13  
14 DIRECT EXAMINATION

15 BY MR. COOLEY:

16 Q Would you state your name for the record, please?

17 A Albert R. Greer.

18 Q Where do you reside, Mr. Greer?

19 A Farmington.

20 Q What connection do you have with the applicant,  
21 Benson-Montin-Greer Drilling Corporation?

22 A President and Petroleum Engineer.

23 Q Has Benson-Montin-Greer Drilling Corporation as an  
24 operator drilled two gas wells in Section 30 of Township 32  
25 North, Range 13 West, San Juan County, New Mexico?

 Phone (505) 982-9212

1 A. Yes, sir.

2 Q. To what formations were those wells drilled?

3 A. To the Dakota.

4 Q. Would you briefly summarize the well data with  
 5 respect to the La Plata 1 and 2 Wells in Section 30?

6 A. Yes, sir, the No. 1 Well is drilled in the southwest  
 7 quarter at Location K. The No. 2 Well is drilled in location  
 8 F in the northwest quarter. The No. 1 Well had an initial  
 9 potential of about three hundred and fifty thousand cubic feet  
 10 a day and the No. 2 Well potentialed approximately six hundred  
 11 thousand cubic feet a day. They are rather small wells.

12 Q. And these are located within the defined boundaries  
 13 of the Ute Dome-Dakota Gas Pool, is that correct?

14 A. Yes, sir.

15 Q. Which pool rules provide for a hundred-and-sixty-acre  
 16 spacing?

17 A. Yes, sir.

18 Q. Is Section 30 of 29, 13 a standard six-hundred-and-  
 19 forty-acre governmental section?

20 A. No, sir.

21 Q. How does it vary from that?

22 A. The west side of the section is short so that there  
 23 is approximately two-hundred-and-fifty acres in the north  
 24 half and approximately two-hundred-and-fifty in the south half.

25 Q. Have you familiarized yourself with the reservoir

1 characteristics and the producing characteristics of the  
2 Ute Dome-Dakota Field?

3 A. Yes, sir.

4 Q. Do you have an opinion as to whether the two wells  
5 which you mentioned are capable of effectively, economically  
6 and efficiently draining the proposed proration units to be  
7 assigned to them?

8 A. Yes, sir.

9 Q. What is that opinion?

10 A. My opinion is that they will effectively and  
11 efficiently drain the gas under their tracts which, unfortunately,  
12 I think is not very much.

13 Q. That is just exactly what I was coming to. Did the  
14 performance of these wells discourage you from drilling any  
15 additional wells in this area?

16 A. Well, yes.

17 Q. Do you feel that the wells you have drilled will  
18 efficiently and economically drain the gas that is there  
19 available?

20 A. Yes, sir.

21 Q. Is the Ute Dome-Dakota gas pool a prorated gas  
22 field?

23 A. No, sir.

24 Q. Then we can assume that the oversized units would not  
25 result in any additional production or allowable production

General Court Reporting Service

1 from these wells, it would not affect their allowable  
2 production?

3 A. No, sir, I anticipate both wells to be marginal  
4 wells and we would not ask for an oversized or excess  
5 allowable.

6 Q If it should ever be prorated?

7 A. No, it won't be prorated.

8 Q Will the granting of this application adversely  
9 affect the correlative rights of any offset operator in your  
10 opinion?

11 A. No, sir. The offset lands are Ute Mountain Indian  
12 lands and our wells are drilled on Federal land, it is our  
13 understanding that everybody is satisfied insofar as royalty  
14 interests are concerned.

15 Q Will the approval of this application avoid the  
16 drilling of additional and unnecessary wells in your opinion?

17 A. Yes, sir.

18 Q Have you prepared a plat which shows the two wells  
19 in question and the offset acreage?

20 A. Yes, sir.

21 Q Identified as Exhibit One?

22 A. Yes, sir.

23 MR. COOLEY: We have no further questions of the  
24 witness and offer into evidence Exhibit Number One.

25 MR. NUTTER: Applicant's Exhibit One will be

5 CROSS EXAMINATION

6 BY MR. NUTTER:

7 Q Mr. Greer, on this Exhibit Number One I see two  
8 wells to the west of your wells, over in Section 25, are those  
9 wells completed in the Ute Dome-Dakota Pools?

10 A Yes, sir, those wells were drilled by Amoco. I  
11 believe they are a year or perhaps a year-and-a-half old.

12 Q Where is the main body of the pool with respect  
13 to this exhibit?

14 A To the west.

15 Q Now, how about Section 29 which would be immediately  
16 to the east, are there any Ute Dome-Dakota wells over in that  
17 area?

18 A No, sir. We drilled a well in Section 29, let's  
19 see, in Unit M of 29 and drilled it to the Dakota and plugged  
20 it back to the Mancos and the sand appears to be thinned out  
21 and deteriorated considerably to the east.

22 Q Okay, so if these wells were to be assigned standard  
23 units or approximately standard units, they would require the  
24 dedication of the westernmost eight lots on this exhibit, is  
25 that correct?

1 A. That is correct, four each.

2 Q. And then you would have a long proration unit  
 3 comprising the east half of the east half of the section?

4 A. That is correct.

5 Q. For dedication to a third well in here?

6 A. Right.

7 Q. But the prospects for getting a commercial well over  
 8 on that side of the unit would be negligible?

9 A. I feel that we probably would not get a commercial  
 10 well over there.

11 Q. So the best way to dedicate the acreage is as  
 12 proposed with the two two-hundred-and-fifty-acre units?

13 A. That's our thought.

14 MR. NUTTER: Are there any further questions of  
 15 Mr. Greer? He may be excused.

16 (THEREUPON, the witness was excused.)

17 MR. NUTTER: Do you have anything further, Mr.  
 18 Cooley?

19 MR. COOLEY: Not a thing, Mr. Examiner.

20 MR. NUTTER: Does anyone have anything they wish  
 21 to offer in Case 5710? We will take the case under advise-  
 22 ment.
