### Water Use

As there are no planned development projects in the GCU for 2026, there is no planned water use.

**Water Disposal:** See table below.

**SWD WELLS (WIW)**

GALLEGOS CANYON UNIT 307	3004524248	NWSW SEC 30-T29N-R12W	GCU 307 disposed 43,506 bbls in 2025. Water is piped and trucked to location. Average daily volume is 119 bbls/day.
GALLEGOS CANYON UNIT 328	3004524735	SESW SEC 33-T29N-R12W	GCU 328 disposed 7797 bbls in 2025. All water is trucked to location, except for the GCU 303 (which is piped). Average daily volume is 119 bbls/day (when not shut in). This well was shut in most of the year due to mechanical issues.

**SUMMARY OF PLANNED YEAR OPERATIONS AND OTHER INFORMATION:**

**GCU Development Potential**

SIMCOE has several improved recovery and reserves growth possibilities in GCU. There is infill development potential in the Fruitland Coal for improved recovery purposes, which could be done by drilling new wells, recompleting current Dakota or Pictured Cliffs wells, or both. There is potential for horizontal well development of the Dakota reservoir. The Mancos and Gallup reservoirs in the Unit have black oil potential like what other operators have drilled in the Lybrook area to the southeast of GCU, where over 180 horizontal Mancos wells have been drilled to date in the Mancos black oil window. In the current oil and gas price environment, such development in GCU is not economic but could be pursued by SIMCOE in the future should product prices improve from their current levels. It is therefore not in our current Plan of Development to pursue these opportunities. We will, however, continue to conduct internal geologic and reservoir studies to assess the opportunities with a view toward bringing them to life when product prices support the investment.

**Shut-In Wells**

As mentioned in the Previous Year Operations above, SIMCOE P&A'd the GCU #275 well and TA'd the GCU #303, GCU #504, and GCU #537 wells. These were listed as Shut-In in last year's POD. There remains 6 wells in Shut-In status, those being: GCU #145, GCU #219, GCU #208E, GCU #153E, GCU #197E, and GCU COM D #160E. These wells produce from the Dakota formation. SIMCOE will continue to evaluate these wells for Mancos/Gallup Potential or possible return to production.

## STATUS OF WELLS –“Unit” Wells

PROD = PRODUCING, SI = SHUT IN, TA ZONE = TEMPORARILY ABANDONED ZONE. Note that P&A wells are excluded from this list. This list includes only those wells where at least one formation is located in and reports to a GCU Participating Area.
