older tanked facilities. The average tankless CVS flash gas capture is 96% and only flares approximately 3,400MCF in the first two years of production. By comparison, a typical tanked facility has a CVS flash gas capture of 78%, flaring approximately 18,650MCF in the first two years of production on tanked facilities. (Gas volumes are calculated assuming the acreage is developed by 4 wells per section landed flat in the 3rd Bone Spring Sand.)

Coterra Exhibit D-3: Operations and Environmental Overview

- 11. Exhibit D-3 provides an overview of Coterra's operations and how it protects the environment.
- 12. Coterra's central battery utilizes surge vessels to remove all thief hatches and End Of Line devices from the closed vent system which significantly reduces emissions. Satellite separators eliminate future ground disturbances.

- 13. Under Coterra's system, there are zero high risk emission devices, no high-pressure flaring, and redundant vapor recovery units that increase low-pressure gas capture and reduces flaring.
- 14. There are various aspects of the system that mitigates spills, including containment around all equipment and pumps; stainless steel piping in high-risk areas, transfer pump seal leak detection, and berm switches in containments.

Coterra Exhibit D-4: Mighty Pheasant - Loosey Goosey Operator Emissions Comparison

- 15. As shown on Exhibit D-4, Coterra has achieved superior emission metrics across 3 categories generally used to compare operator emissions performance.
- 16. These metrics are based directly upon publicly available data submitted to the EPA through the Greenhouse Gas (GHG) Reporting Protocol. Reporting years 2023 is used since it is the most recent data publicly available for both companies.
- 17. Flare intensity is an indicator of product waste. Total flare volumes are based off data in Table N.1 publicly available through the GHG Reporting Protocol. The volumes of gas produced are from [98.236(aa)(1)(i)(B)]. This data indicates Coterra sold 2.63% more of its produced gas than Permian Resources on a volumetric basis in 2023. This result was driven in part by the implementation of tankless facilities.
- 18. Greenhouse Gas (GHG) Intensity is a ratio of overall metric tons (MT) of carbon dioxide equivalent (CO2e) emitted per unit of production, MBOE. This metric only encompasses Scope 1 emissions, or emissions directly emitted by the operations of the companies. The unit MT CO2e incorporates methane and nitrous oxide emissions as well as carbon dioxide emissions at 25:1 and 298:1 ratios, respectively, as per the EPA's stated global warming potential for each species. All three of these greenhouse gas species are reported annually through the GHG

Reporting Protocol. In 2023, Coterra emitted 12.0 MT CO2e less than PR per MBOE produced through Upstream operations. Produced MBOE for each company can be derived from [98.236(aa)(1)(i)(A)] and [98.236(aa)(1)(i)(C)].

- 19. Methane intensity specifically focuses on one greenhouse gas. In 2023, Coterra reported a methane intensity of 0.013, less than one-fifth of Permian Resource's methane intensity in the same year.
- 20. The Exhibits to this Self-Affirmed Statement were prepared by me or compiled from Coterra's company business records under my direct supervision.
 - 21. The foregoing is correct and complete to the best of my knowledge and belief.

Signature page of Self-Affirmed Statement of Calvin Boyle:

I understand that this Self-Affirmed Statement will be used as written testimony before the Commission in Case No. 25371 and affirm that my testimony herein is true and correct, to the best of my knowledge and belief and made under penalty of perjury under the laws of the State of New Mexico.

Calvin Boyle

9-10-2025

Wiighty Pheasant Loosey Goosey Development Plan – Coterra Exhibit D-1

Single Battery develops – 34 planned wells

- Oil water gas power ROW connects 4 drilling pads with on pad separation to Battery
- Single battery eliminates 1 additional batteries worth of disturbance and high-risk emissions devices.
- Coterra allows 0 routine flaring, and our design has >=90% low pressure vapor capture
- Roads (2.33) acres, pads (25.25 acres) and battery (6.31 acres) create ~33.9 acres of disturbance allowing for full development of ~2882.12 acres, 1.18% disturbance.
- Pipelines are onetime construction; follow-up wells will use existing gathering off pad which is installed the first time a well is drilled off a drill pad. All future wells create no new disturbance off drill pads minimizing environmental impact

Coterra Tankless Comparison – Coterra Exhibit D-2

Tankless **Tanks**

Metric	Tankless	Tanked
Avg. Failure Rate For Emissions Devices	0%	8%
Avg. CVS % Capture	96%	78%
CVS Flared Flash Gas first 2 years, MCF*	3,400	18,650

Operations and Environmental Overview — Coterra Exhibit D-3

Tankless Battery Design

- Central battery utilizing surge vessels
- Satellite separators utilized to eliminate future ground disturbance

Emissions Reduction

- 0 high risk emissions devices
- Removal of high-pressure flare (Shut wells in during high line pressure events)
- Redundant vapor recovery units to increase low-pressure gas capture and reduce flaring

Spill Mitigation

- Containment around all equipment and pumps
- Stainless steel piping in high-risk areas
- Transfer pump seal leak detection
- Berm switches in containments

CTRA/PR Permian-Specific Comparison – Coterra Exhibit D-4

Coterra Exhibit E-1: John Coffman's Statement from August 9, 2023, Hearing Regarding Coterra's Dealings with Reid & Stevens and Related Testimony

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATIONS OF CIMAREX ENERGY CO. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case Nos. 23448, 23449, 23450 & 23451

SELF-AFFIRMED STATEMENT OF JOHN COFFMAN

- I, being duly sworn on oath, state the following:
- 1.. I am over the age of eighteen years and have the capacity to execute this Self-Affirmed Statement, which is based on my personal knowledge.
- 2. I am employed as a Landman with Coterra Energy, Inc., and its subsidiary Cimarex Energy Co. ("Cimarex"), the applicant in this case, and I am familiar with the subject application and the lands involved.
- 3. I graduated in 2018 from Texas Tech University with a bachelor's degree in Business Administration with an emphasis on Energy Commerce. I have worked at Cimarex for approximately 4 years, and I have been working in New Mexico for 5 years. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
- 4. This Statement is submitted in connection with the filing by Cimarex of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1).
- 5. This Statement is the first of four Landman Statements in four hearing packets (Hearing Packets I through IV) that cover Cimarex's 16 cases among the 32 cases heard in this contested hearing. Cimarex has presented the cases to the best of its ability in digestible parts so

20 South, Range 34 East, to a bottom hole location in the 100' FSL and 1744' FWL of Section 8, Township 20 South, Range 34 East; with an approximate TVD of 10,860'; approximate TMD of 20,992'; FTP in Section 5: 100' FNL, 1,744' FWL; LTP in Section 8: 100' FSL, 1,744' FWL.

- 19. Under <u>Case No. 23451</u>, Cimarex seeks an order pooling all uncommitted mineral interest in the Bone Spring formation, more specifically, the Teas; Bone Spring, East [Pool Code 96637], designated as an oil pool, underlying a standard 320.06-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4 and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Cimarex intends to dedicate to the unit the **Mighty Pheasant 5-8 Fed Com 303H Well**.
- 20. Cimarex proposes the **Mighty Pheasant 5-8 Fed Com 303H Well** (API pending) to be horizontally drilled from a surface location 281' FSL and 1463' FEL of Section 5, to a bottom hole location 100' FSL and 2122' FEL of Section 8; approximate TVD of 10,860'; approximate TMD of 21,019'; FTP in Section 5: 100' FNL, 2,122' FEL; LTP in Section 8: 100' FSL, 2,122' FEL.
 - 21. The proposed C-102 for each Mighty Pheasant well is attached as **Exhibit A-1**.
- 22. A general location plat and a plat outlining the units being pooled is attached hereto as **Exhibit A-2.1** through **Exhibit A-2.4**, which show the location of the proposed wells within the units. The location of each well is orthodox, and it meets the Division's offset requirements.
- 23. The parties being pooled, the nature of their interests, and their last known addresses are listed in **Exhibit A-2.1** through **Exhibit A-2.4** attached hereto. These Exhibits include information regarding working interest owners.

- 24. Cimarex has been informed that in a recent pleading filed by Permian Resources, Permian Resources accused Cimarex of sitting on its acreage and not moving forward with development. I read this in Permian Resources' Response to Cimarex's Motion to Continue, the exact language accused Cimarex of "sitting on this acreage for years," and only now moving forward. This is a complete mischaracterization of the efforts Cimarex and its parent company Coterra Energy, Inc., ("Coterra" or collectively "Cimarex") have made toward developing the Subject Lands and the surrounding area ("Area of Interest").
- 25. Cimarex has had a difficult history with Read & Stevens, Inc. ("Read & Stevens") and during this history, it is Read & Stevens who has taken actions to impede and obstruct the development of the Subject Lands and Area of Interest over the years.
- **Exhibit A-7** shows the extent of land and acreage that Cimarex has been actively developing and expanding. Coterra has acquired approximately 60 percent working interest ("WI") in Sections 4, 5, 6, 7, 8, 9, 17, 18, 19, 20, 29, 30, 31, 32 and 33, in the Subject Lands and Area of Interest as shown in Slides 1 and 2. It is the intent of Coterra to develop and transform the majority of this acreage into a federal unit, and that is what we have been working toward over the years, to develop these lands into a federal unit that will complement our two other federal units that we operate in the nearby area; those are Laguna Deep and Pipeline Deep.
- 27. Cimarex has been coordinating its efforts, and directly communicating with, the operator of the Mescalero Ridge Unit which covers all depths. As such, we are working toward dissolving and consolidating certain federal units no longer in use and have been working closely with the BLM to revitalize production in the consolidated interests. This will position the majority of our North Lea Acreage for full development and production in the First, Second, and Third

Bone Spring (it is the Bone Spring that contains the common sources of the supply in the Area of Interest) with very little surface impact and the ability to commingle on a larger scale than we would normally be able to do without the wider effort. See, for example, Slide 4, **Exhibit A-7**. This is what Cimarex has been working toward over the past decade, developing, and expanding its acreage and plans, positioning itself well within the acreage, not sitting on them. Furthermore, the Division should appreciate that this kind of work – working with the BLM and the other major owners involved – takes time.

- 28. Cimarex has been able to work quite well and cooperatively with most of the major WI owners, successfully reaching out to larger companies such as Matador, XTO, and Chevron; however, Read & Stevens has proven to be a most uncooperative party in the Area of Interest, and it is not even a party involved in the larger effort of creating and consolidating the federal units. Read & Stevens has presence only in certain contract areas in which most operators are able resolve their difference and reach an agreement. After much negotiating and even offering to travel across Texas and New Mexico to meet, Cimarex could never obtain a successful meeting or reach an agreement with Read & Stevens.
- 29. In fact, Read & Stevens made every effort to frustrate and undermine the coordinated efforts of the WI owners in the Subject Lands. A large part of the Subject Lands (S/2 of Sections 4 and 5 and all of Sections 8 and 9, Township 20 South, Range 34 East) is governed by an existing Operating Agreement dated August 1, 1979, in which Estoril Producing Corporation was the original operator ("1979 OA"). During negotiations over the Subject Lands, Read & Stevens challenged Cimarex's right to seek operatorship under the 1979 OA (Magnum Hunter Hunter Production, Inc. ("Magnum Hunter"), a subsidiary of Cimarex and successor member to the 1979 OA, was the actual party seeking operatorship). Read & Stevens sued Magnum Hunter

in the Fifth Judicial District of New Mexico, in Case No. D-504-CV-2014-00358, claiming that Magnum Hunter had no right to consider being an operator of the 1979 OA. The Judge ruled in favor of Magnum Hunter and Cimarex, stating that Magnum Hunter does have a right to seek operatorship under the 1979 OA. *See* Order on Motion for Partial Summary Judgment in Case No. D-504-CV-2014-00358, Fifth Judicial District, attached hereto as **Exhibit A-8**.

- 30. Based on the court's ruling, Magnum Hunter sent out operatorship ballots to WI owners, in accordance with the terms of the 1979 OA and received a majority of votes in its favor, which secured Magnum Hunter's position as operator under the 1979 OA. However, Read & Steven appeared to reject the opinion of the court and refused to acknowledge Hunger Magnum's balloting of the WI owners under the 1979 OA as legitimate, and instead of respecting the votes of the WI owners, Read & Stevens continued spudding, without well proposals under the 1979 OA, and setting casing for each of their wells in parts of the Subject Lands directly subject to the 1970 OA, specifically in Section 9, Read & Stevens wells being the North Lea 9 Federal 2H (API No. 30-025-4375) (a Third Bone Spring well), and the North Lea 4 Fed Com 2H (API No. 30-025-43504). Cimarex's position is that Read & Stevens spud these wells in trespass under the 1979 OA, and these are the kinds of bad faith antics that Cimarex had to deal with over the years that has consumed an inordinate amount of time and resources, which does not constitute just sitting on the acreage, as erroneously claimed by Permian Resources. Cimarex attempted to reach out to Read & Stevens to find a resolution in the dispute over the 1979 OA, but no resolution or agreement ever materialized.
- 31. When Cimarex heard news that Permian Resources became associated with Read & Stevens, Cimarex was encouraged that a resolution could be reached based on interactions with

5. Released to Imaging: 8/3/2023 7:26:44 AM 9.

1 fifty, everybody on at a hundred percent in the 2 section anymore, so -- especially up in this area. So it's pretty -- it's pretty hairy. 3 MR. SAVAGE: And you have been -- how 4 5 have you been working with the other major players? 6 Have you been working well with them? 7 MR. COFFMAN: Yeah. I think there's a lot of smaller individual owners; you know, 8 9 medium-sized companies; and the larger companies that 10 we've been working with that are pretty open to negotiations and moving forward with a reasonable plan 11 12 of development. 13 I think trying to work with Read & 14 Stevens has been the hardest in this area, you know, 15 in the last years that I've been working on this. 16 it's -- I would say that Read & Stevens was extremely 17 difficult to work with. But I'd say Permian Resources has been 18 19 much more responsive, but nothing has come out of the 20 meetings that we've had on a -- you know, a trade 21 situation or anything like that. 22 So we -- I'd say that for these four sections, we've tried to operate within, you know, a 23 24 proven operator -- how a proven operator would. 25 think it's just been a difficult road to -- trying to Page 30

> Veritext Legal Solutions Calendar-nm@veritext.com 505-243-5691

1 get something resolved and get this acreage drilled. 2 MR. SAVAGE: It looks like in some of 3 Permian Resources' exhibits that they give a history 4 of Read & Stevens prior to Permian Resources being 5 involved. 6 How has that history been with Cimarex? 7 Has there been obstacles? Or has it been smooth? No. There's -- there was 8 MR. COFFMAN: 9 a highly contentious operatorship battle that went 10 over on the majority of these plans covered the south half of Sections 4 and 5 and all of Sections 8 and 9. 11 12 They're under a 1979 operating agreement. 13 We went to court on that with Read & 14 Stevens, and the court said that there was a lack of 15 operatorship vote. So we had sent out our elections 16 for operatorship to the parties under that operating 17 agreement. 18 And we received the majority of support. And we sent a letter to Read & Stevens 19 20 showing that, and they ignored it and refuted it. 21 And then, I think a couple years ago, 22 they had apartments that were about to expire. 23 they -- without proposing wells to anyone under that 24 operating agreement -- spud and set surface casing on three wells in Section 9. 25

1 So that's also an obstacle we've been 2 trying to deal with, is how do we develop when -- how 3 do we develop as a prudent operator within an area where people are spudding wells out of one mile in the 4 5 middle of the section? 6 MR. SAVAGE: Okay. And one of the 7 seven factors that the Division considers in their evaluation of competing applications is good faith 8 9 negotiations. Do you think that this plays -- these 10 interactions with Read & Stevens plays a role in that 11 evaluation? 12 MR. COFFMAN: Yes, sir. 13 MR. SAVAGE: Okay. Could you elaborate on that a little bit? 14 15 MR. COFFMAN: Yeah. I think -- like I 16 said, I think the original Read & stevens discussions 17 we've had with them -- I mean, we tried to get in 18 front of them and, you know, offered to go to New 19 Mexico to Roswell to meet with them. 20 And then, you know -- oh, they were in 21 Fort Worth that weekend or that week. So we offered 22 to go to Fort Worth; and it -- you know, the plans 23 just never matched up. 24 And it was just tough to get ahold of 25 or at least, you know, in some sort of discussion with Page 32

1	them, you know, on getting this acreage developed.
2	But I would say, Permian, they are much
3	more responsive. You know, I've talked with Travis.
4	I think we've had shoot four, five meetings; you
5	know, discussions about, you know, just how do we move
6	forward.
7	I don't think, from the Permian side,
8	that it's been nearly as contentious. But we just
9	haven't been able to come to a, you know, trade or
10	deal. And that's virtual connectivity error
11	from our side.
12	MR. SAVAGE: Okay. And in Mr. Macha's
13	[ph] Exhibit C5 and testimony, he seems to claim that
14	there is acreage that supports Permian Resources'
15	development plan. But I don't see any acreage
16	percentages listed; do you?
17	MR. COFFMAN: No. Not in C5. No.
18	MR. SAVAGE: Okay. And I guess part of
19	that larger package of 44 pages plus pages, there
20	may be some exhibits in there that address.
21	But can you talk about the kind of
22	working interest support? In rebutting Mr. Macha's
23	[ph] claims, can you describe the kind of working
24	interest support that Cimarex has garnered?
25	MR. COFFMAN: Yeah. I would say for
	Page 33

1	MR. RANKIN: I think so. I think so.
2	I mean, I'll reserve my response, I guess, you know,
3	about their ability to file additional exhibits or
4	have additional testimony on our rebuttal.
5	But I just wanted to make sure I
6	understood that they're putting forth their rebuttal
7	towards our direct testimony today, as well. That's
8	all. I appreciate the clarification.
9	MR. ZIMSKY: Yes. That's correct.
10	MS. ORTH: Thank you.
11	MR. RANKIN: Yeah. Thank you, Madam
12	Hearing Officer.
13	Good morning, Mr. Coffman.
14	MR. COFFMAN: Good morning.
15	MR. SAVAGE: So I'm going to do my best
16	to keep myself organized here. I'm going to try to
17	focus on one of the exhibit packets. I know that your
18	testimony is generally the same, but there is some
19	variation. And I think, as I understand, really the
20	only testimony that caries between the exhibit packets
21	is yours; is that correct?
22	MR. COFFMAN: I'd have to I'll take
23	your word for it. There's a lot of hearing packets.
24	MR. RANKIN: there are a lot of hearing
25	packets. Okay. Well, we'll figure that out, I guess,
	Page 42

1 as we go forward. 2 Now I'm going to start off with the 3 first hearing packet, Hearing Packet number 1; which, as I understand, addresses the Mighty Pheasant Bone 4 5 Spring cases; is that correct? 6 MR. COFFMAN: That's correct. 7 MR. RANKIN: Okay. And I'm going to 8 ask -- I'm going to direct your attention first to 9 Paragraph 29 of your statement. 10 MR. COFFMAN: Okay. 11 MR. RANKIN: And this goes to the 12 discussion around the relationship between Read & 13 Stevens and Cimarex. And you discussed this to some extent in your rebuttal, in your dialogue with Mr. 14 15 Savage. 16 And I understood you to essentially 17 distinguish between the time in which -- the time 18 before Read & Stevens acquired -- sorry -- the time 19 before Permian Resources acquired Read & Stevens's 20 interests as to the status of your relationship or 21 ability to communicate with Read & Stevens. 22 In other words: prior to Permian 23 Resources acquiring Read & Stevens's interests, that 24 relationship was difficult; is that fair to say? 25 MR. COFFMAN: Yes. I'd agree with Page 43

Veritext Legal Solutions
Calendar-nm@veritext.com 505-243-5691

1	that.
2	MR. RANKIN: But after Permian
3	Resources acquired it, it was a cordial relationship.
4	And you were able to have good communications, but you
5	just weren't able to reach agreement; is that fair to
6	say?
7	MR. COFFMAN: Yeah. I agree with that.
8	MR. RANKIN: So the issue that you're
9	raising about whether or not whether, you know,
10	Read & Stevens's behavior towards Cimarex should
11	implicate good faith negotiations was all behavior
12	that occurred prior to Permian Resources' acquisition
13	of Read & Stevens; is that correct?
14	MR. COFFMAN: That's correct.
15	MR. RANKIN: And in fact, the specific
16	issues that you raised that you suggested
17	reflected, you know, negatively on good faith
18	efforts involved activities outside of the four
19	sections at issue in these cases; correct?
20	MR. COFFMAN: Outside of the four
21	sections?
22	MR. RANKIN: Is that true or not?
23	MR. COFFMAN: Could you repeat it one
24	more time for me?
25	MR. RANKIN: Yeah. Did the activity
	Page 44

1	that involved Read & Stevens, were they outside of the
2	four sections at issue in these cases? Or were they
3	involving some of the acreage here?
4	MR. COFFMAN: It was solely this
5	acreage here.
6	MR. RANKIN: Now okay. Now, I'm on
7	that paragraph that I directed your attention to,
8	Paragraph 29 in your statement. This is where, I
9	believe, you start referencing that 1979 operating
10	agreement.
11	That 1979 operating agreement covers,
12	as I understand, the south half of Sections 4 and 5
13	and all of Sections 8 and 9; correct?
14	MR. COFFMAN: That's correct.
15	MR. RANKIN: And I'm just going to
16	refer to it as you do here, which is I'm just going
17	to call it the "1979 OA"; okay?
18	Now that includes essentially
19	everything at issue in these contested cases except
20	for the north half of Sections 4 and 5; correct?
21	MR. COFFMAN: That's correct.
22	MR. RANKIN: Now Cimarex has contended
23	that it's the operator under that OA; right?
24	MR. COFFMAN: Yes.
25	MR. RANKIN: But it doesn't include all
	Page 45

1	the acres at issue in these contested cases?
2	MR. COFFMAN: That's correct.
3	MR. RANKIN: And as a consequence, you
4	have provided in your exhibit packet a copy of for
5	both sets of cases, the Mighty Pheasant and the Loosey
6	Goosey the front pages of a proposed joint
7	operating agreement that would cover this acreage
8	entirely; correct?
9	MR. COFFMAN: That's correct.
10	MR. RANKIN: And just so I'm clear, the
11	reason that you've done so and the reason you proposed
12	a JOA that would cover all the acreage is because that
13	1979 operating agreement addresses only the
14	development of that contract area, being the south
15	half of Sections 4 and 5 and all of Sections 8 and 9,
16	but excludes the north half of Sections 4 and 5;
17	correct?
18	MR. COFFMAN: That's correct.
19	MR. RANKIN: So there's currently no
20	agreement among all the working interest owners to
21	combine their interests in Sections 4 and 9 for the
22	Loosey Goosey or Sections 5 and 8 for the Mighty
23	Pheasant; correct?
24	MR. COFFMAN: I would say that the 1979
25	OA is still in effect. So for the north half of 4 and
	Page 46

1	5, I would agree that there is not an operating
2	agreement that covers 4 and 9 and 5 and 8.
3	MR. RANKIN: But Mr. Coffman, you
4	didn't just propose an operating agreement that only
5	covers the north half of those tracts.
6	You proposed an operating agreement
7	that's going to supersede and cover the entire
8	acreage; correct?
9	MR. COFFMAN: That's correct.
10	MR. RANKIN: And the reason you're
11	doing that is because your operators don't currently
12	have an agreement in place to combine their interests
13	for the entire acreage; correct?
14	MR. COFFMAN: That's correct.
15	MR. RANKIN: And the only way to do
16	that is to propose a new JOA that covers all the
17	acreage; fair to say?
18	MR. COFFMAN: That's correct.
19	MR. RANKIN: Thank you. Now I'm going
20	to come back to the JOA, but I just wanted to touch on
21	that as a framework for our discussions.
22	Now in the original exhibits you filed
23	when this case was originally going to go to hearing
24	in July, at the end of each of the individual spacing
25	unit working interest breakdowns for each case, you
	Page 47

1	upper here, upper Wolfcamp. But I guess my question,
2	too, is then: Under option two, does Cimarex have any
3	plans to develop lower benches in the Wolfcamp?
4	MR. COFFMAN: I'd have to rely on Staci
5	and Eddie for future developments.
6	MR. RANKIN: Has Cimarex drilled any
7	lower Wolfcamp benches in the area of interest that
8	Mr. Behm has put together?
9	MR. COFFMAN: Area of interest being
10	Lea County?
11	MR. RANKIN: Well, Mr I guess I'm
12	going to, you know, defer to you on that. Whatever
13	Mr. Behm's area of interest is, you know, that he
14	refers to in his study.
15	MR. COFFMAN: Yeah. I that would be
16	a question for Eddie.
17	MR. RANKIN: Okay. But as you sit here
18	today, are you aware of any lower Wolfcamp wells that
19	have been drilled Cimarex?
20	MR. COFFMAN: Lower Wolfcamp, no.
21	MR. RANKIN: Mr. Behm, at the outset

1	when you were testifying under questioning from Mr.
2	Savage, you talked about a Read & Stevens well that
3	they had drilled in Section 9 in an acreage under
4	contract acreage that at the time, I think, Cimarex
5	contested as Cimarex being the operator. Do you
6	recall that testimony?
7	MR. COFFMAN: Yes.
8	MR. RANKIN: And you used that as a
9	basis to suggest that at the time, prior to Permian's
10	acquisition of Read & Stevens, that maybe Read &
11	Stevens, you know, didn't operate under in good
12	faith manner; fair?
13	MR. COFFMAN: Correct.
14	MR. RANKIN: But subsequent to Read
15	rather, Permian Resources' acquisition of Read &
16	Stevens, isn't it true that Read & Stevens went ahead
17	and plugged any of those wells that Read & Stevens had
18	drilled?
19	MR. COFFMAN: Could you repeat that?
20	MR. RANKIN: Isn't it true that Read &
21	Stevens I'm sorry that Permian went ahead and

1	plugged those wells that you referred to that Read &
2	Stevens had drilled?
3	MR. COFFMAN: That may be true. We
4	never received proposals on them. And
5	MR. RANKIN: Okay. But you don't know
6	that? Okay. That's fine.
7	I think at this time, Madam Hearing
8	Officer, I have no further questions for Mr. Behm.
9	I'm sorry. Mr. Coffman. Sorry.
10	MS. ORTH: Thank you, Mr. Rankin.
11	Mr. Savage, do you have any redirect?
12	Oh, wait. Hold on one minute.
13	I'm going to pause for a moment in the
14	event any counsel who has entered an appearance on
15	behalf of another part in this matter Mr. Bruce,
16	for example, or Mr. Jones has a question of Mr.
17	Coffman. I'll just pause.
18	No? I hear nothing. Oh. There. I
19	see somebody.
20	Mr. Jones?
21	MR. JONES: Yeah. Pardon me. Good

1	afternoon, Madam Hearing Examiner.
2	I just wanted to state my appearance
3	for the record. I was having some technical
4	difficulties as we got started this morning and didn't
5	want to interrupt.
6	But Blake Jones with Steptoe & Johnson
7	on behalf of Northern Oil and Gas. No questions,
8	though. Thank you.
9	MS. ORTH: Thank you very much. All
10	right.
11	Mr. Savage, if you have redirect for
12	Mr. Coffman, this would be a good time.
13	MR. SAVAGE: Thank you, Madam Hearing
14	Examiner.
15	Mr. Coffman, you mentioned and Mr.
16	Rankin asked some questions about your history with
17	Read & Stevens and pointed out that things may have
18	changed with Permian Resources.
19	But that is still a history of
20	negotiations and interactions with Read & Stevens in
21	the past that has brought us to this point of a

1	contested hearing; is that correct?
2	MR. COFFMAN: Yes. That's correct.
3	MR. SAVAGE: And when a company like
4	Permian Resources acquires a company like Read &
5	Stevens, they acquire the good stuff along with the
6	bad stuff; is that correct?
7	MR. COFFMAN: That is correct.
8	MR. SAVAGE: So do you agree, then,
9	that there's a certain amount of accountability for
10	those past negotiations and that past behavior that
11	has come to fruition in the present?
12	MR. COFFMAN: Yeah. I'd say so.
12 13	MR. COFFMAN: Yeah. I'd say so. MR. SAVAGE: Okay. Mr. Rankin asked a
	-
13	MR. SAVAGE: Okay. Mr. Rankin asked a
13 14	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating
13 14 15	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating agreement. And if you have an operating agreement in
13 14 15 16	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating agreement. And if you have an operating agreement in place that covers parts of the subject land and then
13 14 15 16 17	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating agreement. And if you have an operating agreement in place that covers parts of the subject land and then you have a proposing new operating agreement for
13 14 15 16 17	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating agreement. And if you have an operating agreement in place that covers parts of the subject land and then you have a proposing new operating agreement for owners that would incorporate other parts that were
13 14 15 16 17 18	MR. SAVAGE: Okay. Mr. Rankin asked a number of questions about the 1979 operating agreement. And if you have an operating agreement in place that covers parts of the subject land and then you have a proposing new operating agreement for owners that would incorporate other parts that were not covered, is it true that the former operating

Case Nos. 23448-23451

SELF-AFFIRMED STATEMENT OF NOTICE

STATE OF NEW MEXICO)	
)	SS.
COUNTY OF SANTA FE)	

- I, Darin C. Savage, attorney and authorized representative of Cimarex Energy Co. ("Cimarex"), the Applicant herein, being first duly sworn, upon oath, states the following:
- 1. Notice of the applications and hearing in the above-reference cases was timely sent by certified mail, return receipt requested, through the United States Postal Service on March 15, 2023, to all uncommitted interest owners sought to be pooled in this proceeding. See Exhibit D-2, attached hereto. Copies of notice letters and evidence of mailing to parties are attached hereto as Exhibits D-1 and D-2.
- 2. Notice was sent to the Hobbs News-Sun, a newspaper of general circulation in Lea County, New Mexico, and timely published in said newspaper on March 17, 2023. See Exhibit D-3.
- It is my understanding that Cimarex has made a reasonably diligent effort to find
 the names and addresses for the interest owners entitled to receive notice of the application and
 case herein.

Re: Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

Mighty Pheasant 5-8 Fed Com 204H Well (Case No. 23448) Mighty Pheasant 5-8 Fed Com 304H Well (Case No. 23448)

Case No. 23448:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23448, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units within the interval of the Bone Spring formation, as described in the application.

In Case No. 23448, Cimarex seeks to establish a standard 320.09-acre, more or less, horizontal spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, in Township 20 South, Range 34 East, Lea County, NMPM, New Mexico, pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. The unit will be dedicated to the above-referenced wells.

A hearing has been requested before a Division Examiner on April 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact John Coffman at (432) 571-7883 or at john.coffman@coterra.com.

Sincerely,

Darin C. Savage

Released to Imaging: 8/3/2023 7:26:44 AM Released to Imaging: 9/19/2025 8:24:05 AM However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact John Coffman at (432) 571-7883 or at john.coffman@coterra.com.

Sincerely,

Darin C. Savage

For the Pursuit of Energy

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

Mighty Pheasant 5-8 Fed Com 303H Well (Case No. 23451)

Case No. 23451:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23451, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units within the interval of the Bone Spring formation, as described in the application.

In Case No. 23451, Cimarex seeks to establish a standard 320.06-acre, more or less, horizontal spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. The unit will be dedicated to the above-referenced well.

A hearing has been requested before a Division Examiner on April 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505.

COUNTY OF SANTA FE)	

- I, Darin C. Savage, attorney and authorized representative of Cimarex Energy Co. ("Cimarex"), the Applicant herein, being first duly sworn, upon oath, states the following:
- 1. Notice of the applications and hearing in the above-reference cases was timely sent by certified mail, return receipt requested, through the United States Postal Service on March 15, 2023, to all uncommitted interest owners sought to be pooled in this proceeding. *See* Exhibit D-2, attached hereto. Copies of notice letters and evidence of mailing to parties are attached hereto as Exhibits D-1 and D-2.
- 2. Notice was sent to the Hobbs News-Sun, a newspaper of general circulation in Lea County, New Mexico, and timely published in said newspaper on March 17, 2023. *See* Exhibit D-3.

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

<u>Loosey Goosey 4-9 Fed Com 204H Well</u> (Case No. 23452) <u>Loosey Goosey 4-9 Fed Com 304H Well</u> (Case No. 23452)

Case No. 23452:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23452, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units within the interval of the Bone Spring formation, as described in the application.

In Case No. 23452, Cimarex seeks to establish a standard 320.89-acre, more or less, horizontal spacing and proration unit comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. The unit will be dedicated to the above-referenced wells.

A hearing has been requested before a Division Examiner on April 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact John Coffman at (432) 571-7883 or at john.coffman@coterra.com.

Sincerely,

Darin C. Savage

Attorney for Cimarex Energy Co.

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

Loosey Goosey 4-9 Fed Com 301H Well (Case No. 23453)

Case No. 23453:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23453, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units within the interval of the Bone Spring formation, as described in the application.

In Case No. 23453, Cimarex seeks to establish a standard 320.21-acre, more or less, horizontal spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, pooling all uncommitted mineral interests from a depth of 9,373 feet (top of first Bone Spring) in the Quail Ridge; Bone Spring formation [Pool Code 50460], to a depth of 10,845 feet, that being the base of said Bone Spring, designated as an oil pool, underlying the unit. The unit will be dedicated to the above-referenced well.

A hearing has been requested before a Division Examiner on April 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact John Coffman at (432) 571-7883 or at john.coffman@coterra.com.

Sincerely,

Darin C. Savage

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

Mighty Pheasant 5-8 Fed Com 301H Well (Case No. 23594)

Case No. 23594:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23594, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of all uncommitted interests in the Wolfcamp formation, designated as an oil pool, as described in the application.

In Case No. 23594, Cimarex seeks to establish a standard 320.01-acre, more or less, spacing and proration unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. The unit will be dedicated to the above-referenced well.

A hearing has been requested before a Division Examiner on July 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

Released to Imaging: 8/3/2023 10:40:47 AM

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact John Coffman at (432) 571-7883 or at john.coffman@coterra.com.

Sincerely,

Darin C. Savage

Attorney for Cimarex Energy Co.

Application of Cimarex Energy Co., for a horizontal spacing unit and

compulsory pooling, Lea County, New Mexico

Mighty Pheasant 5-8 Fed Com 303H Well (Case No. 23596)

Case No. 23596:

Re:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co. ("Cimarex") has filed the enclosed application, Case No. 23596, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of all uncommitted interests in the Wolfcamp formation, designated as an oil pool, as described in the application.

In Case No. 23596, Cimarex seeks to create a standard 320.06-acre, more or less, spacing and proration unit comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. The unit will be dedicated to the above-referenced well.

A hearing has been requested before a Division Examiner on July 6, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. SELF-AFFIRMED STATEMENT OF NOTICE

- I, Darin C. Savage, attorney and authorized representative of Cimarex Energy Co. ("Cimarex"), the Applicant herein, state and affirm the following:
- 1. Notice of the applications and hearing in the above-referenced case was timely sent by certified mail, return receipt requested, through the United States Postal Service on June 7, 2024, to working interest owners in the Bone Spring and Wolfcamp formations in the lands which will be subject to the creation of a new Quail Ridge; Wolfbone Pool in this proceeding. See Exhibit J-2, attached hereto. Copies of notice letters and evidence of mailing to parties are attached hereto as Exhibits J-1 and J-2.
- 2. Notice was sent to the Hobbs News-Sun, a newspaper of general circulation in Lea County, New Mexico, and timely published in said newspaper on June 14, 2023. See Exhibit J-3.
- 3. Notice of the applications and hearing in the above-referenced case was timely sent by certified mail, return receipt requested, through the United States Postal Service on July 23, 2024, to Operators of units in the Bone Spring and Wolfcamp formations within a one-mile radius of the subject lands, pursuant to 19.15.4.12(A)(4)(b)(ii) NMAC. See Exhibit J-4.
- 4. As a courtesy, notice of the applications and hearing in the above-referenced case was timely sent by certified mail, return receipt requested, through the United States Postal Service

on July 24, 2024, to working interest owners in the Bone Spring and Wolfcamp formations within a one-mile radius of the subject lands. See Exhibit J-5

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Cimarex Energy Co. for the Creation of a Special Pool, a Wolfbone Pool, pursuant to Order No. R-23089 and to reopen Case Nos. 23448 – 23455, 23594 – 23601, and 23508 – 23523, Lea County, New

Mexico

Case No. 24541:

Dear Interest Owners:

This letter is to advise you that Cimarex Energy Co., ("Cimarex"), has filed the enclosed application, Case No. 24541, with the New Mexico Oil Conservation Division ("Division") for the Creation of a Special Pool, a Wolfbone Pool, covering all of Sections 4, 5, 8 and 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico ("Subject Lands").

In Case No. 24541, Cimarex seeks an order for the creation of a special Wolfbone Pool, an oil pool, to be designated as the "Quail Ridge; Wolfbone Pool." The vertical extent of the Wolfbone pool would encompass both the Third Bone Spring and Upper Wolfcamp formations as referenced in Cimarex's Pooling Applications filed in Case Nos. 23448-23455 and 23594-23601. The purpose of filing and hearing Case No. 24541 is to reopen Case Nos. 23448-23455, 23594 – 23601 and 23508 - 23525 ("Related Cases") as provided for by OCD Order No. R-23089. The Related Cases were the focus of a contested hearing for purposes of granting operatorship of units in the Subject Lands. This Case No. 24541 should provide the means for initiating further consideration of operatorship as the proposal for the creation of a special pool is reviewed.

EXHIBIT 363

Cimarex's Application for a Wolfbone Pool was filed within the timeline for the Division's June 2024 docket, but because of the case being contested, the Division scheduled a contested hearing for August 13, 2024. The status of the hearing, including any status conferences prior to the hearing date, can be monitored through the Division's website. Division hearings will commence at 8:30 a.m., in the Wendell Chino Building, Pecos Hall located on the 1st Floor, at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. If so desired, you can attend the hearing in person at Pecos Hall or you can attend virtually through remote online access. For information about attending by remote access and reviewing the status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. Mountain Time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Bella Sikes at (432) 620-1639 or at Bella.Sikes@coterra.com.

Sincerely,

Darin C. Savage

Attorney for Cimarex Energy Co.

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED

TO: OPERATORS OF UNITS WITHIN A ONE-MILE RADIUS OF A PROPOSED SPECIAL WOLFBONE POOL PURSUANT TO 19.15.4.12(A)(4)(b)(ii) NMAC

Re: Application of Cimarex Energy Co. for the Creation of a Special Pool, a Wolfbone Pool, pursuant to Order No. R-23089 and to reopen Case Nos. 23448 – 23455, 23594 – 23601, and 23508 – 23523, Lea County, New

Mexico

Case No. 24541:

Dear Operators:

This letter is to advise you that Cimarex Energy Co., ("Cimarex"), has filed the enclosed application, Case No. 24541, with the New Mexico Oil Conservation Division ("Division") for the Creation of a Special Pool, a Wolfbone Pool, covering all of Sections 4, 5, 8 and 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico ("Subject Lands").

In Case No. 24541, Cimarex seeks an order for the creation of a special Wolfbone Pool, an oil pool, to be designated as the "Quail Ridge; Wolfbone Pool." The vertical extent of the Wolfbone pool would encompass both the Third Bone Spring and Upper Wolfcamp formations as referenced in Cimarex's Pooling Applications filed in Case Nos. 23448-23455 and 23594-23601.

You are being notified of this Application, pursuant to 19.15.4.12(A)(4)(b)(ii) NMAC, as an operator within the same formation as the special pool within a one-mile radius of the boundary of the pool (or notified as a courtesy if you are listed as an owner not part of a unit within said radius) and are not required to attend this hearing, but if you believe you

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Cimarex's Application for a Wolfbone Pool is scheduled for a contested hearing on August 13, 2024. The status of the hearing, including any status conferences prior to the hearing date, can be monitored through the Division's website. Division hearings will commence at 8:30 a.m., in the Wendell Chino Building, Pecos Hall located on the 1st Floor, at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. If so desired, you can attend the hearing in person at Pecos Hall or you can attend virtually through remote online access. For information about attending by remote access and reviewing the status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. Mountain Time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; nature of any protests; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Bella Sikes at (432) 620-1639 or at Bella.Sikes@coterra.com.

Sincerely,

Darin C. Savage

Attorney for Cimarex Energy Co.

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED

TO: OPERATORS OF UNITS WITHIN A ONE-MILE RADIUS OF A PROPOSED SPECIAL WOLFBONE POOL PURSUANT TO 19.15.4.12(A)(4)(b)(ii) NMAC

Re: Application of Cimarex Energy Co. for the Creation of a Special Pool, a Wolfbone Pool, pursuant to Order No. R-23089 and to reopen Case Nos. 23448 – 23455, 23594 – 23601, and 23508 – 23523, Lea County, New

Mexico

Case No. 24541:

Dear Operators:

This letter is to advise you that Cimarex Energy Co., ("Cimarex"), has filed the enclosed application, Case No. 24541, with the New Mexico Oil Conservation Division ("Division") for the Creation of a Special Pool, a Wolfbone Pool, covering all of Sections 4, 5, 8 and 9, in Township 20 South, Range 34 East, NMPM, Lea County, New Mexico ("Subject Lands").

In Case No. 24541, Cimarex seeks an order for the creation of a special Wolfbone Pool, an oil pool, to be designated as the "Quail Ridge; Wolfbone Pool." The vertical extent of the Wolfbone pool would encompass both the Third Bone Spring and Upper Wolfcamp formations as referenced in Cimarex's Pooling Applications filed in Case Nos. 23448-23455 and 23594-23601.

You are being notified of this Application, pursuant to 19.15.4.12(A)(4)(b)(ii) NMAC, as an operator within the same formation as the special pool within a one-mile radius of the boundary of the pool (or notified as a courtesy if you are listed as an owner not part of a unit within said radius) and are not required to attend this hearing, but if you believe you

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Cimarex's Application for a Wolfbone Pool is scheduled for a contested hearing on August 13, 2024. The status of the hearing, including any status conferences prior to the hearing date, can be monitored through the Division's website. Division hearings will commence at 8:30 a.m., in the Wendell Chino Building, Pecos Hall located on the 1st Floor, at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. If so desired, you can attend the hearing in person at Pecos Hall or you can attend virtually through remote online access. For information about attending by remote access and reviewing the status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. Mountain Time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; nature of any protests; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Bella Sikes at (432) 620-1639 or at Bella.Sikes@coterra.com.

Sincerely,

Darin C. Savage

Attorney for Cimarex Energy Co.
