Large Exhibits

The figure is a detailed geological map of the Gulf of Mexico region. It shows the coastline of the United States from Texas to Florida, and the northern coast of Mexico. The map is divided into sections by latitude and longitude lines. Various geological features are labeled, including wells, faults, and state boundaries. The map includes labels for states like Texas, Louisiana, Mississippi, Alabama, Georgia, and Florida. It also shows major cities, rivers, and the Gulf of Mexico coastline. The map is divided into sections by latitude and longitude lines.
